3000 DEFENSE PENTAGON
WASHINGTON DC 20301-3000

FOREWORD

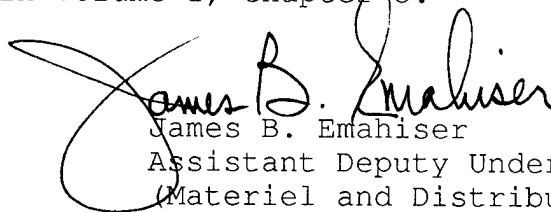

14 FEB 1996

This manual is published by the direction of the Deputy Under Secretary of Defense (Logistics) under the authority of Department of Defense Directive 4140.1, Materiel Management Policy. It consists of five volumes: Volume 1, Concepts and Procedures; Volume 2, Supply; Volume 3, Transportation; Volume 4, Acquisition (Contract Administration); and Volume 7, Finance. Volumes 5 and 6 are reserved pending definition of requirements. The manual provides policy and uniform procedures, and prescribes electronic data interchange standards for conducting DoD logistics business processes implemented under the Defense Logistics Management System. It is the linchpin of logistics systems standardization and modernization both for process and data interchange within the Department and with industry.

The provisions of the manual are effective when published for implementation planning and for system development and upon implementation in the wholesale logistics CIM migratory systems and Services/Agencies retail logistics systems. The provisions apply to the Department of Defense and, by agreement, to external organizations conducting logistics business processes with the Department of Defense. Chapter 1 of each volume identifies specific organizations and circumstances to which the provisions apply. The current Defense Logistics Standard Systems manuals are to be retained and used with the Defense Logistics Standard System (the former MILS systems) pending their complete transition into the DLMS at which time they will be canceled. These manuals and their titles are listed in the Attachment.

Department of Defense activities and activities of external organizations participating in the DLMS who require additional copies of this manual should submit requests through their office responsible for issuing publications. Non-participating activities may obtain copies of this manual from: ATTN: DASC-WDM (Publications), Defense Logistics Agency Administrative Support Center, 8725 John J. Kingman Road, Fort Belvoir, VA 22060-6221.

Recommendations for revisions to this manual are encouraged. Submit all proposed revisions or corrections following the procedures prescribed in Volume 1, chapter 5.

James B. Emahiser

Assistant Deputy Under Secretary
(Materiel and Distribution
Management)

TERMS AND DEFINITIONS

ACCESSORIAL COSTS OR CHARGES. Certain expenses incident to issues, sales, and transfers of material. They are defined to include: packing, handling, and crating costs; transportation costs; port loading and unloading costs; and positioning costs.

FOREIGN MILITARY SALES (FMS). Separate charges added to the standard price of material for each Foreign Military Sales case. The charges cover expenses of packing, handling, crating, transportation, and supply operations associated with preparation and delivery of Foreign Military Sales material.

LAND. Charges by a carrier for rendering service in addition to the linehaul. Such services may include sorting, packing, cooling, heating, switching, delivering, storage, and reconsigning.

OCEAN. Those services for which the ocean carrier is not responsible under the terms of the applicable commercial tariff or Military Sealift Command (MSC) contract rate, but which are required to complete the receipt and delivery of freight between common carriers and consignors or consignees.

ACCOUNTING CLASSIFICATION REFERENCE NUMBER (ACRN). A two-position alphanumeric control code assigned (under DFARS 204.7108) to each accounting classification used in a single contract.

ACCREDITED STANDARDS COMMITTEE (ASC) X12. A group of individuals chartered by American National Standards Institute (ANSI) to develop uniform standards for electronic interchange of business transactions.

ADDRESS MARKING. Applying data, obtained from shipping documents, to a shipment unit. The data identifies the shipment and directs its movement to the ultimate consignee.

ADJUSTMENT REQUEST. Data forwarded to billing offices to request and provide information necessary for adjustment of billings. Adjustment requests also include followups for adjustments for validated discrepancy reports and promised material return program credits.

ADJUSTMENTS, PHYSICAL INVENTORY. The accounting transaction which corrects a book balance to agree with the quantity of the item in storage. Such adjustments may result from (1) physical inventory, (2) a potential discrepancy revealed by a material release denial or location survey/reconciliation, (3) capitalization/decapitalization actions, (4) reidentification of stock, (5) type of pack changes, (6) catalog data changes, (7) supply condition and purpose code changes, etc.

ADMINISTRATIVE COSTS. General overhead expenses and other costs in operating the DoD or General Services Administration logistics systems that are incident to the issue, sale, or transfer of material and are not included in the price of the material or as an accessorial cost.

ADVANCE PAYMENT. Amounts paid for material in advance of performance or delivery of the material. Amounts paid for other purposes in advance of the time the amounts are earned by the payee.

AGREEMENT LINE ITEM NUMBER (ALIN). Identifies an item of supply listed in an agreement document.

AIR CHARTER SERVICE. Air transportation procured from commercial carriers for the exclusive use of one or more aircraft between points in the United States for periods of less than 90 days.

AIRLIFT CLEARANCE AUTHORITY (ACA). A Service activity which controls the movement of cargo (including personal property) into the airlift system.

AIRLIFT SERVICES. The performance or procurement of air transportation and services incident thereto required for the movement of persons, cargo, and mail.

ALLOCATION. Apportioning available transportation capability to users.

AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI). A private, nonprofit coordinator and clearinghouse of national and international standards.

AMERICAN STANDARDS COMMITTEE (ASC) X12 STANDARD. A standard for cross-industry electronic data interchange of business information.

AMMUNITION/EXPLOSIVES. A device charged with explosives, propellants, pyrotechnics, initiating composition, or nuclear, biological, or chemical material for use in connection with defense or offense, including demolitions. Ammunition which can be used for training, ceremonial, or nonoperational purposes is included.

ANTICIPATED NOT MISSION CAPABLE SUPPLY (ANMCS). A condition which is anticipated to occur within 15 days in the continental United States (CONUS) or 20 days outside the continental United States (OCONUS) of the requisition date when the lack of items or equipment required causes mission-essential systems or equipment of being incapable of performing any of their assigned missions.

ARMY or AIR FORCE POST OFFICE (APO). A military post office, numerically designated as a branch of the United States Postal Service (USPS), activated, manned, and operated by the Army or the Air Force to provide postal services to authorized organizations and personnel.

AUTOMATIC DATA PROCESSING (ADP) POINT. The activity which provides ADP services or support to the contract administration office (CAO) or the purchasing office. Usually the field activities of the Defense Contract Management Command (DCMC) (the management area offices and the plant representative offices) receive their ADP support from a central data base.

AUTOMATIC DIGITAL NETWORK (AUTODIN). A computer controlled, electronic, fully secured, high-speed, common user, data communication system, that provides both direct user-to-user, and store-and-forward message switching service for the DoD and other Government agencies on a worldwide basis.

BALANCE WAR RESERVE. The level consisting of the war reserve material requirement less the Pre-Positioned War Reserve (PWR).

BAGGAGE. Includes, but is not limited to, personal clothing; professional equipment; essential dishes, pots, pans, linens, and other light housekeeping items; and other items necessary for the health, welfare, and morale of the member.

ACCOMPANIED BAGGAGE. Baggage which accompanies the passenger while traveling.

HOLD BAGGAGE. Baggage stowed in the hold of a ship.

UNACCOMPANIED BAGGAGE. That portion of a member's authorized weight allowance of personal property which does not accompany the passenger and is normally shipped separately from the bulk of his personal property by expedited transportation.

BASE-LEVEL DEFENSE FUEL SUPPORT POINT (DFSP). Bulk fuel storage facility located within the military base/installation boundaries.

BASELINE. A configuration identification document or set of such documents formally designed by the Government at a specified time during a configuration item's life cycle. Baselines, plus approved changes from those baselines, constitute the current approved configuration identification.

BASIC ISSUE ITEM (BII). Those essential auxiliary items that are required to operate the equipment and to enable it to perform the mission and function for which it was designed or intended.

BATCH SERIAL NUMBER. A consecutive number assigned by the paying office to each batch of contract payment notices. On October 1st, each batch for each accounting point begins with 1. The batch serial number identifies the number of batches transmitted to the specific accounting point since the first day of the fiscal year.

BERTH TERM. Shipments by commercial common carriers operating on established routes at commercial tariff rates. Commercial carriers are normally responsible for loading and unloading cargo. Heavy lifts beyond certain weights are specified in most tariffs as subject to a heavy lift charge in addition to the prescribed freight rate.

BILL. A statement of the dollar amounts owed for the transfer or sale of material and for the performance of services incident to the transfer.

BILL NUMBER. An alpha or numeric identifier assigned by the billing office to identify a bill. The bill number is unique to the billing office and may not be duplicated within a calendar year.

BILL OF LADING (B/L). The acknowledgment of the receipt of goods for movement by the carrier and the contract for the movement.

BILLED OFFICE. Any office designated to receive a bill.

BILLING DISCREPANCY. A discrepancy related to duplicate or multiple billings and/or involving erroneous prices and values. Within U.S. Government channels, all billing discrepancies will be processed under volume 7, Finance.

BILLING ERROR. An error in a bill or detail billing record level which had one or more of the following characteristics: a duplication of a previous bill or detail billing record; an error in the amount; assignment of the wrong billed office; (i.e., billed office designation in a manner which violates volume 7, Finance, requirements); improper billing method (noninterfund versus interfund); or unnecessary billing, (e.g., nonreimbursable issue, canceled requisition or inappropriate accessorial charge).

BLOCK STOWAGE LOADING. A method of loading whereby all cargo for a specific destination is stowed together. The purpose is to facilitate rapid off-loading at the destination, with the least possible disturbance of cargo intended for other points.

BREKABULK POINT. A Transshipping activity to which unitized shipments for various consignees are consigned and from which the shipments are distributed as separate shipment units to the ultimate consignees.

BULK CARGO. Dry or liquid cargo, such as oil, coal, grain, ore, sulfur, or fertilizer which are shipped unpackaged in large quantities.

BULK PETROLEUM PRODUCT. Petroleum product delivered in volumes greater than 55 U.S. gallons such as tank trucks/cars, pipelines, coastal barges, and ocean tankers. Product is stored in tankage having a fill capacity greater than 55 U.S. gallons. (EXCEPTION: Fuel in 500 gallon collapsible drums which are managed/supplied by Defense General Supply Center (DGSC).)

CAPITALIZATION. The receipt or transfer in of inventories from a different fund or fund subdivision without charge or income. The inventory increases the transferee's fund equity (capital) directly and does not increase operational income or expense.

CARGO. Supplies, materials, stores, baggage, or equipment transported by land, water, or air.

CARRIER. Any individual, company, or corporation commercially engaged in transporting cargo or passengers.

CARRIER TARIFF RATES. Rates charged the general public by surface, air, or water carriers engaged in the transportation of property.

CASE DESIGNATOR. A unique code used with a country identification code to identify a particular foreign military sale. It is a three character designation.

CENTRAL ACCOUNTS OFFICE. An office authorized to report interfund disbursement and collection data to the Department of the Treasury. These offices are the General Services Administration Central Office and the following Defense and Accounting Service Centers: Cleveland, Denver, and Indianapolis.

CENTRAL DESIGN ACTIVITY (CDA). An activity that has been assigned standard automated information system development and maintenance responsibilities.

CLASSIFIED ITEMS. See CONTROLLED INVENTORY ITEMS.

CLASSIFIED MATTER. Official information or matter in any form or of any nature which requires protection in the interest of national security.

CLEARANCE AUTHORITY. The activity which controls and monitors the flow of cargo into the airlift or water transportation system. (See also, AIRLIFT CLEARANCE AUTHORITY and OCEAN CARGO CLEARANCE AUTHORITY.)

COMMODITY CATEGORY. Grouping commodities with similar characteristics for purposes of manifesting, billing, cost accounting, contractor payment, and special handling.

COMMON SERVICING. That function performed by one Military Service in support of another Military Service for which reimbursement is not required from the Military Service receiving support.

COMMON-USER WATER TERMINAL. A facility which regularly provides for two or more Services the terminal functions or receipt, transit storage or staging, processing, and loading or unloading of cargo or passengers on ships. It may be a Military Service installation, part of an installation, or a commercial facility operated under contract or arrangement of the Military Traffic Management Command (MTMC).

COMPONENT REGISTRY. The Military Service or Defense Agency system which maintains visibility of all small arms serial numbers within that Component and provides the DoD Registry with small arms status.

CONFIGURATION. The functional and physical characteristics of hardware, firmware, software, or a combination thereof as set forth in technical documentation and achieved in a product.

CONFIGURATION AUDIT. The verification of a configuration item's conformance to specifications, drawings, and other contract requirements.

CONFIGURATION CONTROL. The systematic proposal, justification, evaluation, coordination, approval, or disapproval of proposed changes, and the implementation of all approved changes in the configuration of a configuration item.

CONFIGURATION CONTROL BOARD (CCB). A joint decision-making body that approves and prioritizes or disapproves proposed Defense Logistics Management System (DLMS)¹ changes.

CONFIGURATION CONTROL. A discipline applying technical and administrative direction and surveillance to (1) identify and document the functional and physical characteristics or configuration items; (2) audit of configuration items to verify conformance to specification, interface control documents, and other contract requirements; (3) control changes to configuration items and their related documentation; and (4) record and report information needed to manage configuration items effectively, including the status of proposed changes and the implementation status of approved changes.

CONFIGURATION STATUS ACCOUNTING (CSA). The recording and reporting of information needed to manage configuration effectively, including: (1) a listing of the approved configuration identification; (2) the status of proposed changes, deviations, and waivers to the configuration; (3) the implementation status of approved changes; and (4) the configuration of all units of the configuration item in the operational inventory.

CONSIGNEE. The recipient (unit, depot, or person) to whom cargo is addressed or consigned for final delivery. Activity that is receiving the product.

CONSIGNOR. The person or activity that is the supplier or shipper of a product.

CONSTRUCTED DOCUMENT NUMBER. A document number created and used in place of the original requisition number when the original number cannot be determined. The constructed document number may be employed in reporting selected product quality and supply discrepancies. Under DLMS a constructed document number is identified through the use of a utilization code.

CONSTRUCTIVE DELIVERY. The delivery of material to a commercial carrier, freight forwarder, United States or international post office, or customer at point of production, storage, or test. Delivery is evidenced by completed copies of shipping documents, material shipment status of shipping documents, or a list of deliveries in a post office.

CONTINENTAL UNITED STATES (CONUS). The 48 contiguous states and the District of Columbia, excluding Alaska and Hawaii.

CONTRACT ABSTRACT. A representation, in machine format, of key elements of contractual data that are used to establish the contract record in the recipients data base.

CONTRACT ADMINISTRATION OFFICE (CAO). A DoD Contract Administration Service (CAS) Component which performs assigned functions, or a purchasing office which retains functions related to the administration of contracts. (Included in this definition are all geographic and plant-type organizations engaged in the performance of field contract administration services.)

¹ Applicable to Defense Logistics Standard System (DLSS) only for legacy systems retained during the interim period pending incorporation into a Defense Systems Center's migration system.

CONTRACT LINE ITEM. An item of supply or service on a contractual document usually identified by a contract line item number (CLIN). (See DFARS 204.7103.)

CONTRACT MODIFICATION. Any written alteration in the specifications, delivery point, rate of delivery, contract period, price, quantity, or other contract provision of an existing contract, whether accompanied by unilateral action under a contract provision, or by mutual action of the parties to the contract. It includes: (1) bilateral actions such as supplemental agreements; and, (2) unilateral actions such as change orders, administrative changes, notices of termination, and notices of the exercise of a contract option.

CONTROLLED CARGO. See PROTECTED CARGO.

CONTROLLED INVENTORY ITEMS. Those items designated as having characteristics which require that they be identified, accounted for, secured, segregated, or handled in a special manner to ensure their safeguard or integrity. Controlled inventory item categories in descending order of degree of control normally exercised are:

CLASSIFIED ITEMS. Material which requires protection in the interest of national security.

PILFERABLE ITEMS. Material having a ready resale value or application to personal possession and which is, therefore, especially subject to theft.

SENSITIVE ITEMS. Material which requires a high degree of protection and control due to statutory requirements or regulations, such as narcotics and drug abuse items; precious metals; items which are of a high value, highly technical, or hazardous nature; and small arms, ammunition, explosives, and demolition material.

CONTROL POINT. An activity designated by a Military Service, DLA or the General Services Administration (GSA) to monitor packaging discrepancies for their respective Service/Agency (S/A).

CONVENTIONS OR IMPLEMENTATION CONVENTION (IC). The composite guideline for using the DLMS for a given application. Conventions define the structure and content of a transaction and maps application data requirements into a specific transaction set (TS) for implementation in the DLMS.

COURIER TRANSFER STATION. A collection and control point for carrying on the mission of the Armed Forces Courier Service (AFCS).

CUSTODIAL ACCOUNTABILITY. The responsibility of the Single Manager for Conventional Ammunition (SMCA) to maintain data elements in the wholesale inventory record to reflect by ownership code the receipt, issue, balance, and other quantitative and financial data essential for proper control and management of assets which are in the single manager's custody but are owned by another DoD Component. Custodial accountability includes the responsibility to initiate and approve adjustment actions and financial liability investigation of property loss reports.

CUSTODIAL RESPONSIBILITY. The responsibility of a storage activity, depot, or agent, which is not the designated single manager, to maintain proper custody, care, safekeeping, receipt, issue, and balance data for stored DoD wholesale material.

DAMAGE. Applicable to small parcel shipments only. Injury to (partial or total) or the marring of the appearance or soundness of the structure of property or material.

DANGEROUS CARGO. See HAZARDOUS MATERIAL (DANGEROUS GOODS).

DATA ELEMENT. The smallest, meaningful piece of information in a business transaction. A data element may condense lengthy descriptive information into a short code. Equivalent to a "field" in a paper document, a series of which are used to build a data segment. A data element dictionary that defines the data element and, where appropriate, the code is part of the ANSI ASC X12 standards. (See volume 1, chapter 10, for additional descriptive information.)

DATA SEGMENT. A series of data elements defined and placed in a single group in a specific sequence. A data segment directory, which defines the proper data element sequence for each data segment, is part of the ANSI ASC X12 standards.

DATE PACKED. (Shelf-Life Item). For all items required to be marked with date packed, the date packed will be that date on which the product was packaged in the unit container, regardless of dates of packing, shipping, or additional processing. (See DoD 4140.27-M.)

DECAPITALIZATION. The issue or transfer out of inventories to another fund or fund subdivision without expense or reimbursement. The cost of the inventory decreases the transferor's fund equity (capital) directly and does not increase operational expenses or income.

DEFENSE AUTOMATIC ADDRESSING SYSTEM CENTER (DAASC). The central design activity for the DLMS which executes system modification taskings from Defense Logistics Management Standards Office (DLMSO) after CCB approval.

DEFENSE FUEL AUTOMATED MANAGEMENT SYSTEM (DFAMS). An automated data system with a central data bank which records standard transactions. The DFAMS is designed to: (1) integrate bulk fuel management data (supply transactions, inventory, financial, procurement, requirements, and distribution); (2) incorporate General Accounting Office (GAO) approved accounting principles and standards to ensure proper inventory and financial accounting; and, (3) provide the Defense Fuel Supply Center (DFSC) and other DoD Components with management data required in support of decisions and actions in meeting the fuel needs of the Military Services and Federal Agencies.

DEFENSE FUEL REGION (DFR). A management component of the DFSC with a geographic area of responsibility to monitor DFSC contracts for adequate customer support, control fuel deliveries, perform contract administration functions such as property administration and quality surveillance, provide/coordinate transportation support and emergency planning, and report inventory/supply transactions to the central data bank in the DFAMS.

DEFENSE FUEL SUPPLY CENTER (DFSC). An organizational component of DLA. The DFSC is the integrated material manager (IMM)/DoD central procurement agent for bulk petroleum products and associated services. DFSC owns and manages the bulk petroleum products in the DoD to the point-of-sale (end user).

DEFENSE FUEL SUPPORT POINT (DFSP). A bulk fuel storage facility (or terminal) which receives, stores, and issues DLA-owned product in support of the retail Military Service/Federal Agency requirements. There are two categories of DFSPs: (1) intermediate, and (2) base-level.

DEFENSE TRANSPORTATION SYSTEM (DTS). That portion of the nation's transportation infrastructure that supports DoD transportation needs in peace and war. The DTS consists of those common-user military and commercial assets, services, and systems organic to, contracted by, or controlled by the DoD.

DEFICIENCY REPORT. See DISCREPANCY REPORT.

DEFICIENT MATERIAL. See PRODUCT QUALITY DEFICIENCY.

DEPARTMENT OF DEFENSE CONTRACT ADMINISTRATION SERVICES (CAS) COMPONENT. A DoD office listed in DLA Instruction 4105.4, performing contract administration services.

DEPARTMENT OF DEFENSE COMPONENT. Office of the Secretary of Defense, the Military Services, the Chief, Joint Chiefs of Staff (CJCS) and Joint Staff, the Unified and Specified Commands, the Defense Agencies, and the Defense System Centers (DSCs).

DEPARTMENT OF DEFENSE REGISTRY. The single point of access to the records of all small arms serial numbers (active, inactive, and historical) within DoD.

DETAIL BILLING RECORD. The lowest level of detail in a bill. At this level of the bill, billings for material are identified by the transaction number. When more than one shipment is involved, the partial shipment, identified by a suffix, is the lowest level of detail.

DEVIATION. A specific written authorization, granted prior to the manufacture of an item, to depart from a particular performance or design requirement of a specification, drawing, or other document for a specific period of time. A deviation differs from an engineering change in that an approved engineering change requires corresponding revision of the documentation defining the affected item, whereas a deviation does not contemplate revision of the applicable specification of drawing.

DIRECT PROCUREMENT METHOD (DPM). A method of personal property shipment in which the government manages the shipment throughout packing, drayage, storage, linehaul, and overseas movement. For additional details, see DoD 4500.34-R.

DISCREPANCY REPORT. A discrepancy report is any of the reports prescribed in DoD or joint Service or Agency publications for reporting supply (item or packaging) discrepancies, transportation discrepancies, or quality deficiencies. Examples of these reports are: SF 361, Transportation Discrepancy Report (TDR); SF 364, Report of Discrepancy (ROD); SF 368, Product Quality Deficiency Report (PQDR); and, Transaction Set 842, Supply Discrepancy Report (SDR).

DISTRIBUTION DEPOT. A complex of facilities designed to receive, store, maintain, distribute, and control the flow of material between the point of receipt into the DoD supply system and the point of issue to a post, camp, station, base, ship, industrial activity (or equivalent). (See DoD 4140.1-R.)

DISTRIBUTION SYSTEM. That complex of facilities, installations, methods, patterns, and procedures designed to receive, store, maintain, distribute, and control the flow of material between the point of receipt into a DoD supply system and the point of issue to a post, camp, station, base, or equivalent.

DIVERSION. Changing the mode, route, or destination of a shipment from that shown on the original transportation documentation while the shipment is in transit. A diversion between modes may occur during the clearance process before the shipment actually moves.

DUNNAGE. Lumber or other material used to brace and secure cargo to prevent damage.

DUPLICATE BILL. An exact duplicate of a previous bill or a bill supported entirely by duplicate billing records.

DUPLICATE DETAIL BILLING RECORD. A second or subsequent detail billing record for a single shipment.

DUPLICATE SHIPMENT. A shipment which corresponds exactly to a previous shipment.

ELECTRONICALLY TRANSMITTED MESSAGE (ETM). Messages prepared on DD Form 173/2, Joint Messageform, and dispatched by AUTODIN or teletype.

ELECTRONIC DATA INTERCHANGE (EDI). Computer-to-computer exchange of data using standards jointly developed and established by standards groups; i.e., American National Standards Institute, Electronic Data Interchange Association, and the United Nations/Electronic Data Interchange For Administration, Commerce, and Transport (UN/EDIFACT).

ELECTROSTATIC SENSITIVE DEVICE (ESD). Any electrical or electronic part, assembly, or equipment that is sensitive to electrostatic discharge of 15,000 volts or less. ESD items are classified as:

CLASS 1. Those sensitive to 1,000 volts or less.

CLASS 2. Those sensitive to more than 1,000 volts, but not more than 4,000 volts.

CLASS 3. Those sensitive to more than 4,000 volts, but not more than 15,000 volts.

ESSENTIALITY CODE. Indicates that the assembly or component is essential to the performance of the primary and/or secondary missions of the weapon system and/or end item. The degrees of assembly and/or component essentiality depend on the effect their failure would have on a weapon system and/or end item readiness.

EVIDENCE OF SHIPMENT. Any movement document or receipt, duly signed by a carrier representative, which shows that the United States has shipped or released the material in question to a carrier for shipment to the country's designated representative, constitutes evidence of shipment. Such documents generally show the quantity, national stock number (NSN), mode date, transportation control number (TCN), notice of availability (NOA) number/bill of lading (B/L)/parcel post insured, or registered number, addressee, vessel, or flight number (to the extent possible), and name of shipper and carrier.

EXCEPTION MATERIAL. Security Assistance Program material which, due to its peculiar nature and increased transportation risks, requires special handling in the transportation cycle and deviation from normal shipping procedures. This includes classified material, sensitive material, firearms, explosives, lethal chemicals, and other dangerous and hazardous material that requires rigid movement control and air cargo of such size that the item exceeds commercial capability.

EXHIBIT LINE ITEM, An item of supply or service listed on an exhibit or schedule forming a part of the contractual document usually identified by an exhibit line item number (ELIN). (See DFARS 204.7105.)

EXPEDITED HANDLING SHIPMENTS. Items identified by special requirements handling codes (A, B, C, or D) in the requisitions. Items so identified override normal precedences in processing and moving shipments.

EXPIRATION DATE (Shelf-Life Item). The date beyond which nonextendible shelf-life items (Type I) should be discarded as no longer suitable for issue or use. (See DoD 4140.27-M).

EXPLOSIVES. See HAZARDOUS MATERIAL.

EXPORT TRAFFIC RELEASE (ETR). Shipping instructions, issued by a clearance authority in response to an offering, which specify the mode of shipment and the means by which an export shipment will move.

FINANCIAL DISCREPANCY. A discrepancy related to administrative and/or accessorial charges which will be processed by the Security Assistance Accounting Center (SAAC).

FIRMWARE. The combination of a hardware device and computer instructions or computer data that reside as "read only" software on the hardware device. The software cannot be readily modified under program control.

FLASHPOINT. The temperature at which a substance gives off flammable vapors which will ignite in contact with spark or flame.

FLEET POST OFFICE (FPO). A Navy activity established within CONUS collocated with the postal concentration center for the purposes of providing a standard mail address for forces afloat, mobile shore-based units, and activities OCONUS, directory assistance for Navy mail, and maintaining liaison with and furnishing mail routing and dispatching instructions to appropriate civil and Military postal authorities.

FOLLOWUP. Inquiry originated by an authorized source requesting the status of a previously submitted transaction; e.g., requisition or bill.

FOREIGN MILITARY SALES (FMS). The transfer of material, supplies, equipment, services, or any other support for cash or credit by a DoD Component to a foreign government or international organization as authorized by the FMS Act of 1968. FMS includes Cooperative Logistics Supply Support Arrangements.

FOREIGN MILITARY SALES (FMS) CASE DESIGNATOR. A unique designator within a single country assigned by the implementing Service to each FMS case, to identify a specific offer to a country. This designator stays with and identifies the sale or offer of a sale.

FOREIGN MILITARY SALES COUNTRY REPRESENTATIVE (CR). The designated country official (Consulate, Attaché, Director of Movements) duly authorized to control FMS case transactions.

FOREIGN MILITARY SALES FREIGHT FORWARDER/INTERNATIONAL FREIGHT FORWARDER. A private firm which serves as a contractual agent for the FMS customer. These companies, as a minimum, receive, consolidate, and stage material within the United States for onward shipment to the purchasing country.

FREE-ON-BOARD (FOB) DESTINATION. Product is accepted at destination by the Government. Shipper provides transportation.

FREE-ON-BOARD (FOB) ORIGIN. Product is accepted at origin (source) by the Government. Government provides transportation with commercial carriers.

FREIGHT CLASSIFICATION. (1) A system of grouping and rating similar commodities for use in applying class rates. (2) The Freight Classification Guide publication listing articles by class for use in applying rates.

FULL PIPELINE. A sufficient quantity of assets, onhand and/or on order, to meet forecasted demands through a period equal to the procurement lead time plus the safety level and, when applicable, Other War Reserve Material Requirement, Protectable of the Losing Inventory Manager (LIM).

FUNCTIONAL CONFIGURATION AUDIT (FCA). The formal examination of functional characteristics of a configuration item, prior to acceptance, to verify that the item has achieved the performance specified in its functional or allocated configuration identification.

FUNCTIONAL REQUIREMENT. A set of goals, objectives, criteria, policies, and/or other considerations documented which describe in nonautomatic data processing terminology, and without regard to automatic data processing equipment of its considerations, new or revised tasks to be accomplished by an established automated information system.

FUSE (FUZE or FUSEE). For transportation handling, loading, and movement, the definition of fuse (fuze or fusee) is applied as specified in 49 CFR (Transportation), International Civil Aviation Organization (ICAO) regulations, and related publications.

GAINING INVENTORY MANAGER (GIM). The Inventory Manager (IM) responsible for assuming wholesale material management functions.

GENERAL AGENCY AGREEMENT (GAA). Pertains to Government-owned ships operated under cost plus fixed fee contracts by commercial ocean carriers acting as general agents for the Maritime Administration, U.S. Department of Commerce, with whom the MSC has entered into agreements for the exclusive use of such ships.

GOVERNMENT FURNISHED MATERIAL (GFM). Material in the possession of, or acquired by, the Government and later delivered or otherwise made available to a contractor. GFM is property that may be incorporated into or attached to a deliverable end item or that may be consumed or expended in performing a contract. GFM includes assemblies, components, parts, raw and processed materials, and small tools and supplies that may be consumed in normal use in performing a contract.

GRANT AID (MILITARY ASSISTANCE PROGRAM). Military assistance rendered under the authority of the Foreign assistance Act of 1968, as amended, which provides defense articles and services to recipients on a nonreimbursable (grant) basis.

GREEN SHEET PROCEDURE. A procedure whereby specifically identified cargo in the Air Mobility Command (AMC) system may gain movement precedence over other priority cargo, including A, B, C, or D shipments of the requesting shipper service.

GREENWICH MEAN TIME (GMT). The mean solar time of the meridian of Greenwich (England) used as the prime basis of standard time throughout the world.

GROSS WEIGHT. The combined weight of a container and its contents including packaging material.

HATCH. An opening in the deck of a ship through which cargo is loaded and unloaded.

HATCH LIST. A list showing for each hold section of a cargo ship, a description of the items stowed, their volume and weight, the consignee of each, and the total volume and weight of material in the hold.

HAZARDOUS MATERIAL (DANGEROUS GOODS). A substance of material which has been determined to be capable of posing an unreasonable risk to health, safety, and property when transported. This material includes explosives, gasses (compressed, liquefied, or dissolved under pressure), flammable liquids, flammable solids or substances, oxidizing substances, poisonous and infectious substances, radioactive substances, corrosives, and miscellaneous dangerous substances presenting real or potential hazards to life and property. Procedures for handling this material are specified in applicable publications of the Department of Transportation, the Interstate Commerce Commission, Federal Aviation Agency, U.S. Coast Guard, U.S. Agriculture Department, U.S. Public Health Service, Intergovernmental Maritime Consultative Organization, the International Civil Aviation Organization, and in federal or military documents. Dangerous goods is the term applied to hazardous material in international movement.

HAZARDOUS SUBSTANCE. A material, and its mixtures or solutions, that is identified in the 49 CFR or DLAM 4145.3, et al., when offered for transportation in one package (or in one transport vehicle if not packaged) and when the quantity of the material equals or exceeds the reportable quantity.

HOLD. The interior of a vessel below decks where cargo is stowed.

IMPLEMENTATION CONVENTIONS. See CONVENTIONS.

IMPLEMENTATION GUIDELINE. A document that provides general guidance on how to implement electronic data interchange at a particular activity including data conventions, business and legal issues, system architecture, and network access.

INCORRECT ITEM. An item received in lieu of the item requisitioned. This is an erroneous item shipped due to shipper error and not an intended interchangeable/substitute item. See also, WRONG ITEM.

INITIAL REGISTRATION. The initial loading of a small arm serial number data into the Component and DoD registries.

INTEGRATED MATERIAL MANAGER (IMM). Any DoD activity or agency that has been assigned wholesale IMM responsibility for the DoD and participating Federal Agencies. Integrated material management responsibility include cataloging, requirements determination, procurement, distribution, overhaul, repair, and disposal of material. The term Integrated Material Manager, Inventory Control Point, and Material Manager are synonymous. (See DoD 4140.1-R).

INTERCHANGEABLE ITEM. Interchangeability is a condition which exists when two or more items possess such functional and physical characteristics as to be equivalent in performance and durability and are capable of being exchanged one for the other without alteration of the items themselves or of adjoining items, except for adjustment, and without selection for fit and performance. It includes capability of two or more items or components of equipment to replace each other in a physical or functional environment with negligible modification of loss of efficiency.

INTERFACE PROGRAM. A software program that defines the format for passing flat files between an application system and translation software.

INTERFUND BILL. A bill processed under the interfund billing system. These bills are not only "bills" but notices to the billed office that its funds have been disbursed and the bill "paid."

INTERFUND BILLING SYSTEM. An automated billing fund transfer system.

INTERMEDIATE DEFENSE FUEL SUPPORT POINT (DFSP). Bulk fuel storage facility where product is stored for subsequent issue to multiple end customers.

INTERNATIONAL LOGISTICS CONTROL OFFICE (ILCO). The central U.S. Military Service control point in CONUS that monitors requisitions and related transactions for FMS and Military Sales and Military Assistance Program/Grant Aid (MAP/GA).

INTER-SERVICE SUPPLY. Exchange of material, inventory control documentation, and other management data between the distribution systems of a single Service or Agency and one or more other Services or Agencies.

INTER-SERVICE SUPPORT. Action by one Military Service or element thereof, to provide logistic and/or administrative support to another Military Service, or element thereof. Such action can be recurring or nonrecurring in character, on an installation, area, or worldwide basis.

INTOPLANE. A supply technique whereby the U.S. Government contracts with a contractor to refuel military aircraft at commercial airports. The fuel, lube oil, and refueling facilities (storage tank, vehicle, and equipment) are supplied by the contractor. The use of Government refueling trucks, equipment, bladders, etc., are not

authorized unless so stipulated in the intoplane contract. (**NOTE:** Commercial aircraft under a Government charter may be refueled at intoplane locations; and occasionally, intoplane locations may be at a military base.)

INTRA-SERVICE SUPPLY. Exchange of material, inventory control documentation, and other management data within or between the distribution systems of a single Service or Agency.

INTRATHEATER. Movement of material from a point in a theater to another point within the same theater.

INVENTORY CONTROL POINT (ICP). The organizational element within a distribution system which is assigned responsibility for system-wide direction and control of material including such management functions as the computation of requirements, the initiation of procurement or disposal actions, the development of worldwide quantitative and monetary inventory data, and the positioning and repositioning of material.

INVENTORY LOT/SEGMENT. A subgrouping of the total items in storage for the purpose of physical inventory counting or location audit. The lot/segment is generally by Federal supply classification (FSC), warehousing, picking station, or some form of commodity grouping.

INVENTORY, SCHEDULED. A physical inventory which is to be conducted on a group of items within a specified period of time according to an established plan. There are two types of scheduled inventories:

INVENTORY, COMPLETE. An inventory of all conditions of all stock numbers within specified categories.

INVENTORY, SAMPLE. A sample of items selected from an inventory lot in such a manner that each item in the lot has an equal opportunity of being included in the sample.

INVENTORY, UNSCHEDULED. A physical inventory which is to be conducted on a specific item as a result of some unscheduled inventory requirement such as an inventory manager or locally initiated request, material release denial, location survey or location reconciliation request. There are two types of unscheduled inventories:

INVENTORY, SPECIAL. A physical inventory of a specific item(s) as a result of a special requirement generated by the location audit program, preprocurement, or any other reason deemed appropriate by the item manager, Accountable Property Officer (APO) or the APO designated representative, or the storage activity.

INVENTORY, SPOT. A physical inventory required to be accomplished as a result of a total or partial material denial.

LASHING. Ropes, wires, chains, steel straps, or other special devices used to secure cargo.

LATENT DEFECTS. A flaw or other imperfection in an article or item which is discovered after delivery to the customer. Such defects are inherent weaknesses which are normally not detected by examination or routine test, but which are present at time of manufacture. Latent defects apply only to the operability of an item.

LESS THAN RELEASE UNIT (LRU). A shipment unit that can be shipped without requiring an export release from the appropriate authority.

LETTER OF OFFER AND ACCEPTANCE (LOA). The U.S. document by which the U.S. Government offers to sell to a foreign government or international organization defense articles and defense services. The LOA lists the item and/or services, estimated costs, the terms and conditions of sale, and provides for the foreign government's signature to indicate acceptance. May be referred to as "DD Form 1513," which is now replaced but may remain in effect for many programs.

LINEHAUL. Transportation of freight from one point to another excluding local pickup, delivery, and switching.

LOCATION AUDIT PROGRAM. Consists of actions required to assure compatibility between the assets in storage and the locator records and between the locator records and the accountable records. Location audit programs may include quantity. This program is accomplished in two phases:

LOCATION RECONCILIATION. A match between valid storage activity records and the accountable records, in order to identify and correct situations where items are in physical storage but not on record, on record but not in storage, or where common elements of data, including quantity, do not match. Research of mismatches, including special inventories when required, results in corrective action.

LOCATION SURVEY. A physical verification, other than actual count, between actual assets and recorded location data to ensure that all assets are properly recorded as to location, identity, condition, and unit of issue.

LOGISTICS ASSET SUPPORT ESTIMATE (LASE). Automated procedure for authorized DoD activities to obtain a general estimate of an IMMs ability to provide supply support for contingency or operational plans and programs.

LOGISTICS DATA MANAGER (LDM). A Defense Logistics Management System Office appointee who is the Secretariat to the Configuration Control Board. See chapter 1 for responsibilities.

LOGISTICS REASSIGNMENT. The transfer of Integrated Material Manager responsibilities from one manager to another. (See DoD 4140.1-R.)

LOOP. A group of semantically related segments. An example is the N1 loop which contains name and address information.

LOSING INVENTORY MANAGER (LIM). The Inventory Manager responsible for relinquishing wholesale material management functions.

LOWEST OVER ALL COST. The aggregate of shipment costs known or reasonably estimated; i.e., transportation rate(s), accessorial, drayage, storage, in transit, packing and crating, unpacking, and port handling costs.

MAJOR INVENTORY VARIANCE. Total dollar value of the item overage or shortage for the stock number exceeds \$5,000 or a variance of any value for controlled items.

MANAGEMENT CONTROL ACTIVITY (MCA). DoD component/activity designated to initially receive and effect control over Military Service/Agency initiated and contractor initiated requisitions for GFM to support commercially performed maintenance contracts or requirements which would be supplied from the wholesale DoD supply system.

MANIFEST. A document specifying, in detail, the items carried on a transportation conveyance for a specific destination. Usually refers to a ship or aircraft manifest.

MAPPING. A process for diagraming what electronic data are to be exchanged, how the data are to be used, and what internal application system requires the data.

MARKING. Numbers, nomenclature, or symbols imprinted on items or containers for identification during handling, shipment, and storage.

MATERIAL. All items (including ships, tanks, self-propelled weapons, aircraft, etc., and related spares, repair parts, and support equipment, but excluding real property, installations, and utilities) necessary to equip, operate, maintain, and support military activities without distinction as to its application for administrative or combat purposes. See also, EQUIPMENT; PERSONAL PROPERTY. (See Joint Publication 1-02.)

MATERIAL ACCOUNTABILITY. The act of safeguarding, answering for, and exercising proper quantitative and physical controls over DoD material, supplies, and equipment in the care and custody of DoD activities.

MATERIAL CONDITION. A classification of material that reflects its readiness for issue and use or to identify the action underway to change the status of material.

MATERIAL DENIAL. A transaction notifying the IMM that there is insufficient material in storage to satisfy, in total or in part, the quantity directed for issue and specifying the quantity that could not be issued.

MATERIAL RECEIPT ACKNOWLEDGMENT (MRA). A computer processed transaction or manual form used to advise that material has been received and posted and/or to indicate that a discrepancy affects the receipt posting/acknowledgment process.

MATERIAL RELEASE CONFIRMATION (MRC). A notification from a storage site advising the originator of an Material Release Order release order of the positive action taken on the order.

MATERIAL RELEASE DENIAL (MRD). A notification from a storage site advising the originator of a Material Release Order of negative (warehouse refusal) action on the order.

MATERIAL RELEASE ORDER (MRO). An order issued by an accountable supply system manager (usually an ICP or accountable depot) directing a non-accountable activity (usually a storage site or material drop point) within the same supply distribution complex to release and ship material. Also used to direct redistribution and shipment of material from a post, camp, station, or base to another similar organization to satisfy a specific demand.

MILITARY ASSISTANCE PROGRAM ADDRESS CODE (MAPAC). A code constructed by the ILCO for Security Assistance Program shipments. The Military Assistance Program Address Code (MAPAC) is used to identify the consignee in transportation documents and to obtain clear-text address and other shipment information from the Military Assistance Program Address Directory (MAPAD).

MILITARY ASSISTANCE PROGRAM/GRANT AID (MAP/GA). Military assistance rendered under the authority of the Foreign Assistance Act of 1968, as amended, which provides defense articles and services to recipients on a nonreimbursable (grant) basis.

MILITARY ASSISTANCE SERVICE FUNDED PROGRAM. Programs which, by their nature, are Military Assistance Program/Grant Aid except that the funding source is a DoD appropriation.

MILITARY SEALIFT COMMAND LEASED/CONTROLLED COMMERCIAL/GOVERNMENT-OWNED/LEASED SHIPPING CONTAINER (SEAVAN) (MSCVAN) (See SEAVAN/MILVAN). A SEAVAN or Military Van leased/controlled by Military Sealift Command.

MILITARY SERVICES. The U.S. Army, U.S. Navy, U.S. Air Force, U.S. Marine Corps, and the U.S. Coast Guard.

MILITARY VAN (MILVAN). Military owned demountable container, conforming to U.S. and international standards, operated in a centrally controlled fleet for movement of Military cargo.

MISCIBILITY. The composition of a substance which allows it to be easily mixed with another substance.

MISDIRECTED MATERIAL. Material shipped to the wrong destination.

MISIDENTIFIED ITEM. When the label on the container is different than the item in the container, or tag attached to the item. See also, WRONG ITEM.

MODERNIZATION. Changes to an existing automated information system that involve implementing state of the art automation concepts or technologies.

NATIONAL/NORTH ATLANTIC TREATY ORGANIZATION (NATO) STOCK NUMBER (NSN). The name for the 13-digit number used in all material management functions. The first four digits indicate the FSC which relates/separates items of supply. The next two digits indicate the National Codification Bureau (NCB) assigned the item identification number to the item of supply. The remaining seven digits are a nonsignificant, serially assigned item identification number of the item of supply. The NCB code and the item identification number (a total of nine digits) constitute the U.S. National Item Identification Number (NIIN).

NET EXPLOSIVE QUANTITY (NEQ). The total quantity of propellant in a tank, drum, cylinder, or other container expressed in kilograms.

NET EXPLOSIVE WEIGHT (NEW). The total weight of all explosive Class A and B components of an explosive which includes primary explosives, secondary explosives, pyrotechnics, and propellants in a tank, drum, cylinder, or other container expressed in pounds.

NET WEIGHT. The weight of an item being shipped, excluding the weight of packaging material or container (does not apply to household goods).

NONINTERFUND BILL. A bill which requires payment by a method other than the interfund billing system; e.g., check payment.

NONTRACEABLE SHIPMENT. A shipment by a mode or method wherein an audit trail between the various shipping elements and the consignee is not available or signed delivery receipts are not required from the consignee. The shipping transportation office normally makes the nontraceability determination.

NOT MISSION CAPABLE SUPPLY (NMCS). A condition when the lack of the items or equipment required causes mission-essential systems or equipment of being incapable of performing any of their assigned missions.

NOTICE OF AVAILABILITY (NOA). The method by which the U.S. shipping installation will provide advance notification to the designated FMS country representative (CR) or freight forwarder (FF) that the material is ready for shipment and, where appropriate, that the shipment requires an export release under the provisions of AR 55-355, et al.

OCEAN CARGO CLEARANCE AUTHORITY (OCCA). The Military Traffic Management Command (MTMC) activity which books DoD sponsored cargo and passengers for surface movement, performs related contract administration, and accomplishes export/import surface traffic management functions for DoD cargo moving within the Defense Transportation System (DTS).

OFFERING. The submission of shipment documentation to a clearance authority for release instructions and to the booking office for ocean transportation to effect shipment or transshipment.

OFFER OR RELEASE OPTIONS. Methods by which countries participating in the FMS program advise supply sources whether material shipments should be released without prior notice to the CR or FF. The type of offer or release option will be determined as a result of negotiations between the CRs and the U.S. Military Service at the time the case agreement is reached.

ORGANIZATIONAL EQUIPMENT. Equipment, other than individual equipment, which is used in the furtherance of the common mission of an organization or unit.

OTHER DEPARTMENT OF DEFENSE COMPONENT. A DoD Component identified by a DoD Activity Address Code (DoDAAC) beginning with a Service/Agency code of "H"; e.g., Defense Mapping Agency, Defense Nuclear Agency, and National Security Agency.

OUTSIZE(D) DIMENSIONS. Any dimension of a shipment greater than 6 feet; a shipment with such a dimension.

OVERAGE. Item overage is when the quantity received is greater than that ordered or shown on shipping document. This type of overage is not evident on delivery but is discovered when the article is opened and the contents are checked. Transportation overages reportable under Joint Publication AR 55-38, et al., are overages of boxes, packages, or freight (packaged or loose) found to be in excess of the quantity or articles recorded on the bill of lading or transportation document covering the shipment. *NOTE:* Overage on SEAVAN/ container that is source loaded and moved under a shipper's load and count, and arrives at destination with original seal(s) intact, is a supply discrepancy.

PACKAGED FUEL. Bulk petroleum products which, because of operational necessity, are packaged and supplied in containers of 5 to 55-gallon capacity. Fuel in military collapsible containers up to 500-gallon capacity are also included in this category.

PACKAGED PETROLEUM PRODUCTS. Petroleum products (such as lubricants, oils, and greases) packaged by the manufacturer or contractor for sale/delivery in containers of 55 U.S. gallons or less.

PACKAGING. A generic term which includes the processes of preserving, packing, marking, and unitization as defined below:

MARKING. Application of numbers, letters, labels, tags, symbols, or colors for handling or identification during shipment and storage.

PACKING. Assembly of items into a unit, intermediate, or exterior pack with necessary blocking, bracing, cushioning, weatherproofing, reinforcing, and marking.

PRESERVATION. Application of protective measures to prevent deterioration; includes cleaning, drying, preservation materials, barrier materials, cushioning, and container, when necessary.

UNITIZATION. Assembly of packs of one or more line items of supply into a single load in such a manner that the load can be handled as a unit through the distribution system. Unitization (unitized loads/unit loads) encompasses consolidation in a container, placement on a pallet or load base, or securely binding together.

PACKAGING CONTROL POINT. An activity designated by a Military Service which monitors packaging discrepancies.

PACKAGING DISCREPANCY. Any unsatisfactory condition due to improper or inadequate packaging (including marking, packing, preservation, or unitization) and which causes the item, shipment, or package to be vulnerable to loss, delay, or damage, or unnecessary expense to the U.S. Government, as in excessive packaging.

PACKING, HANDLING, AND CRATING COSTS. Costs incurred for labor, material, or services in preparing material for shipment from or between storage and distribution points.

PALLET

AIRCRAFT (463L). Aluminum air cargo pallet, 88" x 108" or 54" x 88", on which shipments are consolidated for movement by Air Mobility Command (AMC).

WAREHOUSE. A two deck platform, usually wooden, about 42" wide, 42" long and 5" high, used for handling several packages as a unit.

PALLETIZED UNIT LOAD. Packaged or unpackaged item(s) arranged on a pallet and handled as a unit.

PARTIAL SHIPMENT UNIT. A shipment unit separated at the origin shipping activity into two or more increments with each increment identified and documented separately.

PAYBACK. When the SMCA issues material from a location where the requesting service owns no material, the owning service is compensated for its loss of material by a like item and quantity at a location where the requesting service owns some material. The payback of the material is accomplished by ownership gain/loss transactions.

PERSONAL PROPERTY. Household goods, baggage, and privately owned vehicles of DoD sponsored personnel.

PERSONAL PROPERTY (APPLICABLE TO PACKAGING DISCREPANCIES ONLY). Includes household goods and unaccompanied baggage defined as follows:

HOUSEHOLD GOODS. All personal property associated with the home and all personal effects belonging to a member and the member's dependents which can be legally accepted and transported as household goods by an authorized commercial carrier. Also included are spare parts for privately-owned motor vehicle (extra tires and wheels, tire chains, tools, battery chargers, accessories, etc.) and a pickup tailgate when removed to install a camper or for other reasons. Snowmobiles and vehicles such as motorcycles, mopeds, and golf carts may be shipped as household goods. The term "household goods" does not include personal baggage when carried free on carrier tickets, automobiles, trucks, vans, and similar motor vehicles; boats; airplanes; motor homes; camper trailers; and farming vehicles.

UNACCOMPANIED BAGGAGE. That portion of an individual's authorized weight allowance of personal property which is not transported free on a ticket used for personal travel and which is normally shipped separately by expedited transportation from the bulk of the individual's personal property. It may include, but is not limited to, personal clothing, professional equipment, essential cooking utensils, linen and other light housekeeping items, collapsible cribs, special equipment required for patients, and other items required for the care of dependents. Also included are other items necessary for health, welfare, and morale of the member. For specific entitlements, see the regulation of the DoD Components.

PERSONNEL SERVICES ACTIVITIES. Activities operated by a Military Service or other Component of DoD, which exist for the primary purpose of providing services to personnel and their dependents. Examples are service clubs, open messes, post exchanges, dependent schools, and special services activities.

PHYSICAL CONFIGURATION AUDIT (PCA). The formal examination of the "as built" configuration of a configuration item.

PHYSICAL INVENTORY CUTOFF DATE. A date established for striking the property accountability record balance. This date serves as the reference point for considering the relationship between preinventory/post inventory transactions and the physical count quantity to determine if the count is in agreement with the inventory record balance.

PHYSICAL INVENTORY INFLOAT CONTROL DATE. Established for initiating controls on all inprocess transactions and materials which could affect the outcome of the inventory.

PILFERABLE CARGO. See PROTECTED CARGO.

PILFERABLE ITEMS. See CONTROLLED INVENTORY ITEMS.

PORT LOADING AND UNLOADING COSTS. Costs incurred for labor, material, or services for loading, unloading, and handling at the ports of embarkation and debarkation.

PORT OF DEBARKATION (POD). An authorized point of entry into a foreign country or the United States.

PORT OF EMBARKATION (POE). An authorized point of departure from a foreign country or the United States.

POSITIONING COSTS. Costs incurred in prepositioning items in the supply distribution system of a Military Service at locations OCONUS in anticipation of support to other authorized customers.

POST INVENTORY TRANSACTION. Any transaction, causing an increase or decrease to the property accountability record balance, date after the established physical inventory cutoff date.

POST-POST TRANSACTION. The posting of a transaction to add to or subtract from the accountable stock record balance subsequent to physical issue or storage of a stocked item.

POSTAL CONCENTRATION CENTER (PCC). A post office or agency of the USPS at which mail for Armed Forces and maneuvers, afloat or overseas, is concentrated for sorting and delivery or dispatch.

PREINVENTORY PLANNING. Preinventory planning is conducted prior to the physical inventory cutoff date to reduce the potential for inventory inaccuracies through:

Actions to ensure location integrity by resolving such situations as unbinned/loose material; questionable identity of material in location; and multiple conditions, shelf-life (including date of pack/date of expiration), and/or material lots stored in a single location.

Document cleanup to ensure to the extent possible that adjustments and transaction reversals are posted to the record, in-process receipts are stored in location, and related transactions are transmitted to the IMM prior to the established physical inventory cutoff date.

PREINVENTORY TRANSACTION. Any transaction, causing an increase or decrease to the property accountability record balance, dated prior to the established physical inventory cutoff date.

PREMIUM TRANSPORTATION. 1. Transportation by other than conventional rail, motor, or water freight, and parcel post service; e.g., commercial air service, exclusive use of the vehicle. 2. Those transportation services not included in the standard or base price of the item or service.

PREPOST TRANSACTION. The posting of a transaction to add to or subtract from the accountable stock record prior to physical issue or storage of a stocked item.

PRE-POSITIONED WAR RESERVE (PWR). Wholesale protected and nonprotected war reserve material which approved Secretary of Defense guidance dictates be reserved and positioned at or near the point of planned use or issue to the user prior to hostilities, to reduce reaction time and to assure timely support of a specific force/project until replenishment can be effected.

PRIMARY CONTRACT ADMINISTRATION OFFICE (CAO). The DoD CAS component reflected in the "Administered By" block of the contract or the purchasing office when the "Administered By" block of the contract is blank.

PRINCIPAL ITEMS. End items and replacement assemblies of such importance that management techniques require centralized individual item management throughout the supply system to include depot level, base level, and items in the hands of using units. Specifically, these include items of which, in the judgment of the Military Services, there is a need for central inventory control, including centralized computation of requirements, central procurement, central direction of distribution and central knowledge and control of all assets owned by the Military Services.

PRIORITY DESIGNATOR. A code which indicates the priority for handling material based on the mission and need of the requiring activity.

PROCESS REVIEW COMMITTEE (PRC). A component body that processes and recommends the disposition of Defense Logistics Management Standards change requests. See chapter 1 for further information.

PROCUREMENT INSTRUMENT IDENTIFICATION NUMBER (PIIN). Identifies contractual documents. (See DFARS, subparagraph 204.70.)

PRODUCT QUALITY DEFICIENCY. A defect or nonconforming condition which limits or prohibits the product from fulfilling its intended purpose. Included are deficiencies in design, specification, material, manufacturing, and workmanship.

PROGRESS PAYMENT. Amounts paid for goods or service, not yet delivered, to finance that portion on which performance has been completed.

PROOF OF DELIVERY. A term construed to mean "constructive delivery" (tender of the material to a designated carrier at point of origin). In the case of nonreceipt, the DoD ICP/IMM/shipping depot and the General Services Administration (GSA) are required only to provide evidence of shipment. Proof of delivery to a country destination can only be provided when movement was effected within the Defense Transportation System or other transportation provided under U.S. Government auspices (these nonreceipts are considered transportation related reportable under Joint Publication AR 55-38).

PROPER SHIPPING NAME. The name of a hazardous material as shown in 49 CFR and related publications.

PROPERTY ACCOUNTABILITY. The assignment of duties and responsibilities to an individual or organization that mandates jurisdiction, security, and answerability over public property.

PROPERTY ACCOUNTABILITY RECORD. The official record of tangible personal property, including inventory, owned by DoD that is maintained to identify the quantities of items onhand, unit prices, locations, physical condition, receipt and issue records, authorized stock numbers, item descriptions, and other such information necessary to properly account for material and exercise other inventory management responsibilities.

PROPERTY RECORD. General term referring to any record of property. It is inclusive not only of stock record accounts, but also of organization and installation property books, clothing and equipment records, hand receipt records, and any system of files for property records. Also called property account.

PROTECTED CARGO. Those items designated as having characteristics which require that they be identified, accounted for, secured, segregated, or handled in a special manner to ensure their safeguard or integrity. Protected cargo is subdivided into controlled, pilferable and sensitive cargo and defined as follows:

CONTROLLED CARGO. Items which required additional control and security as prescribed in various regulations and statutes. Controlled items include money, negotiable instruments, narcotics, registered mail, precious metal alloys, ethyl alcohol, and drug abuse items.

PILFERABLE CARGO. Items which are vulnerable to theft because of their ready resale potential. Pilferable items include cigarettes, alcoholic beverages, cameras, and electronic equipment.

SENSITIVE CARGO. Items such as small arms, ammunition, and explosives which have a ready use during civil disturbances and other types of domestic unrest or for use by criminal elements and which, if in the hands of militant or revolutionary organizations, present a definite threat to public safety.

PROVISIONING ORDER. A written notification to a contractor to deliver spare repair parts against a line item already contained in a contractual instrument. (Both delivery date and prices may be estimated on the order subject to later definitization on a supplemental agreement.)

PURCHASING OFFICE (PO). The office which awards or executes a contract for supplies or services.

QUALIFIER. A data element which identifies or defines a related element, set of elements, or a segment. The qualifier contains a code taken from a list of approved codes.

QUALITY CONTROL. A planned and systematic evaluation of work processes to assist management in identifying and correcting those human, procedural or system errors which adversely affect the quality of services provided.

RECEIVER. The activity or agency at which a DTS shipment terminates. The activity is usually the ultimate consignee, but may also be an agent for the ultimate consignee, e.g., a central receiving point or a temporary storage point for the ultimate consignee.

RECONCILIATION, PHYSICAL INVENTORY. To obtain agreement between the physical count and record balance by attempting to account for all transactions representing infloat documents.

RECONSIGNMENT. A change from the original consignee to another consignee while the shipment is enroute.

REEFER CARGO. Perishable commodities which require refrigerated (chill and freeze) stowage at prescribed temperatures while in transit (excludes cargo authorized for storage in ventilated holds).

RELEASE. A title given to annual updates of standards.

RELEASE UNIT (RU). A shipment unit of a specific commodity, weight, size, or mode which requires an export release from the appropriate authority before shipment.

REPORTABLE QUANTITY (RQ). The amount of material (as listed in 49 CFR or AFR 71-4, et al.) which results in its designation as a hazardous substance. Hazardous substances in reportable quantities are significant if they are discharged, accidentally or intentionally, into or upon navigable waters or adjoining shorelines.

REPORTING ACTIVITY

MATERIAL RECEIPT ACKNOWLEDGMENT (MRA). Within the context of MRA, the reporting activity for U.S. Forces is the activity identified by the ship-to DoDAAC designated in the requisition. The reporting activity is normally the requiring activity or unit which receives the material and posts it to a record such as a retail stock record, stock record amount property account, etc. For security assistance shipments, the responsible Military Service ILCO will serve as the reporting activity.

MATERIAL RETURNS PROGRAM (MRP). Within the context of Material Returns Reporting, the reporting activity is a Service or Agency organization which has reported material to an ICP/IMM.

REQUIRED AVAILABILITY DATE (RAD). A date specifying when end items and concurrent spare parts are committed to be available for transportation to a Foreign Military Sales, Military Assistance Program/Grant Aid, or Security Assistant Program recipient.

REQUIRED DELIVERY DATE (RDD). A date specifying when material is actually required to be delivered to the requisitioner and is always earlier or later than the computed standard delivery date. A required delivery date cannot exactly equal a computed standard delivery date.

REQUIRED DELIVERY PERIOD (RDP). A period of time specifying the earliest and the latest acceptable date material can be delivered. (Applies to conventional ammunition requisitions only.)

REQUISITION. An authoritative demand or request for personnel, services, or supplies authorized but not made available without specific request.

RESEARCH, PHYSICAL INVENTORY. An investigation of potential or actual discrepancies between physical count and recorded balances. The purpose of research is to determine the correct balance and determine the cause of discrepancies. There are three types of research:

CAUSATIVE RESEARCH. An investigation of discrepancies; i.e., gains and losses, consisting of, as a minimum, a complete review of all transactions to include supporting documentation, catalog change actions, shipment discrepancies, and unposted or rejected documentation occurring since the last completed inventory. The purpose of causative research is to identify, analyze, and evaluate the cause of inventory discrepancies with the intention of eliminating repetitive errors. Causative research ends when the cause of the discrepancy has been discovered or when, after review of the transactions, no conclusive findings are possible.

POSTCOUNT VALIDATION. A comparison of physical count with recorded balances or another count, with consideration of transactions that have occurred recently. The purpose of postcount validation is to determine the validity of the count. Postcount validation research ends when the accuracy of the count has been verified or when any necessary recounts have been taken.

PREADJUSTMENT RESEARCH. A review of potential discrepancies, which involves consideration of recent transactions and verification of catalog data. The purpose of preadjustment research is to determine the correct balance. Preadjustment research ends when the balance has been verified or the adjustment quantity determined.

RESPONSIBLE ACTIVITY. Any activity required to take action as a result of a Supply Discrepancy Report (SDR); e.g., ICP, contract administration office, packaging control point, or a shipping activity of shipments from a RDO.

RETAIL STOCK. Stock held in the custody or on the record of a supply organization below the wholesale level. (See DoD 4140.1-R.)

RETROGRADE CARGO. A movement of material opposite of the normal flow, e.g., cargo returned from OCONUS to CONUS.

ROLL- ON/ROLL- OFF (RORO). Loaded on or discharged from a vessel by rolling or driving instead of lifting. Can be either cargo on trucks or trailers or the vehicles themselves.

ROUTING AUTHORITY. An activity which designates modes and/or provides routing instructions for shipments requiring clearance prior to movement.

SEAVAN. Commercial or Government-owned (or leased) shipping containers which are moved via ocean transportation without bogie wheels attached; i.e., lifted on and off the ship. The term SEAVAN includes Military VAN unless specifically excluded.

SEGMENT. Consists of locally related data elements in a defined sequence. A data segment consists of a segment identifier, one or more data elements each preceded by an element separator, and ends with a segment terminator. (See volume 1, chapter 10, for additional descriptive information.)

SENSITIVE CARGO. See PROTECTED CARGO or CONTROLLED INVENTORY ITEMS.

SHELF-LIFE. The total period of time beginning with the date of manufacture/cure/assembly or inspection/test/restorative action that an item may remain in the combined wholesale including manufacturer and retail storage system and still remain suitable for issue/use by the end user. Shelf-life is not to be confused with service life, which is a measurement of anticipated average or mean life of an item. (See DoD 4140.27-M.)

SHELF-LIFE EXPIRATION DATE. See EXPIRATION DATE (SHELF-LIFE ITEM).

SHELF-LIFE INSPECTION/TEST DATES. The date by which extendable shelf-life items (Type II) should be subjected to inspection, test, or restoration. (See DoD 4140.27-M.)

SHELF-LIFE ITEM. An item of supply possessing deteriorative or unstable characteristics to the degree that a storage time period must be assigned to assure that it will perform satisfactorily in service. Refer to Type I and Type II Shelf-Life Items. (See DoD 4140.27-M.)

SHIPMENT. The movement of material from point of origin to destination by any mode.

SHIPMENT PLANNING. Concurrent and coordinated decisions between the warehousing, consolidating, packing, and transporting functions of shipping activities as to the composition of shipment units and their method of transportation.

SHIPMENT UNIT. One or more items assembled into one unit which becomes the basic entity for control throughout the transportation cycle.

SHIPMENT UNITS IN CONSOLIDATION. Two or more shipment units placed in one container (palletized unit load, SEAVAN, or roll on/roll off) which is moved to a breakbulk point or ultimate consignee as one shipment unit.

SHIPPER. Any organization, service, or agency (including the contract administration or purchasing office for vendors) that originates/delivers material to a carrier for movement. The shipper may be a Military organization or activity, other Government agency, or a manufacturer or vendor. The functions performed include planning, assembling, consolidating, documenting, and arranging for movement of material.

SHIPPER SERVICE CONTROL OFFICE. See Sponsoring Service Control Office.

SHIPPING ACTIVITY. A Service/Agency activity that originates shipments and plans, assembles, consolidates, documents, and arranges for movement of material.

SHIPPING AGREEMENT (SURFACE). A nonexclusive contract between MSC and various commercial ocean carriers for unlimited cargo quantities to be lifted at competitively derived rates on scheduled vessels of participating carriers.

SHIPPING CONTRACT (SURFACE). An exclusive contract between MSC and a commercial ocean carrier to provide for the shipment of cargo at negotiated rates to locations not served by berth term carriers.

SHIPPING (ITEM) DISCREPANCY. See SUPPLY DISCREPANCY.

SHORTAGE. Item shortage is when the quantity received is less than the quantity ordered or shown on the shipping document. The shortage is not evident on delivery but is discovered when the container is opened and the contents are checked. Transportation shortages reportable under Joint Regulation AR 55-38, et al., are shortages of boxes, packages, or loose articles of freight in a SEAVAN/Military Van (MILVAN), roll on/roll off, or a Container Express (CONEX) found to be less than the quantity of freight as recorded on the applicable bill of lading. *NOTE:* Shortage on SEAVAN/container that is source loaded and moves under shipper's load and count, and arrives at destination with original seal(s) intact, is considered a supply discrepancy.

SINGLE MANAGER FOR CONVENTIONAL AMMUNITION (SMCA). The responsibility assigned to the Secretary of the Army by the Secretary of Defense for the procurement, production, supply, and maintenance/renovation of conventional ammunition within the DoD. Specific responsibilities, functions, authority, and relationships are contained in Department of Defense Directive (DoDD) 5160.65.

SMALL ARM SERIAL NUMBER. The total series of characters appearing on the firing component part of a small arm.

SMALL ARMS. Defined as handguns; shoulder-fired weapons; light automatic weapons up to and including .50 caliber machine guns; recoilless rifles up to and including 106mm; mortar tubes up to and including 81mm; reusable rocket launchers, man-portable; grenade launchers, rifle and shoulder fired; and individually operated weapons which are portable and/or can be fired without special mounts or firing devices and which have potential use in civil disturbances and are vulnerable to theft.

SMALL ARMS TRANSACTION REPORTING. Reporting of individual transactions affecting the small arms serial numbers' status within any component registry.

SPECIAL PROGRAM REQUIREMENTS (SPR). Automated procedure to forecast select future nonrepetitive requirements which cannot be forecast by the ICP based on demand data and which have the greatest probability of resulting in the eventual submission of requisitions.

SPECIAL ASSIGNMENT AIRLIFT MISSION (SAAM). A mission by Air Mobility Command, other than the 89th Military Airlift Wing, at the request of the Department of the Army, Navy, or Air Force only. SAAMs covers four categories of operation:

Traffic originating for airlift at other than an Air Port Of Embarkation (APOE) and terminating at any location.

Traffic originating for airlift at an APOE and terminating at other than an APOE.

Traffic originating at an APOE and terminating at an APOE but requiring singular or unusual consideration not available if moved as normal channel traffic.

Traffic originating at an APOE and terminating at a destination in the proximity of a channel route, channel extension, or flag stop.

SPLIT SHIPMENT UNIT. A whole or partial shipment unit separated at a transshipment point into two or more increments with each increment identified and documented separately.

SPONSORING SERVICE. The Military Service authorizing payment for each movement of material.

SPONSORING SERVICE CONTROL OFFICE/SHIPPER SERVICE CONTROL OFFICE (SSCO). An activity established by a Military Service or Agency to perform logistics management functions such as serving as an airlift clearance authority (ACA) for CONUS export shipments, determining air eligibility, responding to tracing and status queries, expediting, and providing consignment instructions for mobile units.

STANDARD DELIVERY DATE (SDD). A date computed by adding the individual Uniform Material Movement and Issue Priority System (UMMIPS) time standards to the requisition date.

STANDARDS. The technical documentation approved for use in the DLMS; specifically, transaction sets, segments, data elements, and code sets. Standards provide the framework for structuring each DLMS transaction.

STOCK RECORD ACCOUNT. A basic record showing by item the receipt and issuance of property, the balances onhand, and such other identifying or stock control data as may be required by property authority. (See Joint Publication 1-02.)

STORAGE ACTIVITY. The organizational element of a distribution system which is assigned responsibility for the physical handling of material incident to its check-in and inspection (receipt), its keeping and surveillance in a warehouse, shed, tank, or open area (storage), and its selection and shipment (issue).

STOWAGE DIAGRAM. A scaled drawing included in the loading plan of a ship for each deck or platform showing the exact location of all cargo. The diagram also contains pertinent items of the following data for each cargo space and deck stowage area; i.e., overall dimensions, location of obstructions, dimensions of the overhead hatch opening, dimensions of bow door or stern gage opening, minimum clearances to the overhead, bale cubic capacity, square feet of deck area, and the capacity of booms.

STOWAGE PLAN. A completed stowage diagram showing cargo that has been loaded and its stowage location in each hold, between deck compartment, or other space in a ship, including deck space. Each POD is indicated by colors or other appropriate means. Deck and between deck cargo normally is shown in top view, while cargo stowed in the lower hold is shown in sideview, except that vehicles usually are shown in top view regardless of stowage.

SUBSISTENCE TYPE OF PACK CODE. Use only in subsistence requisitions to indicate the required level of pack to be applied to shipments of perishable and nonperishable subsistence material.

SUBSTITUTE ITEM. An item authorized for issue instead of a standard item of like nature and quality.

SUMMARY BILLING RECORD (SBR). A record, used in the interfund billing system, which summarizes the values of detail billing records and provides other information needed to support transfers of funds between appropriations.

SUPPLY DISCREPANCY. Errors reportable under DLMS, volume 2, chapter 18; i.e., any variation in goods received from data shown on the covering shipping documents (General Services Administration or Single Line Item Release/Receipt Document; Issue Release/Receipt Document (IRRD); Requisition and Invoice/Shipping Document; authorized procurement delivery document or vendor's packing list; or other authorized shipping document) which is not the result of a transportation discrepancy or product quality deficiency. Supply discrepancies encompass variations in condition or quantity including damaged or lost USPS shipments (except lost registered, insured, or certified), item shortage or overage, incorrect and misdirected material, receipt of canceled requirements, improper or inadequate technical data or supply documentation, and any unsatisfactory condition due to improper packaging which causes the material to be vulnerable to loss, delay, or damage or which imposes unnecessary expense to the U.S. Government; e.g., excessive packaging.

SUPPLY DISCREPANCY REPORT (SDR). An electronic transmission or manual form used to report a supply discrepancy. Other types of discrepancies may be reported via SDR only as specifically authorized under volume 2, chapter 18.

SUPPLY SOURCE. The Service/Agency installations or activities in their respective distribution systems designated to receive and process requisitions and related transactions; e.g., the ICP, Defense Supply Center (DSC), Integrated Material Manager (IMM), stock point, or depot.

SUPPLY SYSTEM RESPONSIBILITY ITEM (SSRI). These items are furnished by the supply system when the end item is issued and will be transferred with the end item during redistribution or other changes of custody unless otherwise specifically directed by the appropriate authority. This term equates to Components of End Item (COEI).

SYSTEM. A composite of equipment, skills, and techniques capable of performing or supporting an operations role, or both. A complete system includes all equipment, related facilities, material, software, services, and personnel required for its operation and support to the degree that it can be considered a self-sufficient item in its intended operational environment.

TARE WEIGHT. The weight of a container which, when deducted from the total weight of a shipment, provides the weight of the contents.

TECHNICAL DATA. Recorded information used to define a design and to produce, support, maintain, or operate items of material. These data may be recorded as graphic or pictorial delineations in media such as drawings or photographs; specifications or related performance of design type documents; in machine forms such as punched cards, magnetic tape, computer memory printouts; or may be retained in computer memory. Examples of recorded information include engineering drawings and associated lists specifications, standards, process sheets, manuals, technical reports, catalog item identifications, and related information.

TERMINAL

AIR. A facility for loading and unloading aircraft and the in-transit handling of traffic (passengers, cargo, and mail) moved by air.

WATER. A facility for loading and unloading vessels and the in transit handling of traffic (passenger, cargo, and mail) moved by water.

THEATER. The geographical area OCONUS for which a commander of a unified or specified command has been assigned military responsibility.

THROUGH GOVERNMENT BILL OF LADING (TGBL). A bill of lading that is issued by a U.S. Government activity to document OCONUS, intermodal, through movement of cargo from initial point of origin to final destination.

TON. A unit of measurement or weight (Short Ton (S/T) - 2,000 pounds, Long Ton (L/T) - 2,240 pounds, Measurement Ton (M/T) - 40 cubic feet, or Metric Ton (M.T.) - 1,000 kilograms (2,204.6 pounds)).

TOTAL ITEM PROPERTY RECORD. The record or record set maintained by the IMM that identifies the quantity, condition, and value of the items assets for each organizational entity having physical custody of these assets. The total item property record includes, as a minimum, material that is due in, in transit, in organic wholesale repair facilities, in a contractor's custody, on loan, onhand in wholesale distribution centers, onhand at retail activities, and for reported assets in the custody of users. (See DoD 4140.1-R).

TRADING PARTNER. A customer, supplier, or service provider; i.e., transportation carriers and manufacturers, that conducts business with a DoD activity. Trading partners are either external (commercial) or internal (DoD activities) vendors.

TRADING PARTNER AGREEMENT. A written instrument of understanding negotiated between trading partners that specifies contractual matters and protocols of Government Defense Logistics Management Standards transactions.

TRAFFIC MANAGEMENT. The direction, control, and supervision of all functions incidental to the effective and economical procurement and use of transportation services.

TRANSACTION NUMBER (OR TRANSACTION REFERENCE NUMBER). A unique reference number assigned to a transaction for identification throughout the logistics system and for the life of the transaction until its retirement is authorized in official audit reports.

TRANSACTION SET (TS). The Electronic Data Interchange (EDI) equivalent of a paper business document composed of data elements and data segments.

TRANSPORTATION CONTROL NUMBER (TCN). A data element assigned to control a shipment unit throughout the transportation pipeline.

TRANSPORTATION COSTS. Costs paid to common carriers or DoD activities to move material.

TRANSPORTATION DISCREPANCY. Any difference(s) identified between the shipment received and the shipment as documented on the bill of lading and/or governing transportation document. Such differences include but are not limited to: variations in piece count; visible/concealed damages; and improper carrier handling, service, or equipment.

TRANSPORTATION OFFICER (TO). Person(s) designated to perform traffic management functions.

TRANSPORTATION PRIORITY (TP). A number assigned to a shipment which establishes its movement precedence by air, land, or sea within the DTS.

TRANSSHIPPER. A transportation activity, other than the shipper or receiver, which handles or documents the transfer of a shipment between conveyances. A transshipper is usually a Consolidation and Containerization

Point (CCP), air Port of Embarkation (APOE) or water Port Of Embarkation (WPOE), air Port of Debarkation (APOD) or water Port Of Debarkation (WPOD), or breakbulk point. A transshipper may perform more than one type transshipment.

TYPE I SHELF-LIFE ITEM. An item of supply which is determined through an evaluation of technical test data and/or actual experience to be an item with a definite nonextendable period of shelf-life. (See Department of Defense 4140.27-M).

TYPE II SHELF-LIFE ITEM. An item of supply having an assigned shelf-life time period that may be extended after completion of inspection/test/restorative action. (See DoD 4140.27-M).

TYPES OF COUNTRY FOREIGN MILITARY SALES (FMS) OFFER/RELEASE OPTIONS. Methods by which countries participating in the FMS program advise supply sources by coded entry on requisitions whether or not prior notice to the CRs/FFs is required before release of material shipments. The type of offer/release option will be determined as a result of negotiations between the CR and the Military Service at the time the case agreement is reached and will prescribe actions required in regard to shipments against the case except when the shipping activity determines a need for added protection and/or controls covered under volume 2, chapter 5. (See DoD 5105.38-M for additional data concerning the use of these codes and complete instructions for preparing the DD Form 1513, DoD Offer and Acceptance.)

Type A. Shipments are to be released automatically by the shipping activity without advance notice.

Type X. The U.S. Service and the CRs have agreed that the:

U.S. Service will sponsor the shipment to a country address. Under this agreement, the FF code of the DD Form 1513 must be "X" and indicate Country-Within-Country (CC) (transportation mark-for addressee) and must identify the CC code and addresses for each type of address required; such as, parcel post, freight, and documentation.

Shipments are to be made to an assembly point or staging area as indicated by clear text instructions on exception requisitions. Under this agreement Block 34 of the DD Form 1513 must contain "W". A mark-for code may be entered in Block 33 and the MAPAD must contain the mark-for code if the mark-for address is to be used on the shipment to the assembly point or staging area.

Type Y. Advance NOA to the CR/FF is required before release of shipments, but shipment may be released automatically if release instructions are not received by the shipping activity within 15 days subsequent to the date of the NOA.

Type Z. Advance NOA to the CR/FF is required before release of shipment and specific release/shipping instructions must be received by the shipping activity before shipment may be made.

UNCLASSIFIED PROPERTY RECORD. A stock account belonging to a DoD activity whose mission is not classified, whereas a classified account contains information of a sensitive nature, the disclosure of which may be detrimental to the U.S. Government's interest; e.g., small arms belonging to intelligence gathering activities.

UNIFORM MATERIAL MOVEMENT AND ISSUE PRIORITY SYSTEM (UMMIPS). A system to ensure that requirements are processed under the mission of the requiring activity and the urgency of need, and to establish maximum uniform requisition processing and material movement standards. (See DoD 4140.1-R.)

UNIFORM ITEM TRACKING (UIT). A program within DoD for tracking selected items to maintain visibility of each uniquely identified asset for the primary purpose of inventory control and/or engineering analysis.

UNIQUE ITEM IDENTIFIER (UII). Identifier used in unique item tracking programs to uniquely identify an individual asset used within DoD.

UNIT LOAD. A pallet, module, or vehicle.

UNITIZED LOAD. One or more packaged items placed in a container or on a pallet and banded together as a unit.

VALIDATED DISCREPANCY REPORT. A discrepancy report in which the authorized processing point has both accepted for processing and confirmed or has a practical reason to believe the discrepancy has occurred. For adjustment purposes, an SDR for nonreceipt is considered validated when the nontraceability of the shipment is determined by the shipping office.

VALUE-ADDED NETWORK (VAN). A service provider that transmits, receives, and stores electronic data interchange messages for trading partners, as well as a wide variety of other EDI related functions.

VERSION. A title given to the updates (every 3 years) of a Defense Logistics Management Standard which has officially been approved by ANSI.

VESSEL PAPERS. An abbreviated manifest showing TCNs of breakbulk shipments loaded aboard a vessel. It can be generated electronically or manually. If the cargo includes hazardous cargo (dangerous goods), a dangerous cargo list must accompany the abbreviated manifest. Vessel papers are given to the vessel master in lieu of the manifest.

WAIVER. A written authorization to accept an item which, during manufacture or having been submitted for inspection, is found to depart from specified requirements, but is considered suitable for use "as is" or after repair by an approved method.

WEIGHT RANGE VARIATION. The weight variation between the lightest and heaviest container within each weight range of a lot. Weight range variations are the same within each lot. There are specified weight ranges for all chilled and frozen meat and meat products; i.e., 41-45 pounds, 46-50 pounds, etc. As long as the variation between the highest and heaviest container is within the specified range, a discrepancy does not exist.

WHOLESALE STOCK. Stock, regardless of funding sources, over which the IMM has asset knowledge and exercises unrestricted asset control to meet worldwide inventory management responsibilities. (See DoD 4140.1-R.)

WRONG ITEM. Any incorrect or misidentified item or unacceptable substitute item received requiring submission of a discrepancy report. See also, MISIDENTIFIED ITEM and INCORRECT ITEM.

ACRONYMS AND ABBREVIATIONS

<u>ACRONYM OR ABBREVIATION</u>	<u>DEFINITION</u>
A/A	Acceptance Alert
AAC	Acquisition Advice Code or Activity Address Code
AAFES	Army/Air Force Exchange Service
AAFM	Army/Air Force Motion Picture Service
AALPS	Automated Air Load Planning System
AB	Air Base
ACA	Airlift Clearance Authority
ACP	Allied Communications Publication
ACRN	Accounting Classification Reference Number
ADP	Automatic Data Processing
ADPE	Automatic Data Processing Equipment
ADUSD(LBS&TD)	Assistant Deputy Under Secretary of Defense (Logistics Business Systems and Technology Development)
ADUSD(L)TP	Assistant Deputy Under Secretary of Defense (Logistics) Transportation Policy
ADUSD(M&DM)	Assistant Deputy Under Secretary of Defense (Materiel and Distribution Management)
AEW&C	Aircraft Early Warning and Control
AF	Air Force
AFAO	Approved Force Acquisition Objective
AFB	Air Force Base
AFCS	Armed Forces Courier Service
AFLCR	Air Force Logistics Command Regulation
AFM	Air Force Manual
AFMC	Air Force Materiel Command
AFR	Air Force Regulation
AFRTS	Armed Forces Radio and Television Service
AGS	Armed Guard Service
AID	Agency for International Development
AIS	Automated Information System
ALC	Air Logistics Center
ALIN	Agreement Line Item Number
ALOC	Air Lines of Communication
AMARC	Aerospace Maintenance and Regeneration Center
AMC	Air Mobility Command or Army Materiel Command
AMC-R	Army Materiel Command Regulation
AMIS	Acquisition Management Information System
ANMCS	Anticipated Not Mission Capable Supply
ANSI	American National Standards Institute
AO	Accountable Office
AOCP	Aircraft Out of Commission for Parts
APL	Automated Packing List
APO	Army or Air Force Post Office
APOD	Aerial Port of Debarkation
APOE	Aerial Port of Embarkation
AR	Army Regulation or Acceptance Report

<u>ACRONYM OR ABBREVIATION</u>	<u>DEFINITION</u>
ARI	Advanced Receipt Information
ARFCOS	Armed Forces Courier Service
ASC	Accredited Standards Committee
ASD(C)	Assistant Secretary of Defense (Comptroller)
ASTM	American Society for Testing Materials
ATA	Air Transport Association or American Trucking Association
AUTODIN	Automatic Digital Network
BAC	Billing Adjustment Code
BII	Basic Issue Item
B/L	Bill of Lading
BSC	Billing Status Code
CAA	Competent Authority Approval
CAGE	Commercial and Government Entity
CAGO	Cargo Manifest Apparent Good Order
CALM	Computer Aided Load Manifest
CANUS-ILOC	Canada-United States Integrated Lines of Communication
CAO	Central Accounts Office(s) or Contract Administration Office

DEFINITION

COEI	Components of End Items
COMM RI	Communications Routing Identifier
COMSC EUR	Commander, Military Sealift Command, Europe
COMSC FE	Commander, Military Sealift Command, Far East
COMSC LANT	Commander, Military Sealift Command, Atlantic
COMSC MED	Commander, Military Sealift Command, Mediterranean
COMSC PAC	Commander, Military Sealift Command, Pacific
COMSEC	Communications Security
CONEX	Container Express
CONUS	Continental United States
CORM	Cargo Outturn Advisory and Reconciliation Message
CORMR	Cargo Outturn Advisory and Reconciliation Message Reply
CORS	Cargo Outturn Reporting System
CPP	Central Processing Point
CPU	Central Processing Unit
CR	Country Representative (FMS)
CSA	Configuration Status Accounting
CTS	Courier Transfer Station
CU	Cube
CUM	Cubic Meter
DAAS	Defense Automatic Addressing System
DAASC	Defense Automatic Addressing System Center
DAMES	DAASC Automated Message Exchange System
DAR	Defense Acquisition Regulation
DASD(MS)	Deputy Assistant Secretary of Defense (Management Systems)
DASD(P)	Deputy Assistant Secretary of Defense (Procurement)
DBOF	Defense Business Operations Fund
DBR	Detail Billing Record
DCA	Defense Communications Agency
DCMC	Defense Contract Management Command
DCS	Defense Communications System
DD	Department of Defense
DDN	Defense Data Network
DDPS	Dual Driver Protective Service
DDSC	Defense Distribution Systems Center
DECA	Defense and Economic Agreement
DEPRA	Defense Program for Redistribution of Assets
DFAMS	Defense Fuel Automated Management System
DFARS	Department of Defense Federal Acquisition Regulation Supplement
DFAS	Defense Finance and Accounting Service
DFAS-IN/AH	Defense Finance and Accounting Service, Indianapolis Center
DFR	Defense Fuel Region
DFSC	Defense Fuel Supply Center
DFSP	Defense Fuel Support Point
DGSC	Defense General Supply Center
DIA	Defense Intelligence Agency
DICOMMS	Direct Commissary Support System

<u>ACRONYM OR ABBREVIATION</u>	<u>DEFINITION</u>
DICP	Designated Intermediate Control Point
DIPEC	Defense Industrial Plant Equipment Center
DISA	Data Interchange Standards Association or Defense Information Systems Agency
DISN	Defense Integrated Services Network
DISREP	Discrepancy in Shipment Report (SF 361)
DIST CD	Distribution Code
DLA	Defense Logistics Agency
DLAH	Defense Logistics Agency Handbook
DLAM	Defense Logistics Agency Manual
DLAPS	Defense Logistics Agency Publishing System
DLAR	Defense Logistics Agency Regulation
DLMS	Defense Logistics Management System
DLMSO	Defense Logistics Management Standards Office
DLSC	Defense Logistics Services Center
DLSS	Defense Logistics System Standard(s)
DM	Data Maintenance
DMIL	Demilitarization
DMIS	Depot Maintenance Inter-Service Support
DMISA	Depot Maintenance Inter-Service Support Agreement
DNA	Defense Nuclear Agency
DoD	Department of Defense
DoDAAC	Department of Defense Activity Address Code
DoDAAD	Department of Defense Activity Address Directory
DoDAAF	Department of Defense Activity Address File
DoDAC	Department of Defense Ammunition Code
DoD CSS	Department of Defense Constant Surveillance Service

DoDDS	Department of Defense Dependent Schools
DoDI	Department of Defense Instruction
DoDIC	Department of Defense Identification Code
DOE	Department of Energy
DOT	Department of Transportation
DPM	Direct Procurement Method
DPSC	Defense Personnel Support Center
DRC	Disposal Release Confirmation
DRD	Disposal Release Denial
DRF	Disposal Release Followup
DRMO	Defense Reutilization and Marketing Office
DRMS	Defense Reutilization and Marketing Service
DRO	Disposal Release Order
DSAA	Defense Security Assistance Agency
DSC	Defense Supply Center
DSN	Defense Switched Network
DSSN	Disbursing Station Symbol Number
DTC	Delivery Term Code
DTID	Defense Turn-In Document
DTMR	Defense Traffic Management Regulation
DTS	Defense Transportation System

**ACRONYM OR
ABBREVIATION**

DEFINITION

DUNS	Data Universal Numbering System or Dun and Bradstreet
DUSD(L)	Deputy Under Secretary of Defense (Logistics)
DVD	Direct Vendor Delivery
EAM	Electronic Accounting Machine
EAP	East Asia and Pacific Region
ECS	Electronic Composing System
EDD	Estimated Delivery Date
EDI	Electronic Data Interchange
ELIN	Exhibit Line Item Number
EOCP	Engine Out of Commission for Parts
EPA	Environmental Protection Agency
EPPL	Excess Personal Property List
ERN	Excess Report Number
ESD	Estimated Shipping Date or Electrostatic Sensitive Device
ETA	Estimated Time of Arrival
ETD	Effective Transfer Date
ETM	Electrically Transmitted Message
ETR	Export Traffic Release
FAA	Foreign Assistance Act
F/AD	Force or Activity Designator
FAR	Federal Acquisition Regulation
FAS	Free Along Side
FBM	Fleet Ballistic Missile
FCA	Functional Configuration Audit
FCG	DoD Foreign Clearance Guide
FDD	Forecast Delivery Date
FEA	Functional Economic Analysis
FEDSTRIP	Federal Standard Requisitioning and Issue Procedures
FF	Freight Forwarder
FF&V	Fresh Fruit and Vegetables
FLIPL	Financial Liability Investigation of Property Lost
FLIS	Federal Logistics Information System
FMC	Federal Maritime Commission
FMS	Foreign Military Sales
FMSO	Foreign Military Sales Order
FOB	Free on Board
FOG	FEDSTRIP Operating Guide
FPMR	Federal Property Management Regulation
FPO	Fleet Post Office
FSC	Federal Supply Classification
FSG	Federal Supply Group
FSS	Forward Supply Support
FTS	Federal Telephone Service or Federal Telecommunications System
FY	Fiscal Year

<u>ACRONYM OR ABBREVIATION</u>	<u>DEFINITION</u>
GA	Grant Aid
GAA	General Agency Agreement
GAO	General Accounting Office
GBL	Government Bill of Lading
GC	General Cost
GFM	Government Furnished Material
GIM	Gaining Inventory Manager
GMPA	General Materiel and Petroleum Activity
GMT	Greenwich Mean Time
GS	Greater Security
GSA	General Services Administration
HHG	Household Goods
HHMM	Hour Hour Minute Minute

1 INTRODUCTION

1.1 PURPOSE AND SCOPE

This manual prescribes logistics management policy, responsibilities, procedures, rules, and electronic data communications standards for use in the Department of Defense for the conduct of logistics operations in the functional areas of supply, transportation, acquisition (contract administration), maintenance, and finance. These data collectively comprise the Defense Logistics Management System, or DLMS, which is a system governing logistics functional business management standards and practices rather than an automated information system. The DLMS provides an infrastructure for the participatory establishment and maintenance of procedural guidance to implement the Department's logistics policy by its user community.

This manual applies to the Office of the Secretary of Defense; the Military Services (including their National Guard and Reserve components and including the Coast Guard both when it is and when it is not operating as a Military Service in the Navy); the Chairman, Joint Chiefs of Staff (CJCS) and Joint Staff; the United and specified Commands; the Defense Agencies; and the Defense Systems Centers (Joint Logistics Systems Center (JLSC), Defense Distribution Systems Center (DDSC), Joint Transportation CIM Center (JTCC), and DAASC), hereafter referred to collectively as the DoD Components. Additionally, the manual applies, by agreement, to other external organizational entities conducting logistics operations business with DoD including (a) non-Government organizations, both commercial and nonprofit; (b) Federal agencies of the U.S. Government other than DoD; (c) foreign national governments; and (d) international government organizations. The term Military Services, as used herein, refers to the Army, the Navy, the Air Force, and the Marine Corps.

1.2 POLICY

DoD Directive 4140.1 authorizes the publication of this manual. DoD 4140.1-R establishes a configuration control board for the DLMS and prescribes use of the DLMS to implement approved DoD policy in logistics functional areas such as cataloging, inventory management, contracting, contract administration, storage, distribution and redistribution of material, transportation and movement, maintenance, property disposal, international supply support, integrated support of weapons, and billing and collections.

1.3 RESPONSIBILITIES¹

1.3.1 UNDER SECRETARY OF DEFENSE (ACQUISITION AND TECHNOLOGY) (USD(A&T))

Provide policy guidance, oversee, and direct implementation of and compliance with the DLMS, except that DoD Comptroller shall be responsible for the Finance functional area addressed under volume 7 of this manual. When carrying out their responsibility, the USD(A&T) and the DoD Comptroller, as appropriate for their respective functional areas, shall:

- Direct or approve expansion of DLMS standards in assigned functional areas or application of DLMS standards in new functional areas.
- Provide the DLMSO with policy guidance for development, expansion, improvement, and maintenance of the DLMS.

¹Responsibilities emulate those for the Defense Logistics Standard Systems and will be modified as they are redefined for implementing the DLMS under the DoD Corporate Information Management concept.

- Review and approve DLMSO plans, priorities, and schedules.
- Resolve policy and procedural issues, submitted by the CCB, which cannot be resolved within the DLMS administrative infrastructure.
- Ensure appropriate coordination with other OSD staff elements when DLMS policy guidance or directional memoranda affect assigned functions of these offices.

1.3.2 DIRECTOR, DEFENSE LOGISTICS AGENCY

Establish a Defense Logistics Management Standards Office which shall report directly to the Deputy Director, Materiel Management, DLA, for supervision and technical guidance.

Provide the necessary military and civilian personnel resources.

Provide the necessary administrative support and services, including office space, facilities, equipment, automatic data processing support, and travel expenses for DLMSO staff personnel.

1.3.3 DIRECTOR, DEFENSE LOGISTICS MANAGEMENT STANDARDS OFFICE

Administers the DLMS for assigned functional areas; receive policy guidance from the OSD proponent offices of the USD(A&T) and the DoD Comptroller, as appropriate; and receive technical guidance and supervision directly from the Deputy Director, Materiel Management, DLA. The Director, DLMSO, shall:

- Chair the DLMS CCB.
- Establish a Process Review Committee (PRC) composed of representatives from the DoD Components and participating external organizations for each of the DLMS functional areas: acquisition (contract administration), finance, maintenance, supply (including reutilization and marketing), and transportation.
- Designate a Chair and Deputy Chair for each DLMS functional area to:
 - Serve as the DoD control point and chair the PRC for that functional area.
 - Review implementation dates and plans of the DoD Components and participating external organizations and make recommendations to the CCB for improvements.
- Provide formal minutes of CCB meetings to the OSD proponent offices and DLMS CCB members.
- Establish a formal configuration control process for the DLMS.
- Perform analysis and design functions to implement new or revised policy guidance and instructions, provided by the OSD proponent offices, and to ensure the involvement of telecommunications planning in an integrated system design.
- Develop and recommend, to the appropriate OSD proponent office, new or revised policy with supporting analysis which identifies and explains process improvements and indicates methods for accomplishing the change.

- Develop, publish, and maintain the DLMS manual and related DLMS publications consistent with DoD 5025.1-M.
- Develop or evaluate proposed DLMS changes and coordinate them with the DoD Components, participating external organizations, and affected CIM activities. Provide a copy of all proposed DLMS changes to the appropriate OSD proponent office.
- Review, evaluate, and recommend improvements to curricula of DoD Component and participating external organization training schools offering DLMS-related courses.
- Assist the DoD Components and participating external organizations in resolving problems, violations, and deviations that arise during operations and are reported to the functional area administrator. Refer unresolved matters to the DLMS CCB with analysis and recommendations for resolution or corrective action.

1.3.4 HEADS OF DOD COMPONENTS AND PARTICIPATING EXTERNAL ORGANIZATIONS

Designate an office of primary responsibility for each DLMS functional area identified in subsection 1.3.3. second bullet, to serve as the control point for that functional area. Identify to the DLMSO the names of the primary and alternate PRC representatives for each functional area to:

- Serve as members on, and fulfill the responsibilities of, the PRC for that function.
- Provide the DoD Component's or external organization's position on DLMS matters and have the authority to make decisions regarding procedural aspects.
- Ensure continuous liaison with the DLMS functional area PRC Chair and with other DoD Components and participating external organizations.
- Submit proposed DLMS changes to the DLMS Logistics Data Manager (LDM) following the guidelines in chapter 5, section 5.4, of this volume. When requested by the DLMS LDM, perform the initial evaluation of proposed changes that originate within the DoD Component or participating external organization and return such proposals with the evaluation results.
- Perform the initial evaluation of beneficial suggestions originating within the DoD Component or participating external organization. For suggestions considered worthy of adoption, submit a proposed DLMS change to the DLMS LDM for processing in the normal manner. The originator's PRC representative shall determine any awards using normal DoD Component or participating external organization procedures.
- Develop and submit to the functional area administrator a single, coordinated DoD Component or participating external organization position on all proposed DLMS changes within the time limit specified. When a proposed DLMS change affects multiple DLMS functional areas, the control point for the PRC identified in the proposal shall submit the single coordinated response.
- Accomplish internal training to ensure timely and effective implementation and continued operation of the approved DLMS. Review, evaluate, and update, at least annually, curricula of internal training programs to ensure adequacy of training. Furnish a copy of initial and revised training curricula to the DLMS functional area PRC Chair.

- Accomplish internal training to ensure timely and effective implementation and continued operation of the approved DLMS. Review, evaluate, and update, at least annually, curricula of internal training programs to ensure adequacy of training. Furnish a copy of initial and revised training curricula to the DLMS functional area PRC Chair.
- Implement the approved DLMS and changes thereto. Provide the functional area PRC Chair semiannual status information concerning implementation of approved changes. RCS DD-A&T(Q&SA) 1419 applies for this requirement. Report information as of May 1st and November 1st of each year for each approved change. Begin reporting the first period following publication of the approved DLMS change. Stop reporting after identifying the approved change as fully implemented. In the final report, cite the DoD Component or participating external organization implementing publication(s) and change number(s) and identify the operating system or subsystem involved. Attach a copy of the publication change if the DLMSO is not on automatic distribution for the publication. Send the reports to the DLMS functional area PRC Chair by May 30th and November 30th of each year.
- Ensure that operating activities supporting a DLMS functional area comply with the requirements and procedures published in the DLMS manual.
- Continually review and revise internal procedures to correct misinterpretation and eliminate and prevent duplication of records, reports, and administrative functions related to the DLMS.
- Furnish to the appropriate functional area PRC Chair copies of supplemental and internal procedures, and changes thereto, related to operation of the DLMS.
- Report to the functional area PRC Chair problems, violations, and deviations that arise during system operations.
- Provide the DLA with an open rider requisition using SF 1, Printing and Binding Requisition, and bulk distribution point addresses to cover this manual and all printed changes. Send the SF 1 to:

1.3.5 CONFIGURATION CONTROL BOARD

The CCB is a joint decision-making body, established by the DUSD(L). DoD 4140.1-R contains the CCB charter which addresses the CCB organization and membership, functions, responsibilities, and administration. In general, the DLMS-CCB:

- Reviews and approves and prioritizes or disapproves proposed DLMS changes.
- Ranks and assigns a scheduled implementation date for each approved DLMS change and forwards it to the appropriate Defense Systems Center(s) for implementation, through the controlling DoD Component offices.
- Resolves referrals of documented DLMS problems, violations, and deviations which the DLMS PRCs cannot resolve. Determines resolution or corrective action. Refers such

problems which the DLMS CCB cannot resolve to the appropriate OSD proponent office for resolution.

Appendix 1A contains a list of the CCB contact points for participating Services and Agencies.

1.3.6 PROCESS REVIEW COMMITTEES

The PRCs are joint forums for each of the DLMS functional areas--acquisition (contract administration), finance, maintenance, supply (including reutilization and marketing), and transportation--responsible for development, expansion, improvement, maintenance, and administration of the DLMS. The DLMS PRCs shall:

- Be administered/controlled by the DLMS PRC Chair for the functional area.
- Consist of representatives from the DoD Components and participating external organizations.
- Meet at least quarterly, and more frequently, as needed. The PRC Chair shall, whenever practicable, announce the meeting and identify the agenda items 30 calendar days in advance of the meeting. The PRC Chair shall also issue fully documented minutes of these proceedings to each participating DoD Component or external organization, and the appropriate OSD proponent office, within 30 calendar days after the meeting.
- Review and resolve comments on DLMS proposed changes, deviations, and waivers and forward with recommendations for implementation or disapproval to the DLMS CCB. Disapprove proposed DLMS changes by unanimous agreement of the PRC.
- Review and resolve documented problems, violations, and deviations. Refer such problems which the PRC cannot resolve to the DLMS CCB for resolution.
- Ensure uniform and effective implementation of DLMS requirements by:
 - Reviewing supplemental procedures and/or implementing procedures issued by the DoD Components and participating external organizations to ensure conformance with the approved DLMS.
 - Conducting periodic evaluations to determine effectiveness of the standards.
 - Conducting reviews, through on-site visits, of selected DLMS operational areas to determine conformance with, and evaluate the effectiveness of, DLMS requirements and to interpret or provide clarification of DLMS procedures.
 - Reporting the findings and recommendations of evaluations and reviews, with comments of the, DoD Components and participating external organizations concerned, to the appropriate OSD proponent office.

Volumes 2-7 of this manual contains a listing of functional area PRC representatives as an appendix to chapter 1.

1.3.7 CENTRAL DESIGN ACTIVITY

The DAASC is the Central Design Activity (CDA) for implementing DLMS data transmission

requirements and will execute system modification taskings from DLMSO after CCB approval. Additional CDA duties include conducting physical configuration audits and facilitating functional configuration audits which assure a configuration item complies with the DLMS physical or functional configuration identification.

1.4 IMPLEMENTATION

The DLMS standards, implementation conventions (ICs), and procedures prescribed by this manual shall be implemented uniformly between DoD Components and other participating external organizations and at all levels within each DoD Component, following the CCB's established implementation schedule.

DoD Components shall give priority to development and implementation of DLMS requirements before the development and implementation of intra-DoD Component requirements.

1.5 DLMS DEVIATIONS OR WAIVERS

DoD Components and participating external organizations shall not request DLMS deviations or waivers solely to accommodate existing internal systems and procedures or organizational environments. When requesting deviations or waivers, DoD Components and participating external organizations shall submit them following the chapter 5, section 5.4 guidelines in this volume.

The functional area PRC Chair shall consider requests for DLMS deviations or waivers when the requestor demonstrates that the system cannot provide a workable method or procedure or cannot accommodate interim requirements.

1.6 REQUIREMENTS FOR NEW OR REVISED DLMS

DoD Components shall use the standards and procedures prescribed by the DLMS when undertaking development of new or revision of existing logistics systems. If a DoD Component or other participating external organization requires changes to or expansion of the existing DLMS to accommodate technological innovations planned for new system designs, they shall submit proposed DLMS changes with full justification and explanation of the intended use following the guidelines in chapter 5, section 5.4, of this volume.

Data elements employed in DoD-wide and inter-DoD Component and participating external organization logistics systems, and authoritative issuances and that have not been standardized under DoD Directive 8320.1 shall be submitted as DoD logistics standards following procedures developed under the authority of the Assistant Deputy Under Secretary of Defense for Logistics Business Systems and Technology Development (ADUSD(LBS&TD)). DoD logistics standard data elements shall be used in design and upgrading of:

- DoD-wide and inter-DoD Component automated logistics systems and authoritative issuances.
- DoD Component systems and issuances.

1.7 DISTRIBUTION OF THE MANUAL

The DLA will distribute this manual and formal changes to points designated by each DoD Component and participating external organization in their open rider requisition. Further

distribution is accomplished within each DoD Component or external organization based upon approved distribution data generated through their internal publication channels.

Nonparticipating organizations may obtain copies of the manual by contacting:

RESERVED

1.9 HOW TO USE THE DLMS MANUAL

1.9.1 STRUCTURE OF THE MANUAL

The DLMS manual consists of 7 volumes: volume 1, Concepts and Procedures; volume 2, Supply; volume 3, Transportation; volume 4, Acquisition (Contract Administration); volume 5, (Reserved), volume 6, (Reserved for Maintenance), and volume 7, Finance.

Volume 1 contains an overall Table of Contents (applicable to the entire manual); the only References, Terms and Definitions, and Acronyms and Abbreviations listings for the manual; instructions for acquiring access to the DLMS standards database; special guidance which applies to all ICs; and both functional and technical information that is relatively stable and applicable to the DLMS as a whole.

Each volume of the DLMS manual contains its own Table of Contents of procedural chapters with listings of figures, tables, and appendices with related data and ICs. The ICs explain the use of the DLMS standards for the functions addressed by that chapter. Chapter 10 of this volume explains how to read the DLMS ICs.

Each volume may also contain appendices for ICs or related data that apply to multiple chapters in the volume; however, use of any of the functional area volumes (volumes 2 -7) requires simultaneous access to volume 1.

1.9.2 NUMBERING SYSTEM

Each chapter contains numbered and titled sections and subsections, untitled paragraphs, and bullets.

- Chapters numbers are in sequence and section numbers are in sequence within the chapter beginning 1.1, 1.2, and so forth.
- Subsection numbers contain additional decimals and sequential numbers, e.g., 1.3.1, 1.3.2. Subsection numbers extend Numbering of paragraphs below the 1.1.1.1.1 level is not permitted. Unnumbered paragraphs may be used but are restricted to no more than five unnumbered consecutive paragraphs.

- The numbering structure is as follows:

1.9.3 PAGE NUMBERING

All page numbers are in the center at the bottom of the page. Numbers for preliminary pages, or front matter (Foreword, Table of Contents, References, Terms and Definitions, and Acronyms and Abbreviations) are consecutive lowercase Roman numerals (e.g., Forward i, Table of Contents iii). Numbers for text pages are Arabic numerals consisting of the chapter number followed by the page number within the chapter (e.g., 10-1 is chapter 10, page 1; 3-32 is chapter 3, page 32). Page numbers for appendices within a chapter cite the chapter number, the appendix number within a chapter, and the page number within the appendix (e.g., 10A-3 is chapter 10, appendix A, page 3). Page numbers for appendices to the volume cite only the appendix number and the page number within the appendix (e.g., A-3 is appendix A, page 3). The same numbering system applies to each volume.

2 BUSINESS CONCEPTS

2.1 OVERVIEW

The DLMS provides standard procedures and data formats to link the various component organizational elements of the defense logistics community including: ICPs, distribution depots, maintenance depots, transportation nodes, and end users in posts, camps, stations, ships, and with deployed units. The DLMS not only addresses the different functional processes of logistics but also provides standards for interchange of data across the Military Services, defense agencies, other Federal agencies, foreign national governments, international government organizations, and with nongovernment participants.

This chapter provides an overview of some of the technologies and procedures that all participants must implement to employ the DLMS across the range of participating organizations. This chapter will also provide a road map to other parts of the manual for details of specific topics.

2.2 TRANSACTION FLOW

The DLMS provides descriptive procedures, transactions, and data formats for computer-to-computer communications. The transactions initiate a logistics action; (e.g., requisition an item; authorize a funds transfer; ship an item, etc.). The transactions are structured and formatted to be computer processable without human intervention.

DAASC will act as a central node for all DLMS transactions. The transactions will flow from the originator's computer to the DAASC. The DAASC will edit the transaction for correct format, retain an image in an interactive data base for user access, route to the correct recipient. The receiving computer will process the transaction and initiate the appropriate logistics action. This action will frequently result in generation of additional DLMS transactions to other systems and/or responses back to the originator via DAASC.

The DAASC will also act as the gateway for DLMS transactions to be routed to and from FMS and contractor participants.

2.3 DATA REQUIREMENTS AND FORMATS

The DLMS utilizes ANSI ASC X12 transactions for EDI. EDI is widely used in the private sector to conduct business operations, and also between industry and the government in acquisition, transportation, finance, and other functional areas. The DLMS extends this electronic connectivity to internal DoD logistics operations.

The ANSI ASC X12 EDI standards define transactions sets which communicate business information. A transaction set may be considered the equivalent of a business form; (e.g., a purchase order, an invoice, or a requisition). The DLMS uses approximately 30 of the more than 100 transaction sets available in the ANSI ASC X12 standards. Several ANSI ASC X12 transaction sets utilized by the DLMS were developed specifically for DoD usage; however, most applications use existing commercial transaction sets.

Transaction sets consist of a group of segments in a specified order. Segments consist of one or more data elements, also in a specified order. The ANSI ASC X12 standards

define the general data characteristics and formats. DLMS implementation conventions define the specific data formats to be used in DLMS transactions and also define usage requirements (required, recommended, or optional) for inter-Service transactions. Except for the communications implementation conventions in this chapter, implementation conventions are grouped by logistics functional area in subsequent volumes of this manual. Component application systems shall conform to the requirements specified in those conventions.

2.3.1 EDITING

Data contained in DLMS transactions must be both complete and accurate for the receiving computer systems to process and act upon reliably. The following paragraphs define some principles for maintaining accurate data within the DLMS for all participants.

Edit at origin. DLMS procedures provide for recipients to edit and, if necessary, reject transactions back to the sender. To minimize the expense and delay involved in processing erroneous transactions, originating activities should apply the maximum amount of editing and validation upon their own transactions prior to transmission. Outbound transactions must meet all the requirements specified in the DLMS implementation conventions. Components may also apply more stringent or specific edit requirements as meets their needs on outbound transactions.

Use data only as defined. Data elements shall carry ONLY the data specifically defined in the DLMS implementation conventions. Capabilities exist to support S/A unique data. However, Components shall submit proposed DLMS changes, following the volume 1, chapter 5, requirements, to address any planned use.

2.3.2 ERROR PROCESSING

Eliminate unnecessary data. The DLMS implementation conventions do not require the transmission of data already available to the receiving party (e.g., to cancel a previously submitted requisition only a minimal amount of data is required). This principle should also be applied to images. Not all recipients require all the data, and images should be tailored to meet specific user requirements. This implies developing additional software at DAASC to implement rules regarding tailoring of images.

- TA1 - Interchange Acknowledgment - Use when the envelope contains an error such that the included transaction sets cannot be processed. The receiving EDI translator initiates the TA1.
- TS 997 - Functional Acknowledgment - Use by the DLMS when the transaction set contains an error which violates rules of ANSI ASC X12 syntax. The receiving EDI translator generates the 997 transaction set.
- TS 824 - Application Advice - Use when the received transaction contains an error which violates the DLMS implementation conventions. The receiving application software initiates the 824 transaction set. Not all functions may use, as some have alternative methods for notification of errors. (SUSPENDED)

Originating sites shall possess technical and procedural means to receive three transaction sets, correct errors, and retransmit appropriate data. Guidelines and procedures for defining the TA1 and TS 997 formats are in chapter 6. Guidelines and procedures for defining the TS 824 are in chapter 7.

2.3.3 CONFIGURATION CONTROL

Logistics data requirements will change over time and the DLMS must be updated to reflect those changing requirements. Chapter 5 discusses the guidelines for maintaining DLMS standards and conventions and defines the procedures for processing and recording proposed DLMS changes.

2.3.4 ENVELOPING

The DLMS supports the bundling of multiple groups of data. Specifically, multiple transactions can be bundled into a single DLMS transaction set. Multiple transaction sets of a similar type can be placed in a single functional group, and multiple functional groups can be placed in a single interchange group. The DLMS use of envelopes is consistent with ANSI ASC X12.6 standards. Refer to chapter 6 for the details of DLMS envelope usage.

2.4 COMMUNICATIONS REQUIREMENTS

The preferred method for conveying DLMS transactions from one activity to another will be by DoD and Federal electronic telecommunications networks. The DISN will be the dominant communications path.

Participating activities must all jointly use a common communications approach. Chapter 6 of this volume and DAASC procedures define specific communication requirements. The following list some highlights of the key communications requirements:

- Transmit through the DISN or other approved alternatives.
- Use the compression algorithms as defined by DAASC.
- Transaction set syntax and content shall be in accordance with ANSI ASC X12.6 standards and the implementation conventions defined in this manual.
- Transmissions shall generally not be encrypted. They may be encrypted under specific component or national command structure policy or directive. Any use of encryption must be coordinated with DAASC.
- Component activities shall maintain copies of all transmissions for at least one week, and shall be able to retransmit them at the request of the receiving party. DAASC shall retain a copy of all receipts and transmissions. The length of the retention periods will vary by the specific transaction set. DAASC procedures define the retention period for each type of transaction set.

- DLMS transactions are variable length and in many cases have no practical maximum size. However, for transmission purposes, there will be an overall maximum size imposed for transaction sets and transmission envelopes. (See chapter 6¹).

Component activities shall have the discretion to determine the technical means for achieving the formats defined above. However, components are encouraged to use a standard EDI translator to convert from their internal system files to the DLMS standards.

2.5 DAASC OPERATIONS

The DAASC is central to all DLMS operations. It performs numerous functions for DLMS operations including:

- Performing basic edits and returning any transactions with errors back to the originator.
- Archiving all received and transmitted messages, to ensure retransmission capability in the event the original message was lost due to computer or telecommunications failure.
- Generating images, as required.
- Holding or forwarding transactions per S/A profile for the recipient.
- Executing "suppress" or other national command directives.
- Loading transaction data into the LIPS.
- Coordinating and providing DoD management information on supply system performance evaluation.
- Performing additional functions for requisitioning including:
 - Rerouting of requisitions to the correct item manager, as required.
 - Managing of DEPRA actions.
- Evaluating the "to" address capability for receiving transactions in EDI versus DLSS format.

DAASC is the CDA for DLMS technical and operations support and will maintain activity profiles recording EDI capability, compression techniques, encryption techniques, communications media, and other address data of the S/As.

¹Temporary restrictions at the data element level may be imposed on translation requirements to the previous fixed-length formats.

4 ENVIRONMENTS

4.1 GENERAL INFORMATION

This chapter discusses the system architectures for processing DLMS transaction sets. It reviews the functions of EDI translation software/hardware and their relationship to component logistics application systems. The EDI translator and other portions of the systems architecture developed for the DLMS will support other EDI applications including exchanges with industry.

4.2 TRANSLATION

Translation is the automated process of transforming component data into ANSI ASC X12 (DLMS) standards for sending and receiving data. Most translation software use "table driven" routines to process regardless of the actual application being processed. Specific action is taken by the program depending on the data being processed and the particular tables associated with the transaction set.

Components may use any desired means to translate component data to the DLMS format. The DLMS standards apply to the transaction sets that result from the component processing and not how a program is designed nor how it operates. Many commercial software packages exist which provide "core translation" and other related functions that are designed to support different EDI environments. The translation software decision to "make or buy" must consider many factors, however the availability of relatively inexpensive proven commercial software packages should make development unnecessary. EDI software should be managed as "system software" not as "application software".

Another factor in determining an architecture for DLMS and EDI translation processing is the number, size, and placement of translators. Translators may be placed at each site processing DLMS transactions or established at regions to serve a number of sites. Making this determination will require a detailed analysis of transaction volumes processed by each participating site, and translation software, hardware and communications costs.

DAASC, in its role as the central site for DLMS and as a DoD distribution point for EDI communications with industry, maintains an extensive capability to translate between EDI formats and other file structures.

4.2.1 TRANSLATOR/HOST ARCHITECTURE

- Minicomputer/Microcomputer Front End - This computer serves as a front-end processor to the host system which may be type of mainframe, minicomputer, a series of microcomputers, or any combination of machines and component application systems. The translation software (to/from DLMS) resides within the microcomputer.
- Mainframe/Minicomputer - All processing (application processing and EDI translation) is performed within one computer. Outbound transactions are consolidated, translated, and transmitted. Network communications and hardware/software are under the control of the one computer.
- Stand alone Microcomputer - Outbound transactions either are entered into an application or some translation software supports direct entry of data. Translation software resides within the microcomputer and communications software/hardware

handles both inbound and outbound transactions. This approach will support only activities with very low transaction volumes and simple application systems.

4.2.2 OTHER FUNCTIONS

Other software/hardware will be required to archive data for retransmission, in case the original transaction is lost or damaged, and to compress data to minimize long-haul communications costs.

4.3 APPLICATION INTEGRATION

The translation software will need to exchange a substantial amount of data with the host application software. The primary exchanges will be transaction data. For outbound transactions, applications programs developed by the components will extract transaction data from the host application data base and reformat it into what is typically called a "flat-file" which can be processed by the EDI translator. Inbound transactions are reversed. The translator outputs the flat-file and application programs must convert the data into the proper format to be input into the application database. The characteristics of the "flat-file" are determined by the type of EDI translation software.

Translation flat-files are not the only information that must be dealt with. ADP and functional procedures must exist to manage errors for both outbound and inbound transactions. Outbound errors must be reported to both the technical and functional staffs. The cause of an error must be identified, corrected, and the data reconstructed for proper transmission. For inbound errors, the type of error needs to be identified and a decision made as to whether the data can be processed or rejected.

Activities that support multiple applications (e.g., a large post which has separate supply, transportation, and procurement systems) must be capable of evaluating inbound transactions and routing them to the proper application system. The capability for updating communications modules with trading partner communication information profiles must also exist.

4.4 SYSTEM ARCHITECTURE

The aggregation of these components in combination with the communications path is called the EDI systems architecture. The components are responsible for determining the most effective architecture(s) for their requirements. Components may vary the architecture by type of activity, (e.g., retail versus ICP). There is no DLMS restriction regarding the components architectures as long as the transactions:

- Meet DLMS format requirements, including enveloping and compression algorithms.
- Are transmitted through a DoD approved communications medium.

5 CONFIGURATION CONTROL

5.1 GENERAL INFORMATION

This chapter describes the guidelines for maintaining the DLMS standards, implementation conventions, and procedures. The configuration control process ensures the proper documentation of all proposed or approved changes to the DLMS, the tracing and reporting of these changes to the functional baseline using configuration status accounting, and the validation of the configuration identification using functional configuration audits, as required. These guidelines also apply to the DLSS¹ legacy systems changes.

5.2 MAINTAINING GUIDELINES

DLMSO oversees the implementation of the DLMS. DLMSO maintains configuration control of related standards, implementation conventions, procedures, and common support packages (e.g., versions of the ANSI ASC X12 standards), participates in the standards-setting process, and assures compliance with approved EDI standards.

5.2.1 CONFIGURATION BASELINE AND IDENTIFICATION

The DLMS Configuration Manager establishes the configuration baseline for DLMS standards and implementation conventions. A baseline plus approved changes from that baseline constitutes the current approved configuration identification.

5.2.2 CHANGE CONTROL

DLMS change control is the approval/disapproval and prioritization of configuration changes to the DLMS, promoting an integrated approach to the standardization and modernization of the DoD logistics systems. The purpose of change control is to regulate changes to the configuration identification of the DLMS. Control of changes includes documentation, justification, systematic evaluation, coordination, release, and implementation.

The change control process assures that those involved in the change process define and evaluate the full impact of a change based on the following considerations and related disciplines before making a decision to approve and implement the change:

- Functional requirements
- Change justification
- Quality assurance
- Operational readiness
- Systems interfaces
- Technical reviews
- Estimated impact on total life-cycle costs

¹ Applicable to DLSS proposed changes affecting only those legacy systems retained during the interim period pending incorporation into a CIM migration system or termination.

5.2.3 CONFIGURATION STATUS ACCOUNTING

DLMS configuration control guarantees that there is a record documenting all proposed changes. DLMS CSA provides for tracking and reporting all proposed changes to the configuration baseline and its identification documents. CSA is also a management tool for documenting the accomplishment of all related tasks resulting from changes and for updating the current configuration identification.

The DLMS Configuration Manager assures the proper recording, management, and reporting of the CSA data needed to effectively manage the configuration identification during development or modification of the DLMS.

5.2.4 DOCUMENTATION

The DLMS Configuration Manager creates a configuration record concurrently with the establishment of the functional baseline and maintains the record's documents and data in a manner that provides the continued visibility required to effectively manage the DLMS configuration. The configuration record, at a minimum, contains:

- The functional documentation comprising the configuration identification.
- The essential configuration item data elements.
- A functional economic analysis.
- All approved changes to the configuration and the implementation status of such changes.

5.2.5 FUNCTIONAL CONFIGURATION AUDIT

The DLMS Configuration Manager conducts FCAs to validate the satisfactory completion of DLMS development or modification and to assure the:

- Establishment and accuracy of the CSA system.
- Existence of a formal process for establishing the functional baseline.
- DLMS and its configuration identification meet functional requirements.
- Execution of appropriate tests, analyses, reviews, and audits; conformance with acceptance requirements; and documentation and resolution of all deficiencies.
- DLMS performs, as required, by its current functional configuration identification.
- Technical documentation accurately reflects the functional characteristics and that test and analysis data verify that the DLMS achieves the performance specified in its current functional configuration identification.

The DLMS Configuration Manager performs configuration audits at his or her discretion:

- To verify that follow-on configuration items meet their specified functional characteristics and the current configuration identification.

- When the accumulation of DLMS approved changes, deviations, and waivers (refer to chapter 1, section 1.5) warrant additional audits.
- When there is a need to validate the performance of the DLMS and/or the accuracy of its configuration identification and status accounting system.

5.3 VERSION/RELEASE

The ANSI ASC X12 version/release identifies the standard, implementation conventions, and procedures in use for generating, interpreting, and employing data in the DLMS. The DLMS will support its current release and the two previous ones. The DLMS CCB will control DLMS versions/releases. DLMS participants exchanging data should send and receive in the same standard "version" to assure the accuracy of the information exchanged.

5.4 PROPOSED CHANGES

A new requirement, a modification in design, a system deficiency, a change in DoD Logistics Policy, or an operational emergency can all cause a proposed change request. Examples of significant changes include those that create substantial life cycle cost savings, correct deficiencies, or make significant effectiveness change(s) in operational or logistics support requirements. Other changes include, but are not limited to: revisions to ICs or formats, codes, procedures, or changes requiring interface with other DoD Logistics CIMS, retail level systems, or Federal agencies. Any interested user may initiate a proposed change.

Change initiators must submit all proposed changes to DLMSO (DLMS Logistics Data Manager) for entry in the DLMS configuration control process. Appendix 5A contains the format to follow when submitting the proposed change. DLMSO is defining requirements to automate the change submission process.

5.5 CHANGE PROCESS

Appendix 5C provides a flow chart illustrating the process involved in submitting a change proposal. In summary, the processing of a change, waiver, or deviation to the DLSS or DLMS involves the following steps and the normal associated timeframes (processing will be expedited for emergency requirements):

- **Step 1.** The initiator submits a proposed change (or waiver or deviation request) in the Appendix 5A format to the DLMS LDM. The DLMS LDM assigns a change control number and enters the change in the configuration control process.
- **Step 2.** The LDM reviews the proposed change for impact on the DLMS.
- **Step 3.** The LDM then submits the proposed change to the appropriate PRC Chair (or lead PRC Chair) to review and assess any affect the proposed change may have. The PRC Chair forwards the proposed change to the S/A PRC members within 45 days of DLMSO's receipt of the proposal.
- **Step 4.** The Service and Agency PRC members assess all functional aspects and the DAASC, JLSC, JTCC, DDSC, and DISA assess all functional and/or technical aspects of the proposed DLMS change. They then submit recommendations for disposition, along with an implementation date for systems under their control, to the PRC Chair within 75 days.

- **Step 5.** The PRC Chair evaluates, reviews, and consolidates all comments on the change proposal and meets with the PRC to resolve disagreements. (A PRC may cancel a proposal, and not forward it further, if all members reach such a consensus). The PRC Chair prepares a change proposal package and forwards it to the LDM within 60 days.
- **Step 6.** The LDM reviews the change proposal package, which includes the PRC's recommendation for approval with implementation date or disapproval, for submission to the CCB. Within 14 days, the LDM schedules a CCB review of the proposed change.
- **Step 7.** The CCB approves/disapproves the change proposal package. If the CCB disapproves a proposed change, the CCB documents and records the reason(s) for disapproval and promptly returns the proposed change via route of initiation. The CCB forwards disagreements that cannot be resolved within the CCB to the appropriate staff element of the Office of the Secretary of Defense for resolution within 7 days.
- **Step 8.** The CCB prioritizes all approved changes for implementation. If the change requires DoD DISA/ANSI ASC X12 review/approval, the CCB forwards the change to DLMSO within 7 days for processing through DoD DISA/ANSI ASC X12 for ultimate implementation by the appropriate CIM system centers and DAASC. If the change does not require DoD DISA/ANSI ASC X12 review/approval, the change flows to the DAASC and the appropriate CIM system centers for implementation, through the controlling CIM office.

APPENDIX 5A

INSTRUCTIONS FOR PREPARATION OF PROPOSED DLSS/DLMS CHANGES

Services/Agencies shall submit proposed DLSS/DLMS changes in the format illustrated in this appendix and in accordance with the entry instructions provided below. Refer to section 5.4 of this volume for additional information concerning submission and processing of change requests.

1. ORIGINATOR:

a. Service/Agency: Identify the CIM, Service or Agency submitting the change request.

b. Originator: Identify the person who can discuss the concepts, needs, and the rationale underlying the proposed change. Include the name, organization and office symbol, and commercial telephone number, as a minimum. Include Defense Systems Network number, data facsimile number, and electronic-mail address, when available.

2. FUNCTIONAL AREA:

a. Primary: Identify the DLSS/DLMS functional area¹ whose systems, policies, and procedures are most affected by the change.

b. Secondary(ies): Identify any other functional area(s)¹ which may be affected by, or have an interest in, the problem or the requested change.

3. REQUESTED CHANGE:

a. Title: A brief, descriptive title for the change requested.

b. Description of Change: A brief description of: (a) the fundamental problem or issue this change seeks to resolve, and (b) the change requested.

c. Procedures: Identify needed changes to DLSS/DLMS publications to support this change and provide the specific wording for the needed changes. Include changes to the DLSS/DLMS Manual procedural text, implementation conventions, and other related appendices, as well as the relevant dictionaries (transaction set, segment, data element, and code value).

d. Alternatives: Identify and discuss alternate approaches to resolving the problem or issue.

4. REASON FOR CHANGE:

Provide background and support for the problem or issue this change attempts to resolve. Elaborate on the need for the change and place the problem in a context which allows evaluators, who are generally

¹ Acquisition (Contract Administration), Financial, Maintenance, Supply, or Transportation.

familiar with the process, to understand the full impact of the problem or issue and the impact of maintaining the status quo.

5. ADVANTAGES AND DISADVANTAGES:

a. Advantages: Identify both tangible and intangible benefits expected from adoption of the change. Include benefits both within and beyond the primary functional area of the DLSS/DLMS, especially benefits accruing to DoD. Address what happens if nothing is done. Quantify both tangible and intangible benefits and advantages. Show computation of dollar values. Demonstrate why the proposed solution is more advantageous than the alternatives.

b. Disadvantages: Indicate known or potential problems and costs associated with the proposal. Consider disadvantages both within and beyond the primary functional area of the DLSS/DLMS. Quantify both tangible and intangible costs and disadvantages. Show computation of dollar values.

6. IMPACT:

a. Transaction Set(s): Identify transaction sets which will be added, revised, or deleted as a result of this change.

b. Segment(s): Identify segments which will be added, revised, or deleted as a result of this change.

c. Data Element(s): Identify data elements which will be added, revised, or deleted as a result of this change. Include those wherein code values will be added, deleted, or revised.

d. Publication(s): Identify other DoD publications which will need to be revised to remain compatible with the DLSS/DLMS. Include suggested wording changes.

APPENDIX 5C

DLMS CHANGE PROCESS FLOW CHART

6 COMMUNICATIONS

6.1 INTRODUCTION

The DISN will be the primary communications path to convey DLMS transactions between DLMS activities. In some cases, DLMS participants will be commercial entities or foreign governments which do not have access to DISN. In these cases, DAASC will be responsible for conveying the DLMS transactions to the appropriate DoD distribution point which can link to the specific DLMS trading partner.

Within the general DISN requirements for transmitting data, the DLMS has specific capabilities and requirements for transmitting data. This chapter will identify and define these requirements and capabilities.

6.2 ENVELOPING

EDI transactions sets are transmitted within other data structures that provide telecommunication (rather than functional) information. For instance, several transaction sets (a transaction set begins with ST and ends with SE segments) can be grouped together within a transmission standard structure (called an envelope). The rules governing such multiple packaging are that: (1) only transactions of the same kind may be bundled together and (2) the group envelope within which they appear must begin with a GS (group start) segment and end with a GE (group end) segment, and (3) one or more like transaction set(s) will be contained within the GS and GE segments.

In a similar fashion, one or more transaction groups fit into a higher-level enveloping structure required for actual EDI transmission. This structure always begins with an ISA (interchange start) segment and ends with an IEA (interchange end) segment. Contained within the ISA and IEA will be one or more group control set(s). Additionally, if TA1 Interchange Acknowledgments are sent, one or more of these must appear before the occurrence of the first GS within the ISA/IEA structure. (See section 6.4.1 regarding TA1 acknowledgment.) Appendix 6A contains the complete Control Envelope IC, to include the TA1 segment for DLMS usage.

6.2.1 DESCRIPTION OF USE

The interchange header and trailer segments (ISA/IEA) along with the optional interchange acknowledgment (the TA1 constitutes the interchange control structure, i.e., an interchange envelope). Interchange control segments perform the following functions:

- Define data element separators and data segment terminators.
- Provide control information.
- Identify sender and receiver.
- Allow for authorization and security information.

The actual interchange control structure includes neither the group control structures nor the transaction control structures. ANSI ASC X12 defines the latter two as application control structures, and even their version and release may differ from those for the interchange

envelope. An interchange envelope may encompass one or more functional groups (GS/GE) which, in turn, may enclose one or more related transaction sets (ST/SE). Appendix 6A illustrates the relationship for these structures.

Since the only purpose of the GS/GE functional groups is to serve as an additional control envelope surrounding like transaction sets (within the ISA/IEA structure), for this IC, we prescribe their usage as interchange control segments.

The generic term, trading partner, has extensive use throughout the EDI community. It refers to the sender/receiver pair in an interchange. In contrast to the arrangement between many commercial or industrial trading partners, the interchange of DLMS transactions employs a central communications hub, known as the DAAS. DAAS performs several value-added functions before forwarding DLMS transactions to their ultimate receiver. Thus, DLMS interchanges occurring between S/As or between them and commercial entities always involves this central facility. For clarity within this IC, we distinguish between the intermediate communication between site and central facility and the actual exchange of EDI transactions between end-to-end entities. We characterize the intermediate interchange between DAAS and any Service, agency or commercial entity as occurring between communications partners, and we reserve the term trading partners to designate the end-to-end communicants in an interchange.

Envelope control segments have few options and, except for minor tailoring, are identical for every EDI interchange. The tailoring involves the code values selected for the GS01 and GS08 elements. GS01 classifies the particular transaction set(s) within a functional group and GS08 identifies their ANSI version and release (and the IC version itself). **It should be noted that the version and release identified in the ISA12 pertains to the control envelope not to the transactions.**

6.2.2 DATA ELEMENT, DATA SEGMENT (FILE), AND SUBELEMENT SEPARATION

6.2.2.1 DATA ELEMENT SEPARATOR

In ANSI ASC X12 documentation, the data element separator is graphically displayed as an asterisk (*). The actual data element separator employed within the interchange envelope assigns the value for the entire interchange. The first occurrence of the data element separator is at the fourth byte of the interchange control header. The value appearing there prescribes the data element separator through the next interchange trailer.

Any character can serve as a data element separator so long as: (1) it is disjoint from every other data element within an interchange and (2) it does not conflict with telecommunications protocols necessary for the transmission of the interchange. The value recommended by ANSI ASC X12, hexadecimal character 1D in ASCII, **shall** apply for use in the interchange of DLMS transactions.

6.2.2.2 DATA SEGMENT TERMINATOR

The interchange control header establishes the value to be used for segment termination within an interchange. ANSI ASC X12 documentation represents this graphically by a new line. Immediately following the ISA16 segment is the first instance of segment termination, and the data value occurring there sets the value for the interchange.

The segment terminator value must be disjoint from every other data value within an interchange and must not conflict with transmission protocols. ANSI ASC X12 recommends using the hexadecimal character 1C in ASCII for the segment terminator (file separation) character, and DLMS users **shall** set the pertinent parameter in their translation software to comply.

6.2.2.3 SUBELEMENT SEPARATOR

Designation of a subelement separator differs from the other separators. First, the ISA segment provides a discrete element (ISA16) for defining the subelement separator data value. As yet, ANSI ASC X12 supports the use of subelements (and a need for subelement separation) only in transactions employing a Composite Unit of Measure (MEA) segment.

The requirements for any separator value are disjointness and lack of conflict with other protocols. DLMS users **shall** set the applicable translation software parameter to employ the recommendation of ANSI ASC X12 for subelement separation, the hexadecimal character 1F in ASCII.

6.3 ARCHIVING AND SEMANTIC ERROR RECOVERY

6.3.1 ARCHIVING

EDI transactions will be retained online at DAASC for a period of seven days and can be accessed by the DAASC customer relations assistance desk for customer status. After successful processing, EDI transactions will be moved to the DAASC LIPS archives. The DAASC central communications facility provides significant archiving and error recovery services for DLMS trading partners. To assist with error correction, DAASC maintains cross-references between original inbound transmissions and subsequent (different) outbound transmissions. This data is forwarded to a receiving trading partner. Without these services, each end of the communication link would have to provide for extended data recovery procedures.

6.3.2 TRANSACTION (SEMANTIC) ERRORS

Semantic errors involve EDI transaction data which have been correctly formatted but whose meaning can not be correctly interpreted by the receiving application process. It is not possible to detect semantic type errors during either transmission or translation. As a result, detection of erroneous data occurring within a transaction is the responsibility of the receiving partner. Semantic errors must be determined either within the receiving application processes or by some error detection software whose editing rules are based on the receiving application. DAASC will perform certain levels of semantic error detection for DLMS transactions based on DoD standard rules and at the request of users of the central communications facility.

If after transmission and translation, semantic errors are detected, their correction may fall outside the domain of either the translation or the transmission process. Semantic errors can be corrected either within the originating application process, by error correction software whose editing rules are based on the originating application process, by error correction software whose editing rules are based on the originating application, or by default values agreed upon by both originator and receiver. At the request of users of the central communications facility, DAASC can perform various levels of semantic error correction based on computer processable editing rules.

For the originating application process to administer correction measures, it must be cognizant of what and where the error occurred. An error advice transaction must be generated by the receiving trading partner or by some error detection software outside the originating process. (See chapter 7 for details on using the TS 824 IC - Application Advice (appendix 7A), to report transaction semantic errors.)

6.4 TRANSACTION ACKNOWLEDGMENT AND ENVELOPE ERROR REPORTING

In addition to semantic errors, EDI formats are subject to failure at three additional levels: (1) transmission, (2) EDI control envelope, and/or (3) EDI transaction syntax. When successful processing is not possible due to problems within one of these levels, error recovery is performed by the central communications facility.

For incoming traffic at DAASC, successful receipt of an electronic message means that the transmission arriving is the same as that which was sent. Thus, if transmission integrity is lacking, communication protocols will require retransmission to be considered to have been successfully received at DAASC. Also, receipt of any transmission whose EDI control envelope has been corrupted, prompts DAASC to return to the sender an appropriately coded TA1 acknowledgment. (See section 6.4.1 regarding the TA1 Interchange Acknowledgment.) If the control envelope is incorrect or lacking, DAASC will treat the faulty transmission as never having been received.

After receiving a correct EDI envelope control structure, DAASC will attempt to translate the EDI format. In any case where the translation process identifies inconsistencies with agreed upon syntactical standards, DAASC will return to the sender a coded error acknowledgment transaction. (See section 6.4.2 regarding the TS 997 IC - Functional Acknowledgment.) Transactions containing syntax errors are neither forwarded on to the receiving trading partner nor retained at DAASC. They are "refused for delivery" until corrected.

The submitting party accepts and responds to the error advice transaction (e.g., TA1, Interchange Acknowledgment, or TS 997 IC - Functional Acknowledgment), corrects the error, and retransmits.

For transmissions between DAASC and the destination trading partner, the roles for error recovery are reversed. Transmission acknowledgment, EDI control envelope error detection, and EDI syntax checking are all performed within the receiver's communications and EDI translation facilities, and DAASC responds only to communications protocol TA1 or TS 997 error advice messages.

6.4.1 TA1 INTERCHANGE ACKNOWLEDGMENT¹

The convention for generating and transmitting a TA1 Interchange Acknowledgment is straightforward; that is, few options are available. The TA1 is an optional segment in the ISA control envelope which indicates whether correct and unambiguous data were received in a previous transaction envelope. The TA1 segment is used to acknowledge receipt of one interchange header and trailer envelope. For DLMS interchanges, the TA1 **shall** apply for both positive and negative acknowledgment.

The variation in content of the TA1 occurs in the last element, TA105, which defines the absence of or type of error in the recurred interchange. Receiver translation software selects

¹ Final decision regarding DLMS use of the TA1 to be made following staffing.

the error code, based on the first error type (or absence thereof) encountered, for inclusion in TA105.

As many TA1s as are practical may be included within a single ISA envelope (whose purpose may be the transmission of additional EDI transactions between an acknowledging receiver and the originator of the acknowledged transmissions). TA1 segments are placed after the ISA segment and before the first functional group (GS). Since more than one TA1 may occur within an envelope, an acknowledger may economically package several with a subsequent EDI transmission back to the originator, or send them separately in an interchange containing no other information. It is usually not necessary that an interchange envelope whose only purpose is to carry TA1 segments be returned to a sender. A separate such response envelope would be required only when the time between receipt of and acknowledgment for an EDI interchange exceeds a reasonable agreed upon threshold.

TA1 acknowledgment should not be confused with the syntactical acknowledgment provided by the TS 997 IC - Functional Acknowledgment (appendix 6B) or the semantical acknowledgment of the TS 824 IC - Rejection (appendix 7A). Furthermore, TA1 acknowledgment is distinct from network communications control protocols, which also assure both sender and receiver that damaged or unintelligible data within an interchange are discovered. TA1 acknowledgment is a strictly technical response reporting the adequacy of the interchange control information received and it disregards the status of any other data contained within the interchange. No acknowledgment is made for receipt of a TA1.

The control number in element TA101 is the control number of the interchange envelope (appearing in ISA12 and IEA02) being acknowledged. Through this control number, the TA1 links its acknowledgment with the original interchange envelope.

While the TA1 is defined by ANSI ASC X12 to be an optional segment, **the preparer of the DLMS interchange envelope shall indicate in ISA14 a request for TA1 acknowledgment.** While an acknowledger may wait to include several requested TA1s until a subsequent interchange back to the originator, all TA1 acknowledgments should occur within two hours of receipt of an interchange envelope. This timing deadline obviates prolonged retention of transmitted data by the originator. To meet it, a receiver will return a separate interchange strictly for acknowledgment, but without a request for an additional TA1.

Appendix 6A, which contains the IC for the ISA control envelope, includes the TA1 segment.

6.4.2 TRANSACTION SET 997 FUNCTIONAL ACKNOWLEDGMENT

Between DLMS trading partners, only a negative functional acknowledgment will be employed. The TS 997 IC - Functional Acknowledgment (appendix 6B) will be transmitted for any interchange whose contents can not be handled unambiguously by properly functioning EDI translation software. Note that "functional acknowledgment" might be a slight misnomer; the TS 997 merely verifies (or challenges) the syntactical correctness of (ability to translate) transaction-level data within a functional group. For DLMS interchanges, a TS 997 IC defining translation problems is exchanged not between trading partners, but between communications partners (i.e., between DAAS and either of the trading partners).

Outbound transaction sets which contain EDI syntax errors will cause an error condition at the receiving EDI translator (typically at DAASC). The receiving EDI translator will report the error back to the sender via a TS 997 IC - Functional Acknowledgment (appendix 6B). For inbound

interchanges, errors in syntax discovered by the receiver during translation will result in the generation of a TS 997 IC defining the syntactical discrepancies and the interchange will be returned to DAASC for correction and retransmission.

The TS 997 IC - Functional Acknowledgment (appendix 6B), is the IC for DoD usage in the interchange of DLMS transactions.

6.5 ADDITIONAL COMMUNICATIONS ISSUES

6.5.1 CONTROL NUMBERS

ANSI ASC X12 standards provide for syntax control on three levels: interchange, group, and transaction. Within each level, use of an identical control number exhibits a positive match between the header segment and its corresponding trailer (e.g., ISA/IEA, GS/GE, and ST/SE). The DLMS conventions specify assignment of these control numbers at each level as described in the following paragraphs.

6.5.1.1 ISA/IEA INTERCHANGE CONTROL NUMBERS (ISA13/IEA02)

The nine-digit interchange control number is assigned by the originator's translation software starting with 000000001. This control number is incremented by one for each subsequent interchange. When the number in the sequence advances to 999999999, the next interchange envelope will restart the series at 000000001.

The duplication of control number in both header and trailer segments provides the means to perceive loss of data and, of course, easily recognize duplicates. Since interchange numbers are not necessarily contiguous, the TA1 acknowledgment provides a practical means for recognizing the loss of an interchange.

6.5.1.2 ST/SE TRANSACTION SET CONTROL NUMBERS (ST02/SE02)

The originator's translation software also assigns the transaction set control number. The number starts with 0001 and increments by one for each transaction set within a functional group. (While a minimum of four digits are required, never transmit more digits than the least number needed.) The series restarts at 0001 with the next functional group sent.

6.5.1.3 GS/GE DATA INTERCHANGE CONTROL NUMBERS (GS06/GE02)

This is a one to nine-digit number assigned by the originator's translation software. The group control number sequence begins with 1 and, in contrast to the ISA control number, is incremented by one for every functional group (GS/GE) within an interchange. This number simply counts the functional groups in the interchange.

6.5.1.4 SENDER AND RECEIVER IDENTIFIERS

A DoDAAC is the usual identifier of originators and receivers of DLMS EDI transactions. All S/A requisitioning activities are assigned a DoDAAC. Commercial transportation activities without a DoDAAC assignment, who may send or receive DLMS transactions, are identified by their SCAC designation. A CAGE code identifies a commercial contractor authorized to do business with the U.S. Government. Other DLMS trading partners without an assigned DoDAAC, SCAC, or CAGE code may be distinguished either by their telephone number or their DUNS code plus four-digit telephone suffix, as coordinated by their VAN.

6.5.2 COMPRESSION

The most prominent cost in the EDI interchange is the cost of communications. Therefore, it is cost effective to reduce data to a minimum. DLMS transactions (in EDI format) require roughly twice the number of data bytes as an equivalent amount of information expressed as a continuous string. This is due to the separation of fields within variable-length records and identification of each segment within the transmission. Required control segments add slightly to the overhead as well. While increasing the number of transactions contained within an envelope is good for improving the overhead-to-data ratio, but provides only minor gains.

The most effective means available for reducing transmission size is data compression. This process uses standard pattern recognition algorithms that substitute single characters for frequently occurring patterns which the decompression process at the other end of the transmission line recognize and replace with the original patterns. Being inherently repetitious, EDI transactions are conducive to such data pattern substitutions and 40 to 80 percent reduction of the data is a realistic expectation.

Data compression is not a part of the EDI format standard. As a result, compression must occur after the EDI translation process, including generation of the control envelope, and prior to packaging the data for actual transmission. Some commercial VANs offer data compression as an optional service. Presently, DDN does not offer compression services.

For error free data recovery, it is essential that both sending and receiving software be compatible. Presently, DAASC supports PKWare compression software. As the CDA for the DLMS, DAASC is responsible for coordinating use of compression software. As with version control for EDI conventions, DAASC will manage compression software version control through trading partner profile information.

6.5.3 ENCRYPTION

Presently, DLMS transactions contain only unclassified data and there is no requirement for encryption. If encryption is required it should be coordinated through DAASC.

6.5.4 MAXIMUM SIZES

Technically, there are no limitations on the size for EDI transactions. However, there are practical limits imposed by transmission duration, speed of the translation process, storage and processing capacities of the communications system, and application systems limitations.

As a practical measure, DLMS transaction sets should be limited to not greater than one megabyte (1,000,000 bytes), uncompressed, for a single transmission envelope. Should the need arise for a larger envelope capacity, such requirement should be negotiated between the affected trading partner(s) and DAASC.

APPENDIX 6A

**INTERCHANGE ENVELOPE AND TA1 SEGMENT
STRUCTURE**

Segment: ISA Interchange Control Header

Purpose: To start and identify an interchange of zero or more functional groups and interchange-related control segments

Implementation Notes:

Use to provide translation software parameters for trading partner profiles and user-defined file structures. Except as noted, these element values remain constant (as does the trading partners profile and user defined files structure) for each type of transaction exchanged.

1. Use HEX 1D in ASCII in the fourth byte of the Interchange Control Header. This first occurrence of an element separator dictates the value the translation software will employ throughout the interchange.
2. Use HEX 1C in ASCII after ISA16. This first occurrence of a segment terminator dictates the value the translation software employs throughout the interchange.
3. See ISA16 for subelement separator usage.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	ISA01	I01	Authorization Information Qualifier Code to identify the type of information in the Authorization Information. 00 No Authorization Information Present (No Meaningful Information in I02) Code Value Implementation Note: Must use for DLMS interchanges.	M ID 2/2
Mandatory	ISA02	I02	Authorization Information Information used for additional identification or authorization of the interchange sender or the data in the interchange; the type of information is set by the Authorization Information Qualifier (I01) Implementation Note: Must fill this field with blank characters for DLMS interchanges.	M AN 10/10
Mandatory	ISA03	I03	Security Information Qualifier Code to identify the type of information in the Security Information. 00 No Security Information Present (No Meaningful Information in I04) Code Value Implementation Note: Must use for DLMS interchanges.	M ID 2/2
Mandatory	ISA04	I04	Security Information This is used for identifying the security information about the interchange sender or the data in the interchange; the type of information is set by the Security Information Qualifier (I03) Implementation Note: Must fill this field with blank characters for DLMS interchanges.	M AN 10/10
Mandatory	ISA05	I05	Interchange ID Qualifier Qualifier to designate the system/method of code structure used to designate the sender or receiver ID element being qualified. 10 Department of Defense (DoD) Activity Address Code 12 Phone (Telephone Companies)	M ID 2/2

		Code Value Implementation Note: <i>Use to identify a sender not assigned a DoDAAC.</i>		
Mandatory	ISA06 I06	Interchange Sender ID Identification code published by the sender for other parties to use as the receiver ID to route data to them; the sender always codes this value in the sender ID element	M AN	15/15
		Implementation Note: <i>Use trailing blank characters to left justify.</i>		
Mandatory	ISA07 I05	Interchange ID Qualifier Qualifier to designate the system/method of code structure used to designate the sender or receiver ID element being qualified. 10 Department of Defense (DoD) Activity Address Code 12 Phone (Telephone Companies)	M ID	2/2
		Code Value Implementation Note: <i>Use to identify a receiver not assigned a DoDAAC.</i>		
Mandatory	ISA08 I07	Interchange Receiver ID Identification code published by the receiver of the data. When sending, it is used by the sender as their sending ID, thus other parties sending to them will use this as a receiving ID to route data to them.	M AN	15/15
		Implementation Note: <i>Use trailing blank characters to left justify.</i>		
Mandatory	ISA09 I08	Interchange Date Date of the interchange.	M DT	6/6
		Implementation Notes: 1. Express the originating activity's date in GMT. 2. Express the date in a six-position (YYMMDD) format.		
Mandatory	ISA10 I09	Interchange Time Time of the interchange.	M TM	4/4
		Implementation Notes: 1. Express the originating activity's time in GMT. 2. Express time in a four-position (HHMM) format.		
Mandatory	ISA11 I10	Interchange Control Standards Identifier Code to identify the agency responsible for the control standard used by the message that is enclosed by the interchange header and trailer. U U.S. EDI Community of ASC X12, TDCC, and UCS	M ID	1/1
Mandatory	ISA12 I11	Interchange Control Version Number This version number covers the interchange control segments.	M ID	5/5
		Implementation Note: <i>Use to identify the ASC X12 version and release for the interchange envelope.</i> 00304 Draft Standards for Trial Use Approved for Publication by ASC X12 Procedures Rev		
Mandatory	ISA13 I12	Interchange Control Number A control number assigned by the interchange sender	M NO	9/9

Implementation Note:

In the first DLMS interchange, cite 000000001. In subsequent DLMS interchanges, increment the control number by 1 (up to 999999999), after which the DLMS originator again cites 000000001.

Mandatory

ISA14 I13 **Acknowledgment Requested** M ID 1/1
Code sent by the sender to request an interchange acknowledgment (TA1)

1 Interchange Acknowledgment Requested

Code Value Implementation Note:

Use in DLMS interchanges until DoD central authority issues countermanding decision.

Mandatory

ISA15 I14 **Test Indicator** M ID 1/1
Code to indicate whether data enclosed by this interchange envelope is test or production.

P Production Data

Code Value Implementation Note:

Use to identify all data, including mission exercise transactions, other than transaction test data.

T Test Data

Code Value Implementation Note:

Use when testing transaction interchanges.

Mandatory

ISA16 I15 **Component Element Separator** M AN 1/1
This field provides the delimiter used to separate component data elements within a composite data structure; this value must be different than the data element separator and the segment terminator

Implementation Note:

Use HEX 1F in ASCII to separate subelements.

Segment: TA1 Interchange Acknowledgment

Purpose: To report the status of processing a received interchange header and trailer or the non-delivery by a network provider

Implementation Note:

Use to report control envelope error status or to respond to an originator's request for an envelope receipt. All DLMS interchanges request TA1 receipts.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	TA101 I12	Interchange Control Number A control number assigned by the interchange sender	M NO 9/9
		Implementation Note: Cite the control number assigned to the original interchange control header being acknowledged.	
Mandatory	TA102 I08	Interchange Date Date of the interchange.	M DT 6/6
		Implementation Notes: 1. Use the date of the originating activity's interchange acknowledgment request. 2. Express the originating activity's date in GMT. 3. Express the date in a six-position (YYMMDD) format.	
Mandatory	TA103 I09	Interchange Time Time of the interchange.	M TM 4/4
		Implementation Notes: 1. Use the time of the originating activity's interchange acknowledgment request. 2. Express the originating activity's time in GMT. 3. Express time in a four-position (HHMM) format.	
Mandatory	TA104 I17	Interchange Acknowledgment Code This indicates the status of the receipt of the interchange control structure. A The Transmitted Interchange Control Structure Header and Trailer Have Been Received and Have No Errors. Code Value Implementation Note: Must use when TA105 cites code 000. R The Transmitted Interchange Control Structure Header and Trailer are Rejected Because of Errors. Code Value Implementation Note: Use to identify a single error. Must generate additional TA1 segments to report multiple errors.	M ID 1/1
Mandatory	TA105 I18	Interchange Note Code This numeric code indicates the error found processing the interchange control structure. Implementation Note: Use as needed to identify control envelope status. 000 No error 001 The Interchange Control Number in the Header and Trailer Do Not Match. The Value From the Header is Used in the Acknowledgment. 002 This Standard as Noted in the Control Standards Identifier is Not Supported.	M ID 3/3

- 027 Invalid Component Element Separator

Segment: GS Functional Group Header

Purpose: To indicate the beginning of a functional group and to provide control information

- Semantic:**
1. GS04 is the Group Date.
 2. GS05 is the Group Time.
 3. The data interchange control number GS06 in this header must be identical to the same data element in the associated Functional Group Trailer GE02.

Comment: A functional group of related transaction sets, within the scope of X12 standards, consists of a collection of similar transaction sets enclosed by a functional group header and a functional group trailer.

Implementation Note:

Use to identify the functional group containing one or more related transactions.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
GS01	479	Functional Identifier Code	M	ID	2/2
Code identifying a group of application related Transaction Sets.					

Implementation Note:

For DLMS interchanges, use only one of the following codes to identify the transaction set type contained within a functional group.

- AG Application Advice (824)
- AN Return Merchandise Authorization and Notification (180)
- AW Warehouse Inventory Adjustment Advice (947)
- CD Credit/Debit Adjustment (812)
- D3 Contract Completion Status (567)
- D4 Contract Abstract (561)
- D5 Contract Payment Management Report (568)
- FA Functional Acknowledgment (997)
- IB Inventory Inquiry/Advice (846)
- IN Invoice Information (810,819)
- LR Logistics Reassignment (536)
- MD Department of Defense Inventory Management (527)
- MV Material Obligation Validation (517)
- NC Nonconformance Report (842)
- OW Warehouse Shipping Order (940)
- PS Planning Schedule with Release Capability (830)
- PT Product Transfer and Resale Report (867)
- QG Product Information (878, 879, 888, 889, 893, 896)
- RC Receiving Advice/Acceptance Certificate (861)
- RN Requisition Transaction (511)
- RS Order Status Information (869, 870)
- SH Ship Notice/Manifest (856)
- SI Shipment Information (858)

			SW Warehouse Shipping Advice (945)			
			WA Product Service Transaction Sets (140, 141, 142, 143)			
Mandatory	GS02	142	Application Sender's Code Code identifying party sending transmission. Codes agreed to by trading partners.	M	AN	2/15
			Implementation Notes: 1. Must use the originating activity's six-character DoDAAC, if assigned. If not assigned a DoDAAC, use a SCAC, if assigned. Otherwise use the telephone number coordinated with the originating activity's VAN. 2. Transmit the required number of characters without leading or trailing blanks.			
Mandatory	GS03	124	Application Receiver's Code Code identifying party receiving transmission. Codes agreed to by trading partners.	M	AN	2/15
			Implementation Notes: 1. Must use the receiving activity's six-character DoDAAC, if assigned. If not assigned a DoDAAC, use a SCAC, if assigned. Otherwise, use the telephone number coordinated with the receiving activity's VAN. 2. Transmit the required number of characters without leading or trailing blanks.			
Mandatory	GS04	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Notes: 1. Express the originating activity's date in GMT. 2. Express the date in a six-position (YYMMDD) format.			
Mandatory	GS05	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	M	TM	4/8
			Implementation Notes: 1. Express the originating activity's time in GMT. 2. Express time in a four-position (HHMM) format.			
Mandatory	GS06	28	Group Control Number Assigned number originated and maintained by the sender.	M	NO	1/9
			Implementation Note: DLMS originating activities cite 1 for the first functional group transmitted within a control envelope. Increment subsequent group control numbers within that envelope by 1 (up to 999999999). Transmit the required number of characters without leading or trailing blanks.			
Mandatory	GS07	455	Responsible Agency Code Code used in conjunction with Data Element 480 to identify the issuer of the standard. X Accredited Standards Committee X12	M	ID	1/2

Mandatory	GS08	480	Version / Release / Industry Identifier Code Code indicating the version, release, subrelease, and industry identifier of the EDI standard being used, including the GS and GE segments. If code in DE455 in GS segment is X, then in DE 480 positions 1-3 are the version number; positions 4-6 are the release and subrelease, level of the version; and positions 7-12 are the industry or trade association identifiers (optionally assigned by user). If code in DE455 in GS segment is T, then other formats are allowed.	M	AN	1/12
-----------	------	-----	---	---	----	------

Implementation Notes:

1. Use to identify the version/release of the transaction sets within a functional group.
2. Use three additional characters, "DLM" in positions 7-9, followed by a two or three-digit designator (positions 10-12), with an assumed decimal after the first character, to identify the applicable version/release of the DLMS implementation convention.

003040 Draft Standards Approved for Publication by ASC X12 Procedures Review Board through October 1993

003041 Draft Standards Approved for Publication by ASC by ASC X12 Procedures Review Board through February 1994

003042 Draft Standards Approved for Publication by ASC X12 Procedures Review Board through June 1994

Segment: GE Functional Group Trailer

Purpose: To indicate the end of a functional group and to provide control information

Semantic: The data interchange control number GE02 in this trailer must be identical to the same data element in the associated Functional Header GS06.

Comment: The use of identical data interchange control numbers in the associated functional group header and trailer is designed to maximize functional group integrity. The control number is the same as that used in the corresponding header.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	GE01	97	Number of Transaction Sets Included Total number of transaction sets included in the functional group or interchange (transmission) group terminated by the trailer containing this data element.	M	N0	1/6
Implementation Notes:						
1. Use to identify the number of ST segments (transactions) within a functional group.						
2. Transmit the required number of characters without leading or trailing blanks.						
Mandatory	GE02	28	Group Control Number Assigned number originated and maintained by the sender.	M	N0	1/9

Implementation Note:

DLMS originating activities cite 1 for the first functional group transmitted within a control envelope. Increment subsequent group control numbers within that envelope by 1 (up to 999999999). Transmit the required number of characters without leading or trailing blanks.

Segment: IEA Interchange Control Trailer

Purpose: To define the end of an interchange of zero or more functional groups and interchange-related control segments

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	IEA01	I16	Number of Included Functional Groups	M NO 1/5
			A count of the number of functional groups included in an interchange	

Implementation Notes:

1. Use to identify the number of GS segments (functional groups) within an interchange.
2. Transmit the required number of characters without leading or trailing blanks.

Mandatory	IEA02	I12	Interchange Control Number	M NO 9/9
			A control number assigned by the interchange sender	

Implementation Note:

In the first DLMS interchange, cite 000000001. In subsequent DLMS interchanges, increment the control number by 1 (up to 999999999), after which the DLMS originator again cites 000000001.

APPENDIX 6B

TRANSACTION SET 997 IMPLEMENTATION CONVENTION - FUNCTIONAL ACKNOWLEDGMENT

997 Functional Acknowledgment

This Draft Standard for Trial Use contains the format and establishes the data contents of the Functional Acknowledgment Transaction Set (997) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Implementation Notes

1. Organizations use this transaction set only to acknowledge a functional group containing syntactical errors.
2. Use a single occurrence of this transaction set to transmit a single acknowledgment of a functional group containing one or more syntactical errors.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
3	010	ST	Transaction Set Header	M	1	
4	020	AK1	Functional Group Response Header	M	1	
		LOOP ID - AK2				999999
6	030	AK2	Transaction Set Response Header	O	1	
		LOOP ID - AK3				999999
8	040	AK3	Data Segment Note	O	1	
9	050	AK4	Data Element Note	O	99	
11	060	AK5	Transaction Set Response Trailer	M	1	
12	070	AK9	Functional Group Response Trailer	M	1	
13	080	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

- 1/010** These acknowledgments shall not be acknowledged, thereby preventing an end-less cycle of acknowledgments of acknowledgments.
- 1/010** The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.
- 1/010** There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.
- 1/020** AK1 is used to respond to the functional group header and to start the acknowledgement for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.
- 1/030** AK2 is used to start the acknowledgement of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.

1/040 The data segments of this standard are used to report the results of the syntactical analysis of the functional groups of transaction sets; they report the extent to which the syntax complies with the standards for transaction sets and functional groups. They do not report on the semantic meaning of the transaction sets (for example, on the ability of the receiver to comply with the request of the sender).

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Max Use: 99
Purpose: To report errors in a data element and to identify the location of the data element.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	AK401	C030	POSITION IN SEGMENT Code indicating the relative position of a simple data element, or the relative position of a composite data structure combined with the relative position of the component data element within the composite data structure, in error; the count starts with 1 for the simple data element or composite data structure immediately following the segment ID	M
Mandatory	AK401 - 1	722	Element Position in Segment This is used to indicate the relative position of a simple data element, or the relative position of a composite data structure with the relative position of the component within the composite data structure, in error; in the data segment the count starts with 1 for the simple data element or composite data structure immediately following the segment ID	M NO 1/2
Implementation Note: Use to indicate the relative position of the syntactical error (For example, the data element number for this AK402 element is 725.)				
Optional	AK401 - 2	1528	Component Data Element Position in Composite To identify the component data element position within the composite that is in error	O NO 1/2
Optional	AK402	725	Data Element Reference Number Reference number used to locate the data element in the Data Element Dictionary.	O NO 1/4
Implementation Note: Use to indicate the data element number of the element in error. (For example, the data element number for this AK402 element is 725.)				
Mandatory	AK403	723	Data Element Syntax Error Code Code indicating the error found after syntax edits of a data element. 1 Mandatory data element missing 10 Exclusion Condition Violated 2 Conditional required data element missing. 3 Too many data elements. 4 Data element too short. 5 Data element too long.	M ID 1/3

- 6 Invalid character in data element.
- 7 Invalid code value.
- 8 Invalid Date
- 9 Invalid Time

Optional

AK404 724 Copy of Bad Data Element

O AN 1/99

This is a copy of the data element in error.

Implementation Note:

Use as needed for a manual back-up for the transaction set being acknowledged.

Segment: **AK5** Transaction Set Response Trailer
Level: Header
Loop: AK2
Usage: Mandatory
Max Use: 1
Purpose: To acknowledge acceptance or rejection and to report errors in a transaction set.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	AK501	717	Transaction Set Acknowledgment Code Code indicating accept or reject condition based on the syntax editing of the transaction set. E Accepted But Errors Were Noted R Rejected	M ID 1/1
Optional	AK502	718	Transaction Set Syntax Error Code Code indicating error found based on the syntax editing of a transaction set. 1 Transaction Set Not Supported 2 Transaction Set Trailer Missing 23 Transaction Set Control Number Not Unique within the Functional Group 3 Transaction Set Control Number in Header and Trailer Do Not Match 4 Number of Included Segments Does Not Match Actual Count 5 One or More Segments in Error 6 Missing or Invalid Transaction Set Identifier 7 Missing or Invalid Transaction Set Control Number	O ID 1/3
Not Used	AK503	718	Transaction Set Syntax Error Code	O ID 1/3
Not Used	AK504	718	Transaction Set Syntax Error Code	O ID 1/3
Not Used	AK505	718	Transaction Set Syntax Error Code	O ID 1/3
Not Used	AK506	718	Transaction Set Syntax Error Code	O ID 1/3

Segment: **AK9 Functional Group Response Trailer**
Level: Header
Loop: ____
Mandatory
Usage: Mandatory
Max Use: 1
Purpose: To acknowledge acceptance or rejection of a functional group and report the number of included transaction sets from the original trailer, the accepted sets, and the received sets in this functional group.
Comment: If AK901 is 'A' or 'E', then the transmitted functional group is accepted. If AK901 is 'R', then the transmitted group is rejected.

Implementation Notes:

1. Use only to indicate accepted with errors or rejected.
2. See transaction set acknowledgment discussion in volume 1, chapter 6.

Data Element Summary

------	-----	--	----------

Implementation Note:

Must use the same number cited in ST02.

7 APPLICATION ERRORS (SUSPENDED¹)

7.1 INTRODUCTION

A variety of different application systems used by the different Services, Defense, and Federal agencies, contractors, and foreign governments will exchange DLMS transaction sets. The primary purpose of this manual is to establish standards through which all of these varied systems can work in unison. This unison will be both on a technical and functional basis. If systems comply fully with these standards errors should not occur. None-the-less, errors will occur due to various circumstances and a mechanism must exist for dealing with them. This chapter describes that mechanism.

The primary means for reducing errors is for each Component to ensure that outbound transactions are thoroughly edited to fully comply with these standards as well as any Component requirements. Still, receiving applications will likely perform edits to preclude processing erroneous transactions that may cause incorrect actions, disrupt the integrity of other data, or even disrupt the operation of the system as a whole.

When receiving applications apply edit checks and determine errors, the errors will be reported back to the originating activity using the TS 824 IC - Rejection (appendix 7A).

7.2 TRANSACTION SET 824 REJECT APPLICATION

The reject transaction set will convey the following information when reporting errors to the originator:

- Table 1 data:
 - The transaction set number of the erroneous transaction set (DLMS will not use interchange and Functional group identifications in reject reporting).
 - The DoDAACs of the rejecting and originating organizations.
- Table 2 data:
 - The transaction number of the erroneous transaction.
 - The Application Error Condition Code identifying the type of error.
 - A copy of the bad data element.
 - A free-form text message describing the error, which the rejecting software can add as an option.

A single reject will report errors identified only in a single transaction set. However, errors in multiple transactions or lines contained within that transaction set may all be reported in a single reject. If multiple errors occur within a single transaction within the set, the reject has

¹ This chapter is suspended pending approval of ANSI ASC X12 data maintenance 672394, initiated by the ANSI ASC X12 Finance Subcommittee, to enable application program recognition of rejection data. If the data maintenance action is not approved, DLMSO will revise DLMS transaction reporting transaction sets, as needed, to include a transaction set purpose code for rejection and reject advice codes for rejection capability.

the capability to transmit them; however, the application generating the reject is obligated to report only the first detected fatal error in any given transaction.

Routing of the reject is from the rejecting activity to the sending activity. This will typically lead to one of two scenarios:

- **The DAASC Rejects the Transaction** - In this case the DAASC, using the TS 824 IC - Rejection (appendix 7A), will report the error back to the originating activity which must correct the transaction and retransmit it.
- **An Activity Rejects a Transaction from the DAASC** - In this case, an activity which receives a transaction from DAASC reports the error back to the DAASC using the TS 824 IC - Rejection (appendix 7A). DAASC will compare the reject information to an image of the transaction as they received it from the originating activity. If DAASC determines that they caused the error, they will correct and retransmit it. If DAASC determines the originating activity caused the error, then DAASC will initiate another reject back to the originating activity, as in the first scenario.

The TS 824 IC - Rejection (appendix 7A) applies to rejecting transactions for all DLMS functional areas. The implementation convention requires use of DLMS reject reason codes which will support all functional areas and all DLMS transaction sets.

7.2.1 SUMMARY OF USE

Service and Agency application programs follow the TS 824 IC - Rejection (appendix 7A) to reject a received transaction which the application program cannot process back to the sending activity. The reject transaction set reports the unique transaction number of the erroneous transaction and codes identifying one or more specific error conditions.²

7.2.2 CHARACTERISTICS OF USE

7.2.2.1 EDI TRANSLATOR IDENTIFIED ERRORS

The use of the TS 824 IC - Rejection (appendix 7A) in some cases closely parallels generation of rejects by the receiving activity's EDI translator. The translator should identify any of the following types of errors:

- Errors in the ISA/IEA Envelope segments.
- Errors in the GS/GE functional groups segment.
- Errors in a transaction set. Typical of this type of error is:
 - Failure to use an ANSI ASC X12 mandatory or DLMS required segment or data element.

² The TS 824 IC - Rejection (appendix 7A) presumes that each business application contains a unique tracking number in table 1. However, the DLMS ICs in this manual do not require such a number. DLMSO is reconsidering the entire concept for transaction rejection, including the possibility of covering such rejection in the applicable business application transaction sets. The data element 1270, Qualifier Code GT, consolidated list of reject reason codes for all application is also to be finalized at a later date.

- Use of an ANSI ASC X12 code which is not included in the DLMS implementation conventions.³

7.2.2.2 APPLICATION IDENTIFIED ERRORS

Even with stringent editing performed by the EDI translator, some error conditions will occur which only the more complex application program edits can identify. Such errors could include:

- Invalid item identification.
- Quantity of zero when a quantity is required.
- Invalid DLMS code received in LQ02.³

The TS 824 IC - Rejection (appendix 7A) applies only when a received DLMS transaction set fails to comply with the rules/format specified in the DLMS implementation convention.

7.2.2.3 VIOLATIONS OF BUSINESS PROCESS RULES

The TS 824 - Rejection (appendix 7A) does not apply when specifying violation of Service, Agency, or activity business policies such as:

- Requisitioning excess quantities.
- Requisitioning material which the user is not authorized to receive.
- Requisition to an incorrect source of supply.

Reporting these types of errors is accomplished through the transaction set specified in the appropriated functional volume. Frequently, the same transaction set number used in the erroneous transaction set applies for reporting back the errors.

7.2.2.4 DAASC RECEIPT AND GENERATION OF TRANSACTION SET 824 REJECTS

As the DAASC receives DLMS interchange envelopes it will process the data through an EDI translator and then break the contents down to the transaction level. DAASC will apply applicable DLMS edit checks on received transactions prior to loading them into LIPS. If DAASC software detects a nonbusiness-process error, it will reject the transaction back to the sender using the TA1 Interchange Acknowledgment, TS 997 IC - Functional Acknowledgment (appendix 6B), or the Reject following the TS 824 IC - Rejection (appendix 7A), as applicable.

DAASC will load transactions which do not contain errors into the LIPS.

Application software which receives data sent from the DAASC and detects nonbusiness-process errors in a transaction shall follow the TS 824 IC - Rejection to reject the transaction to the DAAS, not to the activity originating the transaction. The DAASC will access the transaction identified in the reject and compare the image the DAASC received from the

³ There is some question whether the translator will edit for authorized codes; such an edit might significantly slow throughput.

originator to the image the DAASC retransmitted. If the two images are different, then DAASC will correct the transaction and retransmit it. If the two images are the same, DAASC will forward the reject to the originating activity.

7.3 LEVELS OF ERRORS

Organizations receiving DLMS transactions shall follow the TS 824 IC - Rejection (appendix 7A) to report errors only when the error is so substantial that the receiving application software cannot process the transaction. The receiving translator (or application software if the translators do not detect the error) shall reject a transaction whenever segment(s) or data element(s) identified as mandatory or required by the DLMS implementation conventions are not present.

Other "non-fatal" errors, such as failing to transmit recommended data elements, that still allow the transaction to be processed, are not subject to reject. Receiving organizations which identify a high number of "non-fatal" errors originating from a single activity shall notify that activity in writing and send a copy of the correspondence to their own and the offending organization's functional area PRC representative and to the DLMSO PRC Chair.

Segments and data elements listed as optional in the DLMS implementation convention are optional at the discretion of the transmitting activity. The receiving translator or application software shall never reject a transaction based on omission of optional segments or elements.

APPENDIX 7A

**TRANSACTION SET 824 IMPLEMENTATION CONVENTION -
REJECTION
(SUSPENDED)**

824 Application Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Application Advice Transaction Set (824) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the ability to report the results of an application system's data content edits of transaction sets. The results of editing transaction sets can be reported at the functional group and transaction set level, in either coded or free-form format. It is designed to accommodate the business need of reporting the acceptance, rejection or acceptance with change of any transaction set. The Application Advice should not be used in place of a transaction set designed as a specific response to another transaction set (e.g., purchase order acknowledgement sent in response to a purchase order).

Implementation Notes

1. Organizations use this transaction set to reject transactions based on errors detected by business application programs. The transaction set identifies the error, specifies the incorrect data, and provides correct data when known and applicable. Transaction Set 824 eliminates the need for reporting application system edit errors via phone, facsimile or mailed paper reports.

a. Do not use Transaction Set 824 to report errors found in transactions by receiving application systems that still accepted and processed the erroneous transaction. Report such "non-fatal" errors to the originator by other transaction sets or means.

b. Do not use Transaction Set 824 to communicate edit errors detected on the 824 transaction set itself. Report these errors by manual means.

c. Translation software should detect EDI compliance errors and reject erroneous transactions via a 997 transaction set, thus preventing these errors from reaching the application software. However, it may be the case that the application routines will need to detect invalid code errors.

2. Use a single occurrence of this transaction set to transmit transaction rejections and to identify application system error data, when known and as applicable. Use one occurrence of this transaction set to transmit a single or multiple rejected transactions and associated error data. Use the 2/OT/010 and 2/TED/070 loops to identify the rejected transactions and application system errors, respectively.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
3	010	ST	Transaction Set Header	M	1	
4	020	BGN	Beginning Segment	M	1

17	085	LM	Code Source Information	O	1
18	086	LQ	Industry Code	M	100
19	090	SE	Transaction Set Trailer	M	1

NOTES/COMMENTS:

2/020 REF segments can be used as needed to further identify the original transaction set.

2/085 Use of the LM loop is limited to the identification of industry unique application error conditions.

Segment: **ST** Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
			824 X12.44 Application Advice			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Mandatory

Segment: BGN Beginning Segment

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of a transaction set.

Syntax: C0504 — If BGN05 is present, then BGN04 is required.

Semantic: 1. BGN02 is the transaction set reference number.

2. BGN03 is the transaction set date.

3. BGN04 is the transaction set time.

4. BGN05 is the transaction set time qualifier.

5. BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
BGN01	353	Transaction Set Purpose Code	M	ID	2/2
		Code identifying purpose of transaction set.			
		00 Original			
		77 Simulation Exercise			
		Code Value Implementation Note:			
		Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.			

Mandatory

BGN02	127	Reference Number	M	AN	1/30
		Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
		Implementation Note:			
		Use to uniquely identify this transaction set for archival/audit purposes. BGN02 identifies this 824 transaction set, NOT the transaction being rejected.			

Mandatory

BGN03	373	Date	M	DT	6/6
		Date (YYMMDD).			
		Implementation Notes:			
		1. Use to indicate the date the sender's application program generated this transaction set to reject a transaction previously received.			
		2. Express the originating activity's date in GMT.			

Required

BGN04	337	Time	C	TM	4/8
		Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)			

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Required	BGN05	623	Time Code	O	ID	2/2
			Code identifying the time. In accordance with International Standards Organization standard 8601, time can be specified by a + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time. Since + is a restricted character, + and - are substituted by P and M in the codes that follow.			
			GM Greenwich Mean Time			
Not Used	BGN06	127	Reference Number	O	AN	1/30
Not Used	BGN07	640	Transaction Type Code	O	ID	2/2
Optional	BGN08	306	Action Code	O	ID	1/2
			Code indicating type of action.			
			U Reject			

Code Value Implementation Note:
Used to indicate application rejection.

Required

Segment: N1 Name

Level: Header

Loop: N1 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/030 loop will, as a minimum, cite the organization originating the transaction set and the organization to receive the transaction set.

2. Use the 1/N1/030 loop to identify the organization rejecting the transaction, the organization which transmitted the rejected transaction, and any organization(s) designated to receive copies of the rejection.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		CJ Automated Data Processing (ADP) Point	
		Code Value Implementation Note:	
		Use to indicate the organization rejecting the transaction.	
		QD Responsible Party	
		Code Value Implementation Note:	
		Use to identify the organization which transmitted the rejected transaction set.	
		Z1 Party to Receive Status	
		Code Value Implementation Note:	
		Use to indicate the party to receive status when different from Service/Agency prescribed status recipient. Use multiple iterations of the 1/N1/030 loop to identify all status recipients, as required.	
N102	93	Name	C AN 1/35
N103	66	Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	
		10 Department of Defense Activity Address Code (DODAAC)	
		M4 Department of Defense Routing Identifier Code (RIC)	
N104	67	Identification Code	C AN 2/20
		Code identifying a party or other code.	

Not Used

Required

Required

Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N1/030 code to indicate the organizations sending and receiving the transaction set.

FR Message From**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional	Segment: REF Reference Numbers				
	Level: Header				
	Loop: N1				
	Usage: Optional				
	Max Use: 12				
Mandatory	Purpose: To specify identifying numbers.				
	Syntax: R0203 — At least one of REF02 or REF03 is required.				
	Implementation Note:				
	<i>Use a single repetition, as needed, within each 1/N1/030 loop iteration, to indicate the office symbol as activity code for the party identified in 1/PER/080.</i>				
	Data Element Summary				
Mandatory	REF DES.	DATA ELEMENT	NAME	ATTRIBUTES	
	REF01	128	Reference Number Qualifier	M	ID 2/2
			Code qualifying the Reference Number.		
			KU Office Symbol		
			Code Value Implementation Note:		
Required			<i>Use to indicate the attention symbol/code of action for the specified point of contact.</i>		
	REF02	127	Reference Number	C	AN 1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.		
Not Used	REF03	352	Description	C	AN 1/80

Optional

Segment: PER Administrative Communications Contact

Level: Header

Loop: N1

Usage: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

Syntax: 1. P0304 — If either PER03 or PER04 is present, then the other is required.

2. P0506 — If either PER05 or PER06 is present, then the other is required.

3. P0708 — If either PER07 or PER08 is present, then the other is required.

Implementation Notes:

1. Use multiple repetitions as needed within each 1/N1/120 loop iteration.

2. Use to identify a point of contact and multiple communication numbers. When using multiple repetitions to identify different communications numbers for a single point of contact, repeat the name cited in PER02.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
PER01	366	Contact Function Code	M ID 2/2

Code identifying the major duty or responsibility of the person or group named.

IC Information Contact

Code Value Implementation Note:

Always use in the first repetition to identify the primary point of contact and their primary communication number.

Required

PER02	93	Name	O AN 1/35
-------	----	------	-----------

Free-form name.

Implementation Note:

Provide the Rate/Rank, first name, middle initial, and last name of the individual named as contact point. Include blank spaces between the name components and periods after initials. Do not include NMN when a middle initial is not available.

Required

PER03	365	Communication Number Qualifier	C ID 2/2
-------	-----	--------------------------------	----------

Code identifying the type of communication number.

Implementation Notes:

1. Use to identify the preferred method of communication in the first repetition. Use PER05/6 and PER07/8 to identify additional communication numbers. Use additional repetitions of PER to identify more than three numbers.

2. Do not include blank spaces or dashes between numbers.

AU Defense Switched Network

Code Value Implementation Note:

Use to identify the DSN telephone number.

			EM Electronic Mail

Mandatory

Segment: OTI Original Transaction Identification

Level: Detail

Loop: OTI **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To identify the edited transaction set, the level at which the results of the edit are reported, and to indicate the accepted, rejected or accepted with change edit result.

Syntax: C0908 — If OTI09 is present, then OTI08 is required.

Semantic: 1. OTI06 is the Group Date.

2. OTI07 is the Group Time.

3. If OTI11 is present, it will contain the Version/Release under which the original electronic transaction was translated by the receiver.

Comments: 1. OTI02 contains the qualifier identifying the business transaction from the original business application, and OTI03 will contain the original business application identification.

2. If used, OTI04 through OTI08 will contain values from the original electronic functional group generated by the sender.

3. If used, OTI09 through OTI10 will contain values from the original electronic transaction set generated by the sender.

Implementation Notes:

1. Each DLMS transaction set has a unique tracking number assigned in table 1. Use this segment to identify the transaction set tracking number for the rejected transaction or transaction set. Do not identify the functional group or interchange envelope identification numbers.

2. In addition to the tracking number, each DLSS transaction set or transaction cites an identifying control number. Use the 2/REF/020 segment to indicate the identifying control number for the transaction set or transaction being rejected. The tracking number with the identifying control number provides a unique combination which specifically identifies the transaction or transaction set being rejected. This unique combination distinguishes, for instance, between the requisition and the requisition modifier, both of which cite the same transaction reference number as their identifying control number but different tracking numbers for the transaction set in which they were conveyed.

3. Each iteration of the OTI loop identifies a single rejected transaction or transaction set. Use multiple iterations of the 2/OTI/010 loop to identify multiple rejected transactions or transaction set. Use the 2/TED/070 segment within each 2/OTI/010 loop to identify one or more errors found in each rejected transaction or transaction set.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
OTI01	110	Application Acknowledgment Code	M ID 1/2
		Code indicating the application system edit results of the business data.	
		IR Item Reject	

Code Value Implementation Note:

Use to denote rejection of single transaction within a transaction set containing multiple transactions.

TR Transaction Set Reject

Code Value Implementation Note:

Use to denote rejection of a complete transaction set.

Mandatory	OTI02	128	Reference Number Qualifier Code qualifying the Reference Number.	M	ID	2/2
			2I Tracking Number			
			Code Value Implementation Note: Use to identify the unique tracking number of the original transaction.			
Mandatory	OTI03	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M	AN	1/30
Not Used	OTI04	142	Application Sender's Code	O	AN	2/15
Not Used	OTI05	124	Application Receiver's Code	O	AN	2/15
Not Used	OTI06	373	Date	O	DT	6/6
Not Used	OTI07	337	Time	O	TM	4/8
Not Used	OTI08	28	Group Control Number	C	N0	1/9
Not Used	OTI09	329	Transaction Set Control Number	O	AN	4/9
Not Used	OTI10	143	Transaction Set Identifier Code	O	ID	3/3
Not Used	OTI11	480	Version / Release / Industry Identifier Code	O	AN	1/12

Optional

Segment: REF Reference Numbers

Level: Detail

Loop: OTI

Usage: Optional

Max Use: 12

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Notes:

1. DLMS transaction sets can consist of one "transaction" with an identifying control number in table 1 or of multiple "transactions" with no identifying control number in table 1. For multiple transactions within one transaction set, a single iteration of table 2 contains the detail data for the transaction, including the identifying control number; table 1 serves as an envelope for all the transactions within the set. For application program processing, the table 1 envelope information combined with an individual iteration of table 2 comprises the data for one transaction.
2. Use this segment to indicate the identifying control number for either the transaction set being rejected, or for transaction sets containing multiple transactions, of the individual transaction being rejected within the transaction set. This identifying control number is distinct from the unique transaction set tracking number assigned for each transaction set and referenced in 2/OTI/010.
3. Use this segment as needed to identify additional, or subordinate, reference numbers for identifying the transaction set or transaction being rejected.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Note:

Use only one of codes CT or TN to indicate the identifying control number for an individual transaction within a transaction set containing multiple transactions.

83 Extended (or Exhibit) Line Item Number (ELIN)

Code Value Implementation Note:

Use as needed to identify the ELIN, or the ELIN including the SUBELIN, as appropriate.

C7 Contract Line Item Number

Code Value Implementation Note:

Use as needed to identify the CLIN, or the CLIN including the SUBCLIN, or the agreement line item number (ALIN) appropriate.

CT Contract Number

Code Value Implementation Note:

Use as needed to identify the contract number.

F8 Original Reference Number

Code Value Implementation Note:

Always use to indicate the identifying control number for the transaction set being rejected when rejecting a transaction set as a complete entity.

OQ Order Number

Code Value Implementation Note:

Use as needed to identify the purchase call or order number, or the call or order number including the respective call or order modification, as applicable.

PO Purchase Order Number

Code Value Implementation Note:

Use as needed to identify the purchase request number when there is no contract award and no contract number assignment.

TN Transaction Reference Number

Code Value Implementation Note:

Always use to indicate the identifying control number for the transaction being rejected when rejecting a single transaction from a transaction set containing multiple transactions.

Not Used

C AN 1/30

Not Used

REF03 352 Description

C AN 1/80

Optional

Segment: TED Technical Error Description

Level: Detail

Loop: TED **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To identify the error and, if feasible, the erroneous segment, or data element, or both.

Comment: If used, TED02 will contain a generic description of the data in error (e.g., Part Number, Date, Reference Number, etc.).

Implementation Notes:

1. Use to indicate error(s) within the rejected transaction identified by the receiving application software. TED02 must be used to indicate a specific DLMS error code. TED07 should be used to identify the incorrect data when known. TED08 should be used to identify the correct data in the event it is known even though the transaction remains unprocessable.

2. Use multiple repetitions to identify multiple errors within a single transaction when required.

Data Element Summary

10 STANDARDS AND CONVENTIONS

10.1 GENERAL INFORMATION

The DLMS uses the American National Standards Institute's Accredited Standards Committee (ANSI ASC) X12 standards for EDI to exchange DoD logistics data. The ANSI ASC X12 standards are formally established, maintained, and published under ANSI ASC X12 to provide a common basis for communicating shared business information.

The ANSI ASC X12 standards define the specific rules of syntax for using EDI constructs and defines the universe of components that can be used. However, because the ANSI ASC X12 standards are intentionally designed to be very flexible to meet the needs of a wide variety of users, additional documentation is necessary to define how to use the standards within a specific user community. This documentation is called implementation conventions.

The implementation conventions define for the DLMS which ANSI ASC X12 transaction sets are used. Within each transaction set they define the segments, data elements, and codes which are used. Most importantly, they also define specific rules and formats for the contents of data within the data elements.

The DLMS implementation conventions are organized by logistics functional area: supply, transportation, finance, acquisition, and maintenance¹. They can be found in the subsequent volumes of this manual along with their associated procedures.

The purpose of this chapter is to assist the reader in understanding the basics of ASC X12 EDI standards and how to read the DLMS implementation conventions. It defines ANSI ASC X12 structure, terms, and concepts as applied under the DLMS. The ASC X12 EDI Standards, volume I, Control Standards, Transaction Set Tables, and Segment Directory serves as a reference source for much of the material covered in this chapter.

10.2 BASIC STRUCTURE AND FUNCTION

The following paragraphs define the three key components of the standards. These are the transaction set, the segment, and the data element. Characteristics of these components and their usage within the DLMS are described in this section.

10.2.1 DATA ELEMENT

The data element is the smallest named unit of information in the standard. They are identified as either simple or component. The context in which the data element is used determines which of these types apply. Data elements which are connected to form a composite data element structure are referred to as components. Use of composite data elements within the DLMS is very limited and their structure is discussed separately below.

Data elements are uniquely identified by reference number. Data elements within a segment are also identified by the segment identifier and position within the segment. Data elements appear in a predefined sequence within a segment as established by the standard. Data elements may be used in more than one segment and multiple occurrences of the same data element may be used in the same segment.

¹ The volume containing maintenance procedures is currently reserved.

Basic attributes of a data element are length and type.

10.2.1.1 DATA ELEMENT REFERENCE NUMBER

The data element reference number is a unique one to four digit number used to identify data elements within the ANSI ASC X12 data element dictionary. The number corresponds to the sequence of the data element as it occurs within the dictionary.

10.2.1.2 DATA ELEMENT TYPE

Data elements are identified by type as follows. The symbol used to designate type is shown in parentheses.

- **Numeric (Nn).** A numeric data element is represented by one or more digits with an optional leading sign representing a value in the normal base of 10. The value of a numeric data element includes an implied decimal point. It is used when the position of the decimal point within the data is permanently fixed and is not to be transmitted with the data. The symbol for this data element type is Nn where "N" indicates that it is numeric and "n" indicates the number of decimal positions to the right of the implied decimal point. If no decimal positions are allowed, the symbol is written as N. A leading minus sign (-) is used to express negative values. Absence of a sign indicates positive value. Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. The length of a numeric type data element does not include the optional minus sign. For example, where the numeric type is N2 (indicating an implied decimal placement two position 5 from the right), the value -123.4 would be transmitted as -12340. The length of the value within the data stream is five.
- **Decimal Number (R).** A decimal data element contains an explicit decimal point and is used for numeric values that have a varying number of decimal positions. The decimal point is always carried in the transmission unless it occurs at the right end of the value. A leading minus sign (-) is used to express negative values. Absence of a sign indicates positive value. Leading zeros should be suppressed unless necessary to satisfy a minimum length requirement. Trailing zeros following the decimal point should be suppressed unless used to express precision. Use of commas within the numeric value is prohibited. The length of a numeric type data element does not include the optional minus sign or the decimal point. For example, the numeric value -123.45 would be transmitted as -12345. The length of this entry is five.
- **Identifier (ID).** An identifier data element always contains a unique value from a predefined list of values maintained by ANSI ASC X12, the DoD, or other responsible organization referenced by the data element dictionary. All code lists employed under DLMS including those maintained by ANSI ASC X12 are available via DoD Logistics Data Resource Management System (LOGDRMS) (appendix 10F). The contents are left-justified and trailing spaces should be suppressed unless necessary to satisfy a minimum length requirement. Identifier type data elements are frequently used as qualifiers to identify by code the type of information contained in an associated data element. For example, the identifier type data element Product/Service ID Qualifier may be transmitted with a value of FS to indicate that the value contained in the associated data element Product/Service ID is a national stock number. In this instance, the list of identifier valid codes is maintained by ANSI ASC X12. The conventions normally specify which of these values are permissible entries for the specific usage under DLMS.

- **String (AN).** Contents of a string type data element are a sequence of letters, numbers, spaces, and/or special characters. The contents are left-justified and trailing spaces should be suppressed unless necessary to satisfy a minimum length requirement. The Product/Service ID mentioned in the above example is identified as a string type data element.
- **Date (DT).** A date data element is used to express the standard date in YYMMDD format in which YY is the year, MM is the month (01 to 12), and DD is the day of the month (01 to 31).
- **Time (TM).** A time data element is used to express the time in HHMMSSd.d format in which HH is the hour for a 24-hour clock (00 to 23), MM is the minute (00 to 59), SS is the second (00 to 59) and d.d is the decimal seconds. Seconds and decimal second are optional. Trailing zeros in decimal seconds should be suppressed unless necessary to satisfy a minimum length requirement or unless necessary to indicate precision.
- **Binary (B).** A binary data element is any sequence of octets ranging in value from binary 00000000 to 11111111. This data element type has no defined maximum length. Actual length is specified by the immediately preceding data element. The binary data element type may only exist in the Binary segment and is not used in the DLMS at this time.
- **Fixed-Length String (FS).** A fixed-length string is a sequence of any characters. It must be space filled to satisfy its minimum length. Minimum and maximum values for any data element of this type must be equal and the data element must be mandatory in any segment in which it is used. Significant data shall be left justified (leading zeros are significant, trailing spaces are normally not significant).

10.2.1.3 DATA ELEMENT LENGTH

Each data element is assigned a minimum and maximum length. The length of the data element value is the number of character positions used except as noted for numeric, decimal, and binary elements. A data element may be of variable length within the minimum/maximum range or it may be of fixed length in which the minimum is equal the maximum. Length is expressed by indicating both the minimum and maximum values separated by a slash, i.e., 2/30.

10.2.1.4 DATA ELEMENT REFERENCE DESIGNATOR

Each simple data element or composite data structure in a segment is assigned a reference designator indicating the segment in which it is used and its sequential position within the segment. The reference designator is constructed from the segment identifier followed by the two-digit position number. Counting of the position number starts with 01 for the first data element appearing after the segment identifier and is incremented by one for each subsequent data element until the end of the segment. For example, the second data element in the N1 segment has a reference designator of N102.

10.2.1.5 CONDITION DESIGNATOR

The condition designator (or requirement designator) is used to define the circumstances under which a data element is required to be present or absent in a particular usage. These

conditions are of three basic types: mandatory, optional, and relational condition. Under DLMS, optional and relational condition designations can be further defined as either recommended or required. Condition designators are identified by symbol as specified in parentheses.

- **Mandatory (M).** The designation of mandatory is absolute in the sense that there is no dependency on other data elements within the segment or composite data structure. A mandatory data element must appear in the segment.
- **Optional (O).** The designation of optional means that there is no syntactic requirement for the presence of the data element within the segment or composite data structure. Optional data elements may be included or omitted based upon instructions provided by the conventions or at the discretion of the transmitting activity (as applicable).
- **Conditional (C).** A relational condition defines a special relationship between two or more data elements within a segment or composite data structure. Relational conditions are based upon the presence or absence of one of those data elements. The specific relationship is defined in a syntax note. The first character of the syntax note identifies one of the following conditions. Note that the ANSI ASC X12 segment directory diagrams use the symbol X in the lower left corner of the data element box to indicate that a relational condition applies.
 - **Paired (P).** If any specified data element is present, then all of the specified data elements must be present.
 - **Required (R).** At least one of the specified data elements must be present.
 - **Exclusion (E).** Not more than one of the specified data elements may be present.
 - **Conditional (C).** If the first specified data element is present, then all other specified data elements must be present. However, any or all of the data elements not specified as the first in the condition may appear when the first is not present.
 - **List Conditional (L).** If the first specified data elements is present, then at least one of the remaining specified data elements must be present. However, any or all of the data elements not specified as the first may appear when the first is not present.
- **Recommended.** The DLMS convention designation of recommended is used to further define an ANSI ASC X12 optional or conditional designation. It indicates that use of a specified data element is functionally advisable, but is not necessary for transmission of the transaction set.
- **Required.** The DLMS convention designation of required is used to further define an ANSI ASC X12 optional or conditional designation. It indicates that use of a specified data element is optional according to the standards, but is necessary under the DLMS.

10.2.2 COMPOSITE DATA STRUCTURE

The composite data structure is an intermediate unit of information in a segment. It consists

of two or more component data elements linked together to form a single data structure. Composite data structures are defined in an ANSI ASC X12 composite data structure dictionary. Use of composite data structures is very limited under DLMS.

Composite data elements are identified by a unique four-character reference identifier which corresponds to its location within the dictionary. The first character is alpha followed by three numerics assigned in sequence as composite data structures are created. An S in the first position indicates that the composite data structure is used in a control segment. A C indicates use in a data segment.

Component data elements within the composite data structure are assigned a condition designator which defines their requirement within the structure.

10.2.3 SEGMENT

A segment is the intermediate unit of information in a transaction set. Segments consist of functionally related data elements positioned serially in a standard order. For example, organization name, street address, city, state, and zip code data elements could be grouped together as an address segment.

A control segment is a segment used for transferring control information rather than application information. It has the same structure as a data segment. Refer to chapter 6, Communications, for information regarding the use of transaction set, functional group, and interchange control segments.

10.2.3.1 SEGMENT IDENTIFIER

The segment identifier is composed of a combination of two or three uppercase letters and/or digits. In transmissions the identifier serves as a unique name for the segment and occupies the first character positions of the segment. The segment identifier is not a data element.

10.2.3.2 SEGMENT REQUIREMENT DESIGNATOR

The segment requirement designator defines a segment's need to appear in the data stream of a transmission. The requirements designators are identified by symbol as specified in parentheses.

- **Mandatory (M).** A designation of mandatory indicates that a segment must be used in the transaction set at least once.
- **Optional (O).** A designation of optional indicates that use of this segment in the transaction set is either at the option of the sending party, is based on the mutual agreement of the interchange parties, or is specified by the conventions.
 - **Recommended.** A DLMS convention designation of recommended is used to further define an ANSI ASC X12 optional condition. It indicates that use of a specified segment is functionally advisable, but is not necessary for transmission of the transaction set.
 - **Required.** A DLMS convention designation of required is used to further define an ANSI ASC X12 optional condition. It indicates that use of a specified segment is optional according to the standards, but is necessary under the DLMS.

- **Floating (F).** This designation is used only with the Note/Special Instruction (NTE) segment which may be used anywhere within the transaction set following the ST segment and preceding the SE segment. Its position does not impart any relationship to other segments in the transaction set. ANSI ASC X12 no longer permits the use of the floating designation in new transaction design. Over time its use will be phased out entirely. Use of this type of segment is **prohibited** within the DLMS.

10.2.2.3 SEGMENT POSITION

Each segment is assigned a specific position in the segment sequence of a transaction set. Segments will appear in this order except for segments designated as floating. The sequence position is shown as a three-position number including a leading zero if necessary. The position numbers are assigned sequentially, but not consecutively so that new segments inserted in the transaction set after the original design may be assigned a position number in the proper order.

10.2.3.4 DATA REPETITION

At times it is necessary or desirable to convey multiple occurrences of specific sets of data. For example, a requisition may include multiple items being requested, multiple dates related to a particular item, and/or multiple receiving addresses. The DLMS employs various ANSI ASC X12 techniques to capture this repetition of information within a single transaction set. These are:

- Maximum use of a single segment
- Looping of a group of segments
- Nesting loops within loops
- Hierarchical loops

10.2.3.4.1 MAXIMUM USE

Maximum use of segments (abbreviated "max use") refers to the number of times a single segment is permitted to be repeated in succession at that specific location within the transaction set. Maximum usage may be defined by a specific number or by the symbol >1, indicating that the segment may be used once or repeated with no limitation.

10.2.3.4.2 LOOPS OF SEGMENTS

A group of segments which may be repeated within a transaction set is referred to as a loop. Segments included in the loop are identified by lines or brackets drawn around them in the transaction set hierarchy. The loop is named by the segment identifier of the first segment of the loop. The maximum allowable times the loop may be repeated is called the loop repeat. The segment requirement designator of the first segment in the loop indicates whether the loop is optional or mandatory. The first segment in the loop must be used to initiate each iteration of the loop. The first segment of a loop has a maximum usage of one. All other segments of the loop may have a maximum usage which varies by design. Mandatory segments within loop are only mandatory if the loop is used.

Within a DLMS implementation convention note, a loop is identified by its position within the transaction set. For example, the LIN segment in the TS 527 IC - Receipt, Inquiry, Response, and MRA (appendix 14A) is referred to as the 2/LIN/010 loop, where 2 represents the table number and 010 represents the sequence position of the LIN segment. A segment within the loop is identified similarly. For example, a note in the conventions may refer to the N9 segment within the LIN loop as the 2/N9/030 segment.

10.2.3.4.3 NESTED LOOPS

Loops within loops are referred to as nested loops. These are identified by the first segment of the nested loop. Nested loops never begin with the same segment as the outer loop. Multiple levels of nesting is permitted.

There are no limitations on the placement of loops. Looping structures may appear in any area of any transaction set. Any loop which contains a nested loop is considered the parent structure of that nested loop.

10.2.3.4.4 HIERARCHICAL LOOPS

A hierarchial loop is a structure used in some ANSI ASC X12 transaction sets to control nested loops. A hierarchial loop begins with a Hierarchial Level (HL) segment. This segment allows for identification of a parent-child relationship among related data segments. The content of the HL segment determines the nesting level. The HL segment includes an identification number for each occurrence of the loop. Using that identification number, each successive occurrence of the HL loop identifies the HL loop to which it is subordinate. In this manner an order structure can be established to link higher levels of information to multiple levels of detail information. For example, shipment information expressed in an HL loop as a parent is related to the line item information expressed in an subsequent HL loop at the child level.

10.2.3.5 SYNTAX NOTE

A syntax note defines the specific relational condition which is applicable to a data element within a segment or composite data structure. Syntax notes are identified by a number which is constructed by citing the letter abbreviation for the relational condition followed by the last two digits of the reference designator of the effected data elements. For example, syntax note R0203 indicates that either the second or third data element of the segment must be used. Note that the ANSI ASC X12 segment directory uses the symbol X under the attributes column to indicate that a syntax note applies.

10.2.3.6 SEMANTIC NOTE

A semantic note provides important additional information regarding the intended use of a designated data element, particularly a generic type, in the context of its use within the segment. Semantic notes may also define relational conditions among data element in a segment based on the presence of a specific value (or one of a set of values) in one of the data elements. Note that the ANSI ASC X12 segment directory uses the symbol Z following the condition designator under the attributes column to indicate that a semantic note applies. Where both a semantic note and a syntax note apply the symbols appear as X/Z.

10.2.3.7 SEGMENT COMMENTS

Comments provide additional information about the intended use of the segment. Comments are not part of the standard.

10.2.4 TRANSACTION SET

The structured collection of data that is exchanged in order to convey meaning between trading partners is called a transaction set. A transaction set is uniquely identified by a three-digit number and a name. It is composed of smaller groupings of logically related data elements called segments. Segments within a transaction set are transmitted in a predefined sequence established by the standard.

A transaction set is always initiated with the Transaction Set Header (ST) segment and always concludes with a Transaction Set Trailer (SE) segment. These segments form the boundaries of the transaction set, but are not considered part of the areas of the transaction set described below.

The information communicated by a transaction set relates to a specific document or action. By design, single or multiple occurrences of this document or action can be portrayed within the transaction set. For example, a requisition is submitted on the TS 511 IC - Requisition (appendix 5A). A single occurrence of the transaction set may contain one requisition or many requisitions. The conventions explain how to use the transaction set to express many variables associated with requisitioning including multiple stock numbers, ship to locations, bill to locations, etc.

10.2.4.1 TRANSACTION SET IDENTIFIER

The transaction set identifier is a reference number for the transaction set and is the first data element of the Transaction Set Header (ST) segment. A cross-reference list of transaction set identifiers and their related former DLSS document identifier codes is shown at appendix 10A.

10.2.4.2 TRANSACTION SET TABLES AND AREAS

Most transaction sets are designed so that they may be divided into discrete areas which are identified as tables. Each area includes one or more segments grouped according to the general function performed by the segment(s) which comprise the area.

- **Table 1.** The information in this area pertains to the entire transaction set. Table 1 must be present and may contain one or more segments. Where multiple tables are used, table 1 is considered the heading area.
- **Table 2.** Table 2 may be used optionally to delineate the detail area of the transaction set. Multiple detail areas may be contained in table 2.
- **Table 3.** Depending on the design of the transaction set, a summary area may be present as table 3. When used, table 3 provides either a summarization of information in the detail areas or additional information about the entire transaction that cannot be expressed until the heading and detail areas have been generated. The summary area contains information such as control totals.

10.2.4.3 TRANSACTION SET NOTES AND COMMENTS

Narrative information pertaining to the use of the transaction set may be presented at the conclusion of the transaction set table(s) in the form of notes or comments. Notes should be considered as part of the ANSI ASC X12 standard. Comments are not part of the standard, but offer explanatory information about the transaction set. The number preceding the text indicates the table and segment position for which it applies. Multiple notes or comments may appear for the same segment position.

10.2.4.4 FUNCTIONAL GROUP

Transaction sets may be grouped for transmission according to functional purpose as defined by the specific application to which they apply. Each functional group consists of a functional group header segment, one or more similar transaction sets, and a functional group trailer segment. A functional group identifier is assigned to each transaction set to define which transaction sets may form such a collection. The identifier is carried in the first data element of the Functional Group Header (GS) segment.

DLMS functional groups are frequently composed of only one type of transaction set. For example, the Requisition Transaction Set 511 functional group is RN. Various applications of the TS 511, such as the requisition and the requisition cancellation may be grouped together. However, no other types of transaction sets are included in this group. A list of DLMS transaction sets and their associated functional group is shown at appendix 10A.

10.2.5 OVERRIDE

Override is the capability to selectively replace information in the header area (table 1) with information in the detail area (table 2). For an override to be performed the same segment must occur in both the header and detail areas and if a qualifier is used the same code value must be expressed in both tables.

The override technique is employed to save transmission of repetitive values for each iteration of the detail level. Relatively constant information is carried in the header level where it applies to the entire transaction. To cite the exception information, an entry is made at the detail level. Because the same segment, data elements, and qualifier code values (if applicable) are used, the table 2 entry replaces or overrides the table 1 entry. For example, most requisitions included in a single Transaction Set 511 request material shipped to the same location. An entry is made in table 1 indicating the address for this location. The remaining requisitioned material is to be shipped to two other locations. Addresses for these are cited in separate iterations of the table 2 detail level loops. Where the table 2 location is provided and differs from that cited in table 1, it overrides the previous entry.

Transaction sets which do not contain header and detail areas defined by the ANSI ASC X12 standards can not employ the override function. However, repetition of constant information can be reduced using header and detail loops created within the implementation conventions for the transaction set.

10.2.6 CODE SOURCES

Code values associated with data elements may be derived from several locations.

Many of the data elements under DLMS requiring use of specific code values list the appropriate code values in the conventions.

Three data entries, **transportation mode/method** (data element number 91, Transportation Method/Type Code), **unit of issue** (data element number 355, Unit or Basis for Measurement Code), and **transportation type pack** (data element 103, Packaging Code) use conversion guides shown at appendix 10B, 10C, and 10D, respectively. For ease of entry, the DLMS will continue to support the familiar code structures used in the DLSS. Special processing at the point of input provides conversion from DoD code value to ANSI ASC X12 code value for transmission of the transaction set. Both the sender and the receiver employ the conversion guide so that the user sees only the familiar DoD code values.

Where numerous code values are assigned to a particular data element and all are applicable to the application, specific codes may not be listed in the DLMS convention. Most code lists which are maintained by DoD or by ANSI ASC X12, and are used under the DLMS, are obtainable on-line through the automated DoD LOGDRMS, by following the appendix 10F guidelines. If the list of code values (appendix 10G) is too lengthy to include in the LOGDRMS data base, a reference for the code source will be provided. Each code source entry indicates the complete name of the responsible organization and where to obtain a list of codes.

The DLMS uses data element 1270, Code List Qualifier Code, in a looping structure described below to execute many DoD controlled code lists.

10.2.7 LM/LQ SEGMENT LOOP

The DLMS conventions frequently employ a specific combination of segments and data elements to convey encoded information. The Code Source Information (LM) segment and the Industry Code (LQ) segment are used together to transmit many different types of DoD required information. To do this the LM/LQ segments are used in a loop. The LM segment leads with a mandatory entry of DF (Department of Defense) in the Agency Qualifier Code data element. The LQ segment follows with a Code List Qualifier Code data element (data element number 1270) used to identify the specific industry code list. The dictionary code list for this data element cites over 150 different DoD standard code lists such as Air Commodity and Special Handling Code, Billing Advice Code, Management Code, and Free On Board Site Code. The convention specifies which code lists are appropriate for a particular transaction set application. The second data element of the LQ segment is the Industry Code data element. Although this is a string type data element, it is used to carry the actual code value.

For example, the LM segment identifies **DF** (Department of Defense) as the organization responsible for a code list. The LQ segment identifies **A1** (Ownership Code) as the industry code list and 2 as the actual code value identifying the Defense Logistics Agency.

This technique allows DoD to continue to have control over numerous code lists which would be of no interest to other ANSI ASC X12 trading partners.

The code source for all data element 1270 code lists is this manual. The actual code values are temporarily published in the manual as appendix H. However, users can access the codes on-line using the automated DoD LOGDRMS, following the appendix 10F guidelines.

10.3 DLMS CONVENTIONS

The DLMS conventions are presented in distinct volumes which correspond to the functional

areas of supply, transportation, acquisition, maintenance, and finance. The conventions address how the standards are implemented. One transaction set may be used in several different functional areas or repeatedly within the same functional area. Each separate interpretation of the standards according to a specific usage is called an application.

10.3.1 DLMS CONVENTION FORMAT

Each application convention represents a combination of ANSI ASC X12 standards and implementation guidance specific to the DLMS. The manner in which this information is presented is consistent from one application to the next. The format used is derived from the ANSI ASC X12 guidelines for implementing EDI with slight alteration were necessary to accommodate the amount of information included.

Each application convention begins with a hierarchy table showing the entire transaction set. This is followed by a segment hierarchy for each of the segments used by the application.

The segment hierarchy includes a data element summary with information pertaining to each data element in the segment. In general, information printed in normal typeface is extracted from the ANSI ASC X12 standards and information printed in italics relates to the DLMS implementation of the standards.

10.3.1.1 IMPLEMENTATION NOTES

In many instances, exact equivalents are not available to accommodate the mapping of DoD information requirements to the standard. Specific instructions on how a particular portion of the standard is used under DLMS is provided in the form of implementation notes. These notes explain what data may be carried where. They are printed in italics. Notes may be applicable to a transaction set, a segment, a data element, or a specific code value depending upon their placement.

The information provided in implementation notes is crucial to understanding the convention. At times, the ANSI ASC X12 data element or code value name has little similarity to the commonly used name for a piece of information. Additionally, an ANSI ASC X12 data element or code value may be used as a surrogate to carry DLMS-required data not otherwise provided for by the standard. It is the implementation notes which explain these circumstances.

10.3.1.2 TRANSACTION SET HIERARCHY DESCRIPTION

The following information appears within the double lines at the top of each transaction set table.

- **Transaction set number followed by DLMS application name.**
- **DLMS version number.**
- **ANSI ASC X12 version and release numbers.**

The transaction set number and the transaction set name appear below the double lines in bold print. This is followed by an indented paragraph(s) describing the purpose of the transaction set extracted from the ANSI ASC X12 standards. The application specific purpose under DLMS is provided in the implementation note(s) printed in italics.

All of the remaining information, with exception of the page number, is taken directly from the standards. Elements which compose the table are defined previously in this chapter. Abbreviations used in the layout are shown in parentheses.

- **Table number.**
- **Segment position (POS. #).**
- **Segment identifier (SEG. ID).**
- **Segment name (NAME).**
- **Segment requirement designator (REQ DES.).**
- **Maximum use (MAX USE).**
- **Loop repeat.**
- **Notes and comments.**
- **Page number (PAGE #).** The first column at the left margin shows the page number on which the segment hierarchy begins. If a segment is not used in a particular application the abbreviation N/U indicates this.

Below the line at the bottom of the page is the application control number which is meaningful to the publication software and the LDM. The date on which the convention was printed also appears here.

Refer to figure 10-1 for a key diagram of a DLMS convention transaction set hierarchy.

10.3.1.3 SEGMENT DESCRIPTION

The information portrayed between the double lines at the top of the segment format page is the same as that listed for the transaction set (see previous paragraph) with the addition of the segment identifier and segment name.

All of the following information related to the segment is taken directly from the standards. Elements which compose the segment hierarchy are defined previously in this chapter.

- **Segment.** The segment identifier and segment name are displayed.
- **Level.** This is the level at which the segment occurs in the transaction set, i.e., header, detail, or summary.
- **Loop.** The loop identifier and the loop repeat, if applicable, are shown.
- **Usage.** This is the segment requirement designator. Only mandatory, optional, or floating are applicable.

- **Max use.** The maximum usage is displayed.
- **Purpose.** There is a brief statement describing the purpose of the segment.
- **Syntax.** Syntax notes are listed if applicable.
- **Semantic.** Semantic notes are listed if applicable
- **Comments.** Comments are listed if applicable.

All information shown to the right of the vertical double lines in standard typeface is derived directly from the ANSI ASC X12 standards. DLMS implementation guidance is provided in the form of implementation notes which appear in italics. Notes may be applicable to a segment, a data element, or a specific code value.

Each of the following items which compose the data element summary is defined previously in this chapter. Abbreviations used in the data element summary are shown in parentheses.

- **Data element reference designator (REF. DES.).**
- **Data element reference number (DATA ELEMENT).**
- **Data element name (NAME).** The ANSI ASC X12 data element dictionary definition is shown below the name.
- **Attributes.** Below this heading appear the condition designator, the data element type, and the data element length. Condition designator code values M (mandatory), O (optional) and C (conditional relationship exists as defined by syntax note) are applicable.

Code values and code value names applicable to a particular data element may appear below the data element name. Code values displayed represent those available for use according to the DLMS convention and may be only a portion of those actually assigned under ANSI ASC X12 . Where no code values are listed and no other guidance is given, any assigned ANSI ASC X12 code values may be used as appropriate.

The column to the left of the vertical double line provides additional DLMS criteria for implementation of the standards. In this column the DLMS maximum use and/or segment requirement designator and the data element usage designation further clarifies or restricts the ANSI ASC X12 standard. Although, an ANSI ASC X12-assigned mandatory condition cannot be redefined under DLMS, optional conditions may be imposed more specifically according to context. That is, an optional ANSI ASC X12 condition may become required, recommended, or not used depending upon the specific application.

To conserve space in the layout, data elements which are not used according to the DLMS convention do not include definitions or code values.

Refer to figure 10-2 for a key diagram of a DLMS convention segment page.

997 Functional Acknowledgment

This Draft Standard for Trail Use contains the format and establishes the data contents of the Functional Acknowledgment Transaction Set (997) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Implementation Notes

1. Organizations use this transaction set only to acknowledge a functional group containing syntactical errors.
2. Use a single occurrence of this transaction set to transmit a single acknowledgment of a functional group containing one or more syntactical errors.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
3	010	ST	Transaction Set Header	M		②
4	020	AK1	Functional Group Response Header	M	1	
			LOOP ID - AK2			④ 999999
6	030	AK3	Data Segment Note	O	1	
			LOOP ID - AK3			999999

NOTES: ⑤

1/010 These acknowledgments shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments.

1/010 The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.

1/020 There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.

DOD 4000.25-M Vol 1
ASC X12 VERSION/RELEASE 0030500

511 • REQUISITION
G61 • CONTACT

Optional

Segment: G61 Contact

Level: Header
Loop: N1 ❶
Usage: Optional
Max Use: 5
Purpose: To identify a person or office to whom communications should be directed.
Comments: G6103 qualifies G6104

Implementation Notes:

1. Use only under exceptional circumstances when requiring direct communication with the party originating the transaction set.
2. Use multiple repetitions to identify multiple communication numbers or points of contact. When using multiple repetitions to identify different communication numbers for a single point of contact, repeat the name cited in G6102. ❷

Data Element Summary

Mandatory

REF. DES.	DATA ELE.	NAME	ATTRIBUTES
G6101	366	Contact Function Code Code identifying the major duty or responsibility	M ID 2/2

Implementation Note:

Provide the in-the-clear name of the person to contact for additional information when voice/personal communicating is necessary. ❸

AL Alternate Contact

Code Value Implementation Note:

Use only in subsequent repetitions to identify alternate points of contact or alternate communication number. ❹

IC Information Contact ❺

Code Value Implementation Note:

Must use in the first repetition to identify the primary point of contact and their primary communication number.

❷ Mandatory

G6102	293	Name Free Form Name	M AN 1/35
-------	-----	------------------------	-----------

APPENDIX 10A

DLMS FUNCTIONAL GROUP/TRANSACTION SET/ DLSS DOCUMENT IDENTIFIER CROSS-REFERENCE

The following chart provides a link between the DLMS transaction set and the Defense Logistics Standard Systems transactions¹ which it superseded. Also shown is the functional group identifier associated with each transaction set.

<u>TS ID</u>	<u>FG ID</u>	<u>TRANSACTION SET NAME</u>	<u>DLMS DI CODES (OR HARD COPY EQUIVALENT)</u>
140	WA	Product Registration	DSC-D, DSF, DSM, DSR
180	an	Return Merchandise Authorization and Notification	FTA, FTC, FTE, FTG, FTF, FTT
511	RN	Requisition	A0_, A3_, A4_, AFT, AFY, AK1-5, AM_, AT_, P11, P19
517	MV	Material Obligation Validation	AN_, AP_, AQR, AQV, AV1-3, AX1-2
527	MD	Material Due-In and Receipt	D4_, D6_, DD_, DF_, DLC-F, DRA-B, DRF, DU_, DW_, DXA-D, DZK, P30, P31, P32, P39, P3T, P6B
536	LR	Logistics Reassignment	DLS-X
561	D4	Contract Abstract	PAA-H, PB1, PBA-H, PE1, PEA-H, PEK, PFK
567	D3	Contract Completion Status	PK9, PKX, PKZ
568	D5	Contract Payment Management Report	PV1-5, PVA
810	IN	Invoice	FA1-2, FB1-2, FC1-2, FD1-2, FE3-4, FF1-2, FG1-2, FJ1-2, FL1-2, FN1-2, FP1-2, FQ1-2, FR1-2, FS1-2, FU1-2, FV1-2, FW1-2, FX1-2, and corresponding G series DI codes

¹ Includes approved changes, enhancements, and streamlining. Transportation DI Codes TAA, TAB, TAJ, T_A-R, TM1-3, TMA-C, TMJ, TML, TMS, and TMT are not yet mapped to ANSI ASC X12 transactions. Fuels DI Code P10 is being developed as TSs 850 and 860 and will be included upon completion. Fuels DI Codes P2A, P2B, P2D, P60, P6A, P6B, P6S, P9F have not yet been mapped or are under review. Transaction Reporting DI Code DZK is mapped to five transaction sets: TSs 511, 867, 846, 940, and 945. The Referral Order DI Codes A4_ are mapped to TSs 511 and 940. Fuels DI Code P53 is mapped to TSs 856 and 867. DI Codes D4Z, D6Z, DDZ, DFZ, DG_, DUZ, DWZ, DLB, DTD, DYB, and DYM are not specifically mapped to DLMS transaction sets, although their intent may be accommodated; if additional capabilities are required, they must be pursued through submission of a proposed DLMS change.

APPENDIX 10B

TRANSPORTATION MODE OF SHIPMENT CONVERSION GUIDE

For ease of transition, the DLMS will continue to support the familiar transportation mode/method codes. To allow this capability, the following conversion guide must be employed to translate the application program code values to the valid ANSI ASC X12 code values for transmission. Both the sender and the receiver employ the conversion guide, so that the user sees only the familiar DoD code values. The ANSI ASC X12 code values listed below are assigned under Data Element 91, Transportation Method/Type Code.

<u>DoD Code</u>	<u>Explanation</u>	<u>X12 Code</u>
A	Motor, truckload	J
B	Motor, less than a truckload	LT
C	Van (unpacked, uncrated personal or Government property)	C
D	Driveaway, truckaway, towaway	DW
E	Bus	BU
F	AMC Channel and Special Assignment Airlift Mission	AC
G	Surface parcel post	D
H	Air parcel post	AE
I	Government trucks, for shipment outside local delivery area	SR
J	Air, small package carrier	AF
K	Rail, carload (includes TOFC/COFC (excluding SEAVAN))	R
L	Rail, less carload (includes TOFC/COFC (excluding SEAVAN))	RC
M	Surface - freight forwarder	I
O	Organic military air (including aircraft of foreign governments)	P
P	Through Government Bill of Lading (TGBL)	Q
Q	Commercial air freight	A
R	RESERVED	

<u>DoD Code</u>	<u>Explanation</u>	<u>X12 Code</u>
S	Scheduled Truck Service (applies to contract carriage, guaranteed traffic routings and/or scheduled service)	L
T	Air freight forwarder	FA
V	SEAVAN	O
W	Water, river, lake, coastal (commercial)	W
X	Bearer, walk-thru (customer pickup of material)	CE
Y	Military intratheater airlift service	Y
Z	Military Sealift Command (MSC); controlled, contract, or arranged space	S
2	Government watercraft, barge, or lighter	B
3	Roll-on/roll-off (RORO) service	X
4	Armed Forces Courier Service (ARFCOS)	AR
5	Surface - small package carrier	U
6	Military Official Mail (MOM)	6
7	Express mail	7
8	Pipeline	PL
9	Local delivery by Government or commercial truck including on-base transfer and deliveries between air, water, or motor terminals, and adjacent activities local delivery areas are identified in commercial carriers' tariffs which are filed and approved by regulatory authorities.	T

APPENDIX 10C

TYPE OF PACK CONVERSION GUIDE

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
CS	Case	CAS
AA thru A5	MSCVAN (for all load data)	MS2
BD	Bundle	BDL
BE	Bale	BAL
BG	Bag, burlap or cloth	BAG
BL	Barrel	BBL
BS	Basket	BSK
BX	Box	BOX
CA	Cabinet	CAB
CB	Carboy	CBY
CC	HHG container, wood	CNA
CL	Coil	COL
CM	Container, AMC, International Standards Organization, lightweight, 8x8x20 foot air container	CNB
CN	Can	CAN
CO	Container, other than CC, CM, CW, MW, or MX	CNT
CR	Crate	CRT
CT	Carton	CTN
CU	Container, Navy cargo transporter	CNC
CW	Container, commercial highway	CND
CY	Cylinder	CYL
DB	Duffelbag	DUF

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
DR	Drum	DRM
EC	Engine container	CNE
ED	Engine cradle or dolly	CRD
FK	Footlocker	TRK
HA	Hamper	HPR
KE	Keg	KEG
LS	Loose, not packed	LSE
MW	Multiwall container	CNF
MX	Mixed, more than one type of shipping container	MXD
PC	Piece	PCS
PL	Pail	PAL
PT	Palletized unit load other than multiwall container (code MW)	PLT
RL	Reel	REL
RO	Roll	ROL
RT	RORO	WHE
SA	Sack, paper	SAK
SB	Skid, box	SKE
SD	Skid	SKD
SH	Sheet	SHT
SL	Spool	SPL
SW	Suitcase	SCS
TB	Tub	TUB
TK	Truck	TRU
TU	Tube	TBE

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
UX	Unitized (use code RT for unitized cargo in a RORO)	UNT
VC	Van chassis	VKP
VE	Vehicle	VEH
VO	Vehicle in operating condition	VOC
VS	SEAVAN - tote	TBN
WR	Wrapped	WRP
X0 thru X9	CONEX	CX2
YA thru Y5	MILVAN (for all load data)	ML2
ZA thru Z5	SEAVAN (for all load data)	SV2

APPENDIX 10D

UNIT OF ISSUE AND PURCHASE UNIT CONVERSION GUIDE

For ease of entry, the DLMS will continue to support familiar unit of issue codes assigned by DoD 4100.39-M, DLIS Procedures Manual and used throughout the DLSS . The following conversion guide must be employed to translate application program codes to valid ANSI ASC X12 codes for transmission. Both the sender and the receiver employ the conversion guide so that the user sees only the familiar DoD code values. The ANSI ASC X12 codes listed below are assigned under data element 355, Unit or Basis for Measurement Code.

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
AM	Ampoule	AM
AT	Assortment	AS
AY	Assembly	AY
BA	Ball	AA
BE	Bale	BA
BF	Board foot	BF
BG	Bag	BG
BK	Book	BK
BL	Barrel	BR
BD	Bundle	BD
BO	Bolt	BM
BR	Bar	BI
BT	Bottle	BO
BX	Box	BX
CA	Cartridge	CQ
CB	Carboy	CB
CE	Cone	CJ

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
CF	Cubic foot	CF
CK	Cake	KA
CL	Coil	CX
CN	Can	CN
CO	Container	CH
CD	Cubic yard	CY
CY	Cylinder	CL
CZ	Cubic meter	CR
DR	Drum	DR
DZ	Dozen	DZ
EA	Each	EA
FT	Foot	FT
FV	Five	P5
FY	Fifty	Q4
GL	Gallon	GA
GP	Group	10
GR	Gross	GS
HD	Hundred	HU
HK	Hank	HA
IN	Inch	IN
JR	Jar	JR
KT	Kit	KT
LB	Pound	LB
LG	Length	LN

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
LI	Liter	LT
MC	Thousand cubic foot	FC
ME	Meal	ME
MR	Meter	MR
MX	Thousand	TH
OT	Outfit	11
OZ	Ounce	OZ
PD	Pad	PD
PG	Package	PK
PM	Plate	PP
PR	Pair	PR
PT	Pint	PT
PZ	Packet	12
QT	Quart	QT
RA	Ration	13
RL	Reel	RE
RM	Ream	RM
RO	Roll	RL
SD	Skid	SV
SE	Set	ST
SF	Square foot	SF
SH	Sheet	SH
SK	Skein	SW
SL	Spool	SO

<u>DoD Code</u>	<u>DoD Explanation</u>	<u>X12 Code</u>
SO	Shot	14
SP	Strip	SR
SX	Stick	15
SY	Square yard	SY
TD	Twenty-four	QZ
TE	Ten	TP
TF	Twenty-five	Q5
TN	Ton	TN
TO	Troy ounce	TO
TS	Thirty-six	Q6
TU	Tube	TB
VI	Vial	VI
YD	Yard	TD

APPENDIX 10F

DEPARTMENT OF DEFENSE LOGISTICS DATA RESOURCE MANAGEMENT SYSTEM (LOGDRMS) USER GUIDE¹

1. PURPOSE

2. CONFIGURATION

a. The DoD LOGDRMS is an on-line interactive data base management system employing an IBM-compatible mainframe computer, Computer Corporation of America System 204 software and application program written in Model 204 user language.

b. On-line interactive capabilities are provided through availability and use of data terminals with direct access to the data bank.

c. Two types of terminals are used:

(1) hardwire to the central site, and

(2) dial-up (acoustic coupling) connection using conventional telephone lines.

d. Access to the central site requires the use of LOGON procedures including the use of passwords. Such passwords are the means for controlling unauthorized access to the data base.

e. A variety of edits and validation checks are included in the interactive communication between the data terminal and the central bank to assure compliance with established procedures and to prevent entry of invalid data or sets of data.

3. **GENERAL.** LOGDRMS capabilities include options for viewing data from the terminal or printing the information in formatted reports. Accessing the system and obtaining the data requires the precise command entry in order to prevent system hang up or jamming. In most situations resulting from error in command entry, the system will respond with an error message, and reentry of the correct command. However, when the system stalls or hangs up, user may enter a **K** or **CANCEL** command. If these fail, entry of **CLOSE** or **LOGOFF** commands may be used. The last resort is to disconnect from the system, wait for one minute and access the system from the initial point.

4. ACCESSING THE SYSTEM USING A PERSONAL COMPUTER AND MODEM

a. Communications DIALUP PROTOCOL CONVERTOR

(1) Terminal Emulation = VT100

(2) Baud Rate = 9600

¹ For the purposes of this appendix, numeric zeros are unmarked and alpha Os are denoted by an underline; i.e., "O."

- (3) Mode = Full Duplex (No local character echo)
- (4) Flow Control = XON/XOFF
- (5) Parity = None
- (6) Data Bits = 8
- (7) Stop Bits = 1
- (8) Telephone Numbers = (703)274-7183, DSN 284-7183

b. After connection has been acknowledged, press **<ENTER>** until the prompt **DESTINATION** appears (this may require more than one execution).

c. When the prompt **DESTINATION** appears, type: **1008<ENTER>**

d. At the new prompt, press **<ENTER>**, followed by a period, and press **<ENTER>** again: (**<ENTER>.<ENTER>**)

e. The screen is now ready to access the system, and displays the screen for signing on. At the prompt, type: **AFJM2PAS<ENTER>**

e. The next screen is for logging into the data base. Type the login as: **LOGIN 8299901<ENTER>**

f. Enter the password for the system. Type the password as: **DISPENSE**

g. Open the data base for system query. Type: **OPEN LOGREGAL<ENTER>**

h. Enter password for database. Type the password as: **HOORAY<ENTER>**

i. The system is now ready for information query/data retrieval.

5. ACCESSING THE SYSTEM USING HARDWIRE OR AN OPEN SYSTEM NETWORK (SUCH AS DDN)

a. Follow above instructions in paragraph 3 above starting with subparagraph 3.c.

6. QUERY PROCEDURE

a. The Master LOGDRMS query procedure is identified by program number LQP. Interrogation of the LOGDRMS for retrieval and display of requested information require a single query procedure. Type either: **INCLUDE LQP** or **.I LQP** (I space LQP).

b. Response consists of a menu for viewer selection. Select the appropriate option following the instructions in following paragraphs 7 or 8. The screen will appear as follows:

WELCOME TO DOD LOGDRMS QUERY PROCEDURE.
THIS PROGRAM PROVIDES VIEWING ACCESS ONLY.
PLEASE SELECT AREA OF INTEREST:

<u>OPTION</u>	<u>DESCRIPTION</u>
1	ANSI ASC X12 (<i>Includes Logistics Qualifier Search</i>)
2	(RESERVED)
3	DLSS
4	DOD LOGISTICS DATA ELEMENT
5	TERM/ACRONYM/ABBREVIATION
6	ANSI ASC X12 OLD ROUTINE
7	DLMS
8	DOD ACTIVITY ADDRESS
9	QUIT

7. OPTION 1 -- ANSI ASC X12 QUERY PROCEDURE AND MENU SELECTION:

a. Select option 1, **ANSI ASC X12**. The full screen application allows for a selection from the following 17 search parameters:

<u>SELECTION NUMBER</u>	<u>NAME</u>
1	TRANSACTION SET
2	SEGMENT
3	DATA ELEMENT
4	DATA CODE
5	TRANSACTION SET KEYWORD
6	SEGMENT KEYWORD
7	DATA ELEMENT KEYWORD
8	DATA CODE KEYWORD
9	ELEMENT
10	CODE
11	CODE SOURCE KEYWORD
12	ANSI STANDARD REFERENCE
13	PROJECT REFERENCE
14	DATA MAINTENANCE (DM) - SET
15	DATA MAINTENANCE (DM) - SEGMENT
16	DATA MAINTENANCE (DM) - DATA ELEMENT
17	LOGISTICS QUALIFIER

b. Version Control. All queries contain provisions for entry of a six-position date (yymmdd) which identifies a specific ANSI ASC X12 version publication date. If this option is not exercised, the query automatically defaults to the latest published version and output displays reflect this information.

8. OPTION 2 -- DLMS QUERY PROCEDURE AND MENU SELECTION

a. Select option 7, **DLMS**. The full screen application allows for a selection from the following five search parameters:

<u>SELECTION NUMBER</u>	<u>NAME</u>
1	TRANSACTION SET
2	SEGMENT
3	DATA ELEMENT
4	DATA CODE
5	DATA ITEM
9	QUIT

b. Version Control. A need for version control, while not as critical to DLMS as to the ANSI ASC X12 Directory, is recognized. However, until decisions are made regarding the content, frequency, and criticality of changes, version 2.0 will be cited on all output displays as the latest published version.

APPENDIX 10G

DLMS STANDARDS

The following DLMS Standards provide the Transaction Sets used in DLMS Version 2.0, along with the Segments, Data Elements, and Code Sources supporting those transaction sets. See the ANSI ASC X12 Standards for the complete series of ANSI ASC X12 Transaction Sets, Segments, Data Elements, and Code Sources.

140 Product Registration

FUNCTIONAL GROUP=WA

This Draft Standard for Trial Use contains the format and establishes the data contents of the Product Registration Transaction Set (140) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to specify the manufacturer, seller, secondary warranter, and purchaser or lessee of the product. It can specify the date the product was sold, delivered, and placed in service as well as identify the product model and serial numbers. It can specify the class of service expected from this individual sale, for example: industrial, commercial, or household. This registration information can be used to divide sales commissions among sales associates or attribute license fees to the proper manufacturer. It can be used to submit many product registrations at one time to one receiving organization.

	470	SE	Transaction Set Trailer	M	1

NOTES

- 1/020 BGN02 is used as the initial reference identifier for this transaction. BGN03 defines the date of this registration transaction. Normally BGN04 and BGN05 would not be used in this transaction. BGN01 is normally set to 00 to indicate that this is an original registration. Product registration is normally a by-product of a sale.
- 1/030 The N9 segment can provide a reference to a previous registration transaction. For example, this could be a replacement of a previous registration transaction.
- 1/040 The N1 loop defines the party submitting the product registration, usually the seller of the product rather than the customer, and the party who maintains the registration database, usually the manufacturer of the product. The N1 loop also can be used to specify the product's distributor.
- 2/010 Each iteration of the LX loop is used to group one or more products that are being registered to one individual or organization.
- 2/015 The REF segment is used to identify the individual registration number. It can include the data element 128, code value Q8, "Registration Number."

NOTES

- 2/020 The N1 loop is used to identify the individual or organization responsible for the registration. This could be the purchaser, the lessee, the operator, etc. This is the party registered to be notified if a product recall is required. Successive iterations could identify other individuals and organizations who are involved in some manner. It also could be used to specify if the product is to be installed or housed at a location that is different than that listed for the registration.
- 2/020 An additional use of the N1 loop has been requested to be able to include the salesperson who sold the product or service contract and the service manager who would be responsible for servicing the product.
- 2/060 The PER segment is used to provide an individual's or department's name for a particular support function and, if desired, their communication number for a phone, electronic mail, etc.
- 2/080 The REF segment could be used to identify the item into or onto which this product being warranted will be residing. For example, when a controller is attached to a numerically controlled machine tool, part of the registration could include information about the machine tool. The machine tool could be identified with multiple occurrences of the REF segment. A similar situation would be if an engine were being replaced in a heavy duty truck. The REF segment could then be used to specify the vehicle.
- 2/090 There is a separate LIN segment for each product included in this sale represented by the single iteration of the LX loop. The LIN segment will contain the product's model number and serial number in data element 234-235 combinations. The other pairs can be used to provide other information about the product.
- 2/100 The PID segment can be used to provide additional information regarding the product. However, it seldom will be required. When it is used, PID06, data element 752, is not required.
- 2/110 The QTY segment is used to reflect the quantity of items that do not have a serial number. QTY01 will have a discrete quantity qualifier of 01. For all items with a serial number, the value to be used is either explicitly or implicitly set to one.
- 2/120 The DTM segment in the LIN loop can be used to specify the dates that are significant to the registration such as delivery, installation, placed in service, failed, brought in for service, etc.
- 2/130 The REF segment can identify information about the product that was not able to be coded in the preceding segments. For example, it can be used to specify the warranty coverage code and the warranty registration number.
- 2/140 The N1 loop within the LIN loop provides the same capabilities for the single product as the N1 loop above in the LX loop provides for the entire sale.
- 2/180 The PER segment is used to provide an individual's or department's name or functional area and, if desired, their communication number for a phone, electronic mail, etc.
- 2/190 The PSC loop in the LIN loop refers to the warranty or service contract for the entire product described by the LIN segment. If special operating conditions that could affect the registration are to be noted, such as a household product being used commercially, this would be placed in the PSC segment. Unless noted to the contrary, it will be assumed that the product will be used in its most normal capacity. For example, a kitchen appliance, unless specifically stated to the contrary, will be assumed to be used within a household.
- 2/190 The PSC loop also may be used when a for fee registration is being specified, such as an extended warranty or service contract. The PSC segment also may be used without the other segments in the loop to describe conditions of a standard, free warranty registration.
- 2/190 The PSC segment is used to specify the period for the warranty or service contract.
- 2/190 There may be other measures of service life of a product such as operation counter, an odometer to measure mileage of a vehicle, or a clock that measures operational hours.
- 2/200 The SSS special service segment is used in conjunction with the PSC segment to add any extra services to be specified within the service contract. For example, there may be a clause for 24 hour service or a guaranteed service response of no more than so many hours.
- 2/210 The repeated use of the AMT segment within the PSC loop allows the total amount of the contract to be specified as well as any special conditions on the amount.
- 2/220 The CUR segment is only required when the service contract is to be paid across national boundaries.
- 2/230 The ITA segment would be used in those special cases where the normal service contract cost does not apply. For example, in fleet sales, the product and its service contract may be bought from a local dealer, but because one purchaser buys many of them from several dealers spread across a geographic area, they get a discount or extra service on the purchase.
- 2/240 The TXI, Tax Information segment, can be used to list the sales tax paid on a service contract. Also it identifies the taxing authority.
- 2/250 The ITD segment is to be used in the case where the service contract is to be paid at regular intervals over the life of the contract. For example, the payments might be monthly or quarterly.

NOTES

- 2/260 The N9 segment within the PSC loop can contain a unique code identifying the terms of the service contract. For example, repair order number or contract number as preassigned by the product's manufacturer. It also can be used to record the customer's method of payment for a service contract. It then would be used to contain the check number or charge card number. The expiration date on the charge card does not need to be recorded as the computer program entering the transaction only has to check that the card has not expired. N903 will be able to contain the name of the issuer of the card.
- 2/270 The SLN loop is used to describe subassemblies or parts within an assembly that may be covered by separate warranty conditions.
- 2/270 A pair of data elements 234 and 235 in the SLN segment will be used to contain the serial number, lot number, model number, etc. of the subassembly being registered.
- 2/270 All the loops and segments within the SLN loop perform the same functions for the subassemblies as their counterparts above did for the product.
- 2/320 The N1 loop within the SLN loop provides the same capabilities for the single product as the N1 loop above in the LX loop provides for the entire sale. However, the assembly whose information is in the N1 loop is part of the product specified in the SLN loop.
- 2/360 The PER segment is used to provide an individual's or department's name or functional area and, if desired, their communication number for a phone, electronic mail, etc.

180 Return Merchandise Authorization and Notification**FUNCTIONAL GROUP=AN**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Return Merchandise Authorization and Notification Transaction Set (180) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can provide for customary and established business and industry practice relative to the returning of merchandise to the vendor. This transaction set may satisfy request for returns, authorization or disposition of the return, notification of return, or notification of consumer return.

NOTES

- 2/010 Quantity is specified either in the BLI segment (BLI03) or in the QTY segment.
 2/140 The N1 segment is used to identify the location of the material specified in the QTY loop.
 2/170 The LX loop conveys serial number, lot number and inventory data.
 2/200 The N1 segment identifies the name of the manufacturer associated with the serial or lot number specified in the LX loop.

511 Requisition

FUNCTIONAL GROUP: **RN**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition.

This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

NOTES

- 1/050 The LM loop identifies logistic data common to the entire transaction set.
- 1/070 The N1 loop identifies name and or address information common to the entire transaction set.
- 2/150 Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.
- 2/180 The N1 loop identifies the name and address information unique to each use of the LX loop.
- 2/220 The REF loop conveys serial and lot number inventory data.

517 Material Obligation Validation

FUNCTIONAL GROUP=MV

This Draft Standard for Trial Use provides the format and establishes the data contents of the Material Obligation Validation Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. The material obligation validation transaction set may be used to: (1) verify the continued need for open orders, (2) confirm open order quantities and order priority, (3) request reinstatement of erroneously cancelled open orders, and (4) validate Government Furnished Material (GFM) orders. The transaction set may convey a description of the material, the urgency of need associated with the transaction and quantity of required material. This transaction set is bidirectional between trading partners.

527 Material Due-In and Receipt

FUNCTIONAL GROUP=MD

This Draft Standard for Trial Use contains the format and establishes the data contents of the Material Due-In and Receipt Transaction Set (527) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide advanced notification of scheduled material receipts, to report receipts, and to inquire about the status of receipt reporting.

This transaction set may be used to convey a description of the material, receiving conditions and quantities, necessary contract information, and other logistics information. This transaction set is bi-directional between trading partners.

NOTES

- 1/050 The LM loop identifies logistics data common to the entire transaction set.
1/070 The N1 loop identifies name and or address information common to the entire transaction set.
2/020 The CS segment identifies data related to material obtained from procurement sources.
2/030 The N9 segment identifies data related to material obtained from non-procurement sources.
2/090 The N9 segment identifies shipment identification information.
2/120 The LM loop identifies logistics data unique to each use of the RCD loop.
2/140 The CS loop identifies contract summary, logistics, and packaging data unique to material received from a procurement source.
2/210 The N1 loop identifies name and or address information unique to each use of the RCD loop.
2/250 The REF loop conveys serial number, lot number and inventory data.
2/310 The QTY loop stratifies the RCD02 quantity based on unique logistic and receiving location data.

536 Logistics Reassignment

FUNCTIONAL GROUP=LR

This Draft Standard for Trial Use contains the format and establishes the data contents of the Logistics Reassignment Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to provide information necessary to transfer management responsibility between an old and new managing organization. This transaction set may be used to convey a description and quantity of the transferred material, specific inventory locations, product quality information, technical data, open contract information, demand data, procurement history, and other information necessary for the new managing organization to evaluate and meet the material needs of customers.

561 Contract Abstract

FUNCTIONAL GROUP=D4

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Abstract Transaction Set (561) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to abstract a new contract, abstract a change in terms of a previously abstracted contract, or to correct a previously transmitted abstract. This bi-directional transaction set includes the information necessary to administer a contract, including modifications and corrections to that contract, and provides an acknowledgment mechanism to enable management of the contract administration process. This transaction set is typically used internally within a business entity as a post-award management report, when the purchasing and contract administration functions are separated within that entity.

NOTES

- 1/040 The LM loop identifies industry code data unique to the transaction set.
- 1/060 The N1 loop carries address information such as the purchasing party and the contract administration office.
- 2/020 The CS segment carries the details of a specific contract.
- 2/090 To carry the percent variation in quantity over and under for a specified deliverable quantity of an item.
- 2/160 The N1 loop carries address information about the contractor, paying office, accounting station, and inventory control point.
- 2/220 The N1 loop carries address information for each delivery location.
- 3/010 CTT01 is the number of iterations of HL segment. If used, hash total (CTT02) is the sum of the number of items ordered (PO102) for each PO1 segment.

567 Contract Completion Status

FUNCTIONAL GROUP=D3

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Completion Status Transaction Set (567) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to report administrative closure status on completed contracts. The originator can use this transaction set to close contract files, to indicate why contract files will not be closed within established milestones, or to extend contract closeout milestone dates.

This transaction set may be used to convey contract summary data, financial information, dates pertinent to the administrative closing of a contract file, and logistics information necessary to evaluate contract closeout status.

	140	N3	Address Information	O	2	
	150	N4	Geographic Location	O	1	
	160	SE	Transaction Set Trailer	M	1	

NOTES

- 1/020 The BC segment can carry a transaction reference number and a reference to a previous transaction number.
- 1/050 The CS loop carries the details of the contract(s) being reported and the logistics management information relative to the administrative closeout of the contract(s).
- 1/060 The AMT segment carries the amount of obligated dollars which remain unliquidated, if any existed, at the time the contract was administratively closed.
- 1/070 The N9 segment contains the number of the last payment voucher applicable to the reported contract.
- 1/100 The LM loop identifies logistic data unique to each use of the CS loop.

568 Contract Payment Management Report

FUNCTIONAL GROUP=D5

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Payment Management Report Transaction Set (568) for use within an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the transmission of a management report to provide the details of payments and collections made against funds obligated on contracts, orders, and other services.

NOTES

- 1/020 The BGN segment identifies the transaction set purpose code, a unique number used to identify this transmission, and the date and time of transaction set creation.
- 1/030 The AMT segment identifies the collected amount and the disbursed amount to the extent that either amount applies to the transaction set.
- 1/040 The N1 loop identifies the name and address information for the transmitting and receiving parties.
- 1/080 The PER segment identifies the name and communications number of an information point of contact familiar with the details of the contract payment management report.
- 2/010 The CS segment identifies the contract, modification, call, and order number of the procurement instrument, and the voucher number of the payment being reported on in this contract payment management report.
- 2/020 The N9 segment identifies the number of the original voucher on which a payment was made if the voucher being reported on in this transmission is a change, correction, or adjustment to that previous voucher.
- 2/030 The DTM segment identifies the date of the voucher being reported on in this transmission.
- 2/040 The LM loop provides the capability to transmit industry-specific codes from an industry-specific code list.
- 2/050 The LQ segment identifies the industry-specific codes.
- 2/060 The REF segment identifies a reference number associated with the following appropriation data.
- 2/070 The AT segment identifies the appropriation codes.
- 2/090 The N9 segment identifies a contract line item, exhibit line item, or subclassification of either against which specific data is being reported.
- 2/100 The AMT segment identifies the gross, net, deducted, or collected amounts and the net variance amount applicable to the line item being reported.
- 2/110 The QTY segment identifies the quantity shipped.
- 2/130 The LQ segment identifies industry-specific codes applicable to the line item.
- 2/140 The N1 loop identifies address information for a quantity delivered in a specific shipment, to a specific ship-to address.
- 2/180 The N9 segment identifies the shipment identification number and suffix number, if one exists, for the shipment which resulted in the voucher action.
- 3/010 The CTT segment identifies the number of CS segments used in the transaction. When used, CTT02 is the hash total of AMT02 at position 090 in Table 2 of this transaction set.

810 Invoice

FUNCTIONAL GROUP=IN

This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

NOTES

- 1/212 The BAL segment is to be used only if the code in BIG07 indicates that the transaction is a "Monthly Adjustment" or "Special Handling Adjustment" invoice.
- 2/015 The QTY segment is used to specify a quantity of units which are expected as payments, e.g., trade-ins or returns.
- 3/070 Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used, hash total (CTT02) is the sum of the value of quantities invoiced (IT102) for each IT1 segment.

812 Credit/Debit Adjustment

FUNCTIONAL GROUP=CD

This Draft Standard for Trial Use contains the format and establishes the data contents of the Credit/Debit Adjustment Transaction Set (812) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to notify a trading partner of an adjustment or billback and may be used to request an adjustment or billback. It identifies and contains the details and amounts covering exceptions, adjustments, credits, or debits for goods or services. This transaction set is multidirectional between trading partners.

NOTES

1/020 BCD05 indicates whether the net of the detail is a credit or a debit.

NOTES

1/090 SHD is used to indicate shipment detail relative to credit or debit of returned product.

824 Application Advice

FUNCTIONAL GROUP=AG

This Draft Standard for Trial Use contains the format and establishes the data contents of the Application Advice Transaction Set (824) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the ability to report the results of an application system's data content edits of transaction sets. The results of editing transaction sets can be reported at the functional group and transaction set level, in either coded or free-form format. It is designed to accommodate the business need of reporting the acceptance, rejection or acceptance with change of any transaction set. The Application Advice should not be used in place of a transaction set designed as a specific response to another transaction set (e.g., purchase order acknowledgement sent in response to a purchase order).

NOTES

2/085 Use of the LM loop is limited to the identification of industry unique application error conditions.

COMMENTS

2/020 REF segments can be used as needed to further identify the original transaction set.

THIS PAGE INTENTIONALLY LEFT BLANK.

830 Planning Schedule with Release Capability

FUNCTIONAL GROUP=PS

This Draft Standard for Trial Use contains the format and establishes the data contents of the Planning Schedule with Release Capability Transaction Set (830) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business practice relative to the transfer of forecasting/material release information between organizations.

The planning schedule transaction may be used in various ways or in a combination of ways, such as: (1) a simple forecast; (2) a forecast with the buyer's authorization for the seller to commit to resources, such as labor or material; (3) a forecast that is also used as an order release mechanism, containing such elements as resource authorizations, period-to-date cumulative quantities, and specific ship/delivery patterns for requirements that have been represented in "buckets," such as weekly, monthly, or quarterly. The order release forecast may also contain all data related to purchase orders, as required, because the order release capability eliminates the need for discrete generation of purchase orders.

NOTES

- 2/220 QTY is used to specify supplemental quantities relevant to the forecast function. However, QTY is not related to the actual forecast quantity in the FST segments.
- 2/410 At least one occurrence of segment FST is required, either in the FST loop or within the SDP loop. These two loops are mutually exclusive.
- 3/010 Number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (FST01) for each FST segment.

842 Nonconformance Report

FUNCTIONAL GROUP=NC

This Draft Standard for Trial Use contains the format and establishes the data contents of the Nonconformance Report Transaction Set (842) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report products and processes that do not fulfill specifications or requirements.

The Nonconformance Report Transaction Set provides the ability for the sender to report the nonconformance at the level of detail that is required. It also provides the ability to report the specific nonconformances of a component/part while identifying the assembly as the product that is in nonconformance. The Nonconformance Report Transaction Set may be used to report, initiate, or request actions related to the nonconformance being reported. Financial and accounting information is provided for reporting purposes only.

The Nonconformance Report Transaction Set has the capability to report the cause of the nonconformance and to state the proposed action to be followed to prevent a repetition of the problem.

NOTES

2/010 The HL levels are item, component, product characteristic, report, and serial number. Valid HL Parent-Child relationships are 1) item - component, 2) item - product characteristic, 3) component - product characteristic, 4) report - item, 5) item - serial number, and 6) component - serial number.

846 Inventory Inquiry/Advice

FUNCTIONAL GROUP=IB

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

NOTES

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

THIS PAGE INTENTIONALLY LEFT BLANK.

856 Ship Notice/Manifest

FUNCTIONAL GROUP=SH

This Draft Standard for Trial Use contains the format and establishes the data contents of the Ship Notice/Manifest Transaction Set (856) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. The transaction set enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.

The sender of this transaction is the organization responsible for detailing and communicating the contents of a shipment, or shipments, to one or more receivers of the transaction set. The receiver of this transaction set can be any organization having an interest in the contents of a shipment or information about the contents of a shipment.

NOTES

3/010 Number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of units shipped (SN102) for each SN1 segment.

COMMENTS

2/010 The HL segment is the only mandatory segment within the HL loop, and by itself, the HL segment has no meaning.

858 Shipment Information

FUNCTIONAL GROUP=SI

This Draft Standard for Trial Use contains the format and establishes the data contents of the Shipment Information Transaction Set (858) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the sender with the capability to transmit detailed bill-of-lading, rating, and/or scheduling information pertinent to a shipment.

NOTES

- 1/030 BX05 contains the SCAC of the original roadhaul carrier receiving the shipment.
- 2/180 If the hazardous endorsement (LH204) is "NONE", then use of LH204 is mandatory. However, the receiver must consider it to be blanks when printing a paper document.
- 2/210 All receivers of the EDI transactions covering empty tank cars which last contained hazardous commodities must be able to add the constant words: RESIDUE: LAST CONTAINED ahead of the contents of LHE01 and add the constant: RESIDUE following the contents of the LHE02 when printing paper documents.
- 2/220 When used in the hazardous material loop, the segment will identify the various certification, exemption or shipper-related numbers that relate to the specific line item of the shipment that are in addition to the UN/UA number reference in the LH1 segment.

861 Receiving Advice/Acceptance Certificate

FUNCTIONAL GROUP=RC

This Draft Standard for Trial Use contains the format and establishes the data contents of the Receiving Advice/Acceptance Certificate Transaction Set (861) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the notification of receipt or formal acceptance of goods and services.

NOTES

- 1/020 This transaction set is a receiving advice unless BRA04 contains a value of "8". When BRA04 contains a value of "8", the transaction set is an Acceptance Certificate and the units received is the units accepted.
- 3/010 The number of line items (CTT01) is the accumulation of the number of RCD segments. If used, hash total (CTT02) is the sum of the value of quantities received (RCD02) for each RCD segment.

867 Product Transfer and Resale Report

FUNCTIONAL GROUP=PT

This Draft Standard for Trial Use contains the format and establishes the data contents of the Product Transfer and Resale Report Transaction Set (867) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to: (1) report information about product that has been transferred from one location to another; (2) report sales of product from one or more locations to an end customer; or (3) report sales of a product from one or more locations to an end customer, and demand beyond actual sales (lost orders). Report may be issued by either buyer or seller.

NOTES

- 2/280 The LX loop conveys serial number, lot number, and inventory data.
- 3/010 The number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the value of quantities (QTY02) for each QTY segment.

869 Order Status Inquiry

FUNCTIONAL GROUP=RS

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Inquiry Transaction Set (869) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request all pertinent information relative to an entire purchase order, selected line items on a purchase order, or selected products/services on a purchase order. Inquiry can also be made for all or a selected portion of the customer's ordered items, all or a selected portion of the customer's unshipped items, or all or a selected portion of the customer's shipped items.

870 Order Status Report

FUNCTIONAL GROUP=RS

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

NOTES

2/086 Use is limited to intra-organizational transactions.

NOTES

- 2/340 The LX loop conveys serial number, lot number, and inventory data.
- 3/010 The number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

888 Item Maintenance

FUNCTIONAL GROUP=QG

This Draft Standard for Trial Use provides the format and establishes the data contents of the Item Maintenance Transaction Set (888) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to enable a manufacturer, supplier, broker, or agent to provide detailed finished goods product information to a partner in a consumer goods market. This transaction set can be used to provide information about new products or changes in existing product specifications. Price changes will not be sent with this transaction set, but can be sent with the Price Change Transaction Set (879).

- 2/020 The G62 segment is used to specify the effective date for the item maintenance action reflected in G5301.

940 Warehouse Shipping Order

FUNCTIONAL GROUP=OW

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

945 Warehouse Shipping Advice

FUNCTIONAL GROUP=SW

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Advice Transaction Set (945) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the warehouse to advise the depositor that shipment was made. It is used to reconcile order quantities with shipment quantities.

947 Warehouse Inventory Adjustment Advice

FUNCTIONAL GROUP=AW

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Inventory Adjustment Advice Transaction Set (947) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to inform a warehouse/depositor of a quantity or status change to inventory records. This transaction set provides detail information concerning the internal adjustments which occur between a warehouse and a depositor.

997 Functional Acknowledgment

FUNCTIONAL GROUP=FA

This Draft Standard for Trial Use contains the format and establishes the data contents of the Functional Acknowledgment Transaction Set (997) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Table 1

NOTE	POS. NO.	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N	010	ST	Transaction Set Header	M	1	
N	020	AK1	Functional Group Response Header	M	1	
		LOOP ID - AK2				999999
N	030	AK2	Transaction Set Response Header	O	1	
		LOOP ID - AK3				999999
C	040	AK3	Data Segment Note	O	1	
	050	AK4	Data Element Note	O	99	
	060	AK5	Transaction Set Response Trailer	M	1	
	070	AK9	Functional Group Response Trailer	M	1	
	080	SE	Transaction Set Trailer	M	1	

NOTES

- 1/010 These acknowledgments shall not be acknowledged, thereby preventing an endless cycle of acknowledgments of acknowledgments.
- 1/010 The Functional Group Header Segment (GS) is used to start the envelope for the Functional Acknowledgment Transaction Sets. In preparing the functional group of acknowledgments, the application sender's code and the application receiver's code, taken from the functional group being acknowledged, are exchanged; therefore, one acknowledgment functional group responds to only those functional groups from one application receiver's code to one application sender's code.
- 1/010 There is only one Functional Acknowledgment Transaction Set per acknowledged functional group.
- 1/020 AK1 is used to respond to the functional group header and to start the acknowledgement for a functional group. There shall be one AK1 segment for the functional group that is being acknowledged.
- 1/030 AK2 is used to start the acknowledgement of a transaction set within the received functional group. The AK2 segments shall appear in the same order as the transaction sets in the functional group that has been received and is being acknowledged.

COMMENTS

- 1/040 The data segments of this standard are used to report the results of the syntactical analysis of the functional groups of transaction sets; they report the extent to which the syntax complies with the standards for transaction sets and functional groups. They do not report on the semantic meaning of the transaction sets (for example, on the ability of the receiver to comply with the request of the sender).

AK1 Functional Group Response Header

To start acknowledgment of a functional group.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	479 Functional Identifier Code	M Z ID 2/2
02	28 Group Control Number	M Z NO 1/9

SEMANTIC NOTES

- 01 AK101 is the functional ID found in the GS segment (GS01) in the functional group being acknowledged.
- 02 AK102 is the functional group control number found in the GS segment in the functional group being acknowledged.

AK2 Transaction Set Response Header

To start acknowledgment of a single transaction set.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	143 Transaction Set Identifier Code	M Z ID 3/3
02	329 Transaction Set Control Number	M Z AN 4/9

SEMANTIC NOTES

- 01 AK201 is the transaction set ID found in the ST segment (ST01) in the transaction set being acknowledged.
- 02 AK202 is the transaction set control number found in the ST segment in the transaction set being acknowledged.

AK3 Data Segment Note

To report errors in a data segment and to identify the location of the data segment.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	721 Segment ID Code	M ID 2/3
02	719 Segment Position in Transaction Set	M NO 1/6
03	447 Loop Identifier Code	O AN 1/4
04	720 Segment Syntax Error Code	O ID 1/3

AK4 Data Element Note

To report errors in a data element and to identify the location of the data element.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	C030 Position in Segment	M
02	725 Data Element Reference Number	O NO 1/4
03	723 Data Element Syntax Error Code	M ID 1/3
04	724 Copy of Bad Data Element	O AN 1/99

AK5 Transaction Set Response Trailer

To acknowledge acceptance or rejection and to report errors in a transaction set.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	717 Transaction Set Acknowledgment Code	M ID 1/1
02	718 Transaction Set Syntax Error Code	O ID 1/3
03	718 Transaction Set Syntax Error Code	O ID 1/3
04	718 Transaction Set Syntax Error Code	O ID 1/3
05	718 Transaction Set Syntax Error Code	O ID 1/3
06	718 Transaction Set Syntax Error Code	O ID 1/3

AK9 Functional Group Response Trailer

To acknowledge acceptance or rejection of a functional group and report the number of included transaction sets from the original trailer, the accepted sets, and the received sets in this functional group.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

997

REF	ELE ID NAME	ATTRIBUTES
01	715 Functional Group Acknowledge Code	M ID 1/1
02	97 Number of Transaction Sets Included	M NO 1/6

AMT • MONETARY AMOUNT

REF	ELE ID	NAME	ATTRIBUTES
03	123	Number of Received Transaction Sets	M NO 1/6
04	2	Number of Accepted Transaction Sets	M NO 1/6
05	716	Functional Group Syntax Error Code	O ID 1/3
06	716	Functional Group Syntax Error Code	O ID 1/3
07	716	Functional Group Syntax Error Code	O ID 1/3
08	716	Functional Group Syntax Error Code	O ID 1/3
09	716	Functional Group Syntax Error Code	O ID 1/3

COMMENTS

- 01 If AK901 is 'A' or 'E', then the transmitted functional group is accepted. If AK901 is 'R', then the transmitted group is rejected.

AMT Monetary Amount

To indicate the total monetary amount.

10	1270	Code List Qualifier Code	O ID 1/3

SYNTAX NOTES

- 10 C1001 — If AT10 is present, then AT01 is required.

COMMENTS

- 09 AT09 identifies unique local activity financial accounting information

ATH Resource Authorization

To specify resource authorizations (i.e., finished labor, material, etc.) in the planning schedule.

TRANSACTION SETS USED IN:

830

REF	ELE ID	NAME	ATTRIBUTES
01	672	Resource Authorization Code	M ID 2/2
02	373	Date	X Z DT 6/6
03	380	Quantity	X Z R 1/15
04	380	Quantity	O R 1/15
05	373	Date	X Z DT 6/6

SYNTAX NOTES

- 02 R0203 — At least one of ATH02 or ATH03 is required.
 03 C0305 — If ATH03 is present, then ATH05 is required.
 04 C0405 — If ATH04 is present, then ATH05 is required.

SEMANTIC NOTES

- 02 ATH02 - resource authorization through-date: The date through which the buyer authorizes the seller to commit the resource defined in element ATH01.
 03 ATH03 - current cumulative requirements quantity: The cumulative quantity that has been authorized to-date from the cumulative start date (ATH05) through the resource authorization through-date (ATH02).
 05 ATH05 - cumulative start date: The date where the cumulative quantity count starts. This date might be the start date of a contract period, a calendar or fiscal year, or other.

COMMENTS

- 01 It is imperative that negotiations defining "Financial Commitment" have previously occurred and are agreed to by both buyer and seller.
 04 ATH04 - Maximum Cumulative Requirements Quantity: The maximum cumulative quantity that has been authorized to-date from the cumulative start-date (ATH05) through the resource authorization thru-date (ATH02). This is a high water mark. If the forecast decreases, the current cumulative requirements quantity also decreases, but the maximum cumulative requirements quantity does not decrease.

BAL Balance Detail

To identify the specific monetary balances associated with a particular account.

TRANSACTION SETS USED IN:

810 811 884

REF	ELE ID NAME	ATTRIBUTES
01	951 Balance Type Code	M ID 1/2
02	522 Amount Qualifier Code	M ID 1/2

05	127 Reference Number	O Z AN 1/30
06	640 Transaction Type Code	O ID 2/2
07	306 Action Code	O ID 1/2

SEMANTIC NOTES

- 02 BC02 is the date of transaction set preparation.
 03 BC03 is the time of transaction set preparation.
 04 BC04 is the transaction reference number.
 05 BC05 is the reference number of a previous transaction.

BCD Beginning Credit/Debit Adjustment

To transmit identifying dates and numbers for this transaction set and to indicate the monetary value to the receiver of the transaction

TRANSACTION SETS USED IN:

812

REF	ELE ID NAME	ATTRIBUTES
01	373 Date	M Z DT 6/6
02	475 Credit/Debit Adjustment Number	M AN 1/16
03	305 Transaction Handling Code	M ID 1/2

REF	ELE ID NAME	ATTRIBUTES
13	128 Reference Number Qualifier	X ID 2/2
14	127 Reference Number	X AN 1/30
15	306 Action Code	O ID 1/2

SYNTAX NOTES

- 07 R071014 — At least one of BCD07, BCD10 or BCD14 is required.
 13 P1314 — If either BCD13 or BCD14 is present, then the other is required.

SEMANTIC NOTES

- 01 BCD01 is the credit/debit adjustment date.
 04 BCD04 is the net amount of this complete transaction.
 06 BCD06 is the invoice date.
 09 BCD09 is the purchase order date.

COMMENTS

- 07 If using BCD07 or BCD10, do not use BCD14 to identify invoice number or purchase order number.
 11 For BCD11, only codes 00, 05, 06, 07, and 15 are permitted to be used.

BFR Beginning Segment for Planning Schedule

To indicate the beginning of a planning schedule transaction set; whether a ship or delivery based forecast; and related forecast envelope dates

TRANSACTION SETS USED IN:

830

REF	ELE ID NAME	ATTRIBUTES
01	353 Transaction Set Purpose Code	M Z ID 2/2
02	127 Reference Number	X Z AN 1/30
03	328 Release Number	X AN 1/30
04	675 Schedule Type Qualifier	M ID 2/2
05	676 Schedule Quantity Qualifier	M ID 1/1
06	373 Date	M Z DT 6/6
07	373 Date	O Z DT 6/6
08	373 Date	M Z DT 6/6
09	373 Date	O Z DT 6/6
10	367 Contract Number	O AN 1/30
11	324 Purchase Order Number	O AN 1/22
12	783 Planning Schedule Type Code	O ID 2/2
13	306 Action Code	O ID 1/2

SYNTAX NOTES

- 02 R0203 — At least one of BFR02 or BFR03 is required.

SEMANTIC NOTES

- 01 If BFR01 equals "04" (Net Change), BFR09 is required.
 02 BFR02 is the identifying number for a forecast assigned by the orderer/purchaser.
 06 BFR06 - forecast horizon start date: The date when the forecast horizon (envelope) begins.
 07 BFR07 - forecast horizon end date: The date when the forecast horizon (envelope) ends.

SEMANTIC NOTES

- 08 BFR08 - date forecast generated: The date the forecast data was generated.
- 09 BFR09 - date forecast updated: The date the forecast was updated with "net change" data. (Used only when element 353 in BFR04 equals "04", meaning net change.)

BGN Beginning Segment

To indicate the beginning of a transaction set.

TRANSACTION SETS USED IN:

124	130	131	135	139	140	141	142	143	144
146	147	148	150	152	154	175	176	180	185

06	127	Reference Number	O/Z AN 1/30
07	640	Transaction Type Code	O ID 2/2
08	306	Action Code	O ID 1/2

SYNTAX NOTES

- 05 C0504 — If BGN05 is present, then BGN04 is required.

SEMANTIC NOTES

- 02 BGN02 is the transaction set reference number.
- 03 BGN03 is the transaction set date.
- 04 BGN04 is the transaction set time.
- 05 BGN05 is the transaction set time qualifier.
- 06 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

BIA Beginning Segment for Inventory Inquiry/Advice

To indicate the beginning of an inventory inquiry/advice transaction set.

TRANSACTION SETS USED IN:

846

REF	ELE ID	NAME	ATTRIBUTES
01	353	Transaction Set Purpose Code	M ID 2/2
02	755	Report Type Code	M ID 2/2
03	127	Reference Number	M/Z AN 1/30
04	373	Date	M/Z DT 6/6
05	337	Time	O/Z TM 4/8
06	306	Action Code	O ID 1/2

SEMANTIC NOTES

- 03 BIA03 identifies the number of the inquiry/advice that is transferred.
- 04 BIA04 identifies the date of the inquiry/advice that is transferred.
- 05 BIA05 identifies the time of the inquiry/advice that is transferred.

BIG Beginning Segment for Invoice

To indicate the beginning of an invoice transaction set and to transmit identifying numbers and dates.

TRANSACTION SETS USED IN:

810 811

REF	ELE ID	NAME	ATTRIBUTES
01	373	Date	M/Z DT 6/6
02	76	Invoice Number	M AN 1/22
03	373	Date	O/Z DT 6/6
04	324	Purchase Order Number	O AN 1/22
05	328	Release Number	O AN 1/30
06	327	Change Order Sequence Number	O AN 1/8
07	640	Transaction Type Code	O ID 2/2
08	353	Transaction Set Purpose Code	O ID 2/2
09	306	Action Code	O ID 1/2
10	76	Invoice Number	O/Z AN 1/22

SEMANTIC NOTES

- 01 BIG01 is the invoice issue date.
- 03 BIG03 is the date assigned by the purchaser to purchase order.
- 10 BIG10 indicates the consolidated invoice number. When BIG07 contains code CI, BIG10 is not used.

COMMENTS

- 07 BIG07 is used only to further define the type of invoice when needed.

BIN Binary Data

To transfer binary data in a single data segment and to allow identification of the end of the data segment through a count. There is no identification of the internal structure of the binary data in this segment.

TRANSACTION SETS USED IN:

176 841 842

REF	ELE ID	NAME	ATTRIBUTES
01	784	Length of Binary Data	M NO 1/15
02	785	Binary Data	M B 1/10 ¹⁵⁻¹

BLI **Baseline Item Data**

To specify basic item data: item identification, quantity, and price

TRANSACTION SETS USED IN:

180

REF	ELE ID	NAME	ATTRIBUTES
01	235	Product/Service ID Qualifier	M ID 2/2
02	234	Product/Service ID	M AN 1/40
03	380	Quantity	O R 1/15
04	355	Unit or Basis for Measurement Code	O/Z ID 2/2
05	236	Price Identifier Code	X ID 3/3
06	212	Unit Price	X R 1/17
07	355	Unit or Basis for Measurement Code	O ID 2/2
08	235	Product/Service ID Qualifier	X ID 2/2
09	234	Product/Service ID	X AN 1/40
10	235	Product/Service ID Qualifier	X ID 2/2
11	234	Product/Service ID	X AN 1/40
12	235	Product/Service ID Qualifier	X ID 2/2
13	234	Product/Service ID	X AN 1/40

SYNTAX NOTES

- 05 P0506 — If either BLI05 or BLI06 is present, then the other is required.
- 07 C0706 — If BLI07 is present, then BLI06 is required.
- 08 P0809 — If either BLI08 or BLI09 is present, then the other is required.
- 10 P1011 — If either BLI10 or BLI11 is present, then the other is required.
- 12 P1213 — If either BLI12 or BLI13 is present, then the other is required.

SEMANTIC NOTES

- 04 BLI04, the unit of measure code applies to both quantity, (BLI03) and unit price (BLI06), unless BLI07 is present, in which case BLI04 applies only to BLI03, and BLI07 applies only to BLI06.

COMMENTS

- 00 Element 235/234 combinations should be interpreted to include products or services. See the Data Element Dictionary for a complete list of IDs.
- 01 BLI01, BLI02, and BLI08 through BLI13 provide for four different product/service IDs for each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model, SKU.

BNR **Beginning Segment For Nonconformance Report**

To indicate the beginning of a Nonconformance Report Transaction Set.

TRANSACTION SETS USED IN:

842

REF	ELE ID	NAME	ATTRIBUTES
01	353	Transaction Set Purpose Code	M ID 2/2
02	127	Reference Number	M/Z AN 1/30
03	373	Date	M/Z DT 6/6
04	337	Time	O/Z TM 4/8
05	886	Nonconformance Report Status Code	O ID 2/2
06	640	Transaction Type Code	O ID 2/2

SEMANTIC NOTES

- 02 BNR02 is the nonconformance report identifier number.
- 03 BNR03 is the date that the nonconformance report was created.
- 04 BNR04 is the time that the nonconformance report was created.

COMMENTS

- 05 BNR05 indicates the status or intention of the Nonconformance Report.

BNX **Rail Shipment Information**

To transmit rail-specific shipment data

TRANSACTION SETS USED IN:

404 417 426 858

REF	ELE ID	NAME	ATTRIBUTES
01	460	Shipment Weight Code	O ID 1/1
02	129	Referenced Pattern Identifier	O AN 1/13
03	11	Billing Code	O ID 1/1
04	223	Repetitive Pattern Number	O NO 5/5

BPT **Beginning Segment for Product Transfer and Resale**

To indicate the beginning of the product transfer and/or resale report and transmit identifying data.

TRANSACTION SETS USED IN:

867

REF	ELE ID	NAME	ATTRIBUTES
01	353	Transaction Set Purpose Code	M ID 2/2
02	127	Reference Number	O/Z AN 1/30
03	373	Date	M/Z DT 6/6
04	755	Report Type Code	O ID 2/2
05	648	Price Multiplier Qualifier	X ID 3/3
06	649	Multiplier	X R 1/10
07	306	Action Code	O ID 1/2
08	337	Time	O/Z TM 4/8
09	127	Reference Number	O/Z AN 1/30

SYNTAX NOTES

- 05 P0506 — If either BPT05 or BPT06 is present, then the other is required.

SEMANTIC NOTES

- 02 BPT02 identifies the transfer/resale number.
 03 BPT03 identifies the transfer/resale date.
 08 BPT08 identifies the transfer/resale time.
 09 BPT09 is used when it is necessary to reference a Previous Report Number.

BR Beginning Segment for Material Management

To indicate the beginning of a material management transaction and to transmit identifying numbers and dates

TRANSACTION SETS USED IN:

511 517 527 536

REF	ELE ID	NAME	ATTRIBUTES
01	353	Transaction Set Purpose Code	M ID 2/2
02	640	Transaction Type Code	M ID 2/2
03	373	Date	M Z DT 6/6
04	67	Identification Code	X AN 2/20
05	66	Identification Code Qualifier	O ID 1/2
06	306	Action Code	O ID 1/2
07	128	Reference Number Qualifier	X ID 2/2
08	127	Reference Number	X AN 1/30
09	337	Time	O Z TM 4/8
10	128	Reference Number Qualifier	X ID 2/2
11	127	Reference Number	X AN 1/30

SYNTAX NOTES

- 05 C0504 — If BR05 is present, then BR04 is required.
 07 P0708 — If either BR07 or BR08 is present, then the other is required.
 10 P1011 — If either BR10 or BR11 is present, then the other is required.

SEMANTIC NOTES

- 03 BR03 is the date of the transaction set preparation.
 09 BR09 is the time of the transaction set preparation

BRA Beginning Segment for Receiving Advice or Acceptance Certificate

To indicate the beginning of a receiving advice or acceptance certificate transaction set and to transmit an identifying number, date and time

TRANSACTION SETS USED IN:

861

REF	ELE ID	NAME	ATTRIBUTES
01	127	Reference Number	M AN 1/30
02	373	Date	M Z DT 6/6
03	353	Transaction Set Purpose Code	M ID 2/2
04	962	Receiving Advice or Acceptance Certificate Type Code	M ID 1/1

REF	ELE ID	NAME	ATTRIBUTES
05	337	Time	O Z TM 4/8
06	412	Receiving Condition Code	O ID 2/2
07	306	Action Code	O ID 1/2

SEMANTIC NOTES

- 02 BRA02 is the date that the receiving advice transaction set is created.
 05 BRA05 is the time that the receiving advice transaction set is created.

BSI Beginning Segment for Order Status Inquiry

To indicate the beginning of an order status inquiry and to provide the type of customer status inquiry.

TRANSACTION SETS USED IN:

869

REF	ELE ID	NAME	ATTRIBUTES
01	127	Reference Number	M Z AN 1/30
02	373	Date	M Z DT 6/6
03	847	Order/Item Code	M ID 1/2
04	848	Product/Date Code	O ID 1/2
05	849	Location Code	O ID 1/2
06	337	Time	O Z TM 4/8
07	353	Transaction Set Purpose Code	O ID 2/2
08	640	Transaction Type Code	O ID 2/2
09	306	Action Code	O ID 1/2

SEMANTIC NOTES

- 01 BSI01 is a status inquiry reference number.
 02 BSI02 is date of the inquiry.
 06 BSI06 is time of the inquiry.

BSN Beginning Segment for Ship Notice

To transmit identifying numbers, dates and other basic data relating to the transaction set

TRANSACTION SETS USED IN:

856

REF	ELE ID	NAME	ATTRIBUTES
01	353	Transaction Set Purpose Code	M ID 2/2
02	396	Shipment Identification	M AN 2/30
03	373	Date	M Z DT 6/6
04	337	Time	M Z TM 4/8
05	1005	Hierarchical Structure Code	O ID 4/4
06	640	Transaction Type Code	X Z ID 2/2
07	641	Status Reason Code	O ID 3/3

SYNTAX NOTES

- 07 C0706 — If BSN07 is present, then BSN06 is required.

SEMANTIC NOTES

- 03 BSN03 is the date the shipment transaction set is created.
 04 BSN04 is the time the shipment transaction set is created.
 06 BSN06 is limited to shipment related codes

COMMENTS

- 06 BSN06 and BSN07 differentiate the functionality of use for the transaction set

BSR Beginning Segment for Order Status Report

To indicate the beginning of an Order Status Report.

TRANSACTION SETS USED IN:

870

REF	ELE ID NAME	ATTRIBUTES
01	850 Status Report Code	M ID 1/2
02	847 Order/Item Code	M ID 1/2
03	127 Reference Number	M Z AN 1/30
04	373 Date	M Z DT 6/6
05	848 Product/Date Code	O ID 1/2
06	849 Location Code	O ID 1/2
07	337 Time	O Z TM 4/8
08	127 Reference Number	O Z AN 1/30
09	373 Date	O Z DT 6/6
10	337 Time	O Z TM 4/8
11	353 Transaction Set Purpose Code	O ID 2/2
12	306 Action Code	O ID 1/2

SEMANTIC NOTES

- 03 BSR03 indicates a status report document number assigned by the sender.
 04 BSR04 indicates the date of this report from the sender.
 07 BSR07 indicates the time of this report from the sender.
 08 BSR08 indicates a status report document number assigned by the inquirer.
 09 BSR09 indicates the date this report was requested from the sender by the inquirer.
 10 BSR10 indicates the time this report was requested from the sender by the inquirer.

BX General Shipment Information

To transmit identification numbers and other basic shipment data

TRANSACTION SETS USED IN:

404 417 426 858

REF	ELE ID NAME	ATTRIBUTES
01	353 Transaction Set Purpose Code	M ID 2/2
02	91 Transportation Method/Type Code	M ID 1/2
03	146 Shipment Method of Payment	M ID 2/2
04	145 Shipment Identification Number	O AN 1/30

REF	ELE ID NAME	ATTRIBUTES
05	140 Standard Carrier Alpha Code	O ID 2/4
06	188 Weight Unit Code	O ID 1/1
07	147 Shipment Qualifier	O ID 1/1
08	226 Section Seven Code	O ID 1/1
09	195 Capacity Load Code	O ID 1/1
10	160 Status Report Request Code	O ID 1/1
11	501 Customs Documentation Handling Code	O ID 2/2
12	199 Confidential Billing Request Code	O ID 1/1
13	714 Goods and Services Tax Reason Code	O ID 1/1
14	346 Application Type	O ID 2/2

C3 Currency

To specify the currency being used in the transaction set

TRANSACTION SETS USED IN:

104 110 124 204 210 213 310 312 325 858 859

REF	ELE ID NAME	ATTRIBUTES
01	100 Currency Code	M Z ID 3/3
02	280 Exchange Rate	O R 4/6
03	100 Currency Code	O Z ID 3/3

SEMANTIC NOTES

- 01 C301 = Billing Currency
 03 C303 = Payment Currency

COMMENTS

- 00 Currency is implied by the code for the country in whose currency the monetary amounts are specified.

CAD Carrier Detail

To specify transportation details for the transaction

TRANSACTION SETS USED IN:

810

REF	ELE ID NAME	ATTRIBUTES
01	91 Transportation Method/Type Code	O ID 1/2
02	206 Equipment Initial	O AN 1/4
03	207 Equipment Number	O AN 1/10
04	140 Standard Carrier Alpha Code	X ID 2/4
05	387 Routing	X AN 1/35
06	368 Shipment/Order Status Code	O ID 2/2
07	128 Reference Number Qualifier	O ID 2/2
08	127 Reference Number	X AN 1/30
09	284 Service Level Code	O ID 2/2

SYNTAX NOTES

- 05 R0504 — At least one of CAD05 or CAD04 is required.
 07 C0708 — If CAD07 is present, then CAD08 is required.

CDD Credit/Debit Adjustment Detail

To provide information relative to a line item adjustment

TRANSACTION SETS USED IN:

812

REF	ELE ID	NAME	ATTRIBUTES
01	426	Adjustment Reason Code	M ID 2/2
02	478	Credit/Debit Flag Code	M ID 1/1
03	350	Assigned Identification	O AN 1/11
04	610	Amount	X N2 1/15
05	1073	Yes/No Condition or Response Code	O Z ID 1/1
06	417	Price Bracket Identifier	O AN 1/3
07	477	Credit/Debit Quantity	X R 1/10
08	355	Unit or Basis for Measurement Code	X ID 2/2
09	427	Unit Price Difference	O R 1/9
10	236	Price Identifier Code	X ID 3/3
11	212	Unit Price	X R 1/17
12	236	Price Identifier Code	X ID 3/3
13	212	Unit Price	X R 1/17

SYNTAX NOTES

- 04 R0407 — At least one of CDD04 or CDD07 is required.
 07 C0711 — If CDD07 is present, then CDD11 is required.
 07 P0708 — If either CDD07 or CDD08 is present, then the other is required.
 10 P1011 — If either CDD10 or CDD11 is present, then the other is required.
 12 P1213 — If either CDD12 or CDD13 is present, then the other is required.

SEMANTIC NOTES

- 05 CDD05 is the code indicating whether adjustment is for returned goods. A "Y" confirms that the shipment is for returned goods.

COMMENTS

- 12 If comparison pricing is used, then CDD12 and CDD13 are required.

CID Characteristic/Class ID

To specify the general class or specific characteristic upon which test results are being reported or are to be taken

TRANSACTION SETS USED IN:

142 143 841 842 848 863

REF	ELE ID	NAME	ATTRIBUTES
01	738	Measurement Qualifier	X ID 1/3

REF	ELE ID	NAME	ATTRIBUTES
02	750	Product/Process Characteristic Code	X ID 2/3
03	559	Agency Qualifier Code	X ID 2/2
04	751	Product Description Code	X AN 1/12
05	352	Description	X AN 1/80
06	822	Source Subqualifier	O AN 1/15
07	1073	Yes/No Condition or Response Code	O ID 1/1

SYNTAX NOTES

- 01 R01020405 — At least one of CID01, CID02, CID04 or CID05 is required.
 03 P0304 — If either CID03 or CID04 is present, then the other is required.
 06 C060304 — If CID06 is present, then CID03 and CID04 are required.
 07 L070405 — If CID07 is present, then at least one of CID04 or CID05 is required.

COMMENTS

- 06 CID06 specifies the individual code list of the agency specified in CID03.
 07 CID07 refers to whether or not the characteristic identified in CID04 or CID05 or both is affected by the product change. If it is affected, the value is "Y". A value of "N" is used when it is known that it will not be affected. Any other value indicates it is indeterminate.

CLD Load Detail

To specify the number of material loads shipped.

TRANSACTION SETS USED IN:

856

REF	ELE ID	NAME	ATTRIBUTES
01	622	Number of Loads	M NO 1/5
02	382	Number of Units Shipped	M R 1/10
03	103	Packaging Code	O AN 3/5
04	357	Size	O R 1/8
05	355	Unit or Basis for Measurement Code	O Z ID 2/2

SEMANTIC NOTES

- 05 CLD05, "Unit of Measure Code," is used to dimension the value given in CLD04, "Size."

COMMENTS

- 00 The CLD data segment may be used to provide information to aid in the preparation of move tags and/or bar coded labels.

CM Cargo Manifest

To identify specific flight or voyage information for multimodal shipments.

TRANSACTION SETS USED IN:

404 417 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	55	Flight/Voyage Number	M AN 2/10
02	115	Port Function Code	M ID 1/1
03	114	Port Name	M AN 2/24
04	373	Date	O DT 6/6
05	13	Booking Number	O AN 1/17
06	140	Standard Carrier Alpha Code	O Z ID 2/4
07	140	Standard Carrier Alpha Code	O Z ID 2/4
08	373	Date	O Z DT 6/6
09	182	Vessel Name	O AN 2/28
10	113	Pier Number	O AN 1/4
11	112	Pier Name	O AN 2/14
12	174	Terminal Name	O AN 2/30
13	156	State or Province Code	O ID 2/2
14	26	Country Code	O ID 2/3

SEMANTIC NOTES

- 06 CM06 contains the carrier code.
 07 CM07 contains the previous carrier code.
 08 CM08 is manifest date.

COMMENTS

- 02 CM02 = "D" for Rail Origin and "L" for Rail Destination
 04 CM04 is qualified by CM02.

CON Contract Number Detail

To specify contract or reference number and status.

TRANSACTION SETS USED IN:

536 844 845 849

REF	ELE ID	NAME	ATTRIBUTES
01	128	Reference Number Qualifier	M ID 2/2
02	127	Reference Number	M AN 1/30
03	846	Contract Status Code	M ID 2/2

CRC Conditions Indicator

To supply information on conditions

TRANSACTION SETS USED IN:

124 148 176 180 195 266 272 278 290 810
 837 886

REF	ELE ID	NAME	ATTRIBUTES
01	1136	Code Category	M Z ID 2/2
02	1073	Yes/No Condition or Response Code	M Z ID 1/1
03	1321	Condition Indicator	M ID 2/2
04	1321	Condition Indicator	O ID 2/2
05	1321	Condition Indicator	O ID 2/2
06	1321	Condition Indicator	O ID 2/2
07	1321	Condition Indicator	O ID 2/2

SEMANTIC NOTES

- 01 CRC01 qualifies CRC03 thru CRC07.
 02 CRC02 is a Certification Condition Code applies indicator. A 'Y' value indicates the condition codes in CRC03 thru CRC07 apply. A 'N' value indicates the condition codes in CRC03 thru CRC07 do not apply.

CS Contract Summary

To provide information about a contract

TRANSACTION SETS USED IN:

503 527 536 561 567 568 842 846 870 947

REF	ELE ID	NAME	ATTRIBUTES
01	367	Contract Number	O AN 1/30
02	327	Change Order Sequence Number	O AN 1/8
03	328	Release Number	O AN 1/30
04	128	Reference Number Qualifier	X ID 2/2
05	127	Reference Number	X AN 1/30
06	324	Purchase Order Number	O AN 1/22
07	560	Special Services Code	O ID 2/10
08	433	F.O.B. Point Code	O ID 2/2
09	954	Percent	O Z R 1/10
10	954	Percent	O Z R 1/10
11	782	Monetary Amount	O Z R 1/15
12	336	Terms Type Code	O ID 2/2
13	560	Special Services Code	O ID 2/10
14	355	Unit or Basis for Measurement Code	O Z ID 2/2
15	212	Unit Price	O Z R 1/17
16	336	Terms Type Code	O ID 2/2
17	1073	Yes/No Condition or Response Code	O Z ID 1/1
18	1073	Yes/No Condition or Response Code	O Z ID 1/1

SYNTAX NOTES

- 04 P0405 — If either CS04 or CS05 is present, then the other is required.

SEMANTIC NOTES

- 09 CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.
 10 CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.
 11 CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.
 14 CS14 is the Unit of Measure stipulated in the contract.
 15 CS15 is the contract line item number (CLIN) unit price specified in the contract.
 17 CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.

SEMANTIC NOTES

- 18 CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

COMMENTS

- 04 CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).
- 07 CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

CSH Header Sale Condition

To specify general conditions or requirements of the sale

TRANSACTION SETS USED IN:

830 840 843 850 855 860 865

REF	ELE ID NAME	ATTRIBUTES
01	563 Sales Requirement Code	O ID 1/2
02	564 Do-Not-Exceed Action Code	O ID 1/1
03	610 Amount	X Z N2 1/15
04	508 Account Number	O Z AN 1/35
05	373 Date	O Z DT 6/6
06	559 Agency Qualifier Code	X Z ID 2/2
07	560 Special Services Code	X ID 2/10
08	566 Product/Service Substitution Code	O ID 1/2
09	954 Percent	O Z R 1/10

SYNTAX NOTES

- 02 C0203 — If CSH02 is present, then CSH03 is required.
- 06 P0607 — If either CSH06 or CSH07 is present, then the other is required.

SEMANTIC NOTES

- 03 CSH03 is the maximum monetary amount value which the order must not exceed.
- 04 CSH04 is the account number to which the purchase amount is to be charged.
- 05 CSH05 is the date specified by the sender to be shown on the invoice.
- 06 CSH06 identifies the source of the code value in CSH07.
- 09 CSH09 is the percent of the Set-Aside.

CTP Pricing Information

To specify pricing information

TRANSACTION SETS USED IN:124 304 536 810 821 822 830 832 836 837
840 843 845 846 847 850 851 852 855 857

07	649 Multiplier	X Z R 1/10
08	782 Monetary Amount	O Z R 1/15
09	639 Basis of Unit Price Code	O ID 2/2
10	499 Condition Value	O AN 1/10

SYNTAX NOTES

- 04 P0405 — If either CTP04 or CTP05 is present, then the other is required.
- 06 C0607 — If CTP06 is present, then CTP07 is required.
- 09 C0902 — If CTP09 is present, then CTP02 is required.
- 10 C1002 — If CTP10 is present, then CTP02 is required.

SEMANTIC NOTES

- 07 CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.
- 08 CTP08 is the rebate amount.

COMMENTS

- 03 See Figures Appendix for an example detailing the use of CTP03 and CTP04.
- 03 See Figures Appendix for an example detailing the use of CTP03, CTP04 and CTP07.

CTT Transaction Totals

To transmit a hash total for a specific element in the transaction set

TRANSACTION SETS USED IN:561 568 810 811 819 828 830 832 840 843
844 845 846 847 848 849 850 851 852 853

05	26	Country Code	O Z ID 2/3
06	1429	Construction Type	O ID 1/1
07	373	Date	O Z DT 6/6

SYNTAX NOTES

- 02 C0201 — If EM02 is present, then EM01 is required.
 04 C0403 — If EM04 is present, then EM03 is required.

SEMANTIC NOTES

- 02 EM02 is the maximum load weight.
 04 EM04 is the maximum load volume.
 05 EM05 is the country of manufacture.
 07 EM07 is the last inspection date for convention of safe container.

ETD Excess Transportation Detail

To specify information relating to premium transportation.

TRANSACTION SETS USED IN:

856

REF	ELE ID	NAME	ATTRIBUTES
01	626	Excess Transportation Reason Code	M ID 1/2
02	627	Excess Transportation Responsibility Code	M ID 1/1
03	128	Reference Number Qualifier	X Z ID 2/2
04	127	Reference Number	X AN 1/30
05	743	Returnable Container Freight Payment Responsibility Code	O ID 1/2

SYNTAX NOTES

- 03 P0304 — If either ETD03 or ETD04 is present, then the other is required.

SEMANTIC NOTES

- 03 The value given in ETD03 qualifies the authorization number given in EDT04.

F9 Origin Station

To identify the rail origin of this shipment.

TRANSACTION SETS USED IN:104 404 410 417 421 422 423 425 426 456
858 859

03	156	State or Province Code	M ID 2/2
04	26	Country Code	O ID 2/3
05	573	Freight Station Accounting Code	O ID 1/5
06	19	City Name	O AN 2/30
07	156	State or Province Code	O ID 2/2
08	154	Standard Point Location Code	O ID 6/9
09	116	Postal Code	O ID 3/11

SEMANTIC NOTES

- 02 F902 is the origin Station for Movement.

COMMENTS

- 05 F905 is the Freight Station Accounting of the billed at station.
 06 F906 is the name of the Billed at Station.

FOB F.O.B. Related Instructions

To specify transportation instructions relating to shipment

TRANSACTION SETS USED IN:104 250 503 810 812 830 832 836 838 840
843 850 852 855 856 857 859 860 861 862
865 866

REF	ELE ID	NAME	ATTRIBUTES
01	146	Shipment Method of Payment	M Z ID 2/2
02	309	Location Qualifier	X Z ID 1/2
03	352	Description	O AN 1/80

REF	ELE ID	NAME	ATTRIBUTES
04	334	Transportation Terms Qualifier Code	O ID 2/2
05	335	Transportation Terms Code	X ID 3/3
06	309	Location Qualifier	X Z ID 1/2
07	352	Description	O AN 1/80
08	54	Risk of Loss Qualifier	O Z ID 2/2
09	352	Description	X AN 1/80

SYNTAX NOTES

- 03 C0302 — If FOB03 is present, then FOB02 is required.
 04 C0405 — If FOB04 is present, then FOB05 is required.
 07 C0706 — If FOB07 is present, then FOB06 is required.
 08 C0809 — If FOB08 is present, then FOB09 is required.

SEMANTIC NOTES

- 01 FOB01 indicates which party will pay the carrier.
 02 FOB02 is the code specifying transportation responsibility location.
 06 FOB06 is the code specifying the title passage location.
 08 FOB08 is the code specifying the point at which the risk of loss transfers. This may be different than the location specified in FOB02/FOB03 and FOB06/FOB07.

FST Forecast Schedule

To specify the forecasted dates and quantities

TRANSACTION SETS USED IN:

830 840 843 862

REF	ELE ID	NAME	ATTRIBUTES
01	380	Quantity	M R 1/15
02	680	Forecast Qualifier	M ID 1/1
03	681	Forecast Timing Qualifier	M Z ID 1/1
04	373	Date	M DT 6/6
05	373	Date	O DT 6/6
06	374	Date/Time Qualifier	X ID 3/3
07	337	Time	X TM 4/8
08	128	Reference Number Qualifier	X ID 2/2
09	127	Reference Number	X AN 1/30
10	783	Planning Schedule Type Code	O ID 2/2

SYNTAX NOTES

- 06 P0607 — If either FST06 or FST07 is present, then the other is required.
 08 P0809 — If either FST08 or FST09 is present, then the other is required.

SEMANTIC NOTES

- 03 If FST03 - "F" (indicating flexible interval), then FST04 and FST05 are required. FST04 would be used for the start date of the flexible interval and FST05 would be used for the end date of the flexible interval.

COMMENTS

- 02 As qualified by FST02 and FST03, FST04 represents either a discrete forecast date, the first date of a forecasted bucket (weekly, monthly, quarterly, etc.) or the start date of a flexible interval.

COMMENTS

- 06 FST06 - To qualify time in FST07. The purpose of the FST07 element is to express the specific time of day in a 24-hour clock, to satisfy "just-in-time" requirements. As an alternative, the ship/delivery pattern segment (SDP) may be used to define an approximate time, such as "AM" or "PM".

G22 Pricing Information

To specify pre-pricing information

TRANSACTION SETS USED IN:

878 888 889 894 895

REF	ELE ID	NAME	ATTRIBUTES
01	288	Prepriced Option Code	M Z ID 1/1
02	420	Price New, Suggested Retail	O N2 2/7
03	289	Multiple Price Quantity	O N2 1/2
04	3	Free Form Message	O AN 1/60

SEMANTIC NOTES

- 01 If G2201 = A, then G2202 and G2203 are required.
 01 If G2201 = Y, then G2202 is required.

COMMENTS

- 01 If G2201 = Z or G2201 = N, then neither G2202 or G2203 are required.

G23 Terms of Sale

To specify the terms of sale

TRANSACTION SETS USED IN:

875 876 880 882 888 889 894 895

REF	ELE ID	NAME	ATTRIBUTES
01	336	Terms Type Code	M ID 2/2
02	333	Terms Basis Date Code	M ID 1/2
03	282	Terms Start Date	O DT 6/6
04	283	Terms Due Date Qualifier	O ID 2/2
05	338	Terms Discount Percent	O R 1/6
06	370	Terms Discount Due Date	O DT 6/6
07	351	Terms Discount Days Due	O NO 1/3
08	446	Terms Net Due Date	X DT 6/6
09	386	Terms Net Days	X NO 1/3
10	362	Terms Discount Amount	O N2 1/10
11	391	Discounted Amount Due	O N2 1/10
12	390	Amount Subject to Terms Discount	O N2 1/10
13	343	Installment Total Invoice Amount Due	O N2 1/10
14	342	Percent of Invoice Payable	O R 1/5
15	3	Free Form Message	O AN 1/60
16	713	Installment Group Indicator	O NO 2/2

SYNTAX NOTES

- 08 R0809 — At least one of G2308 or G2309 is required.

COMMENTS

- 00 The G23 segment may be used for the detail or the total transaction set level. Refer to the transaction set assumptions for details on proper usage.
- 01 If G2301 = "04" (Deferred or Installment) then either G2313 or G2314 is required and the data in the segment pertains only to the portion of the invoice described in G2313 or G2314. If G2301 = "11" (Elective) then G2304 is required. If G2301 is not equal to "05" (Discount not Applicable) then (G2305 or G2310) and (G2306 or G2307) is required. If G2301 = "ZZ" (Other) then G2315 is required. Multiple use of this segment when G2301 = "04" (Deferred or Installment) always implies an "AND" relationship. When G2301 = "06" (Mixed) or "11" (Elective) always implies an "OR" relationship.
- 10 G2310 is a memo figure requiring specific payment performance and therefore should not be negative.
- 16 When "Elective" terms are offered in a "deferred or installment" situation, G2316 (Installment Group Indicator - DE713) must be used to properly group the terms within each installment.

G24 Promotion Reference

To reference a promotion number related to the price change

TRANSACTION SETS USED IN:

888

REF	ELE ID NAME	ATTRIBUTES
01	341 Allowance or Charge Number	M AN 1/16

G26 Pricing Conditions

To specify vendor's conditions related to price change

SYNTAX NOTES

- 01 R0102 — At least one of G3901 or G3902 is required.
 02 P0203 — If either G3902 or G3903 is present, then the other is required.
 05 P050607 — If either G3905, G3906 or G3907 are present, then the others are required.
 06 P0607 — If either G3906 or G3907 is present, then the other is required.
 08 P0809 — If either G3908 or G3909 is present, then the other is required.
 10 P1011 — If either G3910 or G3911 is present, then the other is required.
 12 P1213 — If either G3912 or G3913 is present, then the other is required.
 14 P1415 — If either G3914 or G3915 is present, then the other is required.
 18 P1819 — If either G3918 or G3919 is present, then the other is required.
 23 P2324 — If either G3923 or G3924 is present, then the other is required.
 25 P2526 — If either G3925 or G3926 is present, then the other is required.

SEMANTIC NOTES

- 05 G3905 is the gross weight of the vendors selling unit.

COMMENTS

- 00 Equivalent weight is given in the same unit of measure as weight.

G40 Bracket Price

To provide a vendor's pricing structure associated with a specific line item

TRANSACTION SETS USED IN:

832 879 888

REF	ELE ID NAME	ATTRIBUTES
01	417 Price Bracket Identifier	O AN 1/3
02	418 Item List Cost - New	M R 1/9
03	419 Item List Cost - Old	O R 1/9

REF	ELE ID NAME	ATTRIBUTES
04	369 Free-form Description	O AN 1/45

06	421 Price Old, Suggested Retail	O N2 2/7
07	355 Unit or Basis for Measurement Code	O ID 2/2
08	236 Price Identifier Code	O ID 3/3

COMMENTS

- 07 G4007 is the invoicing unit of measure for the costs specified in G4002 and G4003.

G43 Promotion/Price List Area

To specify the geographic area in which a promotion or price is in effect

TRANSACTION SETS USED IN:

832 879 883 888 889 896

REF	ELE ID NAME	ATTRIBUTES
01	771 Market Area Code Qualifier	M Z ID 1/3
02	767 Market Area Code Identifier	O AN 1/12
03	352 Description	O AN 1/80
04	687 Class of Trade Code	O ID 2/2

SEMANTIC NOTES

- 01 If G4301 = 001, 002, or 004, then G4302 is required. If G4301 = 003, then G4303 is required.

G46 Promotion Allowance/Charge

To specify unit amount and method of payment for a charge/allowance for a line item

TRANSACTION SETS USED IN:

879 888 889

REF	ELE ID NAME	ATTRIBUTES
01	340 Allowance or Charge Code	M ID 1/3
02	331 Allowance or Charge Method of Handling Code	M ID 2/2
03	359 Allowance or Charge Rate	X R 1/9
04	355 Unit or Basis for Measurement Code	X ID 2/2
05	610 Amount	X Z N2 1/15
06	378 Allowance/ Charge Percent Qualifier	X ID 1/1
07	332 Percent	X Z R 1/6
08	769 Exception Number	O AN 1/16
09	770 Option Number	O AN 1/20
10	352 Description	O AN 1/80
11	236 Price Identifier Code	O ID 3/3

SYNTAX NOTES

- 03 E030506 — Only one of G4603, G4605 or G4606 may be present.

SYNTAX NOTES

- 03 P0304 — If either G4603 or G4604 is present, then the other is required.
- 06 P0607 — If either G4606 or G4607 is present, then the other is required.

SEMANTIC NOTES

- 05 G4605 indicates the total dollar amount for the allowance or charge.
- 07 G4607 is the allowance or charge percent.

COMMENTS

- 01 If G4601 = 1 then G4603, G4605, and G4607 must not be present.
- 01 If G4601 = 41, then G4611 or G4612 must be used.

G53 Maintenance Type

To identify the specific type of item maintenance.

TRANSACTION SETS USED IN:

820 832 846 860 865 885 888

REF	ELE ID	NAME	ATTRIBUTES
01	875	Maintenance Type Code	M ID 3/3

G54 Module Description

To describe the UPC Case Codes in a module.

TRANSACTION SETS USED IN:

06	236	Price Identifier Code	O	ID 3/3

SYNTAX NOTES

02 P0203 — If either G9302 or G9303 is present, then the other is required.

SEMANTIC NOTES

02 G9302 is the bracket value in terms of minimum quantity or weight as specified in G9303.

GA Canadian Grain Information

To transmit the transportation and distribution requirements of grain at Canadian ports.

TRANSACTION SETS USED IN:

404 410 417 426 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	23	Commodity Code Qualifier	O ID 1/1
02	22	Commodity Code	M AN 1/30
03	187	Weight Qualifier	O ID 1/2

07	899	Unload Terminal	O ID 3/3
08	373	Date	O/Z DT 6/6
09	898	Incentive Grain Rate Indicator	O ID 1/1

SEMANTIC NOTES

- 06 GA06 is used for Loading Week.
08 GA08 is used for the unload date.

COMMENTS

- 02 GA02 will contain the Canadian Wheat Board grain code for terminal elevator accounting.
03 GA03 will be used to identify light weight (code J) or clean out weight (code K) if required for rating purposes.
05 GA05 is used for Grain Block Number.

GF Furnished Goods and Services

To specify information related to furnished material, equipment, property, information, and services.

TRANSACTION SETS USED IN:

180 511 517 527 856 869

REF	ELE ID	NAME	ATTRIBUTES
01	128	Reference Number Qualifier	X ID 2/2

01	62	Hazardous Material Code	M AN 4/10
02	209	Hazardous Material Class Code	O AN 2/4
03	208	Hazardous Material Code Qualifier	O ID 1/1
04	64	Hazardous Material Description	O AN 2/30
05	63	Hazardous Material Contact	O AN 1/24
06	200	Hazardous Materials Page	O AN 1/6
07	77	Flashpoint Temperature	X N 1/3
08	355	Unit or Basis for Measurement Code	X ID 2/2
09	254	Packing Group Code	O ID 1/3

SYNTAX NOTES

- 07 P0708 — If either H107 or H108 is present, then the other is required.

COMMENTS

- 00 This segment is required when the shipment contains hazardous material.
07 H107 is lowest temperature for hazardous materials.

H3 Special Handling Instructions

To specify special handling instructions in coded or free-form format

TRANSACTION SETS USED IN:

104 204 210 214 250 300 301 304 310 312
322 324 325 404 417 421 426 456 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	152	Special Handling Code	X ID 2/3
02	153	Special Handling Description	X AN 2/30
03	241	Protective Service Code	O ID 1/4
04	242	Vent Instruction Code	O ID 1/7
05	257	Tariff Application Code	O ID 1/1

SYNTAX NOTES

- 01 E0102 — Only one of H301 or H302 may be present.

H6 Special Services

To identify forms of unitization, liability issues and special services.

HL • HIERARCHICAL LEVEL

TRANSACTION SETS USED IN:

204 210 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	560	Special Services Code	X ID 2/10
02	560	Special Services Code	X ID 2/10
03	406	Quantity of Pallets Shipped	O NO 1/3
04	399	Pallet Exchange Code	O ID 1/1
05	81	Weight	O R 1/10
06	188	Weight Unit Code	O ID 1/1

SYNTAX NOTES

01 R0102 — At least one of H601 or H602 is required.

COMMENTS

- 01 H601 = Base Services. If H601 = "PC" and H602 = "PL", H603 must be used.
- 02 H602 = Special Services
- 06 H606 is used only when H605 is expressed in other than pounds (weight refers to pallet weight only).

HL Hierarchical Level

To identify dependencies among and the content of hierarchically related groups of data segments.

TRANSACTION SETS USED IN:

148 196 270 271 276 277 278 536 561 805
811 816 841 842 847 856 857 869 870

REF	ELE ID	NAME	ATTRIBUTES
01	628	Hierarchical ID Number	M AN 1/12
02	734	Hierarchical Parent ID Number	O AN 1/12
03	735	Hierarchical Level Code	M ID 1/2
04	736	Hierarchical Child Code	O ID 1/1

COMMENTS

- 00 The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.
- 01 HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.
- 02 HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.
- 03 HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.
- 04 HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

IC Intermodal Chassis Equipment

To specify the chassis equipment details in terms of identifying numbers, weights and ownership

TRANSACTION SETS USED IN:

404 410 417 426 451 456 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	206	Equipment Initial	M AN 1/4
02	207	Equipment Number	M AN 1/10
03	167	Tare Weight	X NO 3/8
04	571	Tare Qualifier Code	X ID 1/1
05	140	Standard Carrier Alpha Code	O Z ID 2/4
06	567	Equipment Length	O NO 4/5
07	140	Standard Carrier Alpha Code	O Z ID 2/4
08	845	Chassis Type	O ID 2/2

SYNTAX NOTES

03 P0304 — If either IC03 or IC04 is present, then the other is required.

SEMANTIC NOTES

- 05 IC05 is the chassis owner.
- 07 IC07 is the equipment lessee.

INC Installment Information

To specify installment billing arrangement

TRANSACTION SETS USED IN:

810 811 850 855 860 865

REF	ELE ID	NAME	ATTRIBUTES
01	336	Terms Type Code	M ID 2/2
02	355	Unit or Basis for Measurement Code	M Z ID 2/2
03	380	Quantity	M Z R 1/15
04	380	Quantity	M Z R 1/15
05	782	Monetary Amount	O Z R 1/15

SEMANTIC NOTES

- 02 INC02 is the installment period (e.g., months).
- 03 INC03 is the total number of installments.
- 04 INC04 is the number of the current installment.
- 05 INC05 is the installment balance after the current installment is applied.

ISR Item Status Report

To specify detailed purchase order/item status.

TRANSACTION SETS USED IN:

870

REF	ELE ID	NAME	ATTRIBUTES
01	368	Shipment/Order Status Code	M Z ID 2/2

REF	ELE ID	NAME	ATTRIBUTES
02	373	Date	O DT 6/6
03	641	Status Reason Code	O ID 3/3

SEMANTIC NOTES

01 If ISR01 specifies a date, ISR02 is required.

ISS Invoice Shipment Summary

To specify summary details of total items shipped in terms of quantity, weight, and volume.

TRANSACTION SETS USED IN:

304 810 857

REF	ELE ID	NAME	ATTRIBUTES
01	382	Number of Units Shipped	X R 1/10
02	355	Unit or Basis for Measurement Code	X ID 2/2
03	81	Weight	X R 1/10
04	355	Unit or Basis for Measurement Code	X ID 2/2
05	183	Volume	X R 1/8
06	355	Unit or Basis for Measurement Code	X ID 2/2

SYNTAX NOTES

- 01 R010305 — At least one of ISS01, ISS03 or ISS05 is required.
- 01 P0102 — If either ISS01 or ISS02 is present, then the other is required.
- 03 P0304 — If either ISS03 or ISS04 is present, then the other is required.
- 05 P0506 — If either ISS05 or ISS06 is present, then the other is required.

IT1 Baseline Item Data (Invoice)

To specify the basic and most frequently used line item data for the invoice and related transactions.

TRANSACTION SETS USED IN:

142 810 811 820 823 857

REF	ELE ID	NAME	ATTRIBUTES
01	350	Assigned Identification	O Z AN 1/11

24	235	Product/Service ID Qualifier	X ID 2/2
25	234	Product/Service ID	X AN 1/40

SYNTAX NOTES

- 02 P020304 — If either IT102, IT103 or IT104 is present, then the others are required.
- 06 P0607 — If either IT106 or IT107 is present, then the other is required.
- 08 P0809 — If either IT108 or IT109 is present, then the other is required.
- 10 P1011 — If either IT110 or IT111 is present, then the other is required.
- 12 P1213 — If either IT112 or IT113 is present, then the other is required.
- 14 P1415 — If either IT114 or IT115 is present, then the other is required.
- 16 P1617 — If either IT116 or IT117 is present, then the other is required.
- 18 P1819 — If either IT118 or IT119 is present, then the other is required.
- 20 P2021 — If either IT120 or IT121 is present, then the other is required.
- 22 P2223 — If either IT122 or IT123 is present, then the other is required.
- 24 P2425 — If either IT124 or IT125 is present, then the other is required.

SEMANTIC NOTES

- 01 IT101 is the purchase order line item identification.

COMMENTS

- 00 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of ID's.
- 06 IT106 through IT125 provides for ten (10) different product/service ID's for each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

IT3 Additional Item Data

To specify additional item details relating to variations between ordered and shipped quantities, or to specify alternate units of measures and quantities.

TRANSACTION SETS USED IN:

810 850 857

ITA • ALLOWANCE, CHARGE OR SERVICE

SYNTAX NOTES

- 02 L02031314 — If ITA02 is present, then at least one of ITA03, ITA13 or ITA14 is required.
- 08 C0809 — If ITA08 is present, then ITA09 is required.
- 10 P1011 — If either ITA10 or ITA11 is present, then the other is required.
- 15 C1502 — If ITA15 is present, then ITA02 is required.

SEMANTIC NOTES

- 09 ITA09 is the allowance or charge percent.
- 10 ITA10 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.
- 12 ITA12 is the quantity of free goods.

COMMENTS

- 01 If ITA01 = A-Allowance or C-Charge, then at least one of ITA06, ITA07, or ITA08 must be present.
- 02 ITA02 identifies the source of the code value in ITA03 or ITA15.
- 07 If ITA07 is present with either ITA06 or ITA08, then ITA07 takes precedence.
- 13 ITA13 is used to clarify the allowance, charge or service.
- 15 ITA15 specifies the individual code list of the agency specified in ITA02.
- 16 ITA16 describes the relationship of ITA06, ITA07 or ITA09 to an associated segment.

ITD Terms of Sale/Deferred Terms of Sale

To specify terms of sale.

15	954	Percent	O Z	R	1/10

SYNTAX NOTES

- 03 L03040513 — If ITD03 is present, then at least one of ITD04, ITD05 or ITD13 is required.
- 08 L08040513 — If ITD08 is present, then at least one of ITD04, ITD05 or ITD13 is required.
- 09 L091011 — If ITD09 is present, then at least one of ITD10 or ITD11 is required.

SEMANTIC NOTES

- 15 ITD15 is the percentage applied to a base amount used to determine a late payment charge.

COMMENTS

- 01 If the code in ITD01 is 04, then ITD07 or ITD09 is required and either ITD10 or ITD11 is required; if the code in ITD01 is 05, then ITD06 or ITD07 is required.

L0 Line Item - Quantity and Weight

To specify quantity, weight, volume and type of service for a line item including applicable "quantity/rate-as" data.

TRANSACTION SETS USED IN:

104	110	204	210	300	301	304	310	311	312

SYNTAX NOTES

- 01 P0102 — If either L301 or L302 is present, then the other is required.
- 03 P0304 — If either L303 or L304 is present, then the other is required.
- 09 P0910 — If either L309 or L310 is present, then the other is required.

SYNTAX NOTES

- 12 C1201 — If L312 is present, then L301 is required.
 14 P1415 — If either L314 or L315 is present, then the other is required.

SEMANTIC NOTES

- 05 L305 is the total charges.

L5 Description, Marks and Numbers

To specify the line item in terms of description, quantity, packaging, and marks and numbers.

TRANSACTION SETS USED IN:

104 110 204 210 300 301 304 310 311 312

02	380	Quantity	M R 1/15
03	344	Unit of Time Period or Interval	M ID 2/2
04	373	Date	OZ DT 6/6

SEMANTIC NOTES

- 04 LDT04 is the effective date of lead time information.

COMMENTS

- 02 LDT02 is the quantity of Unit of Time Periods.

LE Loop Trailer

To indicate that the loop immediately preceding this segment is complete

CONTROL SEGMENT

TRANSACTION SETS USED IN:

124 130 175 185 200 201 217 218 264 265
 271 272 404 410 417 418 501 503 837 838
 841 846 850 854 860 894 895

REF	ELE ID	NAME	ATTRIBUTES
01	447	Loop Identifier Code	M AN 1/4

SEMANTIC NOTES

- 00 One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as "mandatory", this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

COMMENTS

- 00 See Figures Appendix for an explanation of the use of the LE and LS segments.

LEP EPA Required Data

To specify the Environmental Protection Agency (EPA) information relating to shipments of hazardous material

TRANSACTION SETS USED IN:

204 304 404 417 418 423 435 856 858

REF	ELE ID NAME	ATTRIBUTES
01	806 EPA Waste Stream Number Code	O ID 4/4
02	807 Waste Characteristics Code	O ID 14/16

LFH Freeform Hazardous Material Information

To uniquely identify the variable information required by government regulation covering the transportation of hazardous material shipments

TRANSACTION SETS USED IN:

204 304 404 417 418 423 435 856 858

REF	ELE ID NAME	ATTRIBUTES
01	808 Hazardous Material Shipment Information Qualifier	M ID 3/3
02	809 Hazardous Material Shipment Information	M AN 1/25
03	809 Hazardous Material Shipment Information	O AN 1/25
04	1023 Hazard Zone Code	O ID 1/1

LH1 Hazardous Identification Information

To specify the hazardous commodity identification reference number and quantity.

TRANSACTION SETS USED IN:

204 304 404 417 418 423 856 858

REF	ELE ID NAME	ATTRIBUTES
01	355 Unit or Basis for Measurement Code	M ID 2/2
02	80 Lading Quantity	M NO 1/7
03	277 UN/NA Identification Code	O ID 6/6
04	200 Hazardous Materials Page	O AN 1/6
05	22 Commodity Code	O AN 1/30
06	355 Unit or Basis for Measurement Code	O ID 2/2
07	380 Quantity	O R 1/15
08	595 Compartment ID Code	O ID 1/1
09	665 Residue Indicator Code	O ID 1/1
10	254 Packing Group Code	O ID 1/3
11	1375 Interim Hazardous Material Regulatory Number	O AN 1/5

COMMENTS

- 01 LH101 and LH102 are used to convey the number and type of packages for bulk and non-bulk movements.
- 06 LH106 and LH107 are used to convey the quantity or volume and unit of measure for non-bulk shipments only.
- 09 LH109 value of "R" requires that the receiver generate the words "Residue: Last Contained" prior to the shipping name in accordance with regulations and the words "Residue" following all placards associated with this description.

LH2 Hazardous Classification Information

To specify the hazardous classification, placard notation and endorsement information.

TRANSACTION SETS USED IN:

204 304 404 417 418 423 435 856 858

REF	ELE ID NAME	ATTRIBUTES
01	215 Hazardous Classification	O ID 1/30
02	983 Hazardous Class Qualifier	O ID 1/1
03	218 Hazardous Placard Notation	O ID 14/40

REF	ELE ID NAME	ATTRIBUTES
01	447 Loop Identifier Code	M AN 1/4

SEMANTIC NOTES

00 One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as "mandatory", this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

COMMENTS

00 See Figures Appendix for an explanation of the use of the LS and LE segments.

LX Assigned Number

To reference a line number in a transaction set.

SYNTAX NOTES

07 P0708 — If either M107 or M108 is present, then the other is required.
 09 P0910 — If either M109 or M110 is present, then the other is required.
 11 P1112 — If either M111 or M112 is present, then the other is required.

SEMANTIC NOTES

01 M101 is the code identifying the country in whose currency the insurance is specified.
 05 M105 (Organization Identifier) is the code for the beneficiary of the insurance policy.
 06 M106 is free-form information used to describe the type of insurance coverage.

COMMENTS

07 M107 through M112 may be used to specify the values to be used in insurance formulas. For example: M107 and M108 may specify the basis of application and the premium rate (\$0.25 per hundred) M109 and M110 may specify the value at which insurance is to be obtained (insure at 110% of bill of lading value.) M111 and M112 may specify the premium rate (rate of .015 per dollar.)

M2 Sales/Delivery Terms

To state terms and dates

TRANSACTION SETS USED IN:

REF	ELE ID	NAME	ATTRIBUTES
03	87	Marks and Numbers	O AN 1/45
04	88	Marks and Numbers Qualifier	X ID 1/2
05	87	Marks and Numbers	X Z AN 1/45
06	87	Marks and Numbers	O AN 1/45

SYNTAX NOTES

- 04 P0405 — If either MAN04 or MAN05 is present, then the other is required.
- 06 C0605 — If MAN06 is present, then MAN05 is required.

SEMANTIC NOTES

- 01 MAN01/MAN02 and MAN04/MAN05 may be used to identify two different marks and numbers assigned to the same physical container.
- 02 When both MAN02 and MAN03 are used, MAN02 is the starting number of a sequential range and MAN03 is the ending number of that range.
- 05 When both MAN05 and MAN06 are used, MAN05 is the starting number of a sequential range, and MAN06 is the ending number of that range.

COMMENTS

- 01 When MAN01 contains code UC (U.P.C. Shipping Container Code) and MAN05/MAN06 contain a range of ID numbers, MAN03 is not used. The reason for this is that the U.P.C. Shipping Container code is the same on every carton that is represented in the range in MAN05/MAN06.
- 03 MAN03 and/or MAN06 are only used when sending a range(s) of ID numbers.
- 03 When both MAN02/MAN03 and MAN05/MAN06 are used to send ranges of ID numbers, the integrity of the two ID numbers must be maintained.

MEA Measurements

To specify physical measurements or counts, including dimensions, tolerances, variances, and weights

(See Figures Appendix for example of use of C001.)

TRANSACTION SETS USED IN:

REF	ELE ID NAME	ATTRIBUTES
09	752 Surface/Layer/Position Code	O ID 2/2
10	1373 Measurement Method or Device	X ID 2/4

SYNTAX NOTES

- 03 R03050608 — At least one of MEA03, MEA05, MEA06 or MEA08 is required.
- 05 C0504 — If MEA05 is present, then MEA04 is required.
- 06 C0604 — If MEA06 is present, then MEA04 is required.
- 07 L07030506 — If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 is required.
- 08 E0803 — Only one of MEA08 or MEA03 may be present.

SEMANTIC NOTES

- 04 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.

COMMENTS

- 05 When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed use MEA05 as the negative (-) value and MEA06 as the positive (+) value.

MSG Message Text

To provide a free form format that would allow the transmission of text information.

04	67 Identification Code	X AN 2/20
05	706 Entity Relationship Code	O ID 2/2
06	98 Entity Identifier Code	O ID 2/2

SYNTAX NOTES

- 02 R0203 — At least one of N102 or N103 is required.
- 03 P0304 — If either N103 or N104 is present, then the other is required.

COMMENTS

- 04 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 05 N105 and N106 further define the type of entity in N101.

N2 Additional Name Information

To specify additional names or those longer than 35 characters in length

04	373	Date	O DT 6/6
05	337	Time	X TM 4/8
06	623	Time Code	O Z ID 2/2

SYNTAX NOTES

- 02 R0203 — At least one of N902 or N903 is required.
 06 C0605 — If N906 is present, then N905 is required.

SEMANTIC NOTES

- 06 N906 reflects the time zone which the time reflects.

NA Cross-Reference Equipment

To cross-reference additional equipment to a primary piece of equipment.

TRANSACTION SETS USED IN:

311	322	324	404	422	451	456	858	859
-----	-----	-----	-----	-----	-----	-----	-----	-----

REF	ELE ID	NAME	ATTRIBUTES

SYNTAX NOTES

- 01 C0102 — If NA01 is present, then NA02 is required.

SEMANTIC NOTES

- 07 NA07 is the owner's SCAC code.

COMMENTS

- 03 NA03 will contain the equipment initial of an associated shipment and is required by Rail. If unknown, use NONZ for van or NONU for container.
 04 NA04 will contain the equipment number of an associated shipment
 09 NA09 is the SCAC code of the operator of the equipment.

NCA Nonconformance Action

To specify the action that is to be taken in response to a nonconformance condition.

TRANSACTION SETS USED IN:

842

REF	ELE ID	NAME	ATTRIBUTES
01	350	Assigned Identification	O AN 1/11
02	887	Nonconformance Resultant Response Code	X ID 1/2

SYNTAX NOTES

- 02 R0203 — At least one of NCA02 or NCA03 is required.
 04 P0405 — If either NCA04 or NCA05 is present, then the other is required.

SEMANTIC NOTES

- 03 NCA03 describes the action that is to be undertaken.

COMMENTS

- 04 NCA04 is used to specify the quantity that is associated with NCA02 or NCA03.

NCD Nonconformance Description

To describe the nonconformance condition.

TRANSACTION SETS USED IN:

842

REF	ELE ID	NAME	ATTRIBUTES

947

REF	ELE ID	NAME	ATTRIBUTES	
01	363	Note Reference Code	O	ID 3/3
02	352	Description	M	AN 1/80

COMMENTS

00 The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the "NTE" segment should therefore be avoided, if at all possible, in an automated environment.

OTI Original Transaction Identification

To identify the edited transaction set, the level at which the results of the edit are reported, and to indicate the accepted, rejected or accepted with change edit result.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

824

REF	ELE ID	NAME	ATTRIBUTES

11	480	Version / Release / Industry Identifier Code	O Z	AN 1/12

SYNTAX NOTES

09 C0908 — If OTI09 is present, then OTI08 is required.

SEMANTIC NOTES

06 OTI06 is the Group Date.

07 OTI07 is the Group Time.

11 If OTI11 is present, it will contain the Version/Release under which the original electronic transaction was translated by the receiver.

COMMENTS

02 OTI02 contains the qualifier identifying the business transaction from the original business application, and OTI03 will contain the original business application identification.

COMMENTS

- 04 If used, OTI04 through OTI08 will contain values from the original electronic functional group generated by the sender.
- 09 If used, OTI09 through OTI10 will contain values from the original electronic transaction set generated by the sender.

PAL Pallet Information

To identify the type and physical attributes of the pallet, and, gross weight, gross volume, and height of the load and the pallet

TRANSACTION SETS USED IN:

304 852 856 857

REF	ELE ID	NAME	ATTRIBUTES

SYNTAX NOTES

- 05 P0506 — If either PAL05 or PAL06 is present, then the other is required.
- 07 C0710 — If PAL07 is present, then PAL10 is required.
- 08 C0810 — If PAL08 is present, then PAL10 is required.
- 09 C0910 — If PAL09 is present, then PAL10 is required.
- 10 L10070809 — If PAL10 is present, then at least one of PAL07, PAL08 or PAL09 is required.
- 11 P1112 — If either PAL11 or PAL12 is present, then the other is required.
- 13 P1314 — If either PAL13 or PAL14 is present, then the other is required.

SEMANTIC NOTES

- 04 PAL04 (PACK) is the number of pieces on the pallet.
- 05 PAL05 (UNIT WEIGHT) is the weight of the pallet alone, before loading.
- 07 PAL07 and PAL08 (LENGTH and WIDTH) are the dimensions of the pallet before loading.
- 09 PAL09 (HEIGHT) is the height of the pallet and load.
- 11 PAL11 and PAL13 (GROSS WEIGHT and GROSS VOLUME) are measured after loading and includes the pallet.

PAM Period Amount

To indicate a quantity and/or amount for an identified period

TRANSACTION SETS USED IN:

SYNTAX NOTES

- 04 C0403 — If PID04 is present, then PID03 is required.
- 04 R0405 — At least one of PID04 or PID05 is required.
- 07 C0703 — If PID07 is present, then PID03 is required.
- 08 C0803 — If PID08 is present, then PID03 is required.

SEMANTIC NOTES

- 03 Use PID03 to indicate the organization that publishes the code list being referred to.
- 04 PID04 should be used for industry-specific product description codes.
- 08 PID08 describes the physical characteristics of the product identified in PID04. A "Y" indicates that the specified attribute applies to this item. A "N" indicates it does not apply. Any other value is indeterminate.

COMMENTS

- 01 If PID01 = "F", then PID05 is used. If PID01 = "S", then PID04 is used. If PID01 = "X", then both PID04 and PID05 are used.
- 06 Use PID06 when necessary to refer to the product surface or layer being described in the segment.
- 07 PID07 specifies the individual code list of the agency specified in PID03.

PKG Marking, Packaging, Loading

To describe marking, packaging, loading and unloading requirements.

TRANSACTION SETS USED IN:

180	536	810	830	832	840	841	843	846	847
848	850	855	856	857	860	862	865	867	870

05	352	Description	X AN 1/80
06	400	Unit Load Option Code	X ID 2/2

SYNTAX NOTES

- 04 R040506 — At least one of PKG04, PKG05 or PKG06 is required.
- 04 C0403 — If PKG04 is present, then PKG03 is required.
- 05 C0501 — If PKG05 is present, then PKG01 is required.

SEMANTIC NOTES

- 04 PKG04 should be used for industry-specific packaging description codes.

COMMENTS

- 00 Use MEA (Measurements) segment to define dimensions, tolerances weights, counts, physical restrictions, etc.
- 01 If PKG01 = "F", then PKG05 is used. If PKG01 = "S", then PKG04 is used. If PKG01 = "X", then both PKG04 and PKG05 are used.
- 03 Use PKG03 to indicate the organization that publishes the code list being referred to.
- 05 Special marking or tagging data can be given in PKG05 (Description).

PO1 Baseline Item Data

To specify basic and most frequently used line item data

TRANSACTION SETS USED IN:

SYNTAX NOTES

- 03 C0302 — If PO103 is present, then PO102 is required.
- 05 C0504 — If PO105 is present, then PO104 is required.
- 06 P0607 — If either PO106 or PO107 is present, then the other is required.
- 08 P0809 — If either PO108 or PO109 is present, then the other is required.
- 10 P1011 — If either PO110 or PO111 is present, then the other is required.
- 12 P1213 — If either PO112 or PO113 is present, then the other is required.
- 14 P1415 — If either PO114 or PO115 is present, then the other is required.
- 16 P1617 — If either PO116 or PO117 is present, then the other is required.
- 18 P1819 — If either PO118 or PO119 is present, then the other is required.
- 20 P2021 — If either PO120 or PO121 is present, then the other is required.
- 22 P2223 — If either PO122 or PO123 is present, then the other is required.
- 24 P2425 — If either PO124 or PO125 is present, then the other is required.

COMMENTS

- 00 See the Data Dictionary for a complete list of ID's.
- 01 PO101 is the line item identification
- 06 PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

PO3 Additional Item Detail

To specify additional item related data involving variations in normal price/quantity structure.

TRANSACTION SETS USED IN:

154 830 836 840 843 850 851 855 860 865
867 870

SYNTAX NOTES

- 02 P0203 — If either PO402 or PO403 is present, then the other is required.
05 C0506 — If PO405 is present, then PO406 is required.

SYNTAX NOTES

- 06 P0607 — If either PO406 or PO407 is present, then the other is required.
08 P0809 — If either PO408 or PO409 is present, then the other is required.
10 C1013 — If PO410 is present, then PO413 is required.
11 C1113 — If PO411 is present, then PO413 is required.
12 C1213 — If PO412 is present, then PO413 is required.
13 L13101112 — If PO413 is present, then at least one of PO410, PO411 or PO412 is required.

COMMENTS

- 03 PO403 - The "Unit of Measure Code" (Element #355) in this segment position is for purposes of defining the pack (PO401) /size (PO402) measure which indicates the quantity in the inner pack unit. Example: If the carton contains 24 12-Ounce packages, it would be described as follows: Element 356 = 24; Element 357 = 12; Element 355 = OZ.
13 PO413 defines the unit of measure for PO410, PO411, and PO412.

PRF Purchase Order Reference

To provide reference to a specific purchase order

TRANSACTION SETS USED IN:

180 214 250 325 856 857 861 867 869 870

REF	ELE ID	NAME	ATTRIBUTES
01	324	Purchase Order Number	M AN 1/22

09	81	Weight	O R 1/10
10	745	Pre-Cooled (Rule 710) Code	O ID 1/1

SEMANTIC NOTES

- 04 PS04 is the optimum allowable temperature condition for shipment.

COMMENTS

- 05 PS05 through PS08 are used to specify the station which the temperature applies. PS05 and PS06 are preferred over PS07 and PS08.
09 PS09 is the weight of Body Ice in hundreds.

PSA Partner Share Accounting

To communicate the percentage share of the project that a particular owner has to pay.

TRANSACTION SETS USED IN:

819 867

REF	ELE ID	NAME	ATTRIBUTES
01	66	Identification Code Qualifier	M ID 1/2
02	67	Identification Code	M AN 2/20
03	826	Owners Share	M R 1/8
04	782	Monetary Amount	O R 1/15

COMMENTS

- 03 PSA03 is expressed as a decimal amount.

PSC Product Service Contract

To describe the conditions of a product service contract as in a warranty registration

TRANSACTION SETS USED IN:

140 142

REF	ELE ID	NAME	ATTRIBUTES

25	1079	Contact Method Code	O Z ID 1/1

SYNTAX NOTES

- 07 P0708 — If either PSC07 or PSC08 is present, then the other is required.
12 L12131415 — If PSC12 is present, then at least one of PSC13, PSC14 or PSC15 is required.
13 C1312 — If PSC13 is present, then PSC12 is required.
14 C1412 — If PSC14 is present, then PSC12 is required.
15 C1512 — If PSC15 is present, then PSC12 is required.
16 L160810 — If PSC16 is present, then at least one of PSC08 or PSC10 is required.
16 C1613 — If PSC16 is present, then PSC13 is required.
18 C1820 — If PSC18 is present, then PSC20 is required.
19 C1918 — If PSC19 is present, then PSC18 is required.

SEMANTIC NOTES

- 02 When used with a claim for service, PSC02 could specify the contractual basis for the claim. If a single product is going to have several contracts in place at the same time, such as five years for parts and one year for labor or, in a different case, five years or 70,000 miles, the PSC segment will have to be invoked the required number of times. The first and required use of the type of contract code identifies its most general category while the second, optional, use is more specific.
04 PSC04 can contain a type of contract that is for an individual manufacturer.
05 PSC05 specifies the party responsible for this portion of the service contract.
06 PSC06 is the number on one individual contract.

SEMANTIC NOTES

- 07 PSC07 is the unit of measure for PSC08. It normally would be a unit of time, such as months or years, or a service unit, such as miles or operational hours.
- 08 PSC08 is the length, duration, or period of the contract. It normally would be a unit of time, such as months or years, or a service unit, such as miles or operational hours.
- 09 PSC09 indicates the event that starts the warranty or service contract.
- 10 PSC10 is the "Thru Date". The thru date and the range maximum both refer to the condition at the end of the contract period.
- 11 PSC11 is the "Beginning Date". The beginning date and the range minimum both refer to the condition at the start of the contract period.
- 12 PSC12 refers to PSC13, PSC14 and PSC15.
- 13 PSC13 is the value in terms of the previous unit of measure that specifies the end of the service contract.
- 14 PSC14 is the value in terms of the previous unit of measure that specifies the value at the beginning of the service contract.
- 15 PSC15 is the current measurement value.
- 16 PSC16 describes the relationship between the service life in PSC10 or PSC08 and PSC11 and the measurement in PSC13.
- 17 PSC17 is used to describe the current percentage of warranted life for use when the claim amount paid is based on this.
- 18 PSC18 identifies the source of the following operation environment codes.
- 19 PSC19 specifies a particular table of codes maintained by the organization specified in PSC18 for specifying PSC20.
- 20 PSC20 can be used to indicate the environment in which this product is to be used.
- 21 PSC21 can be used to describe where the contract service is to be performed.
- 22 PSC22 can be used to describe any non-standard conditions regarding this contract.
- 23 PSC23 is the price of this individual contract.
- 24 PSC24 is used to indicate whether or not a supplemental inspection of the product is required before a new service contract can be accepted on a product that has been in service. Code "Y" indicates that the inspection is required. Code "N" indicates that the inspection is not required.
- 25 PSC25 can be used to specify how the service contract was received.

PSD Physical Sample Description

To define the physical sample parameters associated with a test resulting in discrete measurements.

SYNTAX NOTES

- 01 P0102 — If either RC01 or RC02 is present, then the other is required.
 04 C0406 — If RC04 is present, then RC06 is required.
 05 C0504 — If RC05 is present, then RC04 is required.
 06 R0607 — At least one of RC06 or RC07 is required.

SEMANTIC NOTES

- 02 RC02 contains the part number of the assembly or part that is the fundamental cause of the customer complaint.
 03 RC03 would contain the name or identify code of the manufacturer that supplied the part.
 04 RC04 identifies the source of the codes in RC05 and RC06.
 05 RC05 refers to a specific table belonging to the agency specified by RC04.
 06 RC06 or RC07 describes the condition of the part or assembly that is the root cause of the problem being reported or repaired.
 08 RC08 can be used to describe a root cause condition. It may be used only in conjunction with either RC06 or RC07.
 09 RC09 refers to whether a part was repaired or replaced. A "Y" indicates it was repaired. A "N" indicates it was replaced.

RCD Receiving Conditions

To report receiving conditions and specify contested quantities

- 15 P151617 — If either RCD15, RCD16 or RCD17 are present, then the others are required.
- 18 P181920 — If either RCD18, RCD19 or RCD20 are present, then the others are required.

SEMANTIC NOTES

- 01 RCD01 is the receiving advice line item identification.
- 21 RCD21 is the cumulative quantity of goods received for a specific time period.

COMMENTS

- 00 See the Data Dictionary for a complete list of receiving condition ID's.
- 06 RCD06 through RCD20 provide for five (5) different quantities whose condition upon receipt is under question.

RDR Return Disposition Reason

To indicate the disposition of the item, the reason for return by the returnee, the response to the reason for return, and whether the item was used

TRANSACTION SETS USED IN:

180

REF	ELE ID	NAME	ATTRIBUTES

SYNTAX NOTES

- 02 R0203 — At least one of SAC02 or SAC03 is required.
- 03 P0304 — If either SAC03 or SAC04 is present, then the other is required.
- 06 P0607 — If either SAC06 or SAC07 is present, then the other is required.
- 09 P0910 — If either SAC09 or SAC10 is present, then the other is required.
- 11 C1110 — If SAC11 is present, then SAC10 is required.
- 13 L130204 — If SAC13 is present, then at least one of SAC02 or SAC04 is required.
- 14 C1413 — If SAC14 is present, then SAC13 is required.

SEMANTIC NOTES

- 01 If SAC01 is A or C, then at least one of SAC05, SAC07, or SAC08 is required.
- 05 SAC05 is the total amount for the service, promotion, allowance, or charge.
- 05 If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
- 08 SAC08 is the allowance or charge rate per unit.

SEMANTIC NOTES

- 10 SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.
- 10 SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
- 13 SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
- 14 SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

COMMENTS

- 04 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- 10 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to a "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier DO - Dollars in SAC09.

SCH Line Item Schedule

To specify the data for scheduling a specific line item.

TRANSACTION SETS USED IN:

- 08 L080910 — If SCH08 is present, then at least one of SCH09 or SCH10 is required.
- 09 C0908 — If SCH09 is present, then SCH08 is required.
- 10 C1008 — If SCH10 is present, then SCH08 is required.

SEMANTIC NOTES

- 12 SCH12 is the schedule identification.

COMMENTS

- 05 SCH05 specifies the interpretation to be used for SCH06 and SCH07.

SDP Ship/Delivery Pattern

To identify specific ship/delivery requirements

TRANSACTION SETS USED IN:

830 862

REF	ELE ID	NAME	ATTRIBUTES		
01	678	Ship/Delivery or Calendar Pattern Code	M	ID	1/2
02	679	Ship/Delivery Pattern Time Code	M	ID	1/1
03	678	Ship/Delivery or Calendar Pattern Code	O	ID	1/2
04	679	Ship/Delivery Pattern Time Code	O	ID	1/1
05	678	Ship/Delivery or Calendar Pattern Code	O	ID	1/2
06	679	Ship/Delivery Pattern Time Code	O	ID	1/1
07	678	Ship/Delivery or Calendar Pattern Code	O	ID	1/2
08	679	Ship/Delivery Pattern Time Code	O	ID	1/1

COMMENTS

- 00 The intent of this segment is to define the routine ship or delivery patterns, as required, when order quantities are in "buckets", such as weekly, monthly. Ship/Delivery patterns eliminate the need to transmit discrete quantities and dates for each required shipment or delivery. It is assumed that a "bucketed" quantity is to be divided equally by the ship/delivery pattern. For example, a weekly quantity of 100 with a delivery pattern of Monday and Wednesday would result in 50 to be delivered on Monday and 50 to be delivered on Wednesday.

SDQ Destination Quantity

To specify destination and quantity detail.

- 17 P1718 — If either SDQ17 or SDQ18 is present, then the other is required.
- 19 P1920 — If either SDQ19 or SDQ20 is present, then the other is required.
- 21 P2122 — If either SDQ21 or SDQ22 is present, then the other is required.

SEMANTIC NOTES

- 23 SDQ23 identifies the area within the location identified in SDQ03, SDQ05, SDQ07, SDQ09, SDQ11, SDQ13, SDQ15, SDQ17, SDQ19, and SDQ21.

COMMENTS

- 02 SDQ02 is used only if different than previously defined in the transaction set.
- 03 SDQ03 is the store number.
- 23 SDQ23 may be used to identify areas within a store, e.g. front room, back room, selling outpost, end aisle display, etc. The value is agreed to by trading partners or industry conventions.

SE Transaction Set Trailer

To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

SYNTAX NOTES

- 01 C0102 — If SHP01 is present, then SHP02 is required.
 03 L030405 — If SHP03 is present, then at least one of SHP04 or SHP05 is required.
 04 C0403 — If SHP04 is present, then SHP03 is required.
 05 C0503 — If SHP05 is present, then SHP03 is required.

SEMANTIC NOTES

- 04 SHP04 - The date shipped, delivered, received, or the cumulative quantity start date (as qualified by SHP03).
 06 SHP06 - The cumulative quantity end date.

COMMENTS

- 00 The SHP segment is used to communicate shipment, delivery, or receipt information and may include discrete or cumulative quantities, dates, and times.
 01 If SHP01 = "02", "07", "08", "09", or "10" (indicating cumulative quantities), then SHP04 and SHP06 are required to identify the start and end dates of the quantity count.

SYNTAX NOTES

07 C0706 — If SLN07 is present, then SLN06 is required.

08 C0806 — If SLN08 is present, then SLN06 is required.

09 P0910 — If either SLN09 or SLN10 is present, then the other is required.

11 P1112 — If either SLN11 or SLN12 is present, then the other is required.

13 P1314 — If either SLN13 or SLN14 is present, then the other is required.

15 P1516 — If either SLN15 or SLN16 is present, then the other is required.

17 P1718 — If either SLN17 or SLN18 is present, then the other is required.

19 P1920 — If either SLN19 or SLN20 is present, then the other is required.

21 P2122 — If either SLN21 or SLN22 is present, then the other is required.

23 P2324 — If either SLN23 or SLN24 is present, then the other is required.

25 P2526 — If either SLN25 or SLN26 is present, then the other is required.

27 P2728 — If either SLN27 or SLN28 is present, then the other is required.

SEMANTIC NOTES

01 SLN01 is the identifying number for the subline item.

02 SLN02 is the identifying number for the subline level. The subline level is analogous to the level code used in a bill of materials.

03 SLN03 is the configuration code indicating the relationship of the subline item to the baseline item.

08 SLN08 is a code indicating the relationship of the price or amount to the associated segment.

COMMENTS

00 See the Data Dictionary for a complete list of ID's.

01 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.

09 SLN09 through SLN28 provide for ten (10) different product/service ID's for each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

SN1 Item Detail (Shipment)

To specify line item detail relative to shipment

06	942	Sample Frequency Value per Unit of Measurement Code	X NO 1/9

SYNTAX NOTES

05 P0506 — If either SPS05 or SPS06 is present, then the other is required.

SEMANTIC NOTES

- 01 SPS01 is the population size (count) of the class of objects or events to which the statistical generalizations refer.
- 02 SPS02 is the sample size, which is the number of observations on which the reported summary statistics were based.
- 03 SPS03 is the subgroup size, which is the number of observations in a subgroup of a sample.

10	234	Product/Service ID	O AN 1/40
11	234	Product/Service ID	O AN 1/40

SYNTAX NOTES

- 03 C0304 — If SR03 is present, then SR04 is required.
- 08 C0809 — If SR08 is present, then SR09 is required.

SEMANTIC NOTES

01 SR01 contains the same line number shown in the IT1 segment, to which data contained in the SR segment refers.

COMMENTS

- 03 SR03 defines the start time of the advertising promotion.
- 04 SR04 defines the end time of the advertising promotion.
- 05 SR05 is used to describe the advertising schedule details in literal form.
- 07 SR07 is used to provide the number of scheduled commercial spots to be run.
- 08 SR08 defines the start date of the advertising promotion.
- 09 SR09 defines the end date of the advertising promotion.
- 10 SR10 defines the seller's plan code.
- 11 SR11 defines the buyer's advertising package code.

SSS Special Services

To specify special conditions or services associated with the purchased product

TRANSACTION SETS USED IN:

140 142 844 845 849

REF	ELE ID	NAME	ATTRIBUTES
01	248	Allowance or Charge Indicator	M ID 1/1

08	380	Quantity	O R 1/15
09	822	Source Subqualifier	O AN 1/15

SEMANTIC NOTES

06 SSS06 indicates the total dollar amount for the allowance or charge.

COMMENTS

- 02 SSS02 identifies the source of the code value in SSS03.
- 07 SSS07 (Description) is normally used to clarify/expand on the services to be provided.
- 09 SSS09 specifies the individual code list of the agency specified in SSS02.

ST Transaction Set Header

To indicate the start of a transaction set and to assign a control number

12	441	Tax Exempt Code	O ID 1/1
13	1179	Customs Entry Type Code	O ID 1/1

SYNTAX NOTES

- 01 R0103 — At least one of TAX01 or TAX03 is required.
 02 P0203 — If either TAX02 or TAX03 is present, then the other is required.
 04 P0405 — If either TAX04 or TAX05 is present, then the other is required.
 06 P0607 — If either TAX06 or TAX07 is present, then the other is required.
 08 P0809 — If either TAX08 or TAX09 is present, then the other is required.
 10 P1011 — If either TAX10 or TAX11 is present, then the other is required.

COMMENTS

- 00 Tax ID number is, in many instances, referred to as a "Tax Exemption Number." The paired (combined) use of data elements 309 and 310 provides for the designation of five (5) taxing jurisdictions.
 01 TAX01 is required if tax exemption is being claimed.

TC2 Commodity

To identify a commodity or a group of commodities or a tariff page commodity

TRANSACTION SETS USED IN:

810 832 850 857 860

REF	ELE ID	NAME	ATTRIBUTES
01	23	Commodity Code Qualifier	M ID 1/1
02	22	Commodity Code	M AN 1/30

TD1 Carrier Details (Quantity and Weight)

To specify the transportation details relative to commodity, weight and quantity.

TRANSACTION SETS USED IN:

180 325 830 840 843 850 855 856 857 860

11	733	Transit Time	X R 1/4
12	284	Service Level Code	X ID 2/2

SYNTAX NOTES

- 02 R0204050612 — At least one of TD502, TD504, TD505, TD506 or TD512 is required.
02 C0203 — If TD502 is present, then TD503 is required.
05 C0708 — If TD507 is present, then TD508 is required.
10 C1011 — If TD510 is present, then TD511 is required.

TDS • TOTAL MONETARY VALUE SUMMARY**COMMENTS**

- 02 When specifying a routing sequence to be used for the shipment movement in lieu of specifying each carrier within the movement: use TD502 to identify the party responsible for defining the routing sequence; use TD503 to identify the actual routing sequence, specified by the party identified in TD502.

TDS Total Monetary Value Summary

To specify the total invoice discounts and amounts

TRANSACTION SETS USED IN:

141 142 304 810 811 819 857

REF	ELE ID	NAME	ATTRIBUTES
01	610	Amount	M Z N2 1/15
02	610	Amount	O Z N2 1/15
03	610	Amount	O Z N2 1/15
04	610	Amount	O Z N2 1/15

SEMANTIC NOTES

- 01 TDS01 is the total amount of invoice (including charges, less allowances) before terms discount (if discount is applicable).
- 02 TDS02 indicates the amount upon which the terms discount amount is calculated.
- 03 TDS03 is the amount of invoice due if paid by terms discount due date (total invoice or installment amount less cash discount).
- 04 TDS04 indicates the total amount of terms discount.

COMMENTS

- 02 TDS02 is required if the dollar value subject to discount is not equal to the dollar value of TDS01.

TED Technical Error Description

To identify the error and, if feasible, the erroneous segment, or data element, or both.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

824

REF	ELE ID	NAME	ATTRIBUTES
01	647	Application Error Condition Code	M ID 1/3
02	3	Free Form Message	O AN 1/60
03	721	Segment ID Code	O ID 2/3
04	719	Segment Position in Transaction Set	O N0 1/6
05	722	Element Position in Segment	O N0 1/2
06	725	Data Element Reference Number	O N0 1/4
07	724	Copy of Bad Data Element	O AN 1/99
08	961	Data Element New Content	O AN 1/99

COMMENTS

- 02 If used, TED02 will contain a generic description of the data in error (e.g., Part Number, Date, Reference Number, etc.).

TMD Test Method

To describe the nature of the test performed.

TRANSACTION SETS USED IN:

142 841 842 848 863

REF	ELE ID	NAME	ATTRIBUTES
01	750	Product/Process Characteristic Code	O ID 2/3

07	373	Date	O Z DT 6/6
08	127	Reference Number	O Z AN 1/30
09	822	Source Subqualifier	O AN 1/15

SYNTAX NOTES

- 02 P0203 — If either TMD02 or TMD03 is present, then the other is required.
- 09 C0902 — If TMD09 is present, then TMD02 is required.

SEMANTIC NOTES

- 07 TMD07 is the date of the test method as assigned by the issuing organization.
- 08 TMD08 is the document revision number.

COMMENTS

- 09 TMD09 specifies the individual code list of the agency specified in TMD02.

TXI Tax Information

To specify tax information.

TRANSACTION SETS USED IN:

124 140 142 148 263 810 811 820 823 832
850 851 855 857 860 865

08	828	Dollar Basis For Percent	O R 1/9
09	325	Tax Identification Number	O AN 1/20
10	350	Assigned Identification	O AN 1/11

SYNTAX NOTES

- 01 R020306 — At least one of TXI02, TXI03 or TXI06 is required.
- 04 P0405 — If either TXI04 or TXI05 is present, then the other is required.
- 08 C0803 — If TXI08 is present, then TXI03 is required.

SEMANTIC NOTES

- 07 TXI07 is a code indicating the relationship of the price or amount to the associated segment.

COMMENTS

- 02 TXI02 is the monetary amount of the tax.
- 03 TXI03 is the tax percent expressed as a decimal.
- 04 If TXI02 is not used, then the application of the percent (TXI03) is between trading partners.

UIT Unit Detail

To specify item unit data

TRANSACTION SETS USED IN:

07	1122	Vent Setting Code	O ID 1/1
08	488	Percent	O Z NO 1/3
09	380	Quantity	O Z R 1/15

SYNTAX NOTES

- 02 P0203 — If either W0902 or W0903 is present, then the other is required.
- 04 P0405 — If either W0904 or W0905 is present, then the other is required.

SEMANTIC NOTES

- 02 W0902 is the minimum allowable temperature condition for shipment; (the qualifying temperature scale is specified in W0903).
- 04 W0904 is the maximum allowable temperature condition for shipment; (the qualifying temperature scale is specified in W0905).
- 06 W0906 is used to describe the environment required within an ocean-type, refrigerated container when other than normal air is required.
- 08 W0908 is the Humidity Percentage.
- 09 W0909 is the Number of Air Exchanges Per Hour.

W10 Warehouse Additional Carrier Information

To transmit shipping information and requirements

TRANSACTION SETS USED IN:

10	890	Carrier/Route Change Reason Code	O	ID	2/2

SYNTAX NOTES

- 02 R0203 — At least one of W2702 or W2703 is required.

SEMANTIC NOTES

- 02 W2702 is required when W2701 = B, E, H, I, K, L, M, P or T.
06 W2706 is required when W2701 = G or R.

COMMENTS

- 00 Shipment/order status code is used at the total invoice level only when differences cannot be provided at the line item level or when the entire order has been shipped complete.

W28 Consolidation Information

To transmit freight consolidation information

TRANSACTION SETS USED IN:

943 945

REF	ELE ID NAME	ATTRIBUTES
01	604 Consolidation Code	M ID 1/1
02	81 Weight	X R 1/10

08	625 COD Method of Payment Code	X ID 1/1
09	610 Amount	X Z N2 1/15
10	140 Standard Carrier Alpha Code	O ID 2/4

SYNTAX NOTES

- 08 P0809 — If either W6608 or W6609 is present, then the other is required.

SEMANTIC NOTES

- 09 W6609 is the monetary amount of the charges to be collected on delivery of order.

W76 Total Shipping Order

To specify summary details of total items shipped in terms of quantity, weight, and volume

TRANSACTION SETS USED IN:

940

REF	ELE ID NAME	ATTRIBUTES
01	330 Quantity Ordered	M R 1/9
02	81 Weight	X R 1/10
03	355 Unit or Basis for Measurement Code	X ID 2/2
04	183 Volume	X R 1/8
05	355 Unit or Basis for Measurement Code	X ID 2/2
06	398 Equivalent Weight	O R 1/10

SYNTAX NOTES

- 02 P0203 — If either W7602 or W7603 is present, then the other is required.
- 04 P0405 — If either W7604 or W7605 is present, then the other is required.
- 06 C0603 — If W7606 is present, then W7603 is required.

COMMENTS

- 00 Equivalent weight is given in the same unit of measure as weight.
- 01 Quantity ordered (W7601) is a "Hash" total and the unit of measure is not required.

X1 Export License

To transmit information contained on an export license

TRANSACTION SETS USED IN:

104 304 310 311 404 841 858 859

REF	ELE ID NAME	ATTRIBUTES
01	83 Licensing Agency Code	O ID 1/1

06	48 Export License Control Code	O ID 1/1
07	26 Country Code	O ID 2/3
08	141 Schedule B Code	O ID 7/10
09	210 International/Domestic Code	O ID 1/1
10	80 Lading Quantity	O NO 1/7
11	148 Lading Value	O R 2/9
12	47 Export Filing Key Code	O ID 1/1
13	355 Unit or Basis for Measurement Code	O ID 2/2
14	212 Unit Price	O R 1/17
15	1306 U.S. Government License Type	O AN 1/1

SEMANTIC NOTES

04 X104 is the Export License Expiration Date.

X2 Import License

To transmit import license number and effective dates

TRANSACTION SETS USED IN:

104 304 310 311 841 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	70	Import License Number	M AN 6/30
02	373	Date	O Z DT 6/6
03	373	Date	O Z DT 6/6
04	70	Import License Number	X AN 6/30
05	373	Date	O Z DT 6/6
06	373	Date	O Z DT 6/6

SYNTAX NOTES

05 C0504 — If X205 is present, then X204 is required.

06 C0604 — If X206 is present, then X204 is required.

SEMANTIC NOTES

02 X202 is the date the import license was issued.

03 X203 is the date import license expires.

05 X205 is the date the import license was issued.

06 X206 is the date the import license expires.

COMMENTS

04 X204 through X206 are used to transmit letter of credit amendment or addendum information.

XH Pro Forma - B13 Information

This segment is used to specify proforma invoice and B13 Canadian Customs Export Declaration information, required by U. S. and Canadian customs.

TRANSACTION SETS USED IN:

404 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	100	Currency Code	M ID 3/3
02	645	Related Company Indication Code	O ID 1/1
03	150	Special Charge or Allowance Code	O ID 3/3
04	610	Amount	O Z N2 1/15
05	503	Block 20 Code	O ID 1/1
06	504	Chemical Analysis Percentage	O Z N2 2/9
07	212	Unit Price	O Z R 1/17

SEMANTIC NOTES

04 XH04 for a line item: is the freight or special charge; for the total invoice: the total charges -- expressed in the standard monetary denomination for the currency specified.

06 XH06 will contain percentage of a component of a product which is required by Customs to be reported.

SEMANTIC NOTES

07 XH07 will contain unit price of item being shipped.

COMMENTS

00 This segment is to be used for shipments originating in Canada only.

XPO Preassigned Purchase Order Numbers

To transmit preassigned purchase order numbers

TRANSACTION SETS USED IN:

830 852

REF	ELE ID	NAME	ATTRIBUTES
01	324	Purchase Order Number	M Z AN 1/22
02	324	Purchase Order Number	O AN 1/22
03	66	Identification Code Qualifier	X ID 1/2
04	67	Identification Code	X AN 2/20

SYNTAX NOTES

03 P0304 — If either XPO03 or XPO04 is present, then the other is required.

SEMANTIC NOTES

01 XPO01 is the preassigned purchase order number. If a range of purchase order numbers is to be transmitted, use XPO01 for the first number and XPO02 as the ending number.

COMMENTS

03 XPO03 and XPO04 specify the location that the purchase order numbers apply to.

Y6 Authentication

To specify the authority for authorizing an action and the date authentication is made

TRANSACTION SETS USED IN:

135 204 300 301 303 304 310 311 312 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	313	Authority Identifier Code	O ID 2/2
02	151	Authority	M AN 1/20
03	275	Authorization Date	M DT 6/6

Y7 Priority

To assign a priority to a booking which would increase the possibility that this cargo would be booked on said voyage and not be shut out

TRANSACTION SETS USED IN:

300 322 858 859

REF	ELE ID	NAME	ATTRIBUTES
01	467	Priority	O N0 1/1

REF	ELE ID	NAME	ATTRIBUTES
02	470	Priority Code	X NO 1/1
03	471	Priority Code Qualifier	X AN 1/1
04	468	Port Call File Number	O NO 4/4
05	373	Date	O Z DT 6/6

SYNTAX NOTES

02 P0203 — If either Y702 or Y703 is present, then the other is required.

SEMANTIC NOTES

05 Y705 is the date specified by the shipper indicating when the shipment is required at the consignee's location.

ZC1 Beginning Segment For Data Correction Or Change

To transmit identifying numbers, dates and other basic data relating to the transaction set.

MANAGEMENT SEGMENT

TRANSACTION SETS USED IN:

322 404 417 858

REF	ELE ID	NAME	ATTRIBUTES
01	145	Shipment Identification Number	O AN 1/30

CZ Refrigerated Container
DD Double-Drop Trailer
A flatbed with two drop decks
DF Container with Flush Doors
Container doors must be flush with the inside walls of the ocean-type containers
DT Drop Back Trailer
DX Boxcar, Damage Free Equipped

CODE DEFINITION & EXPLANATION

ET End of Train Device
FH Flat Bed Trailer with Headboards
FN Flat Bed Trailer with No Headboards
FP Flatcar With Pedestal
FR Flat Bed Trailer - Removable Sides
FS Container with Floor Securing Rings
Appliances at floor level that can be used to secure cargo
FT Flat Bed Trailer
FX Boxcar Cushion Under Frame OF
GS Generator Set
HB Container with Hangar Bars
Container must be equipped with hangar beams/bars for garment shipments
HC Hopper Car (Covered)
HO Hopper Car (Open)
HP Hopper Car (Covered; Pneumatic Discharge)
HT Head of Train Device
HV High Cube Van
HY Hydrant-Cart
Used at large airports with installed distribution systems to make into-plane deliveries; distinguished from other types of fueling vehicles
ID Idler Car
IX Boxcar (Insulated)
LO Locomotive
LU Load/unload Device on Equipment
NX Boxcar (Interior Bulkheads)
OB Ocean Vessel (Break Bulk)
OT Open-top/flatbed trailer
OV Open Top Van
PP Power Pack
A container holding a motor, generator, and fuel tank; used to provide power for refrigerated containers on a double stack train
PT Protected Trailer
PU Pick-up Truck
RA Fixed-Rack, Flat-Bed Trailer
A flatbed trailer with an A-frame
RC Refrigerated (Reefer) Car
RD Fixed-Rack, Double Drop Trailer
A double-drop, flatbed with an A-frame
RE Flat Car (End Bulkheads)
RF Flat Car
RG Gondola Covered
RI Gondola Car (Covered - Interior Bulkheads)
RO Gondola Car (Open)
RR Rail Car
RS Fixed-Rack, Single-Drop Trailer
A single-drop, flatbed with an A-frame
RT Controlled Temperature Trailer (Reefer)
SA Saddle
Device to stack containers on a rail car

CODE DEFINITION & EXPLANATION

SC Service Car
SD Single-Drop Trailer
A flatbed trailer with one drop deck
SK Stack Car
SL Container, Steel
Container must be made of steel
SR STAK-RAK
A device upon which empty chassis may be stacked for movement "en bloc" on a railcar, stack train, trailer, or water-borne vessel
SS Container with Smooth Sides
Walls in ocean container must be flat/smooth
ST Removable Side Trailer
SV Van - Special Inside Length, Width or Height Requirements
TA Trailer, Heated/Insulated/Ventilated
TB Trailer, Boat
TC Trailer, Car
TF Trailer, Dry Freight
TG Trailer, Tank (Gas)
TH Truck, Open Top High Side
TI Trailer, Insulated
TJ Trailer, Tank (Chemicals)
TK Trailer, Tank (Food Grade-Liquid)
TL Trailer (not otherwise specified)
TM Trailer, Insulated/Ventilated
TN Tank Car
TO Truck, Open Top
TP Trailer, Pneumatic
A specialized trailer with a pneumatic device for loading or unloading
TQ Trailer, Electric Heat
A trailer with electric heat to keep product from freezing
TR Tractor
TT Telescoping Trailer
TU Truck, Open Top Low Side
TV Truck, Van
TW Trailer, Refrigerated
A refrigerated trailer capable of keeping product cold. Different from a temperature controlled trailer which is able to keep product at a constant temperature
UA Trilevel Railcar 20 Feet
UB Trilevel Railcar Screened, Fully Enclosed
UC Trilevel Railcar Screened, With Roof
UD Trilevel Railcar Screened, No Roof
UE Trilevel Railcar Screened, With Doors, No Roof
UL Unit Load Device (ULD)
UP Container, Upgraded
Container must be upgraded for higher weights
VA Container, Vented
Dry container must have vent openings for air exchange
VE Vessel, Ocean

CODE DEFINITION & EXPLANATION

VL Vessel, Lake
 VR Vessel, Ocean, Rollon-Rolloff
 VS Vessel, Ocean, Lash
 VT Vessel, Ocean, Containership
 WR Container with Wavy or Ripple Sides
Walls must be wavy or ripple type
 WY Railroad Maintenance of Way Car

46 Ex ParteTYPE=AN_{MIN=4}MAX=4

Level of rates as published in the tariff.

X1

TRANSACTION SETS USED IN:

104 304 310 311 404 841 858 859

51 Export License Status CodeTYPE=ID_{MIN=1}MAX=1

Code defining whether the shipment completes the terms of the license, or the shipment is only a partial delivery relative to the license terms.

SEGMENTS USED IN (AS SIMPLE):

X1

TRANSACTION SETS USED IN:

104 304 310 311 404 841 858 859

CODE DEFINITION & EXPLANATION

C Complete
 P Partial

52 Export License Symbol CodeTYPE=ID_{MIN=1}MAX=2

Code which specifies the export symbol marked on a shipment.

SEGMENTS USED IN (AS SIMPLE):

X1

TRANSACTION SETS USED IN:

104 304 310 311 404 841 858 859

CODE DEFINITION & EXPLANATION

- 1 G-Dest - Shipments of Commodities to Destination Not Requiring a Validated License
- 2 GLV - Shipments of Limited Value
- 3 GIT - In-transit Shipments
- 4 GUS - Shipments to Personnel and Agencies of the U.S. Government
- 5 GLC - Exports of Commercial Vehicles by Certain Civil Airlines and by Private Common Carrier
- 6 GTF-US - Goods Imported for Display at U.S. Exhibitions or Trade Fairs
- 7 GLR - Return or Replacement of Certain Commodities
- 8 GIFT - Shipment of Gift Parcels
- 9 GATS - Aircraft on Temporary Sojourn
- 10 GMS - Shipments Under the Mutual Security Act
- 11 GTD & GTDR - Technical Data

CODE DEFINITION & EXPLANATION

- 12** State
Shipment under validated State Department license
- 13** General License Non-naval Reserve (G-NNR)
Shipments of certain non-naval reserve petroleum
- 14** General License Cooperating Governments (GCG)
Shipments to agencies of cooperating countries
- 15** Registered Carrier Stores (RCS)
Shipments to U.S. or Canadian vessels, planes, and air installations or agents
- 16** General License - Temporary (G-Temp)
Temporary exports
- 17** General License Free World (GFW)
Low-level exports to certain countries

54 Risk of Loss QualifierTYPE=ID_{MIN=2}MAX=2

Code specifying where responsibility for risk of loss passes.

SEGMENTS USED IN (AS SIMPLE):

- 35** Electronic Mail Internal System Address Code
- 36** Customs House Broker License Number
SEE CODE SOURCE 155
- 38** Country Code
- 39** Local Union Number
- 40** Electronic Mail User Code
Identifies the Electronic Mail User locally defined and maintained between trading partners
- 41** Telecommunications Carrier Identification Code
Identifies the Interexchange carrier for the charges being billed
SEE CODE SOURCE 46
- 42** Telecommunications Pseudo Carrier Identification Code
A code similar to the standard Carrier Identification Code which is used to identify the local exchange service providers
SEE CODE SOURCE 46
- 43** Alternate Social Security Number
The social security number attributed to the secondary taxpayer
- 44** Return Sequence Number
A unique 16-digit number that is assigned by the transmitter to each return within a transmission
- 45** Declaration Control Number
A unique 14-digit number assigned to each taxpayer's Form 8453 (Individual Income Tax Declaration for Electronic Filing) which is used to match this form to the filed return
- 46** Electronic Transmitter Identification Number (ETIN)
A unique number assigned to each transmitter and software developer
- 47** Tax Authority Identification
- 48** Electronic Filer Identification Number (EFIN)
A unique number assigned to each firm, organization, or individual who is authorized to electronically file tax returns
- 49** State Identification Number
A unique number that a state taxing authority assigns an organization, firm, or individual
- 50** Business License Number
- 53** Building
- 54** Warehouse
- 55** Post Office Box

CODE DEFINITION & EXPLANATION

- 56** Division
- 57** Department
- 61** Holding Mortgagee Number
- 62** Servicing Mortgagee Number
- 63** Servicer-holder Mortgagee Number
- 71** Integrated Postsecondary Education Data System (IPEDS) set of codes maintained by the U.S. Department of Education's National Center of Education Statistics, Washington, D.C.
- 72** The College Board's Admission Testing Program (ATP), administered by the Educational Testing Service (ETS), 4-digit list of postsecondary educational institutions.
- 73** Federal Interagency Commission on Education (FICE) number. Available from the United States Department of Education, National Center for Education Statistics.
- 74** American College Testing (ACT) list of postsecondary educational institutions.
- 75** State or Province Assigned Number
- 76** Local School District or Jurisdiction Number
- 77** National Center for Education Statistics (NCES) Common Core of Data (CCD) number for PreK - 12 institutions
- 78** The College Board and ACT 6 digit code list of secondary educational institutions
- 81** Classification of Instructional Programs (CIP) coding structure maintained by the U.S. Department of Education's National Center for Education Statistics
- 82** Higher Education General Information Survey (HEGIS) maintained by the U.S. Department of Education's National Center for Education Statistics
- 90** California Ethnic Subgroups Code Table
SEE CODE SOURCE 37
- 91** Assigned by Seller or Seller's Agent
- 92** Assigned by Buyer or Buyer's Agent
- 93** Code assigned by the organization originating the transaction set
- 94** Code assigned by the organization that is the ultimate destination of the transaction set
- 95** Assigned By Transporter
SEE CODE SOURCE 188
- 96** Assigned By Pipeline Operator
- 97** Receiver's Code
Derived from the entries in the Military Assistance Program Address Directory (MAPAD) or the Department of Defense Active Address Code (DoDAAC). Represents the location of the ultimate consignee
- 98** Purchasing Office
Purchasing Office (location and address) identified by a unique number found in Appendix N of the Defense Federal Acquisition Regulation Supplement
- A1** Approver ID

CODE DEFINITION & EXPLANATION

- A2** Military Assistance Program Address Code (MAPAC)
Contained in the Military Assistance Program Address Directory (MAPAD); represents the location of an entity
SEE CODE SOURCE 350
- AA** Postal Service Code
SEE CODE SOURCE 93
- AC** Attachment Control Number
Means of associating electronic claim with documentation forwarded by other means
- AD** Blue Cross Blue Shield Association Plan Code
Unique 3-digit number assigned to independent Blue Cross or Blue Shield plans by Blue Cross/Blue Shield Association
- AE** Alberta Energy Resources Conservation Board
SEE CODE SOURCE 207
- AL** Anesthesia License Number
License number issued by Board of Anesthesiologist
- AP** Alberta Petroleum Marketing Commission
SEE CODE SOURCE 208
- BC** British Columbia Ministry of Energy Mines and Petroleum Resources
SEE CODE SOURCE 209
- BD** Blue Cross Provider Number
Number assigned by Blue Cross Plan to a provider of services
- BE** Common Language Location Identification (CLLI)
The standard address location code for a specific equipment location as used in the telephone industry
- BG** Badge Number
- BP** Benefit Plan
- BS** Blue Shield Provider Number
Number assigned by Blue Shield Plan to a provider of services
- C1** Insured or Subscriber
- C2** Health Maintenance Organization (HMO) Provider Number
- CA** Statistics Canada Canadian College Student Information System Course Codes
SEE CODE SOURCE 323
- CB** Statistics Canada Canadian College Student Information System Institution Codes
SEE CODE SOURCE 324
- CC** Statistics Canada University Student Information System Curriculum Codes
SEE CODE SOURCE 296
- CD** Contract Division
- CF** Canadian Financial Institution Routing Number
SEE CODE SOURCE 91
- CI** CHAMPUS (Civilian Health and Medical Program of the Uniformed Services) Identification Number
Number issued by CHAMPUS organization to a unique provider of services
- CL** Corrected Loan Number
A new or corrected number used to identify a loan
- CP** Canadian Petroleum Association
SEE CODE SOURCE 210
- CR** Credit Repository

CODE DEFINITION & EXPLANATION

- CS** Statistics Canada University Student Information System University Codes
SEE CODE SOURCE 300
- CT** Court Identification Code
- DG** United States Department of Education Guarantor Identification Code
SEE CODE SOURCE 172
- DL** United States Department of Education Lender Identification Code
SEE CODE SOURCE 172
- DN** Dentist License Number
License number issued by American Dental Association
- DP** Data Processing Point
- DS** United States Department of Education School Identification Code
SEE CODE SOURCE 173
- EH** Theatre Number
Number assigned by the exhibition company
- EI** Employee Identification Number
- EP** U.S. Environmental Protection Agency (EPA)
SEE CODE SOURCE 109
- EQ** Insurance Company Assigned Identification Number
- ER** Mortgagee Assigned Identification Number
- FA** Facility Identification
- FB** Field Code
A code assigned by regulatory agencies to a surface area
- FC** Federal Court Jurisdiction Identifier
SEE CODE SOURCE 36
- FD** Federal Court Divisional Office Number
- FI** Federal Taxpayer's Identification Number
- FJ** Federal Jurisdiction
SEE CODE SOURCE 282
- GA** Primary Agent Identification
- GC** GAS*CODE
SEE CODE SOURCE 301
- HN** Health Insurance Claim (HIC) Number
Unique number assigned to individual for submitting claims covered by Medicare benefits
- LI** Labeler Identification Code (LIC)
SEE CODE SOURCE 243
- LN** Loan Number
A unique number used to identify a loan on a property, entity, or location at a financial institution or mortgage broker
- M3** Disbursing Station
DOD Disbursing Offices (location and address) can be identified by a unique number found in departmental regulations
SEE CODE SOURCE 199
- M4** Department of Defense Routing Identifier Code (RIC)
An integral and predetermined participant in an established logistical system performing general logistic control, distribution, and storage functions
SEE CODE SOURCE 350
- M5** Jurisdiction Code

CODE DEFINITION & EXPLANATION

- M6** Division Office Code
- MA** Mail Stop
- MB** Medical Information Bureau
SEE CODE SOURCE 280
- MC** Medicaid Provider Number
Number assigned to a health care provider for submitting claims covered by medicaid benefits
- MD** Manitoba Department of Mines and Resources
SEE CODE SOURCE 211
- MI** Member Identification Number
- MK** Market
- MP** Medicare Provider Number
Number assigned to a health care provider for submitting claims covered by Medicare benefits
- MR** Medicaid Recipient Identification Number
Unique identification number assigned to each member covered under a subscriber's contract
- NI** National Association of Insurance Commissioners (NAIC) Identification
- NO** National Criminal Information Center Originating Agency
- OC** Occupation Code
Identifies individual's occupation
SEE CODE SOURCE 156
- OP** On-line Payment and Collection
- PA** Secondary Agent Identification
- PC** Provider Commercial Number
Unique number assigned to the provider for submitting claims to commercial insurance carriers
- PI** Payor Identification
- PP** Pharmacy Processor Number
Unique number assigned to each pharmacy for submitting claims
- PR** Pier
- RA** Regulatory Agency Number
A number assigned to a regulatory jurisdiction
- RT** Railroad Track
- SA** Tertiary Agent Identification
- SD** Saskatchewan Department of Energy Mines and Resources
SEE CODE SOURCE 212
- SF** Suffix Code
A code assigned by a regulatory agency to operator numbers
- SI** Standard Industry Code (SIC)
- SJ** State Jurisdiction
SEE CODE SOURCE 22
- SL** State License Number
Number uniquely issued to provider by state licensing board
- SP** Specialty License Number
License number issued to identify providers unique area of practice
- ST** State/Province License Tag
- SV** Service Provider Number

CODE DEFINITION & EXPLANATION

SW Society for Worldwide Interbank Financial
Telecommunications (SWIFT) Address

TC Internal Revenue Service Terminal Code
SEE CODE SOURCE 409

O Containerized Ocean

P Private Carrier

Q Conventional Ocean

R Rail

S Ocean

T Best Way (Shippers Option)

U Private Parcel Service

W Inland Waterway

X Intermodal (Piggyback)

Y Military Intratheater Airlift Service
Method of movement of material from a point in a theater to another point within the same theater by military controlled aircraft

AC Air Charter

AE Air Express

AF Air Freight

AH Air Taxi
FAA approved carrier utilizing a 1 or 2 engine aircraft for on demand service

AQ Quicktrans
Navy long-term contract airlift service within the continental United States for movement of cargo in support of the logistics systems of the Military Services and Defense Agencies

AR Armed Forces Courier Service (ARFCOS)
A military organization whose mission involves the receipt, movement, and delivery of special categories of material

BP Book Postal

BU Bus

CE Customer Pickup / Customer's Expense

CODE DEFINITION & EXPLANATION

DA	Driveaway Service <i>Movement of wheeled vehicle, wheeled equipment, or wheeled chassis of which is powered by a self-contained power unit (includes tractor/trailer combination)</i>
DW	Driveaway, Truckaway, Towaway <i>DoD policy includes all three terms in one. They mean collectively, a transportation method whereby a vehicle is moved under its own power by a driver, or loaded into or upon a carrier's equipment, or towed by carrier's equipment</i>
ED	European or Pacific Distribution System <i>Military operated logistic distribution system within the indicated theaters of operation</i>
FA	Air Freight Forwarder <i>A firm other than a railroad, motor, or water carrier, which represents itself as a common carrier and undertakes to assemble and consolidate shipments or provide for same and assumes responsibility for the air transportation of such property from point of receipt to its destination. Delivery is "Held in Bond"</i>
FL	Motor (Flatbed)
GG	Geographic Receiving/Shipping <i>A collection of shipments that involve multiple origins, multiple destinations, and a single trailer, and are paid under a single freight bill</i>
GR	Geographic Receiving <i>A collection of shipments that involve a single origin, multiple destinations, and a single trailer, and are paid under a single freight bill</i>
GS	Geographic Shipping <i>A collection of shipments that involve multiple origins, a single destination, and a single trailer, and are paid under a single freight bill</i>
LA	Logair <i>Air Force long-term contract airlift service within the continental United States for the movement of cargo in support of the logistics systems of the Military Services and Defense Agencies</i>
LT	Less Than Trailer Load (LTL)
MB	Motor (Bulk Carrier)
MP	Motor (Package Carrier)
PA	Pooled Air <i>Outbound shipment from an airport consolidation point to a final destination via an air move</i>
PG	Pooled Piggyback <i>Outbound shipment consisting of a trailer on a railcar from a consolidation point to a final destination via rail move</i>
PL	Pipeline
PP	Pool to Pool <i>Shipment moves from one consolidation point to another consolidation point before final delivery</i>
PR	Pooled Rail
PT	Pooled Truck
RC	Rail, Less than Carload <i>Movement by rail of a quantity of freight less than that required for the application of a carload rate</i>

CODE DEFINITION & EXPLANATION

RR	Roadrailer <i>Used for shipments that travel by roadrailer, i.e., a multimodal rail/highway trailer</i>
SB	Shipper Agent <i>Agent for piggyback code consolidation</i>
SC	Shipper Agent (Truck) <i>Motor carrier agent for piggyback trailer consolidators</i>
SD	Shipper Association <i>Non-profit cooperative consolidator or distributors of shipments by member firms</i>
SE	Sea/Air
SR	Supplier Truck
SS	Steamship
ST	Stack Train
TA	Towaway Service <i>Movement of shipper owned trailers or semi-trailers loaded and/or pulled by carrier furnished power unit</i>
TC	Cab (Taxi)
VA	Motor (Van)
VE	Vessel, Ocean
VL	Vessel, Lake
WP	Water or Pipeline Intermodal Movement <i>A water move by barge or tanker followed by a pipeline move to the destination</i>
Y1	Ocean Conference Carrier
Y2	Ocean Non-Conference Carrier
ZZ	Mutually defined

92 Purchase Order Type Code

TYPE=ID_{MIN}=2_{MAX}=2

Code specifying the type of Purchase Order.

CODE DEFINITION & EXPLANATION

AB	Assortment Against Blanket
AC	AOG (Aircraft on Ground) Critical
AO	AOG (Aircraft on Ground) Service
BD	Bidding
BE	Blanket Order/Estimated Quantities (Not firm Commitment)
BH	Bill and Hold
BK	Blanket Order (Quantity Firm)
BL	Bailment
BQ	Budgetary Quote
BY	Buying
CA	Contract Award Notification
CC	Change to Contract

CODE DEFINITION & EXPLANATION

CF	Confirmation
CN	Consigned Order
CO	Catalog Order
CP	Change to Purchase Order
CR	Change to Release
DR	Direct Ship <i>Vendor ships directly to customer</i>
DS	Dropship
EO	Emergency Order <i>Acquires what is needed no matter what the cost; different from a rush order in that rush utilizes the normal channels as quickly as possible</i>
FH	Fabricate and Hold
IN	Information Copy
JL	Job Lot
KA	Agreement
KB	Blanket Purchase Agreement <i>A charge account established with qualified sources of supply to satisfy repetitive requirements</i>
KC	Contract <i>A legally binding document wherein one party agrees to provide supplies or services and another party agrees to provide compensation for the supplies or services</i>
KD	Basic Agreement <i>A written instrument of understanding that contemplates separate future contracts</i>
KE	Basic Ordering Agreement <i>A document which contains terms and conditions, a description of supplies or services to be provided and methods of pricing, issuing, and delivering orders under this agreement</i>
KG	Grant
KI	Indefinite Delivery Indefinite Quantity <i>A contract that provides for a minimum quantity and an indefinite maximum quantity within stated limits</i>
KN	Purchase Order <i>Procurement instrument within the small purchasing threshold</i>
KO	Close Out
KP	Authority to Proceed <i>An authorization that permits the selling party to incur costs for the eventual delivery of supplies or services prior to the formal execution of a contract</i>
KQ	Indefinite Delivery Definite Quantity <i>A contract that provides for delivery of a specified quantity over a fixed period of time to unspecified locations</i>
KR	Requirements <i>A contract to provide all specified requirements of designated organizations for a fixed period of time</i>
KS	Letter Contract
KT	Task Order
LB	Lease (Blanket Agreement)
LS	Lease
NE	New Order
NO	Not for Sale

CODE DEFINITION & EXPLANATION

NP	New Product Introduction
NS	New Store Opening
OS	Special Order
PR	Promotion
RA	Release Against Assortment
RE	Reorder
RL	Release or Delivery Order <i>An order for goods and services placed against a pre-existing contract or blanket order</i>
RN	Renewal Order
RO	Rush Order
RR	Repair and Return
RT	Rental
RU	Record Update Service <i>Service orders for customer-requested changes to the service provider's records that do not require installation or movement of equipment</i>
SA	Stand-alone Order
SO	Shipped Order
SP	Sample
SS	Supply or Service Order
ST	Standing Order
SW	Stop Work
TC	Toll Conversion Order
TM	Time & Materials
TR	Termination
UD	Unit Down <i>Critical unit is down. This is the highest priority</i>
UE	Unit Exchange
US	Urgent Service Request
WO	Warranty Order
ZZ	Mutually Defined

CODE DEFINITION & EXPLANATION

- 40 Receiver
Entity to accept transmission
- 41 Submitter
Entity transmitting transaction set
- 42 Component Manufacturer
Provider of a proprietary designed and manufactured subassembly that meets defined customer specifications
- 43 Claimant Authorized Representative
- 44 Data Processing Service Bureau
- 45 Drop-off Location
- 46 Invoicing Dealer
Source with whom monetary transactions for component manufacturer extended service coverages will occur
- 47 Estimator
- 48 In-service Source
Source placing product into service
- 49 Initial Dealer
The dealer who initially attempted the repair
- 4A Birthing Room/LDRP Room
- 4B Burn Care Unit
- 4C Cardiac Catheterization Laboratory
- 4D Open-Heart Surgery Facility
- 4E Cardiac Intensive Care Unit
- 4F Angioplasty Facility
- 4G Chronic Obstructive Pulmonary Disease Service Facility

- 5S Therapeutic Radioisotope Facility
- 5T X-Ray Radiation Therapy Unit
- 5U CT Scanner Unit
- 5V Diagnostic Radioisotope Facility
- 5W Magnetic Resonance Imaging (MRI) Facility
- 5X Ultrasound Unit
- 5Y Rehabilitation Inpatient Unit
- 5Z Rehabilitation Outpatient Services
- 60 Salesperson
Identification of individual that sold the product e.g. ssn, salesperson id, etc.
- 61 Performed At
The facility where work was performed
- 62 Applicant's Employer
- 63 Reference's Employer
- 64 Cosigner's Employer
- 65 Applicant's Reference
A person identified on the loan application as a secondary contact for the borrower
- 66 Applicant's Cosigner
A person who signs the promissory note in addition to the borrower and is responsible for the obligation if the borrower does not pay

CODE DEFINITION & EXPLANATION

- 67 Applicant's Comaker
One of two individuals who are joint borrowers on a loan and who are equally liable for repayment of the loan
- 68 Owner's Representative
Individual operating or responsible for the vehicle/equipment
- 69 Repairing Outlet
Party completing the repair
- 6A Reproductive Health Services
- 6B Skilled Nursing or Other Long-Term Care Unit
- 6C Single Photon Emission Computerized Tomography (SPECT) Unit
- 6D Organized Social Work Service Facility
- 6E Outpatient Social Work Services
- 6F Emergency Department Social Work Services
- 6G Sports Medicine Clinic/Services
- 6H Hospital Auxiliary Unit

- 6S Women's Health Center/Services
- 6T Health Sciences Library
- 6U Cardiac Rehabilitation Program Facility
- 6V Non-Invasive Cardiac Assessment Services
- 70 Prior Incorrect Insured
- 71 Attending Physician
Physician present when medical services are performed
- 72 Operating Physician
Doctor who performs a surgical procedure
- 73 Other Physician
Physician not one of the other specified choices
- 74 Corrected Insured
- 75 Participant
- 76 Secondary Warranter
- 77 Service Location
- 78 Service Requester
- 79 Warranter
- 7A Premises
- 7B Bottler
- 7C Place of Occurrence
- 7D Contracting Officer Representative
- 7E Party Authorized to Definitize Contract Action
- 7G Hazardous Material Office
- 7H Government Furnished Property FOB Point

CODE DEFINITION & EXPLANATION

- 7L Preliminary Inspection Location
- 7M Inspection and Acceptance Location
- 7N Party to Receive Proposal
- 7P Transportation Office
- 7Q Party to Whom Protest Submitted
- 7S Pipeline Segment
- 80 Hospital
An institution where the ill or injured may receive medical treatment
- 81 Part Source
Identifies vendor who supplied casual part
- 82 Rendering Provider
- 83 Subscriber's School
- 84 Subscriber's Employer
- 85 Billing Provider
- 86 Conductor
- 87 Pay-to Provider
- 88 Approver
Manufacturer's representative approving claim for payment
- 89 Investor
- 8A Vacation Home
- 8B Primary Residence
- 8C Second Home
- 8D Permit Holder
- 8F Bailment Warehouse
A warehouse property that is owned by an organization, but the inventory contained in the warehouse belongs to the supplier until the organization owning the warehouse legally purchases the goods
- 91 Action Party
The organization responsible for investigation and resolution
- 92 Support Party
The organization supporting the resolution of an investigation
- 93 Insurance Institute
- 94 New Supply Source
- 95 Research Institute
- 96 Debtor Company
- 97 Party Waiving Requirements
- 98 Freight Management Facilitator
Organization and/or individual responsible for the monitoring and management of freight services
- 99 Outer Continental Shelf (OCS) Area Location
- 9A Debtor Individual
- 9B Country of Export
- 9C Country of Destination
- 9D New Service Provider

- 9F Loss Payee
- 9G Nickname
- 9H Assignee

CODE DEFINITION & EXPLANATION

- A1** Adjuster
Investigates a claim and estimates the value of the damage: the information gathered by an adjuster is used in settling the insurance claim.
- A2** Woman-Owned Business
A business (not defined as large or small) that is owned by a woman
- A3** Labor Surplus Area Firm
A business that has an identified surplus of labor in the geographic area where it is located
- A4** Other Disadvantaged Business
A business which qualifies as a disadvantaged business for another, unspecified reason
- A5** Veteran-Owned Business
A business owned by a veteran
- A6** Section 8(a) Program Participant Firm
A firm participating in a program (under Section 8 (a) of the Small Business Act (15 U.S.C. 637 (a)), in which the Small Business Administration enters into contracts on behalf of, and then subcontracts with, the participating firm, certifying the firm's competence and responsibility
- A7** Sheltered Workshop
A business entity which provides work for a special category of worker
- A8** Nonprofit Institution
A business that by operation of policy or law does not choose (or is not allowed) to make a profit from the efforts of its enterprise
- A9** Sales Office
A business entity whose main activity is, or a location at which, the sale of goods or services takes place
- AA** Authority For Shipment
- AB** Additional Pick Up Address
- AC** Air Cargo Company
- AD** Party to be advised (Written orders)
- AE** Additional Delivery Address
- AF** Authorized Accepting Official
- AG** Agent/Agency
- AH** Advertiser
- AI** Airline
- AJ** Alleged Debtor
- AK** Party to Whom Acknowledgment Should Be Sent
- AL** Allotment Customer
- AM** Assistant U.S. Trustee
- AN** Authorized From
A geographic location designated as an authorized pick-up or origin point for a shipment
- AO** Account Of
- AP** Account of (Origin Party)
- AQ** Account of (Destination Party)
- AR** Armed Services Location Designation
- AS** Postsecondary Education Transcript Sender
Indicates that the educational record, or transcript, is being sent from a postsecondary educational institution

CODE DEFINITION & EXPLANATION

- AT** Postsecondary Education Transcript Recipient
Indicates that the educational record, or transcript, is being sent to a postsecondary educational institution or other agency
- AU** Party Authorizing Disposition
- AV** Authorized To
A geographic location designated as an authorized drop-off or destination point for shipment
- AW** Accountant
- AX** Plaintiff
- AY** Clearinghouse
- AZ** Previous Name
- B1** Construction Firm
A business entity whose main activity is construction
- B2** Other Unlisted Type of Organizational Entity
An organization, e.g., a business, the description of which cannot be accomplished using the existing code list and for which the trading partners have not mutually agreed to a definition for it
- B3** Previous Name of Firm
A name by which a business entity was previously known
- B4** Parent Company
The organizational entity which, by virtue of organization, ownership, and/or management, exercises control over a subordinate but separate business entity
- B5** Affiliated Company
An organizational entity that shares a business affiliation with another business entity
- B6** Registering Parent Party
An organizational entity (which is also a parent company) that is registering, for a program, e.g. to become a registered bidder
- B7** Registering Nonparent Party
An organizational entity (which is not a parent company) that is registering, for a program, e.g. to become a registered bidder
- B8** Regular Dealer
A business entity that regularly deals in a commodity or service being quoted on; use of the term "regular dealer" is consistent with its application to the Walsh-Healey Act
- B9** Large Business
A business entity that cannot be classified as a small business for purposes of receiving preferential treatment in the award of contracts
- BA** Battery
That portion of the surface of land, other than a wellsite or roadway, required for access to and to accommodate all equipment, including above ground pressure maintenance facilities that are necessary to measure, separate or store prior to shipping to market or disposal, or necessary to produce the fluids, minerals and water or any of them from wells
- BC** Broadcaster
- BD** Bill-to Party for Diversion Charges
Charges associated with a diversion or reconsignment of a railcar

DTB	Double-length Tote Bin
DUF	Duffelbag
EGG	Egg Crating <i>In containers and shipping devices, usually describes a type of interior dunnage which allows the contents to be individually segregated, horizontally and vertically, to provide protection during transportation and storage</i>
ENV	Envelope
EPR	Edge Protection <i>A right-angle piece placed over the outermost perimeter edges of a container to distribute pressure and prevent collapse or cutting from banding, strapping, or handling</i>
FIR	Firkin
FLO	Flo-bin
FRM	Frame
FSK	Flask
FWR	Forward Reel

CODE DEFINITION & EXPLANATION

HED	Heads of Beef
HGH	Hogshead
HPR	Hamper
HPT	Hopper Truck
HRB	On Hanger or Rack in Boxes
HRK	Half-standard Rack
HTB	Half-Standard Tote Bin
INT	Intermediate Container
JAR	Jar
KEG	Keg
KIT	Kit
KRK	Knockdown Rack
KTB	Knockdown Tote Bin
LBK	Liquid Bulk
LID	Lip/Top <i>In packaging, the top or bottom of a container, usually the part that closes the opening; may also be known as cap, over, or top</i>
LIF	Lifts
LNR	Liners <i>Any material that separates a product within a container from the basic walls of the container</i>
LOG	Log
LSE	Loose
LUG	Lug
LVN	Lift Van
MIX	Mixed Container Types <i>More than one type of container is included in a shipment (shipment could consist of 3 pieces that include 1 box, 1 crate, and 1 basket)</i>
ML2	MILVAN <i>A military owned demountable container that conforms to US and international standards and operates in a centrally controlled fleet for movement of military cargo</i>
MRP	Multi-Roll Pack
MS2	MSCVAN <i>A commercial (leased) or Government-owned shipping container controlled by the Military Sealift Command</i>
MXD	Mixed
NOL	Noil
PAF	Pallet - 4 Way <i>A pallet that permits entry of handling equipment on each of its four sides</i>
PAL	Pail
PAT	Pallet - 2 Way <i>A pallet that permits entry of handling equipment on opposing two of its four sides</i>
PCK	Packed - not otherwise specified
PCS	Pieces
PIR	Pirns
PKG	Package

CODE DEFINITION & EXPLANATION

PLC	Primary Lift Container <i>The largest (outermost) unitized package or articles secured together that can be handled (usually mechanically) in common shop floor/warehouse applications as a single entity; "primary" indicates preferred or mandatory</i>
PLF	Platform
PLN	Pipeline
PLT	Pallet
POV	Private Vehicle
PRK	Pipe Rack
PRT	Partitioning <i>The proceeds of applying separators or dividers</i>
PWT	Plastic-Wrapped Tray
QTR	Quarter of Beef
RAL	Rail (Semiconductor)
RCK	Rack
REL	Reel
RFT	Reinforcement <i>In containers and shipping devices, a component (usually temporary) added to a container for a particular application to lend additional support under severe applications</i>
ROL	Roll
RVR	Reverse Reel
SAK	Sack
SCS	Suitcase
SHK	Shook
SHT	Sheet <i>A thin layer of material usually used as a pad for extra protection by isolating/separating tiers or layers of parts within the package</i>
SID	Side of Beef
SKD	Skid
SKE	Skid, elevating or lift truck
SLP	Slip Sheet <i>Shipping containers utilizing slip sheets, which are cardboard platforms used to hold product for storage or transportation</i>
SLV	Sleeve
SPI	Spin Cylinders
SPL	Spool
SPR	Separator/Divider <i>In packaging, any material inserted between tiers or layers of articles to prevent contact and provide protection</i>
SRW	Shrink Wrap <i>In packaging, a method of securing a unit load by placing a large "bag" of plastic film over the components and applying heat to induce shrinkage and cause the bag to tighten around the contents</i>
STW	Stretch Wrap <i>In packaging, a high-tensile plastic film, stretched and wrapped repeatedly around a unitized load to secure and maintain unit integrity</i>

CODE DEFINITION & EXPLANATION

SV2	SEAVAN <i>A commercial or government-owned (or leased) shipping container which is moved via ocean transportation without wheels attached and is lifted on and off a ship</i>
TBE	Tube
TBN	Tote Bin
TKR	Tank Car
TKT	Tank Truck
TLD	Intermodal Trailer/Container Load (Rail)
TNK	Tank
TRC	Tierce
TRK	Trunk and Chest
TRU	Truck
TRY	Tray
TSS	Trunk, Salesmen Sample
TUB	Tub
UNP	Unpacked
UNT	Unit
VEH	Vehicles
VIL	Vial
VOC	Vehicle in Operating Condition
VPK	Van Pack
WHE	On Own Wheel
WLC	Wheeled Carrier
WRP	Wrapped

Part 2

01	Aluminum
04	As Specified by the DOT
07	Burlap
10	Chemically Hardened Fibre
13	Cloth
16	Cloth Top
19	Cloth or Fabric
22	Compressed
25	Corrugated or Solid
28	Double-wall Paper
31	Fibre
34	Fibre (Paperboard)
37	Fiberboard
40	Fiberboard Metal
43	Glass
46	In Inner Containers
48	Wire/Cord <i>Something that binds, ties, or encircles the package/container to secure and maintain unit integrity</i>
49	Insulated
50	Steel - Vinyl Coated <i>Steel that has been covered with a plastic material</i>
51	Wire Mesh
52	Iron or Steel
53	Jumbo

CODE DEFINITION & EXPLANATION

- 54 Special Jumbo
- 55 Lead
- 58 Metal
- 59 Metal Cans
- 61 Moisture Resistant
- 64 Molded Plastic
- 67 Multiple-wall Paper (2 or more walls)
- 70 Multiple-wall Paper (3 or more walls)
- 71 Not Otherwise Specified
- 72 Paper - VCI
Water-resistant paper that is treated by the addition of materials to provide resistance to damage or deterioration by water in liquid form
- 73 Other than Glass
- 74 Other than Metal or Plastic Tubes, or Glass
- 75 Plastic - Vacuum Formed
Packaging material that is formed by heating plastic sheet and drawing it against the mold surface by evacuating the air between the sheet and the mold
- 76 Paper
- 77 Plastic - Structural Foam
A method of manufacturing containers and shipping devices by mixing plastic resins with a foaming agent, heating it and injecting the mix into a two-piece machined aluminum mold
- 78 Plastic - Injection Molded
Packaging material that is formed by melting the material and then forcing it under pressure into a cavity of a closed mold
- 79 Plastic
- 80 Polyethylene Lined
- 81 Plastic - Virgin
Plastic in the form of pellets, granules, powder, floc, or liquid that has not been subjected to use or processing other than for its initial manufacture
- 82 Pulpboard
- 83 Plastic - Regrind
A plastic prepared from discarded articles that have been reprocessed, often changing some of its original properties
- 84 Polystyrene
A polymer prepared by the polymerization of styrene as the sole monomer
- 85 Rubber
- 86 Foam
In packaging, a cushioning material used to reduce shock and vibration or abrasion
- 88 Rubber and Fabric
- 89 Special
- 90 Standard
- 91 Stainless Steel
- 92 Tubes, Metal or Plastic
- 94 Wood

CODE DEFINITION & EXPLANATION

- 95 Single Wall Corrugated Board
The structure formed by one corrugated inner member between two flat facings; also known as double face
- 96 Double Wall Corrugated Board
The structure formed by three flat facings and two intermediate corrugated members
- 97 Triple Wall Corrugated Board
The structure formed by four flat facings and three intermediate corrugated members

107 Payment Method Code

TYPE=ID MIN=1 MAX=1

Code identifying type of payment procedures.

SEGMENTS USED IN (AS SIMPLE):

- J CTX (NACHA Corporate Trade Exchange - Transaction Plus Remittance Detail in ANSI Standard Flexible Format)
- K Private Netting, Pay by Check
- L Letter of Credit
- M Deduction from Film Rental
- N Billing Account
The account or summary account that represents a customer's net compensation position with the bank for the relationship within this transaction set
- O CTP (NACHA Corporate Trade Payment - Transaction Plus Remittance Detail in Fixed Format)
- P Previously Charged
Service charged outside of analysis; provided for completeness of bank information
- Q Petroleum Clearinghouse Bank

CODE DEFINITION & EXPLANATION

- R** Related Detail Account
Individual account that provides supporting data for a billing or summary amount
- S** Summary Account
Summary of account level detail for information, pricing or balance netting
- T** Wire Transfer
- U** Direct Pay to Others
- V** Lock Box
- W** Waived
- X** In Kind Payment

110 Application Acknowledgment Code

TYPE=ID MIN=1 MAX=2

Code indicating the application system edit results of the business data.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION.

CODE DEFINITION & EXPLANATION

- 1** Final Port of Discharge (Operational)
Last port at which cargo is unloaded from vessel
- 2** Collect Charge Location (Operational)
Place at which collect charges are paid
- 3** Customs Office of Manifest Origin
- 4** Customs Office of Manifest Destination
- 5** Activity Location (Operational)
Place at which the activity being reported is occurring

CODE DEFINITION & EXPLANATION

- A** Place of Acceptance (Operational)
Place at which carrier actually accepts cargo from shipper or his agent
- B** Reconsolidation Point (Operational)
Place at which loose or other noncontainerized cargo is regrouped for further carriage
- C** De-Consolidation Point (Operational)
Place at which loose or other noncontainerized cargo is ungrouped for delivery
- D** Port of Discharge (Operational)
Port at which cargo is unloaded from vessel
- E** Place of Delivery (Contractual)
Place at which cargo leaves its care and custody of carrier
- F** Freight Payable At (Contractual)
Carrier's location of collection of freight
- G** Port of Entry (Operational)
Place at which cargo actually enters a country where the cargo is not part of its commerce
- H** Port of Exit (Operational)
Place at which cargo actually leaves a country where the cargo is not part of its commerce
- I** Interim Point (Operational)
Place at which cargo is transferred from one inland means of transport to another
- J** Bill of Lading Port of Loading (Contractual)
Place at which cargo is loaded on board the means of transport
- K** Bill of Lading Port of Discharge (Contractual)
Place at which cargo is discharged from means of transport
- L** Port of Loading (Operational)
Port at which cargo is loaded on vessel
- M** Destination (Operational)
Place at which carrier actually turns cargo to consignee or his agent
- N** Final Destination (Operational)
Consignee's facility at which shipment ends its movement at cargo's expense
- O** Origin (Operational)
Shipper's facility at which shipment begins its movement at cargo's expense
- P** Dispatching Pool (Operational)
Place from which equipment is dispatched
- Q** Bill of Lading Origin of Goods (Contractual)
Origin of goods or shipments, or both as denoted on bill of lading
- R** Place of Receipt (Contractual)
Place at which cargo enters the care and custody of carrier
- S** Return Pool (Operational)
Place at which equipment is returned
- T** Transshipment Port (Contractual)
Place at which cargo is transferred to another carrier
- V** Prepaid Charge Location (Operational)
Place at which prepaid charges are paid
- W** Bill of Lading Release Office (Operational)
Place at which original bills of lading are released to the shipper or his agent

CODE DEFINITION & EXPLANATION

- Y** Relay Port (Operational)
Port at which cargo is transferred from one vessel to another

116 Postal Code

TYPE=ID MIN=3 MAX=11

Code defining international postal zone code excluding punctuation and blanks (zip code for United States).

CODE DEFINITION & EXPLANATION

- 01** American Bankers Assoc. (ABA) Transit/Routing Number (Including Check Digit, 9 Digits)
- 02** Society for Worldwide Interbank Financial Telecommunication (S.W.I.F.T.) Identification (8 or 11 Characters)
- 03** Clearing House Interbank Payment System (CHIPS) Participant Number (3 or 4 Digits)
- 04** Canadian Bank Branch and Institution Number
SEE CODE SOURCE 91
- 05** Clearing House Interbank Payment System (CHIPS) User Identification (6 digits)
- 06** System Number
A unique number assigned by the manufacturer to identify the initial computer system sold to the customer

CODE DEFINITION & EXPLANATION

- 07** Add-On System Number
A unique number assigned by the manufacturer to identify additional products added to or used by the customer in the initial system
- 08** Carrier Assigned Package Identification Number
A reference number assigned by a carrier to uniquely identify a single package
- 09** Customs Bar Code Number
- 0A** Supervisory Appraiser Certification Number
- 0B** State License Number
- 0C** Certification Number
- 0D** Subject Property Verification Source
- 0E** Subject Property Reference Number
- 0F** Subscriber Number
- 0G** Reviewer File Number
- 0H** Comparable Property Pending Sale Reference Number
- 0I** Comparable Property Sale Reference Number
- 0J** Subject Property Non-Sale Reference Number
- 10** Account Managers Code
Identifies the telecommunications manager assigned to this account
- 11** Account Number
Number identifies a telecommunications industry account
- 12** Billing Account
Account number under which billing is rendered
- 13** Horizontal Coordinate
Positional address, horizontal component. The assigned address is based upon a grid mapping scheme
SEE CODE SOURCE 46
- 14** Master Account Number
Account number used to represent individual billing accounts which have been consolidated and/or summarized
- 15** Vertical Coordinate
Positional Address, Vertical component. The assigned address is based upon a grid mapping scheme
SEE CODE SOURCE 46
- 16** Military Interdepartmental Purchase Request (MIPR) Number
A specific form used to transmit obligation authority (dollars) and requirements between a service or agency requiring a purchase and a military service or agency responsible for procuring the requirement
- 17** Client Reporting Category
Code assigned by the client to categorize participants for reporting requirements
- 18** Plan Number
The unique identification number assigned for a defined contribution plan
- 19** Division Identifier
- 1A** Blue Cross Provider Number
- 1B** Blue Shield Provider Number
- 1C** Medicare Provider Number
- 1D** Medicaid Provider Number

CODE DEFINITION & EXPLANATION

- 1E** Dentist License Number
- 1F** Anesthesia License Number
- 1G** Provider UPIN Number
- 1H** CHAMPUS Identification Number
- 1I** Department of Defense Identification Code (DoDIC)
Qualifies a code that uniquely identifies a type of explosive or ammunition
SEE CODE SOURCE 196
- 1J** Facility ID Number
- 1K** Payor's Claim Number
- 1L** Group or Policy Number
- 1M** Preferred Provider Organization Site Number
An identification number used to identify the Preferred Provider Organization (PPO) and/or its office location
- 1N** Diagnosis Related Group (DRG) Number
- 1O** Consolidation Shipment Number
Qualifies a single number that is a key to a group of individual shipment numbers
- 1P** Accessorial Status Code
Qualifies a single number that describes the status of an accessorial transportation service
- 1Q** Error Identification Code
Qualifies a single number that describes an error found in application-level data
- 1R** Storage Information Code
Qualifies text data that describes a storage facility used for transportation services
- 1S** Ambulatory Patient Group (APG) Number
- 1T** Resource Utilization Group (RUG) Number
- 1U** Pay Grade
- 1V** Related Vendor Order Number
A vendor's order number that is in addition to a primary order number
- 1W** Member Identification Number
Unique identification number assigned to each member under a subscriber's contract
- 1Y** Repair Action Number
- 1Z** Financial Detail Code
- 20** Repair Part Number
Code assigned by a company to represent internal delivery points
- 21** American Gas Association Equation Number
Indicates which American Gas Association (AGA) equation was used to calculate the volumes reported
- 22** Special Charge or Allowance Code
- 23** Client Number
- 24** Short-term Disability Policy Number
- 25** Reason Not Lowest Cost Code
Qualifies a code that identifies why a service/rate other than the least costly service/rate was used
SEE CODE SOURCE 350
- 26** Union Number
- 27** Insuror Pool Identification Number
- 28** Employee Identification Number for Employer Usage
- 29** Foreclosure Account Number
- 2A** Import License Number

CODE DEFINITION & EXPLANATION

- 2B** Terminal Release Order Number
Cargo number assigned to staged material
- 2C** Long-term Disability Policy Number
- 2D** Aeronautical Equipment Reference Number (AERNO)
A unique number assigned to a particular piece of government-furnished aeronautical equipment
- 2E** Foreign Military Sales Case Number
A reference number designating the foreign military sale records
- 2F** Consolidated Invoice Number
- 2G** Amendment
- 2H** Assigned by transaction set sender
- 2I** Tracking Number
- 2J** Floor Number
- 2K** Food and Drug Administration (FDA) Product Type
- 2L** Association of American Railroads (AAR) Railway Accounting Rules
SEE CODE SOURCE 449
- 2M** Federal Communications Commission (FCC) Identifier
- 2N** Federal Communications Commission (FCC) Trade/Brand Identifier
- 2O** Occupational Safety and Health Administration (OSHA) Claim Number
- 2P** Subdivision Identifier
- 2Q** Food and Drug Administration (FDA) Accession Number
- 2R** Coupon Redemption Number
- 2S** Catalog
- 2T** Sub-subhouse Bill of Lading
- 2U** Payer Identification Number
- 2V** Special Government Accounting Classification Reference Number (ACRN)
- 2W** Change Order Authority
- 2X** Supplemental Agreement Authority
- 2Y** Wage Determination
- 2Z** U.S. Customs Service (USCS) Anti-dumping Duty Case Number
- 30** United States Government Visa Number
- 31** Docket Number
- 32** Credit Repository Code
- 33** Lender Case Number
- 34** Loan Request Number
- 35** Multifamily Project Number
- 36** Underwriter Identification Number
- 37** Condominium Identification Number
- 38** Master Policy Number
- 39** Proposal Number
- 3A** Section of the National Housing Act Code
A code taken from the Mortgage Insurance Certificate indicating the specific National Housing Act Program under which the mortgage is insured
- 3B** Supplemental Claim Number
Number assigned by claimant to a supplemental claim for benefits

CODE DEFINITION & EXPLANATION

- 3C** Payee Loan Number
Number assigned by payee to insured loan; used only when payee is different from insured lender
- 3D** Servicer Loan Number
The loan number assigned by the servicer to the mortgage when the servicer is not the insured entity
- 3E** Investor Loan Number
The number assigned by the investor to the mortgage when the investor is different from the insured or payee
- 3F** Show Identification
Identification of a broadcast program
- 3G** Catastrophe Number
- 3H** Case Number
- 3I** Precinct Number
- 3J** Office Number
- 3K** Petroleum Pool Code
A code which identifies a common source of underground oil or gas supply whose vertical and horizontal limits are defined by a state regulatory agency
- 3L** Branch Identifier
- 3M** Federal Communications Commission (FCC) Condition Code
- 3N** Gas Custodian Identification
Identification number for custodian from whom gas was received or to whom gas was delivered
- 3O** U.S. Customs Service (USCS) Pre-approval Ruling Number
- 3P** Third Party Originator Number
Number identifying the organization acting as a correspondent in originating a loan
- 3Q** Food and Drug Administration (FDA) Product Code
- 3R** U.S. Customs Service (USCS) Binding Ruling Number
- 3S** Provincial (Canadian) Sales Tax Exemption Number
- 3T** U.S. Customs Service (USCS) Pre-classification Ruling Number
- 3U** Protraction Number
The identifier of an official protraction diagram, either an official protraction diagram or a leasing map
- 3V** Formation Identifier
A code or name identifying a subsurface formation
- 3W** U.S. Customs Service (USCS) Commercial Description
- 3X** Subcontract Number
- 3Y** Receiver Assigned Drop Zone
- 3Z** Customs Broker Reference Number
- 40** Lease Schedule Number - Replacement
- 41** Lease Schedule Number - Prior
- 42** Phone Calls
- 43** Supporting Document Number
Supports or clarifies information and values represented in a document
- 44** End Use Number
Represents the final use or form of the material being manufactured or sold

CODE DEFINITION & EXPLANATION

- 45** Old Account Number
Identifies accounts being changed
- 46** Old Meter Number
Identifies meters being removed
- 47** Plate Number
- 48** Agency's Student Number. This is the number assigned by an agency other than the institution sending the record.
Student number assigned by an agency other than the institution sending or receiving the record
- 49** Family Unit Number
An identification number assigned to siblings within the same family
- 4A** Personal Identification Number (PIN)
A number that uniquely identifies an individual
- 4B** Shipment Origin Code
- 4C** Shipment Destination Code
- 4D** Shipping Zone
- 4E** Carrier-assigned Consignee Number
- 4F** Carrier-assigned Shipper Number
- 4G** Provincial Tax Identification
- 4H** Commercial Invoice Number
- 4I** Balance-due Reference Number
- 4J** Vehicle-related Services Reference Number
- 4K** Accessorial Rail Diversion Reference Number
- 4L** Location-specific Services Reference Number
- 4M** Special Move Reference Number
- 4N** Special Payment Reference Number
- 4O** Canadian Goods & Services or Quebec Sales Tax Reference Number
- 4P** Affiliation Number
- 4Q** Call Sign
- 4R** Rule Section
SEE CODE SOURCE 360
- 4S** Preferred Call Sign
- 4T** North American Datum Standard (NADS)
- 4U** Market Area
- 4V** Emission Designator
SEE CODE SOURCE 360
- 4W** Study
- 4X** Log
- 4Y** Subhouse Bill of Lading
- 4Z** U.S. Customs Service (USCS) Countervailing Duty Case Number
- 50** State Student Identification Number
A student identification number assigned by the state education agency to students enrolled in state schools
- 51** Picture Number
- 52** SWIFT (MT 100)
- 53** SWIFT (MT 202)
- 54** FEDWIRE (Federal Wire Transfer)
- 55** Sequence Number
- 56** Corrected Social Security Number
- 57** Prior Incorrect Social Security Number

CODE DEFINITION & EXPLANATION

- 58** Corrected Batch Number
- 59** Prior Incorrect Batch Number
- 5A** Offense Tracking
- 5F** Warrant
- 5G** Complaint
- 5H** Incident
- 5I** Offender Tracking
- 5J** Driver's License
- 5K** Commercial Driver's License
- 5M** Previous Sequence
- 5N** Citation of Statute
- 5O** Citation of Opinion
- 5P** National Criminal Information Center Originating Agency Identification
- 5Q** State Criminal History Repository Individual Identification
- 5R** Federal Bureau of Investigation Individual Identification
- 5S** Processing Area
- 60** Account Suffix Code
- 65** Total Order Cycle Number
- 66** Previous Policy Number
- 67** Previous Claim History Identifier
- 68** Dental Insurance Account Number
- 69** Dental Insurance Policy Number
- 6A** Consignee Reference Number
- 6B** U.S. Customs Service (USCS) Entry Number
- 6C** U.S. Customs Service (USCS) Entry Type Code
SEE CODE SOURCE 49
- 6D** U.S. Customs Service (USCS) Statement Number
- 6E** Map Reference
- 6F** Appraiser License
- 6G** Map Number
- 6H** Comparable Property Verification Source
- 6I** Comparable Property
- 6J** Census Tract
- 6K** Zone
- 70** Calendar Number
Identifies a working calendar (for example, Monday through Friday) for a company, division, or labor group
- 71** (Working) Shift Number
Identifies a working shift for a company with multiple working shifts per day
- 72** Schedule Reference Number
Identifies a number for a program schedule (for example, a logic type of network) or working schedule to complete a specific task or set of tasks
- 73** Statement of Work (SOW)
Description of a product or service to be procured under a contract; statement of requirements
- 74** Work Breakdown Structure (WBS)
A product-oriented family tree composed of hardware, software, services, and data that completely defines the project or program

CODE DEFINITION & EXPLANATION

- 75** Organization Breakdown Structure
A functionally oriented family tree that shows organization relationships and is used as the framework for assigning work responsibilities
- 76** Milestone
A specific event that can be identified as occurring at a specific time
- 77** Work Package
A detailed, short span task or material item identified by a contractor for doing the work required to complete the contract
- 78** Planning Package
A logical aggregation of work within a cost account (see code 79) that can be identified and budgeted, but not yet defined into work packages
- 79** Cost Account
A management control point for cost and schedule planning and control; it represents that work assigned to one responsible organization element and to one work breakdown structure element
- 80** Charge Number
A number used by financial systems to identify accounts for costs incurred on a contract
- 81** Symbol Number (for Milestone or LOB reports)
Symbols are used for graphical representation on Milestone schedule reports and Line of Balance reports; the various symbols indicate planned, revised, completed, and slipped events; symbols used are mutually agreed upon between supplier and customer
- 82** Data Item Description (DID) Reference
Specific data elements that the government will ask a contractor to provide and are spelled out in specific requirement documents
- 83** Extended (or Exhibit) Line Item Number (ELIN)
Identifies specific line items to be delivered for a contract
- 84** Contractor Data Requirements List (CDRL)
Government or customer specific deliverables identified by line item; referenced on shipping details, etc
- 85** Subcontractor Data Requirements (SDRL)
Line item deliverables that a subcontractor is responsible for
- 86** Operation Number
Identifies a specific operation number as part of the manufacturing process for a part or product
- 87** Functional Category
An organization or groups of organizations with a common operational orientation such as Quality Control Engineering, etc
- 88** Work Center
Identifies a specific work area in a manufacturing process
- 89** Assembly Number
Identifies specific assemblies in the manufacturing process
- 8A** Health Maintenance Organization (HMO)
Authorization Number

CODE DEFINITION & EXPLANATION

8B	Preferred Provider Organization (PPO) Authorization Number
8C	Third-party Organization (TPO) Authorization Number
8D	Chemical Abstract Service Registry Number SEE CODE SOURCE 69
8E	Guarantor Loan Number
8F	School Loan Number
8G	Automated Clearinghouse (ACH) Trace Number
8H	Check List Number
8I	FEDWIRE Confirmation Number
8J	Society for Worldwide Interbank Financial Telecommunications (SWIFT) Confirmation Number
8K	Dominion of Canada Code
8L	International Standard Industry Classification Code (ISIC)
8M	Originating Company Identifier
8N	Receiving Company Identifier
8O	Automated Clearing House (ACH) Entry Description
8P	Originating Depository Financial Institution Identifier
8Q	Receiving Depository Financial Institution Identifier
8R	Security Type
8S	Broker Identification
8T	Committee for Uniform Security Identification Procedure (CUSIP)
8U	Bank Assigned Security Identifier
90	Subassembly Number <i>Components of assemblies</i>
91	Cost Element <i>A subdivision of costs defined by the accounting structure and the level that costs are recorded at within a cost accounting system (examples are labor, material, other direct costs)</i>
92	Change Document Number <i>Reference numbers to track changes made to a contract</i>
93	Funds Authorization <i>Reference numbers to identify funds authorization (document or other reference number) in the government contracting environment</i>
94	File Identification Number
95	Committee on Uniform Securities Identification Procedures (CUSIP) Number
96	Stock Certificate Number
97	Package Number <i>A serial number indicating unit shipped</i>
98	Container/Packaging Specification Number <i>A numeric or alphanumeric identification assigned to a unique packaging/container configuration</i>
99	Rate Conference ID Code <i>A group which publishes transportation rates for a group of transportation carriers</i>
9A	Repriced Claim Reference Number
9B	Repriced Line Item Reference Number
9C	Adjusted Repriced Claim Reference Number
9D	Adjusted Repriced Line Item Reference Number

CODE DEFINITION & EXPLANATION

9E	Replacement Claim Number
9F	Referral Number
9G	Department of Defense Form 250 Requirement Code SEE CODE SOURCE 329
9H	Packaging Group Number
9I	Automated Clearing House (ACH) Standard Entry Class
9J	Pension Contract

AK	Sending Company Audit Number (Automated Clearinghouse Transfers)
AL	Accounting (Equipment) Location Number
AM	Adjustment Memo (Charge Back)
AN	Associated Purchase Orders
AO	Appointment Number
AP	Accounts Receivable Number
AQ	Access Code <i>Identifies difficulties in accessing subassembly or part requiring repair</i>
AR	Arrival Code
AS	Acceptable Source Supplier ID
AT	Appropriation Number
AU	Authorization to Meet Competition No. SEE CODE SOURCE 188
AV	Health Insurance Rating Account Number
AW	Air Waybill Number
AX	Government Accounting Class Reference Number (ACRN)
AY	Floor Plan Approval Number <i>Authorization number supplied by a finance company prior to shipment of product</i>
AZ	Health Insurance Policy Number

CODE DEFINITION & EXPLANATION

B1	Lessee Bill Code Number
B2	Axle Ratio <i>Numerical gear ratio of an axle drivetrain</i>
B3	Preferred Provider Organization Number
B4	Bilateral Car Service Agreements
B5	Health Insurance Rating Suffix Code
B6	Life Insurance Billing Account Number
B7	Life Insurance Policy Number
B8	Life Insurance Billing Suffix Code
B9	Retirement Plan Account Number
BA	Retirement Plan Policy Number
BB	Authorization Number <i>Proves that permission was obtained to provide a service</i>
BC	Buyer's Contract Number
BD	Bid Number
BE	Business Activity
BF	Billing Center Identification
BG	Beginning Serial Number
BH	Lease Schedule Number - Blanket
BI	Bonded Carrier Internal Revenue Service Identification Number
BJ	Carrier's Customs Bond Number
BK	Broker's Order Number
BL	Government Bill of Lading
BM	Bill of Lading Number
BN	Booking Number
BO	Bin Location Number
BP	Adjustment Control Number <i>Identification assigned to an adjustment for future reference</i>
BQ	Health Maintenance Organization Code Number <i>A unique number assigned to each individual Health Maintenance Organization (HMO) health insurance plan (assigned by the HMO)</i>
BR	Broker or Sales Office Number
BS	Split Booking Number
BT	Batch Number
BU	Buyer's Approval Mark
BV	Purchase Order Line Item Identifier (Buyer)
BW	Blended With Batch Number <i>Number of the batch with which another batch was blended prior to delivery to customer</i>
BX	Buyer' Shipment Mark Number <i>Number identifying individual bales and total shipments of cotton which have been tested according to U.S. Government regulations</i>
BY	Repair Category Number <i>Classification number for the type of repair performed on a product</i>
BZ	Complaint Code <i>Number categorizing customer complaints</i>
C0	Canadian Social Insurance Number
C1	Customer material specification number

CODE DEFINITION & EXPLANATION

C2	Customer process specification number
C3	Customer specification number
C4	Change Number
C5	Customer Tracking Number For Loaned Materials
C6	Carnet Number
C7	Contract Line Item Number
C8	Corrected Contract Number
C9	Previous Credit/Debit Adjustment Number
CA	Cost Allocation Reference
CB	Combined Shipment
CC	Contract Co-op Number
CD	Credit Note Number
CE	Class of Contract Code
CF	Fleet Reference Number
CG	Consignee's Order Number
CH	Customer catalog number
CI	Unique Consignment Identifier
CJ	Clause Number
CK	Check Number
CL	Seller's Credit Memo
CM	Credit Memo
CN	Carrier's Reference Number (PRO/Invoice)
CO	Customer Order Number
CP	Condition of Purchase Document Number
CQ	Customshouse Broker License Number
CR	Customer Reference Number
CS	Condition of Sale Document Number
CT	Contract Number
CU	Clear Text Clause
CV	Coil Number
CW	Canadian Wheat Board Permit Number
CX	Consignment Classification ID
CY	Commercial Registration Number
CZ	Contract Rider Number (Used in conjunction with contract number)
D0	Data Reliability Code
D1	Drug Enforcement Administration Order Blank Number
D2	Supplier Document Identification Number
D3	National Association of Boards of Pharmacy Number SEE CODE SOURCE 307
D4	Cut Number
D5	Dye Lot Number
D6	Duplicate Bill Number <i>The number of the second or subsequent invoice for the same goods or services</i>
D7	Coverage Code <i>Type of protection provided by an insurance policy</i> SEE CODE SOURCE 214
D8	Loss Report Number <i>Sequence number to identify a particular loss and its information. It will be assigned across all lines of business for a particular customer</i>

CODE DEFINITION & EXPLANATION

D9	Claim Number <i>Sequence number to track the number of claims opened within a particular line of business</i>
DA	Domicile Branch Number <i>Home location of product</i>
DB	Buyer's Debit Memo
DC	Dealer purchase order number
DD	Document Identification Code
DE	Depositor Number
DF	Defense Federal Acquisition Regulations (DFAR) SEE CODE SOURCE 80
DG	Drawing Number
DH	Drug Enforcement Administration Number SEE CODE SOURCE 73
DI	Distributor Invoice No.
DJ	Delivery Ticket Number
DK	Dock Number
DL	Debit Memo
DM	Associated Product Number
DN	Draft Number
DO	Delivery Order Number
DP	Department Number
DQ	Delivery Quote Number
DR	Dock Receipt Number
DS	Defense Priorities Allocation System (DPAS) Priority Rating
DT	Downstream Shipper Contract Number
DU	Dependents Information <i>Qualifies text data that describes information about a dependent spouse or children as it pertains to the transportation of household goods</i>
DV	Diversion Authority Number
DW	Deposit Sequence Number
DX	Department/Agency Number
DY	Department of Defense Transportation Service Code Number (Household Goods) SEE CODE SOURCE 124
DZ	Certified Registered Nurse Anesthetist (CRNA) Provider Identification Number <i>Provider number of the physician that is supervising the registered nurse anesthetist</i>
E1	Emergency Order Number
E2	Part Causing Repair Number
E3	Expansion on Effect of Change Number <i>Description of additional effects on test or operating procedures as a result of the change to the product</i>
E4	Charge Card Number
E5	Claimant's Claim Number <i>Unique number assigned to the claim by the claimant</i>
E6	Backout Procedure Code <i>Description of the procedures required to remove the change to the product in case the change just made causes an unwanted result</i>
E7	Service Bulletin Number

CODE DEFINITION & EXPLANATION

E8	Service Contract (Coverage) Number <i>Number or code identifying length and terms of the coverage</i>
E9	Attachment Code <i>Supplementary reference information</i>
EA	Medical Record Identification Number <i>A unique number assigned to each patient by the provider of service (hospital) to assist in retrieval of medical records</i>
EB	Embargo Permit Number
EC	Circular
ED	Export Declaration
EF	Electronic Funds Transfer ID Number
EG	Ending Serial Number
EH	Financial Classification Code
EI	Employer's Identification Number
EJ	Patient Account Number <i>A unique number assigned to each patient by the provider of service to facilitate retrieval of individual case records tracking of claims submitted to a payer and posting of payment</i>
EK	Healthcare Manpower Shortage Area (HMSA) Facility Identification Number <i>A unique number assigned to facility located in a Health Manpower Shortage Area</i>
EL	Electronic device pin number
EM	Electronic Payment Reference Number
EN	Embargo Number
EO	Submitter Identification Number <i>A unique number identifying the submitter of the transaction set</i>
EP	Export Permit Number
EQ	Equipment Number
ER	Container or Equipment Receipt Number
ES	Employer's Social Security Number
ET	Excess Transportation
EU	End User's Purchase Order Number
EV	Receiver Identification Number <i>A unique number identifying the organization/site location designated to receive the current transmitted transaction set</i>
EW	Mammography Certification Number <i>Health Care Financing Administration assigned certification number of the certified mammography screening center</i>
EX	Estimate Number
EY	Receiver Sub-identification Number <i>A unique code identifying the receiver's specific department or office location for internal routing of electronic claims</i>
EZ	Electronic Data Interchange Agreement Number
F1	Version Code - National <i>Identifies the release of a set of information or requirements to distinguish from the previous or future sets that may differ; the release in question is on the national level</i>

CODE DEFINITION & EXPLANATION

- F2** Version Code - Local
Identifies the release of a set of information or requirements to distinguish from the previous or future sets that may differ; the release in question is on the local level
- F3** Submission Number
A unique number assigned to the submitted transaction set; this number is used by the payer to track every file submitted
- F4** Facility Certification Number
A unique number assigned to qualifying facilities to perform services
- F5** Medicare Version Code
Identifies the release of a set of information or requirements to distinguish from previous or future sets that may differ; the version in question is that which is being used by Medicare
- F6** Health Insurance Claim (HIC) Number
A unique number assigned by the government to each person entitled to Medicare benefits
- F7** New Health Insurance Claim (HIC) Number
A revised Health Insurance Claim Number (HIN)
- F8** Original Reference Number
- F9** Freight Payor Reference Number
- FA** Federal Acquisition Regulations (FAR)
SEE CODE SOURCE 80
- FB** File Transfer Form Number
- FC** Filer Code Issued by Customs
- FD** Filer Code Issued by Bureau of Census
- FE** Failure mechanism number
- FF** Film Number
Number assigned by the film distribution company
- FG** Fund Identification Number
- FH** Clinic Number
A unique identifying the clinic location that rendered services
- FI** File Identifier
- FJ** Line Item Control Number
A unique number assigned to each charge line used for tracking purposes
- FK** Finish Lot Number
- FL** Fine Line Classification
Fine Line Classifications are used to group related items so that retail stores can perform analyses of sales and shelf space allocation by groups of products
- FM** Federal Maritime Commission (FMC) Forwarders Number
- FN** Forwarder's/Agent's Reference Number
- FO** Drug Formulary Number
- FP** Forestry Permit Number
- FQ** Form Number
- FR** Freight Bill Number
- FS** Final Sequence Number
- FT** Foreign Trade Zone

CODE DEFINITION & EXPLANATION

- FU** Fund Code
Defense Fuel Supply Center to bill back fuel purchases to the appropriate service or agency account fund
- FV** Health Maintenance Organization (HMO) Reference Number
A unique number assigned to each referral or authorization when a claimant visits a provider other than the primary care provider
- FW** State License Identification Number
A unique number assigned to each provider of service; this number is assigned by state governments and is the provider's legal identification number in the state that is assigned
- FX** Failure Analysis Report Number
- FY** Claim Office Number
The identification of the specific payer's location designated as responsible for the submitted claim
- FZ** Processor's Invoice Number
The invoice number of the third-party outside processor
- G1** Prior Authorization Number
An authorization number acquired prior to the submission of a claim
- G2** Provider Commercial Number
A unique number assigned to a provider by a commercial insurer
- G3** Predetermination of Benefits Identification Number
A number assigned by a third-party payer identifying the pre-treatment estimate
- G4** Peer Review Organization (PRO) Approval Number
An authorization number for certain surgical procedures and for an assistant at cataract surgery
- G5** Provider Site Number
A unique code identifying the provider's specific department or office location for internal routing of electronic claims
- G6** Payer Assigned Resubmission Reference Number
- G7** Resubmission Reason Code
A code identifying the reason that the claim was resubmitted
- G8** Resubmission Number
- G9** Secondary Employee Identification Number
- GA** Government Advance Progress
- GB** Grain Block Number
- GC** Government Contract Number
- GD** Return Goods Bill of Lading Number
Bill of lading number for returned goods enroute
- GE** Geographic Number
- GF** Specialty License Number
A unique number assigned to each provider of service by specialty
- GG** Gauge Ticket Number
- GH** Identification Card Serial Number
- GI** Secondary Provider Number
- GJ** Cornbore Certification Number
Certificate stating that shipment is free of cornbores

CODE DEFINITION & EXPLANATION

GK	Third Party Reference Number <i>A unique number assigned to a claim after it has been entered into the third party payer's adjudication system; this number is used by the payer to track claims internally</i>
GL	Geographic Destination Zone Number
GM	Loan Acquisition Number <i>Number assigned to a loan during the acquisition process</i>
GN	Folder Number <i>Number used to identify the folder in which the loan is located</i>
GO	Exhibit Identifier
GP	Government Priority Number
GQ	Internal Purchase Order Release Number <i>The release number associated with the internal purchase order number</i>
GR	Grain Order Reference Number
GS	General Services Administration Regulations (GSAR) SEE CODE SOURCE 80
GT	Goods and Service Tax Registration Number
GU	Internal Purchase Order Item Number <i>The item number associated with the internal purchase order</i>
GV	Third Party Purchase Order Number <i>The purchase order number from a manufacturer to a third-party which provides value added to the manufactured product</i>
GW	Third Party Purchase Order Release Number <i>The release number associated with a third-party purchase order number</i>
GX	Third Party Purchase Order Item Number <i>The item number associated with the third-party purchase order number</i>
GY	Empty Repositioning Number <i>Number used to authorize and track an empty container or bare chassis or generator set being repositioned for later use</i>
H1	High Fabrication Authorization Number <i>The purchaser's program number that authorizes the highest amount of material production</i>
H2	High Raw Material Authorization Number <i>The purchaser's program number that authorizes the highest amount of raw material or purchased components in their original state to be secured for production</i>
H3	Gravity Source Meter Number
H4	Federal Information Resources Management Regulation SEE CODE SOURCE 316
H5	Special Clause
H6	Quality Clause
H7	Standard Clause
H9	Payment History Reference Number
HB	Bill & Hold Invoice No.
HC	Heat Code
HD	Department of Transportation Hazardous Number

CODE DEFINITION & EXPLANATION

HE	Hazardous Exemption Number
HI	Health Industry Identification Number SEE CODE SOURCE 121
HN	Hazardous Certification Number
HO	Shipper's Hazardous Number
HP	Pack & Hold Invoice No.
HR	Horsepower <i>Horsepower rating of the engine</i>
HS	Harmonized Code System (Canada) SEE CODE SOURCE 78
HW	High/Wide File Number
I1	Owning Bureau Identification Number
I2	Interstate Commerce Commission (ICC) Account Number <i>A code which is mandatory on Joint Facility Billing that indicates that the following is an ICC Account Number</i>
I3	Non-American Identification Number
I4	Credit Counseling Identification Number
I5	Invoice Identification
I7	Credit Report Number
I8	Social Insurance Number <i>Canadian Social Insurance Number</i>
IA	Internal Vendor Number
IB	In Bond Number
IC	Inbound-to Party
ID	Insurance Certificate Number
IE	Interchange Agreement Number <i>Number identifying the interchange agreement of a domestic carrier with an ocean carrier</i>
IF	Issue Number
IG	Insurance Policy Number
IH	Initial Dealer Claim Number <i>Claim number of previously attempted repair</i>
II	Initial Sample Inspection Report Number
IJ	Standard Industry Classification (SIC) Code
IK	Invoice Number <i>Manufacturer's invoice number for vehicle/component</i>
IL	Internal Order Number
IM	Intergovernmental Maritime Organization (IMO) Number
IN	Consignee's Invoice Number
IO	Inbound-to or Outbound-from Party
IP	Inspection Report Number
IQ	End Item
IR	Intra Plant Routing
IS	Invoice Number Suffix
IT	Internal Customer Number
IU	Barge Permit Number <i>Identification of permit for rail traffic moving on a barge</i>
IV	Seller's Invoice Number

CODE DEFINITION & EXPLANATION

- IW** Part Interchangeability
Specifies the interchange relationship between an old part number and a new part number (replaced and replacing part numbers)
SEE CODE SOURCE 219
- IX** Item Number
- IZ** Insured Parcel Post Number
Number assigned to control an insured parcel post shipment from shipper to consignee
- J0** Proceeding
- J1** Creditor
- J2** Attorney
- J3** Judge
- J4** Trustee
- J5** Originating Case
- J6** Adversary Case
- J7** Lead Case
- J8** Jointly Administered Case
- J9** Substantively Consolidated Case
- JA** Beginning Job Sequence Number
- JB** Job (Project) Number
- JC** Review
- JD** User Identification
- JE** Ending Job Sequence Number
- JH** Tag
- JL** Packet
- JS** Job Sequence Number
- JY** Origin of Shipment Harmonized-Based Code
Harmonized code of the commodity in the country which is the origin of the shipment
- K0** Approval Code
SEE CODE SOURCE 188
- K1** Foreign Military Sales Notice Number
Number assigned to control a foreign military sales shipment from shipper to consignee
- K2** Certified Mail Number
Number assigned by U.S. Postal Service (USPS) to monitor the movement of certified mail from point of acceptance by USPS to point of delivery
- K3** Registered Mail Number
Number assigned by U.S. Postal Service (USPS) to monitor the movement of mail from point of acceptance by USPS to point of delivery
- K4** Criticality Designator
A number assigned to a contract or order that expresses the relative importance of that contract or order and thereby assists the contractor in making performance decisions and assists in making production surveillance decisions
SEE CODE SOURCE 188
- K5** Task Order
- K6** Purchase Description
- K7** Paragraph Number
- K8** Project Paragraph Number
A number for a nested part of a project

CODE DEFINITION & EXPLANATION

- KA** Distribution List
Qualifies a list of addresses to which the distribution of something should be made
- KB** Beginning Kanban Serial Number
- KC** Exhibit Distribution List
Qualifies a list of addressees to which the distribution of a cited contract exhibit must be made
- KD** Special Instructions Number
- KE** Ending Kanban Serial Number
- KF** Pre-award Survey
- KG** Foreclosing Status
- KH** Type of Law Suit
- KI** Type of Outstanding Judgement
- KJ** Tax Lien Jurisdiction
- KK** Delivery Reference
- KL** Contract Reference
- KM** Rental Account Number
- KN** Census Automated Files ID
An ID given by the U.S. Bureau of the Census to those parties having fulfilled the necessary requirements to be able to file shipper's export declaration data directly with the Census through automated means
- KO** Customs Drawback Entry Number
A number given to importers by U.S. Customs which have filed for "drawbacks," of certain import duties
- KP** Health Certificate Number
A certificate given by the veterinary authorities regarding the health of animals being shipped
- KQ** Procuring Agency
- KR** Response to a Request for Quotation Reference
A discrete number assigned for identification purpose to a response to a request for quotation
- KS** Solicitation
A discreet number assigned by the purchasing activity to differentiate between different solicitations
- KT** Request for Quotation Reference
A discrete number assigned for identification purposes to a request for quotation
- KU** Office Symbol
A number assigned for reference to a specific office within an organization
- KV** Distribution Statement Code
SEE CODE SOURCE 188
- KW** Certification
A number, taken from an acquisition regulation, which represents a specific certification that must be made by a prospective vendor before a contract or order can be placed with that vendor
- KX** Representation
A number, taken from an acquisition regulation, which represents a specific representation that must be made by a prospective vendor before a contract or order can be placed with that vendor

CODE DEFINITION & EXPLANATION

- KY** Site Specific Procedures, Terms, and Conditions
A set of procedures, terms, and conditions, applicable to a category of procurement emanating from a specific location, which will be incorporated into all procurement actions in that category by referencing its unique number rather than by incorporating the lengthy details it represents
- KZ** Master Solicitation Procedures, Terms, and Conditions
A set of standard procedures, terms, and conditions, applicable to a category of procurement, which will be incorporated into all procurement actions in that category by referencing its unique number rather than by incorporating the lengthy details it represents
- L1** Letters or Notes
- L2** Location on Product Code
- L3** Labor Operation Number
Uniquely identifies the repair actions performed
- L4** Proposal Paragraph Number
The place in a proposal where additional information can be found
- L5** Subexhibit Line Item Number
A further subdivision of a contract exhibit line item
- L6** Subcontract Line Item Number
A further subdivision of a contract line item number
- LA** Shipping Label Serial Number
- LB** Lockbox
- LC** Lease Number
- LD** Loan Number
- LE** Lender Entity Number
- LF** Assembly Line Feed Location
- LG** Lease Schedule Number
- LH** Longitude Expressed in Seconds
- LI** Line Item Identifier (Seller's)
- LJ** Local Jurisdiction
- LK** Longitude expressed in Degrees, Minutes and Seconds
- LL** Latitude Expressed in Seconds
- LM** Product Period for which Labor Costs are Firm
- LN** Non pickup Limited Tariff Number
- LO** Load Planning Number
- LP** For Pickup Limited Freight Tariff Number
- LQ** Latitude Expressed in Degrees, Minutes and Seconds
- LR** Local Student Identification Number
A student identification number assigned by a local school or school district
- LS** Bar-Coded Serial Number
- LT** Lot Number
- LU** Location Number
- LV** License Plate Number
- LW** Location Within Equipment
- LX** Qualified Products List
- LY** Destination of Shipment Harmonized-Based Code
Harmonized code of the commodity in the country which is the shipping destination
- LZ** Lender Account Number

CODE DEFINITION & EXPLANATION

- M1** Material Storage Location
- M2** Major Force Program
Defense Fuel Supply Center to bill back fuel purchases to the appropriate service or agency account fund
- M3** Crop Year
- M4** Lease Agreement Number - Master
- M5** Lease Agreement Amendment Number - Master
- M6** Military Ordnance Security Risk Number
A number that identifies the security risk of transporting arms and ammunition
SEE CODE SOURCE 270
- M7** Medical Assistance Category
- M8** Limited Partnership Identification Number
- M9** Tax Shelter Number
- MA** Ship Notice/Manifest Number
- MB** Master Bill of Lading
- MC** Microfilm Number
- MD** Magazine Code
- ME** Message Address or ID
- MF** Manufacturers Part Number
- MG** Meter Number
- MH** Manufacturing Order Number
- MI** Mill Order Number
- MJ** Model Number
- MK** Manifest Key Number
- ML** Military Rank/Civilian Pay Grade Number
- MM** Master Lease Agreement Number
- MN** MICR Number
- MO** Manufacturing Operation Number
- MP** Multiple P.O.s of an Invoice
- MQ** Meter Proving Report Number
- MR** Merchandise Type Code
- MS** Manufacturer's Material Safety Data Sheet Number
- MT** Meter Ticket Number
- MU** Military Specification (MILSPEC) Number
- MV** Migrant Number, This number is assigned by the national Migrant Records Transfer System
- MW** Military Call Number
Assigned by the military to identify a billing period
- MX** Material Change Notice Number
- MY** Model year number
- MZ** Maintenance Request Number
- N0** Nomination Number
Shipper-assigned bulk product number identifying a request for pipeline transportation services which is used to relate an into-plane delivery to the bulk fuel movement from which it was derived
- N1** Local School Course Number
- N2** Local School District Course Number
- N3** Statewide Course Number
A course number assigned by the state education agency to courses taught in public schools

CODE DEFINITION & EXPLANATION

N4	United States Department of Education, National Center for Education Statistics (NCES) Course Number <i>A proposed course number to be assigned by NCES to identify a common grouping of subject area content and sequence</i>
N5	Provider Plan Network Identification Number <i>A number assigned to identify a specific provider in a health care plan network</i>
N6	Plan Network Identification Number <i>A number assigned to identify a specific health care network that provides health care services to insured members</i>
N7	Facility Network Identification Number <i>A number assigned to identify a specific facility in a health care plan network</i>
N8	Secondary Health Insurance Identification Number
N9	Data Authentication Number
NA	North American Hazardous Classification Number
NB	Letter of Credit Number
NC	Secondary Coverage Company Number
ND	Letter of Credit Draft Number
NE	Lease Rider Number <i>Qualifies a code that identifies the authorizing documentation for a household goods shipment</i>
NF	National Association of Insurance Commissioners (NAIC) Code <i>A unique number assigned to each insurance company</i> SEE CODE SOURCE 245
NG	Natural Gas Policy Act Category Code SEE CODE SOURCE 122
NH	Rate Card Number
NI	Military Standard (MIL-STD) Number
NJ	Technical Document Number
NL	Technical Order Number
NM	Discounter Registration Number
NN	Nonconformance Report Number
NO	No OT5 Authority-zero Mileage Rate
NP	Partial Payment Number
NR	Progress Payment Number
NS	National Stock Number
NX	Related Nonconformance Number
NY	Agent Claim Number
NZ	Critical Application
O1	Outer Continental Shelf Area Code <i>The designated code assigned to Outer Continental Shelf (OCS) geographical units for identification purposes</i>
O2	Outer Continental Shelf Block Number <i>The number corresponding to a U.S. offshore block</i>
O5	OT5 Authority-Condition or Restriction on Car Hire Rate
O7	On-line Procurement and Accounting Control (OPAC) Transaction
O8	Original Filing

CODE DEFINITION & EXPLANATION

O9	Continuation Filing
OA	Outlet Number
OB	Ocean Bill of Lading
OC	Ocean Container Number
OD	Original Return Request Reference Number <i>A sequential number assigned by the originator of the original return request</i>
OE	Open and Prepaid Station List Number
OF	Operator Identification Number
OG	Termination Filing
OI	Original Invoice Number
OJ	Amendment Filing
OL	Original Shipper's Bill of Lading Number <i>Number on the Original Bill of Lading assigned by the shipper</i>
OM	Ocean Manifest
ON	Dealer Order Number
OP	Original Purchase Order
OQ	Order Number <i>Qualifies a code that identifies the authorizing documentation for a household goods</i>
OR	Order/Paragraph Number
OS	Outbound-from Party
OT	Sales Allowance Number
OW	Service Order Number <i>Number assigned when a customer orders service and equipment and which appears on bill</i>
OZ	Product Number
P1	Previous Contract Number
P2	Previous Drug Enforcement Administration Number. SEE CODE SOURCE 73
P3	Previous customer reference number.
P4	Project Code
P5	Position Code
P6	Pipeline Number
P7	Product Line Number
P8	Pickup Reference Number
P9	Page Number
PA	Price Area Number
PB	Payer's Financial Institution Account Number for Check, Draft, or Wire Payments. Originating Company Account Number for ACH Transfers.
PC	Production Code
PD	Promotion/Deal Number
PE	Plant Number
PF	Prime Contractor Contract Number
PG	Product Group
PH	Priority Rating
PI	Price List Change or Issue Number
PJ	Packer Number
PK	Packing List Number
PL	Price List Number
PM	Part Number

CODE DEFINITION & EXPLANATION

PN Permit Number
PO Purchase Order Number
PP Purchase Order Revision Number
PQ Payee Identification
PR Price Quote Number
PS Purchase Order Number Suffix
PT Purchase Option Agreement
PU Previous Bill of Lading Number
PV Product change information number
PW Prior purchase order number
PX Previous Invoice Number
PY Payee's Financial Institution Account Number for Check, Draft or Wire Payments. Receiving Company Account Number for ACH Transfer.
PZ Product Change Notice Number
Q1 Quote Number
Q2 Starting Package Number
The beginning package number in a shipment or container of numbered packages
Q3 Ending Package Number
The ending package number in a shipment or container of numbered packages
Q4 Prior Identifier Number
Q5 Property Control Number
Q6 Recall Number
Q7 Receiver Claim Number
Q8 Registration Number
Code describing which type of registration is being submitted
Q9 Repair Order Number
Repairing outlet's unique order number
QA Press Identifier
QB Press Form Identifier
QC Product Specification Document Number
Model designation of replacement component
QD Replacement Drug Enforcement Administration Number
SEE CODE SOURCE 73
QE Replacement Customer Reference Number
QF Quality Disposition Area Identifier
QG Replacement Assembly Model Number
QH Replacement Assembly Serial Number
Serial number of replacement component
QI Quality Inspection Area Identifier
QJ Return Material Authorization Number
QK Sales Program Number
Identifies specific sales program/promotion
QL Service Authorization Number
Identifies pre-authorized submittal or payment of a claim
QM Quality Review Material Crib Identifier
QN Stop Sequence Number
QO Service Estimate Number
Code that identifies special handling requirements

CODE DEFINITION & EXPLANATION

QP Substitute Part Number
QQ Unit Number
QR Quality Report Number
QS Warranty Coverage Code
Number of code identifying length and terms of the coverage
QT Warranty Registration Number
QU Change Verification Procedure Code
Description of procedures required to verify that the change made to the product accomplishes the desired effect
QV Major System Affected Code
QW New Part Number
QX Old Part Number
QY Service Performed Code
Number indicating the type of service performed to repair a product
QZ Reference Drawing Number
R1 Current Revision Number
R2 Canceled Revision Number
R3 Correction Number
R4 Tariff Section Number
R5 Tariff Page Number
R6 Tariff Rule Number

RF Export Reference Number
RG Route Order Number-Domestic
RH Route Order Number-Export
RI Release invoice number for prior bill and hold.
RJ Route Order Number-Emergency
RK Rack Type Number
RL Reserve Assembly Line Feed Location
RM Raw material supplier Dun & Bradstreet number
RN Run Number
RO Repetitive Booking Number
SEE CODE SOURCE 188
RP Repetitive Pattern Code
RQ Purchase Requisition No.
RR Payer's Financial Institution Transit Routing Number for Check, Draft or Wire Payments. Originating Depository Financial Institution Routing Number for ACH Transfers.
RS Returnable Container Serial Number

CODE DEFINITION & EXPLANATION

RT Payee's Financial Institution Transit Routing Number for Check, Draft or Wire Payments. Receiving Depository Financial Institution Transit Routing Number for ACH Transfers.

RU Route Number

RV Receiving Number

RW Repetitive Waybill Code (Origin Carrier, Standard Point Location Code, Repetitive Waybill Code Number)

RX Resubmit number

RY Rebate Number

RZ Returned Goods Authorization Number

S0 Special Approval

S1 Engineering Specification Number

S3 Specification Number

S4 Shippers Bond Number
Number differentiating between shipper's bond movements by intermodal shippers and ocean carriers and in-bond movements which default to the carrier's bond

S5 Routing Instruction Number
Directions for Claim Routing

S6 Stock Number

S7 Stack Train Identification

S8 Seal Off Number

S9 Seal On Number

SA Salesperson

SB Sales Region Number

SC Shipper Car Order Number

SD Subday Number
A sequential number denoting the order of meter readings taken during a single day, assigned by the party responsible for the measurement of gas at the meter

SE Serial Number

SF Ship From

SG Savings

SH Sender Defined Clause

SI Shipper's Identifying Number for Shipment (SID)
A unique number (to the shipper) assigned by the shipper to identify the shipment

TO Terminal Operator Number

TP Test Specification Number

TQ Tracer Action Request Number

TR Government Transportation Request

TS Tariff Number

TT Terminal Code
A code assigned by a transportation carrier that identifies a freight terminal

TU Trial Location Code
To identify one of a group of possible sites within a system or set of systems where an engineering change is to modelled and tested before proceeding to install the change on all possible sites; the change may have been specified by a service bulletin

TV Line of Business
Indicates the nature of policy coverage; examples of line of business include fire, homeowners, flood and earthquake
SEE CODE SOURCE 244

TW Tax Worksheet

TX Tax Exempt Number

CODE DEFINITION & EXPLANATION

TY	Policy Type <i>The type of policy being billed; examples of policy type include Package Policy and Forced Placed</i> SEE CODE SOURCE 246
TZ	Total Cycle Number <i>A complete set of events occurring in the same sequence</i>
U0	Consolidator's Receipt Number
U1	Regional Account Number <i>A number provided by the customer that is used to identify the customer across states or regional areas</i>
U2	Term <i>Indicates the college or university period for which permission is requested</i>
U3	Unique Supplier Identification Number (USIN)
U4	Unpaid Installment Reference Number
U7	Prior Mortgagee Account Number
U8	Mortgage Backed Security (MBS) Loan Number
U9	Mortgage Backed Security (MBS) Pool Number
UA	Mortgage Number <i>The number that identifies the type of mortgage loan</i>
UB	Unacceptable Source Purchaser ID
UC	Mortgage Insurance Indicator Number <i>Specifies the type of insurance coverage for the mortgage loan</i>
UD	Unacceptable Source DUNS Number
UE	Secondary Coverage Certificate Number
UF	Mortgage Insurance Company Number
UG	U.S. Government Transportation Control Number
UH	Removal Number <i>Identifies the reason a mortgage is removed from default status reporting</i>
UM	Quarter Quarter Section Number <i>An identifier of 1/16 portion of a section</i>
UN	United Nations Hazardous Classification Number
UO	Quarter Quarter Spot Number <i>An identifier of 1/64 portion of a section</i>
UP	Upstream Shipper Contract Number
UQ	Section Number <i>The number corresponding to a section within a township and range</i>
UR	Unit Relief Number <i>A supplemental contract number applying to per diem relief on equipment</i>
US	Unacceptable Source Supplier ID
UT	Unit Train
UU	Township Number
UV	Range Number <i>An identifier corresponding to a range within a township</i>
UY	Federal National Mortgage Association (Fannie Mae) Loan Number
V0	Version
V1	Volume Purchase Agreement Number
V3	Voyage Number

CODE DEFINITION & EXPLANATION

V8	Institution Number
V9	Subservicer
VA	Vessel Agent Number
VB	Department of Veterans Affairs Acquisition Regulations (VAAR) SEE CODE SOURCE 80
VC	Vendor Contract Number
VD	Volume Number
VE	Vendor Abbreviation Code
VF	Vendor Change Identification Code <i>Vendor's product change notice number</i>
VG	Vendor Change Procedure Code <i>Vendor's name and document number for the affected change procedure</i>
VI	Pool Number
VJ	Investor Note Holder Identification
VK	Institution Note Holder Identification
VL	Third Party Note Holder Identification
VN	Vendor Order Number
VO	Institution Loan Number
VP	Vendor Product Number <i>A unique number assigned by a vendor or manufacturer to identify its products</i>
VQ	Related Contract Line Item Number
VR	Vendor ID Number
VS	Vendor Order Number Suffix
VT	Motor Vehicle ID Number
VU	Preparer's Verification Number
VV	Voucher
VW	Standard
VX	Value-Added Tax Registration Number (Europe)
VZ	Sponsor's Reference Number <i>A unique number that references a reported test to a particular sponsor</i>
W1	Defense Turn-In Document Number <i>Identifies material submitted for reutilization and marketing</i>
W2	Weapon System Number <i>Identifies a weapon system</i>
W3	Manufacturing Directive Number <i>Identifies the Management Control Activity and contract associated with government furnished material transactions</i>
W4	Procurement Request Number <i>Identifies a transaction resulting in a contract established to provide material</i>
W5	Inspector Identification Number <i>Identifies the manufacturer's material inspector</i>
W6	Federal Supply Schedule Number <i>Identifies an item with a two-digit group number, two-digit part number, and one-character section letter</i>
W7	Commercial and Government Entity (CAGE) Code <i>Code that identifies a commercial contractor authorized to do business with the U.S. Government</i>

CODE DEFINITION & EXPLANATION

W8 Suffix
Differentiates between partial actions taken on the original transaction

W9 Special Packaging Instruction Number
Number assigned to distinguish between special packaging instruction specifications

WC Contract Option Number
The number of contract option years remaining on the current contract

WD Review Period Number
An indicator representing the period of time before which an action will occur

WE Well Classification Code
SEE CODE SOURCE 401

X4 Clinical Laboratory Improvement Amendment Number

X5 State Industrial Accident Provider Number

X6 Original Voucher Number

X7 Batch Sequence Number

X8 Secondary Suffix Code Indicator
Secondary indicator to differentiate between partial actions taken on the original transaction, e.g., identify a parent-child relationship

X9 Internal Control Number
Number assigned by the managing office to provide internal processing information

XA Substitute National Stock Number
A national stock number that can take the place of another

XB Substitute Manufacturer's Part Number
A manufacturer's part number that can take the place of another

XC Cargo Control Number

CODE DEFINITION & EXPLANATION

XD Subsistence Identification Number
Item identifier is a brand-name resale subsistence item

XE Transportation Priority Number
Number indicating the level of government priority associated with the transportation of a shipment

XF Government Bill of Lading Office Code

XG Airline Ticket Number

XH Contract Auditor ID Number

XI Federal Home Loan Mortgage Corporation Loan Number
Assigned by the Federal Home Loan Mortgage Corporation (FHLMC) to each FHLMC loan

XJ Federal Home Loan Mortgage Corporation Default/Foreclosure Specialist Number
Assigned by the Federal Home Loan Mortgage Corporation (FHLMC) to a FHLMC agent processing the default and foreclosure reports

XK Mortgagee Loan Number

XL Insured's Loan Number

XM Issuer Number

XN Title XIX Identifier Number
Identifies the state in which the individual is eligible for Medicaid.

CODE DEFINITION & EXPLANATION

YR	Operator Lease Number
YS	Yard Position <i>Location where equipment has been placed in a yard, parking lot, etc.; may be stall number, row/slot, etc.; defined by sender</i>
YT	Reporter Identification
YU	Payor Identification
YV	Participating Area
Z1	Safety of Ship Certificate <i>Number of a document guaranteeing the safety of a ship</i>
Z2	Safety of Radio Certificate <i>Number of a document guaranteeing the safety of radio equipment on board a vessel</i>
Z3	Safety Equipment Certificate <i>Number of a document specifying and guaranteeing the safety equipment on board a vessel</i>
Z4	Civil Liabilities of Oil Certificate <i>Number of a document certifying the civil liabilities of oil on board a vessel</i>
Z5	Load Line Certificate <i>Number of a document specifying the depth to which a vessel should sink when properly loaded</i>
Z6	Derat Certificate <i>Number of a document guaranteeing that a vessel has been freed of rats</i>
Z7	Maritime Declaration of Health <i>Number of a document declaring the health conditions of a ship</i>
Z8	Federal Housing Administration Case Number <i>The unique loan number assigned by the Federal Housing Administration (FHA) to each FHA loan</i>
Z9	Veterans Affairs Case Number <i>The unique loan number assigned by the Veterans Affairs (VA) to each VA loan</i>
ZA	Supplier
ZB	Ultimate Consignee
ZC	Connecting Carrier
ZE	Coal Authority Number
ZF	Contractor Establishment Code (OEC) <i>Government identifier to designate a contractor; it is nine characters, eight numeric and a final alpha</i> SEE CODE SOURCE 269
ZG	Sales Representative Order Number
ZH	Carrier Assigned Reference Number
ZI	Reference Version Number
ZJ	Universal Railroad Revenue Waybill Identified Number (URRWIN)
ZK	Duplicate Waybill in Route
ZL	Duplicate Waybill Not in Route
ZM	Manufacturer Number <i>Number that identifies a manufacturer, typically a Commercial and Government Entity (CAGE) code, and contributes to the uniqueness of a product identification</i>
ZN	Agency Case Number
ZO	Makegood Commercial Line Number

CODE DEFINITION & EXPLANATION

ZP	Spouse Tie <i>A reference number used to relate the assets and or liabilities of two married residential loan applicants to each other</i>
ZQ	Non-Spouse Tie <i>A reference number used to relate the assets and or liabilities of two unmarried residential loan applicants to each other</i>
ZR	Supplier (Replacement) <i>Number that identifies a replacement supplier typically a Commercial and Government Entity (CAGE) code, and contributes to the uniqueness of a product identification from a replacement supply source</i>
ZS	Software Application Number
ZZ	Mutually Defined

129 Referenced Pattern Identifier

TYPE=AN MIN=1 MAX=13

Identification of a repetitive pattern that is to be used as a basis for creating a shipment record or a new pattern; or identification of a pattern requiring change or deletion.

B2 BNX

TRANSACTION SETS USED IN:

204 304 404 417 426 858

132 Release Code

TYPE=ID MIN=1 MAX=1

Code signifying whether or not the shipment information transaction set includes instructions for pick-up and movement of the shipment. (This code provides a means for the shipper to transmit billing data along with the movement instructions, transmit billing data ahead of the movement instructions, or follow movement instructions with complete billing data at a later date.)

SEGMENTS USED IN (AS SIMPLE):

M3

TRANSACTION SETS USED IN:

404 858

CODE DEFINITION & EXPLANATION

B	Not Released - Billing Data Only
H	Hold previously released shipment.
R	Released with Billing Data
S	Scheduled future release.
T	Released with shipment information/billing data.
U	Unscheduled release.

133 Routing Sequence CodeTYPE=ID_{MIN=1}MAX=2

Code describing the relationship of a carrier to a specific shipment movement.

SEGMENTS USED IN (AS SIMPLE):

E5 R2 R3 R2A T3 TD5

CODE DEFINITION & EXPLANATION

11	Rule 11 Shipment
BP	Paid by Buyer <i>The buyer agrees to the transportation payment term requiring the buyer to pay transportation charges to a specified location (origin or destination location)</i>
CA	Advance Collect
CC	Collect
CD	Collect on Delivery
CF	Collect, Freight Credited Back to Customer
DE	Per Contract <i>Destination with exceptions as agreed between buyer and seller</i>
DF	Defined by Buyer and Seller
FO	FOB Port of Call
HP	Half Prepaid
MX	Mixed
NC	Service Freight, No Charge
NR	Non Revenue
PA	Advance Prepaid
PB	Customer Pick-up/Backhaul

CODE DEFINITION & EXPLANATION

PC	Prepaid but Charged to Customer
PD	Prepaid by Processor <i>Identifies the processor as the party responsible for transportation charges for the shipment</i>
PE	Prepaid and Summary Bill
PL	Prepaid Local, Collect Outstate
PO	Prepaid Only
PP	Prepaid (by Seller)
PS	Paid by Seller <i>The seller agrees to the transportation payment term requiring the seller to pay transportation charges to a specified location (origin or destination location)</i>
PU	Pickup
RC	Return Container Freight Paid by Customer
RF	Return Container Freight Free
RS	Return Container Freight Paid by Supplier
TP	Third Party Pay
WC	Weight Condition

147 Shipment QualifierTYPE=**ID**MIN=1MAX=1

Code defining relationship of this shipment with respect to other shipments given to the carrier at the same time.

CODE DEFINITION & EXPLANATION

1	Master Bill for Empty Non-Revenue Equipment
2	Sea Waybill <i>A non-negotiable transport document issued by an ocean carrier covering cargo shipped on a vessel owned or chartered by that carrier</i>
3	Intermodal/Combined Transport Bill of Lading
4	Household Goods Bill of Lading <i>A transport document issued by an individual or business entity for the movement of household goods</i>
5	Load Handled as Empty <i>Rail cars handled under Railroad Accounting Rule 107</i>
6	First Bill for Split Shipment
7	Subordinate Bill for Split Shipment
A	Sub for Assembly
B	Bill of Lading for Individual Shipment
C	Consolidated Shipment
D	Sub for Distribution
E	Empty Equipment Billing (Non-Revenue)
F	Stop-off Shipment <i>Shipment with sub-shipments to be loaded or unloaded enroute to final destination</i>

CODE DEFINITION & EXPLANATION

G	Switch Waybill
H	Company Business (Non-revenue)
I	Intermodal
J	Charity Load (Non-revenue)
K	Free Astray (Non-revenue)
L	Single Load (Blind Memo) Memo--Incomplete Documentation
M	Master Bill of Lading for Assembly, Distribution and Volume Shipment <i>A bill of lading with multiple delivery locations</i>
N	Multiple Loads (Blind Memo) Memo--Incomplete Documentation
O	Memo Bill (Not Used for Rail)
P	PTF Bill of Lading
Q	Continuous Movement <i>Two or more loads tendered to a carrier at the same time that are to be performed in conjunction with one another using the same carrier equipment</i>
R	Supplemental Billing
S	Submaster Bill of Lading for Volume Shipment <i>A bill of lading for a full truckload shipment</i>
T	Freight Claim Rule 93-B (Free Return)
U	Roundtrip Movement <i>A special type of continuous movement in which, at the shipper's request, the carrier equipment loads at point A, delivers at point B, then immediately re-loads at point B, and delivers the second load back to point A</i>
V	Void Bill
W	Revenue Empty
X	Empty Switch Waybill
Y	Advance/Prepaid Only Waybill
Z	Commercial Zone Pick-up

148 Lading ValueTYPE=**R**MIN=2MAX=9

Value of shipment for export, expressed in the standard monetary denomination for the currency specified.

LUB	Lubricant Charge
LUP	Locomotive Under Own Power
LUS	Leaking underground storage tax (LUST)
LYC	Layover Service Charge
MAA	Metals Surcharge
MAB	Mileage or Travel
MAC	Mileage Fee (For Repair and Return)
MAD	Minimum Order/Minimum Billing Charge
MAE	Monthly Rental
MAR	Marriage Rule
MCC	Machining Charge <i>Covers tasks procured in addition to outside production requirements set forth in a purchase requisition</i>
MDG	Molding <i>Shaped trim that borders an object</i>
MDM	Mount/Demount
MEA	Meals or Lodging Charge

CODE DEFINITION & EXPLANATION

MEN	Escort Service with Overnight Subsistence <i>Motor charge when movement hour restrictions require an escort vehicle driver or flagmen to stay overnight</i>
MES	Escort Service
MET	Escort Service (Telephone) <i>Motor charge when shipper/consignee requests that vehicles be equipped with mobile telephones or two-way radios</i>
MFC	Manifest Charge
MFG	Manufacturing
MGA	Message Rate Adjustment <i>Adjustment to account for a message billing error</i>
MGC	Message Charge <i>Charge for messages incurred thru the use of a service</i>
MIC	Minimum Charge
MIL	Special Mileage Movements
MIN	Minimum Guarantee
MKU	Markup Charge <i>Amount of price increase due to various circumstances</i>
MLB	Minimum Bill of Lading Charge
MLS	Meals <i>Charge incurred for meals</i>
MMC	Minimum/Maximum Charge
MMF	Mill Freight
MMS	Market Development Funds
MMT	Metropolitan Transit Tax
MNC	Notify Consignee
MNS	Motor Surveillance Service <i>Motor security service which provides shippers with visibility of their shipments from origin to destination</i>
MPC	Miscellaneous Parts Charge
MRK	Marking or Tagging Charge
MRP	Medical Report Charge <i>Report of an individual's medical condition</i>
MSC	Other Accessorial Service Charge
MSG	Miscellaneous Charge
MTR	Meter Charge
MUS	Municipal Surcharge <i>Surcharge assessed to recover additional expense related to local utility gross revenue</i>
MVR	Motor Vehicle Report (MVR) Charge <i>Report of a person's driving history</i>
MVS	Special Motor Surveillance Charge <i>Motor security service which provides shipper with extraordinary visibility of their shipments in transit</i>
MVT	Venting Instructions
NAA	Non Generated Freight
NAB	New Store Allowance
NAL	Nozzle Charge
NCH	Order Notify Charge
NDS	Non-document Surcharge <i>Charge for additional clearance processing of non-document freight</i>

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
NFY	Carrier Notification Charge	PDS	Pickup and Delivery from Storage in Transit <i>The additional service charge or order for a transportation carrier to pickup a household goods shipment at, or deliver to, a temporary storage facility</i>
NHB	N.H.D. Wharfage	PDY	Pickup and Delivery Beyond Service Area Charge
NSD	New Store Discount	PEC	Pallet Exchange Charge
NWD	New Warehouse Discount	PEN	Penalty Charge
NYD	New York Delivery Charge	PER	Permit Charge
NYP	New York Pick-up Charge	PFA	Power Factor Adjustment
OAA	O.T.O. Charge	PHC	Photocopy <i>Copy of any document produced by a copy machine</i>
OAB	Overrun Charge	PHG	Photographs <i>Photo pictures taken by a camera</i>
OAC	Overtime Loading	PIR	Pier Pick-up and/or Delivery
OCH	Ocean Charges -- Hazardous	PLC	Insurance Placement Cost Charge
ODF	Collect on Delivery Deletion Charge	PLT	Pallets/Skids/Platforms <i>Provides for the exclusion of pallet weight from shipment weight not to exceed a stated percentage of total shipment weight</i>
OFR	Official Report Charge <i>Reports written by an official organization (police, fire, etc.)</i>	PMC	Prior Month Credit <i>Adjustment to WATS billing for the amount of WATS charges billed in the prior period. This is issued when delayed usage has been received and the previous months billing has been recalculated using the complete usage information</i>
OFU	Fumigation	PMR	Paint and Materials <i>Paint and the items necessary to perform repair work</i>
ONC	On Carriage	PMS	Pickup of Shipments Requiring Same Day Delivery Service Charge
OOC	Option Charge (Color Fabric Office Furniture)	PMT	Pickup of Shipments Requiring Same Day Delivery Service and/or Delivery at a Specified Time Charge
OOF	Order-Flat	PMU	Normal Pump Charge
OPC	Optional Charge	PMX	Special Pump Charge
ORC	Operator Credit <i>Adjustment billed amount for operator issued credits</i>	PNA	Prior Period Net Adjustment <i>Adjusting entry that corrects a previously invoiced amount</i>
ORM	Out of Route Miles	POC	Piano/Organ Carry <i>The additional service charge or order for a transportation carrier to provide special handling and transportation for a piano or organ as part of a household goods shipment</i>
OSC	Outside Charge	POD	Proof of Delivery
OSO	Optional Software Support for Operational Support Systems	POL	Police Report Charge <i>Document produced by the police department describing a particular incident</i>
OSS	Optional Software Support for Switching Systems	POS	Positioning at Origin
OUT	Out of Zone Pick-up or Delivery	PPC	Per Pound Charge
OVR	Over Dimension	PPD	Pickup and Delivery Service for Perishables Charge
PAA	Percent of Product	PPH	Per Item Charge
PAC	Pump Air Charge	PPI	Pick/Up Allowance
PAD	Premium Charge	PPM	Precious Metal Content
PAE	Premium Transportation	PPN	Pallet Charge
PAF	Price Deviation	PPO	Per Order Charge
PAG	Professional Fees	PPR	Performance Award
PAH	Promotional Allowance	PPS	Placement and/or Removal Charge
PAI	Promotional Discount	PPT	Parish/County Sales Tax (only)
PAJ	Pump Charge		
PAK	Preparation and Delivery		
PAL	Parts Adjustment Allowance		
PAR	Parts Charge		
PAT	Priced Parts Charge		
PAV	Pickup of Shipments on Saturday, Sunday, and/or Holidays Requiring Absolute Next Day Delivery Charge		
PBA	Prior billing amount		
PBE	Permits Bonds Escort Attendant		
PBL	Pier Charges Other Than Wharfage		
PCH	Protective Service Charge		
PCT	City Pick-up		
PDB	Prior Delivery Of Bill Charge		
PDC	Preloading Charge		

CODE DEFINITION & EXPLANATION

PPU	Prepaid Usage Allowance <i>Adjustment to billed amount of Optional Calling Plan charges to credit account for Prepaid usage. This credit will not create a negative billed amount</i>
PRB	Prior Balance
PRC	Pre-carriage
PRE	Pre-carriage Excess
PRK	Parking <i>Charge incurred for parking a vehicle</i>
PRL	Prelodge Charge
PRM	Premise Use
PRP	Prior Period Rebook <i>Corrected invoice amount that should have been invoiced originally</i>
PRV	Prior Period Reversal <i>Reversal of a previously invoiced amount that was billed incorrectly</i>
PSC	Protective Service - Cold
PSD	Preparation of Special Documents
PSG	Protective Service Security with Armed Guards <i>Motor charge for Protective Security Service when shipper requires one or both cleared drivers be armed</i>
PSH	Protective Service - Heat
PSS	Protective Service Security <i>Motor security service provided by cleared carrier for movement of Department of Defense secret shipments</i>
PST	Postage
PTC	Tobacco Products Report Charge
PTS	Protective Tarp for Security Purposes <i>Motor charge when shipments containing classified material are tarped by the carrier for security purposes</i>
PUC	Pick-up Charge
PUD	Pick-up and Delivery
PUK	Pack and Unpack <i>The additional service charge or order for a transportation carrier to provide packing services at the origin location and unpacking services at destination site, including labor, packing material, and containers, as part of a household goods shipment</i>
PWH	Pier Charges - Wharfage
PWT	Pallet Allowance
PYS	Priority Service Charge
QAA	Quantity Surcharge
QQD	Quantity Discount
RAA	Rebate
RAB	Reclamation, Federal
RAC	Reclamation, State
RAD	Recovery Allowance
RAE	Redistribution Allowance
RAF	Rental Deduction
RAG	Repack Charge
RAH	Retainer
RAI	Resellers Discount
RAJ	Restocking Charge

CODE DEFINITION & EXPLANATION

RAK	Royalties
RAL	Roll Rebate
RAM	Ramping
RCA	No Return Credit Allowance
RCB	Repair at buyers expense charge
RCC	Reconsignment Charge
RCD	Reconsign Consignee Charge
RCE	Repair at customer expense charge
RCG	Repair at government expense charge
RCL	Redelivery
RCP	Recoopering (at Owner's or Shipper's Expense)
RCS	Reconnect charge
RDC	Reconsign Delivery Charge
RDF	Research & development fee
REC	Return Cargo Charge
REE	Regulatory Fee <i>Surcharge levied to fund a state regulatory commission</i>
REF	Refrigeration
REG	Regulatory tax
REL	Requested Labor Charge
REP	Residential Pick-up
REQ	Request Via Canada
RES	Residential Delivery
RET	Returned Load
RFD	Refund <i>Amount of refund awarded to the customer due to a regulatory committee action</i>
RGA	Regain Allowance
RGC	Regain Charge
RHM	Recurring Hardware Maintenance Charge <i>A periodic fee charged by a manufacturer to pay for maintenance on computer hardware as covered in a maintenance contract</i>
RID	Riding Attendant Charge
RIE	Released Value Charge in Excess of Carrier Maximum Liability Charge
RLA	Retail Loss Allowance <i>A standard discount to compensate a retail organization for the cost of lost or damaged items during operations</i>
RLC	Rents and Leases
RLQ	Relinquishment Charge
RLS	Relocation of Vehicle <i>Motor charge when carrier is requested to move a vehicle from one platform doorway or shipping room to another</i>
RMB	Rocky Mountain Bureau 583 Item 1100 Arbitrary Charge
RMD	Refrigeration/Mechanical Detention
RMS	Rail Surveillance <i>Rail security service performed by the rail carriers in the movement of Government unclassified sensitive cargo</i>

CODE DEFINITION & EXPLANATION

ROC	Roll Out Adjustment
RPC	Reduction Prepalletized Cargo
RRC	Reel Cable
RRD	Reel Deposit
RRF	Refurbishing Charge
RRN	Rental Charge
RRP	Repair Charge
RRR	Regulatory required refund
RSM	Recurring Software Maintenance Charge <i>A periodic fee charged by a manufacturer to pay for maintenance on computer software as covered in a maintenance contract</i>
RSP	Reshipment <i>The additional service charge or order for a transportation carrier to prepare a household goods shipment for onward movement when the shipment is diverted to a new destination location</i>
RSS	Restricted Speeds <i>Charge when the unusual nature of the shipment requires the carrier to operate at speeds below its normal limits</i>
RSV	Reservations <i>Shipper may reserve space in a vehicle for second and third Priviso commodities moving via Household Goods motor carriers only</i>
RTC	Rate Code
SAA	Subject to Cooperative Advertising Allowance
SAB	Shipping and Handling
SAC	Service Charge (with Cash Discount)
SAD	Scrap Allowance
SAE	Shrink-Wrap Charge
SAF	Special Credit
SAG	State Motor Fuel
SAH	Stenciling Charge
SAI	Super Fund Excise Tax
SAJ	Surcharge (Dollar Value)
SAK	Surcharge (Percentage)
SAM	Stopcharge
SAN	State Sales Charge
SAP	Service Assistance Program Surcharge
SAT	Saturday Pick-up or Delivery Charge
SBC	Standby Charge
SBL	Sublet <i>To contract another individual or organization to perform a duty or to fulfill an obligation that was not theirs originally</i>
SCC	Special Seal Charge <i>The additional service charge or order for a carrier to use specially constructed containers for oversized or fragile items as part of a household goods shipment</i>
SCD	Special Containers <i>The additional service charge or order for a transportation carrier to use specially constructed containers for oversized or fragile items as part of a household goods shipment</i>

CODE DEFINITION & EXPLANATION

SCG	Small Order Charge
SCL	Scale Charge
SCU	Scale Charge Unloading
SDC	Special Detention Charge
SDL	Split Delivery
SDS	Special Dromedary Service <i>Demountable shipping container (special sizes) than can be fastened to the chassis of a truck, tractor, or flat bed</i>
SEC	Special Equipment Charge
SEE	Stairs, Elevator, Excess Carry <i>The additional service charge or order for a transportation carrier to use stairs, elevators, or long carry as part of the origin or destination services on a household goods shipment</i>
SEG	Segregating (Sorting)
SEL	Self Unloader
SEQ	Ship Exact Quantity Charge
SER	Service Charge
SEV	Security Escort Vehicle Service <i>Motor security service where carrier provides an escort vehicle to maintain surveillance of the cargo vehicle</i>
SFC	Stuffing Charge
SFT	Special Train Movement
SGL	Single Pick-up
SHL	Shipper Load
SHS	State Hazardous Substance Tax <i>A tax that is paid by the first party to own a hazardous substance within the state</i>
SKT	Skirting and Unskirting <i>The additional service charge or order for a transportation carrier to remove skirting from the mobile home prior to movement and reinstalling the skirting at destination after the transportation from one location to another has been performed</i>
SLC	Street lamps charge
SLP	Slip Sheet Charge
SMS	State/Metropolitan Transit Authority Surcharge <i>Surcharge to offset the cost of mass commuter transportation</i>
SNS	Satellite Surveillance Service <i>Motor security service which provides satellite tracking and in transit status of a shipment 24 hours a day</i>
SNT	Shipment from Non-temp Storage <i>The additional service charge or order for a transportation carrier to perform pickup and inspection of household goods from a long-term storage facility</i>
SOC	Stop-off Charge
SOP	Stop-off at Pier Charge
SPA	Special Allowance
SPB	Special Buy
SPC	Special Permits
SPD	Spreader Charge
SPL	Spool Charge

CODE DEFINITION & EXPLANATION

SPP	Split Pick-Up at Pier Charge
SPS	Special Freight Supplements
SPT	Spotting of Trailer
SPU	Split Pick-up
SRG	Storage
SRS	Surveying Routes <i>Charge when, because of the unusual size or weight of the shipment, a survey of the route is required for its safety</i>
SSA	Salvage
SSB	Super Bag Charge
SSC	Stripping, Sorting, and Consolidation
SSF	Single Shipment Fee
SSL	Select Charge
SSO	Pole, Wood-service Charge
SSP	Shipside Pickup
SSS	Software Support Service
SST	Sales Tax (State and Local)
SSX	Sales and Use Tax
STA	Conductivity/Anti-static Additive
STC	State Surcharge <i>Surcharge to provide funds to the state, (specific use of funds not available to TBWG at this time)</i>
STF	Container Stuffing
STL	Standard Labor Charge
STM	Steaming Charge
STP	Stopping in Transit
STR	Storage in Transit
STW	Special tooling rework charge
SUC	Special Use
SUF	Sufferance Warehouse Charge (Export or Import)
SUP	Supervisor Charge
SUR	Surcharge
SVA	Single Invoice Allowance
SVL	Manual Surveillance of Shipment
SVS	Storage of Vehicles <i>Charge for vehicles on a flat car held by carrier, beyond the free time allowed, for any reason not the fault of the carrier</i>
SWC	Switching Charge
TAA	Telephone Charge
TAB	Tank Rental
TAC	Temporary Allowance
TAD	Tax on Transportation
TAE	Temporary Voluntary Allowance
TAF	Terminal Differential
TAG	Testing Charge
TAH	Tool Charge
TAI	Testing Allowance
TAJ	Trade In
TAK	Transportation and Setup
TAL	Truckload Discount

CODE DEFINITION & EXPLANATION

TAX	Tax Charge
TAY	Governmental Tax
TCB	Telegram Chargeback <i>Adjustment for telegram charges billed on behalf of Western Union</i>
TCM	Transportation Charge (Minimum Rate)
TDI	Truck Detention
TER	Terminal Charge
TLC	Trimming Charge
TMS	Multi-Tank Surveillance Service <i>Charge for security service performed by railroads applicable when two M1 tanks are loaded on a rail car</i>
TMV	Tendering of Multiple Vehicles <i>Charge for delay when all vehicles on a flatcar shipment are not delivered to the ramp in a specified period of time</i>
TOA	Total Assessorial Charges
TOC	TOFC Service Charge
TPC	Throughput Container Charge
TPS	Third-Party Service <i>The additional service charge or order for a transportation carrier to obtain independent contractors or companies to perform certain services on a household goods shipment that are not covered under an existing commercial or military tariff and the carrier is entitled to recover expenses or costs</i>
TRA	Travel Charge
TRC	Trailer Rental Charge
TRE	Travel Expense <i>Expense incurred for traveling from one location to another</i>
TRF	Transfer Charge
TRM	Termination <i>The additional service charge or order for a transportation carrier to terminate the movement of a household goods shipment at origin or enroute to a destination location</i>
TRN	Transit
TRP	Process in Transit Privilege
TRS	Transferred Charges <i>Adjustment for delayed charges or payments to an account number no longer in service</i>
TRU	Thruway Charge
TSC	Testing Services Charge
TSS	Tank Surveillance Service <i>Charge for security service performed by railroads applicable when one M1 tank is loaded on a rail car</i>
TST	Track Storage
TTA	Tank Car Allowance
TTB	Transportation-Direct Billing
TTD	Trade Discount
TTL	Local Tax
TTM	Tax on Miscellaneous Charges
TTP	Third Party Allowance
TTR	Throughput Allowance

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
TTS	State Tax	VVL	Vehicle Load Allowance
TTT	Transportation - Third Party Billing	VVP	Vehicle Prep Charge (courtesy delivery)
TTU	Tire Repair and Replace <i>The additional service charge or order for a transportation carrier to repair or replace military member-owned tires and/or tubes used on a mobile home</i>	WAR	War Risk Surcharge
TTV	Transportation - Vendor Provided	WAT	Wide Area Telephone Service (WATS) Usage Credit <i>Credit given to eligible WATS usage having chargeable hours exceeding a minimum quantity</i>
TUR	Turning Charge	WDS	Waterfront Delivery Charge <i>Service charge for waterfront delivery of bulk fuel</i>
TWO	Two Door Pick Up	WEA	Weather Protection
UFC	Under Carriage Furnished By Carrier Charge	WFH	Wharfage & Handling
UND	Unloading	WHC	Warehouse Charge
UNL	Unloading (Labor Charges)	WRC	Load Weighing Charge
UPD	Usage Plan Detail Charge <i>Charges for providing additional usage details associated with a measured usage or Optional Calling Plan</i>	WRE	Empty Weighing Charge
UPK	Unpacking <i>The additional service charge or order for a transportation carrier to perform unpacking services on an unaccompanied baggage shipment that are not covered under the carrier filed transportation rate</i>	WSA	Warehouse Allowance
URC	Unloading/Reloading Charge	WTG	Waiting Time
USF	Use - Special Type Flat Car	WTM	Waiting Time Service Charge
USV	U.S. Vehicles	WTV	Weight Verification Charge
USW	Unabsorbed Switching	WWC	Wharfage Charge
UTL	Utilities Disconnect and Connect <i>The additional service charge or order for a transportation carrier to disconnect utilities attached to a mobile home prior to movement and reconnect utilities at destination after transportation from one location to another has been performed</i>	Z01	Protective Service Rule 25 <i>Charges for protective services not included in freight rate</i>
UTP	Use charge tooling/personnel	Z02	Protective Service Rule 27 <i>Charges for protective service on shipments in articulated cars</i>
UUC	Up Charge	Z03	Protective Service Rule 37 <i>Prepayment of protective service charges</i>
UUM	Unsalable Merchandise Allowance	Z04	Protective Service Rule 75 <i>Change in protective service</i>
UUT	Use Tax	Z05	Protective Service Rule 95 <i>Protective service diversions and reconsignments</i>
VAA	Vendor Freight	Z06	Protective Service Rule 140 <i>Charges for disinfecting refrigeration cars</i>
VAB	Volume Discount	Z07	Protective Service Rule 160 <i>Protective service on mixed shipments</i>
VCR	Voluntary contribution charge	Z08	Protective Service Rule 165 <i>Freight in bunkers of refrigerator cars</i>
VEX	Excess Mileage for Stop Off Delivery of Personal Vehicles Charge	Z09	Protective Service Rule 500 <i>Protective service against cold</i>
VFN	Vehicles Furnished But Not Used <i>Charge when a vehicle is furnished at shippers request and loading of such vehicle is subsequently cancelled by shipper</i>	Z10	Protective Service Rule 510 <i>Shippers protective service</i>
VIS	Vehicles Inoperable <i>Charge when a vehicle is inoperable and is loaded/unloaded in truckaway service by the truckaway driver</i>	Z11	Protective Service Rule 518 <i>Charge on out-of-line or back haul on refrigeration cars</i>
VIT	Virgin Island Transfer Charge	Z12	Protective Service Rule 530 <i>Intermediate Stop or Hold Points and Destination Service at Origin on refrigeration equipment</i>
VOR	Vehicle Ordered but Not Used	Z13	Protective Service Rule 531 <i>Charges for heater on shipments stopped in transit for partial unloading</i>
VSO	Stop Off Delivery of Personal Vehicles Charge	Z14	Protective Service Rule 545 <i>Transportation of heaters with freight</i>
VTS	Vehicles in Truckway <i>Charge when vehicles, before loading in truckaway service, exceed 64" in height measured from ground to top of vehicle</i>	Z15	Protective Service Rule 565 <i>Allowance to shippers for prewarming cars on shipment of potatoes</i>
		Z16	Protective Service Rule 570 <i>Protective service on shipments destined to stations on Alaska Railroad</i>

CODE DEFINITION & EXPLANATION

- Z17** Protective Service Rule 580
Special heater protective service (from Western Territory)
- Z18** Protective Service Rule 581
Special heater protective service (from Eastern and Southern Territories)
- Z19** Protective Service Rule 705
Frozen commodities
- Z20** Protective Service Rule 710
Nonfrozen commodities
- Z21** Protective Service Rule 711
Modified mechanical protective service
- Z22** Protective Service Rule 712
Shipper-specified mechanical service
- Z23** Protective Service Rule 716
Liquid CO2 used in lieu of MPS in shipper-furnished cars
- Z24** Protective Service Rule 720
Mechanical car used for shipments where MPS not ordered
- Z25** Protective Service Rule 725
Detention of refrigeration equipment
- Z26** Protective Service Rule 727
Detention at stations in Canada of refrigeration equipment
- Z27** Protective Service Rule 735
Mechanical car ordered but not used
- Z28** Protective Service Rule 740
Charge for frozen commodities stopped in transit
- Z29** Protective Service Rule 760
Charges for refrigeration equipment on shipments stopped to complete loading or for partial unloading
- Z30** Protective Service Rule 815
Protective service included in freight rate waybilling
- Z31** Quality Differential
General code to be used for all quality associated differentials including: gravity, quality, sulphur, value-bonus, or equal barrel
- Z32** Protective Service Rule 26
Non-application of Mechanical Protective Service Charges
SEE CODE SOURCE 112
- Z33** Protective Service Rule 715
Shipper Furnished, Owned or Leased Cars

CODE DEFINITION & EXPLANATION

- 15** Speed Restricted to 15 Miles per Hour
- 25** Speed Restricted to 25 Miles per Hour
- 35** Speed Restricted to 35 Miles per Hour
- 45** Speed Restricted to 45 Miles per Hour
- AK** Attachment - Auto Keys
- AT** Attachment to Move with Car
- AV** Annual Volume
- AW** Attachments - Advance Only Waybill
- BA** Clearinghouse Balance
- BL** Blowable Load
- BN** If Bad Ordered Notify Shipper
- BW** Bill Shipper for Weigh Charge
- CD** Attachment - Customer's Document
- CE** Cleared for Export
- CH** Carrier
- CI** Customs Inspection
- CM** Attachment - Cotton Manifest
- CO** No Marshalling Required for Hazardous Mats
- CR** Circus Ramp Only (TOFC Van)
- CW** Bill Consignee for Weigh Charges
- CY** Certification that this Shipment is for Recycling as Defined in Applicable Tariffs Containing Such Provisions
- DA** Dangerous
- DE** Demurrage
- DM** Domestic
- DN** Shipper Authorization Required for Diversion or Consignment
- DR** Drop Yard
- DS** Delivery Only on Surrender of Written Order

CODE DEFINITION & EXPLANATION

DT Dead in Tow
DU Do Not Uncouple
DV Equipment
DW Destination Weights Apply
ED Excessive Dimensions
Equipment exceeds operating restrictions but is not considered high/wide in interline movement
EE Electronic Equipment Transfer
EL Environmental Control Limits
The items contained in the shipment are subject to environmental controls whose limits are specified in the contract
EP Expedite
ER Return Empty Via Reverse Route
EV Damages Incurred if Shipment Fails to Meet Vessel Loading
EW Excessive Weight
EX Explosive Flammable Gas
FC Moving Under "For Furtherance Instructions" and May Be Delivered
FD Full Service
FG Flammable Gas
FL Flammable
FP Flammable Poison Gas
FR Fragile - Handle with Care
FS Nontransit Flat Shipment
GI Grain Inspection
HE Head End Car
HH Household
HM Endorsed as Hazardous Material
HO Hold for Orders
HP Heated Prior to Loading
HR Home for Repair
HT Heat
HV High Value Load
HW High Wide Load
IB In-bond
IC Ice
ID Shipment to be Inspected at Destination and Disposition Instructions will be Furnished
IM Interoffice Move
IP Import Shipment
IR Rail Incentive Rate
IS Surveillance Service
JS Junction Settlement Account
LB Land Bridge (Import/Export)
LC Car Trip Leased to Consignee
LD Loading Devices
LF Loaded to Full Visible Capacity
LP Protect Lowest Through Rate
LS Local Service Only
LT Less Than Full Carload

CODE DEFINITION & EXPLANATION

MC Person in Charge of Car
MF Cleared for Border Crossing
MP Multiple Pickup
MR Mechanical Refrigeration
NC Notify Consignee Before Delivery
ND Do Not Divert
NE No Special Entrainment Required
NH Do Not Hump
NP Do Not Pool
NS Notify Shipper Before Reconsignment
NT Do Not Transfer Contents
NW In Case of Fire Do Not Use Water
NX Not for Export
OS Commodity Loaded Less Than or Equal To the Car Ordered
PB Perishable in Box Car
PD Privately Controlled Private Equipment Subject to Demurrage
PG Poisonous Gas
PI Iced Prior to Loading
PS Product Protection Service
PW Attachment - Prepaid Waybill
RA Return Authorization
RB Render Bill for Charges
RC Railroad Controlled Private Equipment Subject to Demurrage
Equipment subject to paragraph #1 of tariff RPS6004 item 765 - allowing private equipment to be subject to demurrage when authorized by equipment owner
RM Radioactive Material
RO Rush Order
RR Rear Rider
Operational restrictions require equipment to be run on the rear of a train only
RS Inspect Hourly if Car Stopped
RT Record for Transit
SB Shipper Load/Carrier Count
SC Shove to Rest and Cover
SD Subject to Special Detention Rules/Charges
SE Attachment - Shipper's Export Document
SF Split Pickup
SH Shiftable Load
SI Ship to Cross Dock or Pool
SK Requires Shelf Couplers
SM Attachment - Shipper's Manifest
SP Attachment - Shipper's Packing Instructions
SR Speed Restricted
ST Stack Train
SW Stretch Wrap
A high-tensile film, stretched and wrapped repeatedly around a unitized load to secure and maintain unit integrity.
TA Cars Temporarily Articulated

CODE DEFINITION & EXPLANATION

TN	Turn Car
TS	Transit Shipment
TT	Team Track Delivery
TV	Time Volume Rates Only
UB	Unload at Bumper (Circus Ramp)
UI	Unitized
UN	Unload as Placarded
UP	Unprotected Perishable
US	Shipper Certifies Gross Weight under 240,000 pounds
VN	Verification Weigh
VT	Ventilation Instructions
WB	Wide-Body Pickup Truck (Applies to Finished Vehicle Loading)
WD	Waived Inspection - Set Direct
WE	Weigh Empty
WH	Attachments - High Wide Notice
WI	Waive Inspection
WM	Manifest Must Accompany Waybill
WO	Weigh to Check for Overload
WW	Waste Water
XP	Export
XT	Cross Town
045	Advanced Fee
520	Oversized Premium
675	Security Signature Service
A1M	Aggregate 1000
A3M	Aggregate 3000
A5M	Aggregate 5000
AAS	Attendants Accompanying <i>Rail service for government or contractor personnel accompanying freight shipments on freight trains</i>
ADL	Advance Loading <i>Service for advanced loading of bulk fuel</i>
AFN	Air Craft Furnished and Not Used
AGG	Aggregate Tender Discount
AGS	Armed Guard Service
AIB	Additional Injection/Blending Service <i>Service for providing additional pipeline injection/blending service</i>
ALT	Use of Alternate Terminal
AMM	A.M. Delivery Requirement
ANC	Anchoring and Unanchoring <i>The additional service charge or order for a transportation carrier to perform unanchoring services on a mobile home at one location and anchoring services at another location after transportation has been performed</i>
APD	Additional Copy of Shipping Papers for Proof of Delivery
APL	Appliance Servicing <i>The additional service charge or order for a transportation carrier to service used household goods appliances by securing the item in such a manner that it withstand handling and transportation</i>

CODE DEFINITION & EXPLANATION

ARC	Air Conditioning Disconnect and Connect <i>The additional service charge or order for a transportation carrier to disconnect an air conditioning unit attached to a mobile home and reconnecting the air conditioner after transportation from one location to another has been performed</i>
ARG	Rail Armed Guard Service
ARR	Air Ride Tractor Service
ART	Air Ride Truck Service
ASY	Assembly Service Requested
AUX	Auxiliary Service <i>The additional service charge or order for a transportation carrier to provide exclusive use of a vehicle as part of the movement of a household goods shipment</i>
BCP	Bypass Consolidation Point
BAK	Bulky Article <i>The additional service charge or order for a transportation carrier to service motorcycles, tractors, riding lawn mowers, privately owned vehicles, and other personal effects of unusual size or nature by securing the item in such a manner that will withstand handling and transportation</i>
BLS	Blind Shipment <i>Shipper's name inserted in place of the manufacturer's name on the shipping papers</i>
BNS	Bolster Load, Do Not Switch
BOX	Boxing Service - Dry Bulk <i>Carrier responsible for transferring product into boxes at the point of delivery</i>
CAR	ROEE Car or Pick-up Truck
CCB	Convert Commercial Bill of Lading (BOL) to Government BOL
CCH	Certification
CCS	Carrier Caboose <i>Service for carrier-furnished caboose</i>
CDD	Corrosion Additive Service
CGC	Carrier Guard Car Service <i>Rail service for each carrier guard car used by attendants accompanying freight shipments</i>
CGR	Return Carrier Guard Car Service <i>Rail service when an unoccupied guard car is returned to a location other than the original shipping point</i>
CHN	Chain and Binders <i>Motor service when more than eight sets are required to secure a shipment to flat bed equipment</i>
CLS	Class Rates Applied
CMD	Comb. Rates over Detroit
CNL	Consolidation and Line Haul
CNS	Consolidation
CON	Contract Rates Apply
COR	Certification That the Newsprint Winding Cores Being Returned Empty Were Received Filled by Rail Freight Service
COU	Consignee Unload
COV	Courier, Overnight

CODE DEFINITION & EXPLANATION

CPC	Copilot Service
CPM	Customs Papers Mailed
CSD	Courier, Same Day
CSP	Government Caboose <i>Service for carrier-furnished caboose for use by government personnel</i>
CTM	Container Mounting <i>Carrier mounts container onto chassis</i>
DBL	Double Wide Separate and Reassemble <i>The additional service charge or order for a transportation carrier to separate each unit of a double-wide mobile home and prepare for movement and reassemble the double-wide mobile home after transportation from one location to another has been performed</i>
DBP	Delivery of Fuel From Barge to Pipeline
DCS	DOD Constant Surveillance Service
DDN	Dual Driver with National Agency Check <i>A type of security service where a carrier must allow the government to perform a National Agency Check (NAC) on all personnel involved in a government shipment</i>
DDP	Dual Driver Protective Service
DDS	Direct Delivery
DEL	Delivery Service
DFS	410 Dromedary <i>Demountable 410 cu. ft. shipping container that can be fastened to the chassis of a truck, tractor, or flat bed</i>
DIS	Distribution Service Requested
DLP	Delivery of Fuel From Rail Tank Car to Pipeline
DLR	Notify Shipper Immediately if Shipment is Delayed en Route
DNF	Do Not Freeze <i>Specifies that the temperature of a shipment must not go below the freezing point during transit</i>
DOC	Documentation - Special <i>Carrier creates special shipper documentation</i>
DPB	Delivery of Fuel From Pipeline to Barge
DPL	Delivery of Fuel From Pipeline to Rail Tank Car
DPT	Delivery of Fuel From Pipeline to Tank Truck or Trailer
DPU	Detention With Power Units (30 minute periods)
DRO	Drop-Off Delivery
DRU	Drumming Service <i>Carrier responsible for transferring product into drums at the point of delivery</i>
DSR	Dromedary Service Requested
DST	Regular Dromedary Service <i>Demountable 155-200 cu. ft. shipping container that can be fastened to the chassis of a truck, tractor, or flat bed</i>
DSV	Door Side Vanning <i>The cargo is to be placed in the container adjacent to the door</i>
DTP	Delivery of Fuel From Tank Truck or Trailer to Pipeline

CODE DEFINITION & EXPLANATION

DTV	Detention (Vehicle) <i>Rail service when rail owned/leased trailers/containers on flat cars are detained for loading/unloading</i>
DWP	Detention With Power Units (60 minute periods)
EAX	Extra Axles <i>The additional service charge or order for a transportation carrier to install and rent an axle with wheels, tires and brakes required for the transportation of a mobile home</i>
ECR	Escort/Courier Service
EDD	Equipment Hose at Destination <i>Service for supplying special hose equipment for dispatching bulk fuel at destination</i>
EDO	Equipment Hose at Origin <i>Service for supplying special hose equipment for dispatching bulk fuel at origin</i>
EED	Exclusive Use <i>Charge when vehicle furnished is devoted exclusively to transportation of a shipment without breaking of seals</i>
ELS	Extra Lights <i>Motor service when a state agency requires extra lights be placed on an overdimensional shipment</i>
EMR	Emergency Service <i>Carrier provides special services in case of emergency</i>
EMT	Empty Movement <i>Motor service when empty movement of equipment is required</i>
END	Endorsement
ERS	Empty Return <i>Motor service when empty equipment is returned from the destination to point of origin</i>
ERT	Satisfactory Service Standards
EXC	Exclusive Use of Vehicle
EXD	Extra Driver
EXO	Export Preparation <i>Carrier must prepare shipment for export</i>
EXP	Expedited Rates Applied
EXQ	Expedited Service <i>Motor service for the immediate dispatch of equipment in continuous line-haul service to meet delivery schedules</i>
EXT	Extra Labor <i>Carrier must supply additional labor</i>
EXU	Exclusive Use of Vehicle Damaged
EXZ	Expand Remove and Install <i>The additional service charge or order for a transportation carrier to prepare, separate, and seal an expando room attached to a mobile home prior to movement and secure the room at destination after the transportation from one location to another has been performed</i>
EZE	Roadway Easy Rates Applied
FAS	Firearms
FCS	Furnishing Chassis <i>Rail service when chassis are furnished by carrier to effect pickup or delivery of containers on flat cars</i>

CODE DEFINITION & EXPLANATION

FFC	Fuel Filters Furnished by Carrier
FFS	Fuel Filters Furnished by Shipper
FPT	For Processing in Transit
FRZ	Accepted by Carrier at Owner's Risk of Freezing
FST	For Storage in Transit
FTR	Filtration Service <i>Service for providing pipeline filtration service</i>
GOC	Government-Owned Containers <i>The additional service charge or order for a transportation carrier to utilize containers provided by the U. S. Government for movement of used personal property belongings to U. S. Government employees</i>
GSP	Government Guard Car <i>Service for carrier-furnished guard car for use by government personnel</i>
GSS	Greater Security Service
HAN	Handling
HEA	Heat in Transit <i>Carrier required to keep product heated during transit</i>
HES	Heat - Special <i>Carrier required to keep product heated during transit in accordance with special instructions provided</i>
HET	Heat With Steam <i>Carrier required to keep product heated with steam during transit</i>
HHB	Handling <i>Motor service to move partial shipments from or to positions immediately adjacent to flat car loading/unloading point</i>
HOR	24 Hour Availability <i>Loading and unloading site is open 24 hours a day</i>
HQT	High Cube Trailer Rates
HRS	Heater or Refrigeration <i>Rail service when shipments of commodities require protective service from the heat or cold</i>
HTI	Hitch Installation
HZC	Hazardous Materials Surcharge
IIH	Icing Inhibitor Service
IMP	Impactographs <i>Motor service when impactographs are provided at the request of the shipper or consignee</i>
INT	Intra-Plant Move <i>Carrier requested to provide equipment and labor for intra-plant work</i>
ITS	Interline Transfer Service
JIT	Just-In-Time (JIT)
JLX	Joint Line Exception
KEG	Certification that the Containers Being Returned Empty Were Received Filled by Rail Freight Service
KMD	Keep Material Dry
LAB	Labor Disturbance <i>Labor disturbance at plant</i>
LAY	Layover <i>Carrier equipment and driver required to layover</i>

CODE DEFINITION & EXPLANATION

LBL	Apply a Uniform Code Council/International Article Numbering Association (UCC/EAN) Serial Shipping Container Label to the Shipping Containers
LBR	Light Bar Service
LBT	Low Boy Trailer/Flat Bed
LHS	Linehaul Service <i>The additional service charge or order for a transportation carrier to provide special linehaul services; i.e. to or from a temporary storage site, for used household goods not included in the normal transportation from origin to destination locations</i>
LTT	Less Than Truckload
LYC	Layover Service
MEN	Escort Service with Overnight Subsistence <i>Motor service when movement hour restrictions require an escort vehicle driver or flagmen to stay overnight</i>
MES	Escort
MET	Escort Services (Telephone) <i>Motor service when shipper/consignee requests that vehicles be equipped with mobile telephones or two-way radios</i>
MEX	Exclusive Use
MIN	Insulated
MOT	Other
MRF	Refrigerated
MSS	Motor Surveillance Service
MTE	Military Traffic Expediting Service
MVS	Special Motor Surveillance <i>Motor security service which provides shipper with extraordinary visibility of their shipments in transit</i>
NPR	No Placards Required
NSV	Nose Side Vanning <i>The cargo is to be placed in the container at the end furthest from the door</i>
OAH	Stow Away from Heat <i>The container is to be stowed away from any source of heat</i>
OBL	Block Stowage
OCA	Cargo Aboard
OCL	Carrier Load and Consignee Unload
OCS	Completing Shipment
OCV	Delivery Verification Not Required
ODI	Stow with Doors Facing Inward <i>The container is to be stowed with the doors facing towards the midline of the vessel</i>
OEH	Exempt Commodity
OFH	In Front of House Stowage <i>The container is to be stowed on deck forward of the superstructure of the vessel</i>
OFU	Fumigation <i>The additional service charge or order for a transportation carrier to fumigate a household goods shipment that is insect infested</i>
OHC	Harmless

CODE DEFINITION & EXPLANATION

OIL	Oil Field Service <i>Special services required to deliver freight at oil field site</i>
ONC	Use No Hooks
ONS	Not Restricted Cargo
OOB	Cargo on Board Certification Required
OOD	On Deck Stowage
OOL	Carrier Load and Carrier Unload
OPR	Perishable
OPT	Partial Shipment
OSB	Stow Below Deck
OST	Stow Between Decks
OTC	Temperature Control
OTD	Time of Delivery and Signature Required
OTH	On Top In-hatch Stowage <i>The container is to be stowed as the top-most container of those stowed within a hatch</i>
OTO	On Top On-deck Stowage <i>The container is to be stowed as the top-most container of those stowed on-deck</i>
OTS	Total Shipment
OUC	Under Container On-deck Stowage <i>The container is to be stowed below another container on the deck of the vessel</i>
OUW	Below Water Line Stowage <i>The container is to be stowed below the waterline of the vessel</i>
OVR	Overflow
OWR	One Way Rates Applied
PAV	Pickup of Shipments on Saturday, Sunday, and/or Holidays Requiring Absolute Next Day Delivery
PDS	Pickup and Delivery From Storage in Transit <i>The additional service charge or order for a transportation carrier to pickup a household goods shipment at, or deliver to a temporary storage facility</i>
PDY	Pickup and Delivery Beyond Service Area
PER	Special Permits <i>Carrier required to provide special permits in order to move freight</i>
PFH	Protect From Heat
PHR	Per Hour Rates Applied
PIR	Pier Time <i>Carrier required to wait at pier for loading or unloading</i>
PMM	P.M. Delivery Requirement
PMR	Per Mile Rates Apply
PMS	Pickup of Shipments Requiring Same Day Delivery Service
PMT	Pickup of Shipments Requiring Same Day Delivery Service and/or Delivery at a Specified Time
POC	Piano/Organ Carry <i>The additional service charge or order for a transportation carrier to provide special handling and transportation for a piano or organ as part of a household goods shipment</i>
PPD	Pickup and Delivery Service for Perishables

CODE DEFINITION & EXPLANATION

PRL	Prelodge <i>Motor service for hand delivery of shipping documents 24 hours or more prior to the delivery of a shipment(s)</i>
PSG	Protective Service Security with Armed Guards <i>Motor service for Protective Security Service when shipper requires one or both cleared drivers be armed</i>
PSS	Protective Security Service
PTS	Protective Tarp For Security Purposes
PUC	Pickup
PUD	Pickup and Delivery
PUK	Pack and Unpack <i>The additional service charge or order for a transportation carrier to provide packing services at the origin location and unpacking services at destination site; including labor, packing material, and containers; as part of a household goods shipment</i>
PUP	PUP Trailer Rates Apply
PYS	Priority Service
RCC	Reconsignment <i>Change in destination, route, etc., that requires a change in billing or an additional movement of the shipment</i>
RCL	Redelivery <i>Motor service when, through fault of the consignee, delivery cannot be made and has to be redelivered at a later date</i>
RDR	Roadrailer Service
RIE	Released Value Charge in Excess of Carrier Maximum Liability
RLS	Relocation of Vehicle <i>Motor service when carrier is requested to move a vehicle from one platform doorway or shipping room to another</i>
RMS	Rail Surveillance <i>Rail security service performed by rail carriers in the movement of Government unclassified sensitive cargo</i>
RRR	Round Trip Service
RSP	Reshipment <i>The additional service charge or order for a transportation carrier to prepare a household goods shipment for onward movement when the shipment is diverted to a new destination location</i>
RSS	Restricted Speeds <i>Service when the unusual nature of the shipment requires the carrier to operate at speeds below its normal limits</i>
RSV	Reservations <i>Shipper may reserve space in a vehicle for second and third Proviso commodities moving via Household Goods motor carriers only</i>
RWR	Reweight Requested
SCC	Special Containers <i>The additional service charge or order for a transportation carrier to use specially constructed containers for oversized or fragile items as part of a household goods shipment</i>
SCL	Shipper Load and Consignee Unload
SDL	Split Delivery

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
SDS	Special Dromedary Service <i>Demountable shipping container (special sizes) that can be fastened to the chassis of a truck, tractor, or flat bed</i>	SUP	Supervisor Requested <i>Carrier must provide a person to supervise loading or unloading</i>
SEC	Special Equipment Charge	SVS	Storage of Vehicles <i>Service for vehicles trailer or flat car held by carrier, beyond the free time allowed, for any reason not the fault of the carrier</i>
SEE	Stairs, Elevator, Excess Carry <i>The additional service charge or order for a transportation carrier to use stairs, elevators, or long carry as part of the origin or destination services on a household goods shipment</i>	TDC	Truckload-Double Operator-Common Carrier
SER	Service Charge Applies	TDP	Truckload-Double Operator-Padded Van
SEV	Security Escort Vehicle Service	TLS	Tendered as Truckload (Truckload Service Requested)
SFT	Special Train Movement <i>Rail service when a special train is necessary due to excessive dimensions, weight, or safety of the shipment</i>	TMS	Multi-Tank Surveillance Service <i>Service for security service performed by railroads applicable when two M1 tanks are loaded on a rail car</i>
SGL	Single Shipment	TOF	Trailer on Flat Car
SHL	Shipper Load	TPS	Third Party Service <i>The additional service charge or order for a transportation carrier to obtain independent contractors or companies to perform certain services on a household goods shipment that are not covered under an existing commercial or military tariff and the carrier is entitled to recover expenses or costs</i>
SKT	Skirting and Unskirting <i>The additional service charge or order for a transportation carrier to remove skirting from the mobile home prior to movement and reinstalling the skirting at destination after the transportation from one location to another has been performed</i>	TRA	Tractor Only <i>Carrier required to provide tractor only</i>
SLC	Shipper Load and Count	TRK	Truck Rates Applicable
SMP	Small Package	TRL	Trailer Preparation - Special <i>Carrier required to prepare the trailer in accordance with special shipper requirements</i>
SMS	Satellite Surveillance Service	TRM	Termination <i>The additional service charge or order for a transportation carrier to terminate the movement of a household goods shipment at origin or enroute to a destination location</i>
SNM	Transmit a Ship Notice/Manifest Transaction Set	TRN	Transfer Product <i>Carrier required to provide labor and equipment to transfer product</i>
SNT	Shipment from Non-Temp Storage <i>The additional service charge or order for a transportation carrier to perform pickup and inspection of household goods from a long term storage facility</i>	TRP	Tire Repair and Replace <i>The additional service charge or order for a transportation carrier to repair or replace military member-owned tires and/or tubes used on a mobile home</i>
SOC	Stop-off <i>Service for stop-off in transit to complete loading or to partially unload a shipment</i>	TRS	Trade Show
SOL	Shipper Load and Carrier Unload	TRT	Tractor and Trailer <i>Carrier required to provide tractor and trailer only</i>
SPC	Special Permit	TSC	Truckload-Single Operator-Common Carrier
SPR	Spreader Service <i>Carrier responsible for spreading product at point of delivery</i>	TSP	Truckload-Single Operator-Padded Van
SPT	Spot for Storage - No Shipment <i>Carrier required to provide a trailer for shipper although no shipment is available for assignment</i>	TSS	Tank Surveillance Service
SPU	Split Pickup <i>Service for pickup/delivery of articles in a single shipment at more than one place within the origin/destination</i>	UFC	Under Carriage Furnished By Carrier
SRG	Storage <i>Service for freight held in carrier's possession beyond free time for any reason not the fault of the carrier</i>	UPK	Unpacking <i>The additional service charge or order for a transportation carrier to perform unpacking services on an unaccompanied baggage shipment that are not covered under the carrier filed transportation rate</i>
SRS	Surveying Routes <i>Service when, because of the unusual size or weight of the shipment, a survey of the route is required for its safety</i>	URC	Unloading or Reloading <i>Service when carrier is required to perform loading/unloading of a shipment unassisted by shipper/consignee</i>
SSN	Substitute Service Not to be Used		
STA	Conductivity/Anti-static Additive		
STR	Signature and Tally Record		

CODE DEFINITION & EXPLANATION

UTL Utilities Disconnect and Connect
The additional service charge or order for a transportation carrier to disconnect utilities attached to a mobile home prior to movement and reconnect utilities at destination after transportation from one location to another has been performed

VAC Vacuum Service
Carrier required to provide vacuum service

VAN ROEE Van Type Truck

VSO Stop Off Delivery of Personal Vehicles

VTs Vehicles in Truckaway
Service when vehicles, before loading in truckaway service, exceed 64" in height measured from ground to top of vehicle

WDS Waterfront Delivery
Service for waterfront delivery of bulk fuel

WTV Weight Verification
Service for weight verification when the difference between billed weight and actual weight is less than 5 percent

ZZZ Mutually Defined

153 Special Handling DescriptionTYPE=AN_{MIN=2}MAX=30

Free-form additional description of special handling instructions to appear on printed bill if special handling code is not adequate.

181 Quantity or Status Adjustment Reason Code

TYPE=ID MIN=2 MAX=2

Code indicating reason for change in level or status of inventory.

SEGMENTS USED IN (AS SIMPLE):

W19

TRANSACTION SETS USED IN:

947

CODE DEFINITION & EXPLANATION

01 Unable-to-Locate (UTL) Product Located
03 Shipment Greater Than Previously Reported
04 Receipt Less Than Previously Reported
05 Product Put on Hold
06 Book Adjustment Decrease
07 Product Dumped or Destroyed
51 Unable-to-Locate (UTL) Product Located
52 Recoup/Rework of Damaged Product
53 Shipment Less Than Previously Reported
54 Receipt Greater Than Previously Reported
55 Product Taken Off Hold
56 Book Adjustment Increase
AA Physical Count
AB Accounting Error
AC Condition Change
An adjustment to inventory is required due to a change in the condition classification of the material
AD Purpose Change
AE Reidentification
AF Stock Number Change
AG Ownership Change
AH Other
AI Disaster
AJ Survey
AK Transfer
AL Capitalization
An adjustment to inventory resulting from reassignment between different funds or chartered subdivisions of a fund
AN Unit of Issue Change
AP Product/Formula Evaluation and Testing
AR Order Shipment Error
AS Recouping
AT Prepack Preparation
AU Damaged in Facility
AV Damaged in Transit
AW Product Recall
AX Shelf-life Obsolescence
AY Receipt Error
BA Operating Variance
An adjustment to inventory resulting from gain or loss occurring under routine operating conditions, e.g. temperature, handling, etc
BD Nonrecoverable
An adjustment to inventory resulting from unretrievable/unusable liquid product located in the bottom of a storage tank (nonrecoverable tank bottoms)
BK Off Specification
An adjustment to inventory resulting from gain of slop fuel, i.e., off-specification fuel not meeting deterioration limits and not to be blended or downgraded to a usable product

CODE DEFINITION & EXPLANATION

BM Replacement

An adjustment to inventory resulting from a replacement of a previously recorded loss (e.g., loss due to linebreak) at no cost to the owner per agreement with the storage facility operator

BN Tariff Deduction

An adjustment to inventory resulting from a loss due to the change in volume after receipt of product via a pipeline operation as covered in a tariff agreement

BR Regrade

An adjustment to inventory resulting from regarding of product, i.e., redesignating a product from one grade to another when the product meets specifications for both

BS Downgrade**BT** Additive

An adjustment to inventory resulting from injection of an additive, e.g., fuel system icing inhibitor, into a petroleum product

CD Product Donations**CO** Consignment**CR** Customer Returned Inventory**CS** Product Samples**PC** Product Reserved for Customer**182 Vessel Name**

TYPE=AN MIN=2 MAX=28

Name of ship as documented in "Lloyd's Register of Ships".

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
CTN	Carton	PCS	Pieces
CUB	Cube <i>A box that has a "bladder" (poly-formed bladder) inside; it has an opening similar to bottle; the interior bladder is flexible not rigid</i>	PIR	Pims
CYL	Cylinder	PKG	Package
DBK	Dry Bulk	PLF	Platform
DRK	Double-length Rack	PLN	Pipeline
DRM	Drum <i>A large container with a cylindrical shape; top may have removable or sealed top sides may be fiberboard or metal</i>	PLT	Pallet
DSK	Double-length Skid	POV	Private Vehicle
DTB	Double-length Tote Bin	PRK	Pipe Rack
ENV	Envelope	QTR	Quarter of Beef
FIR	Firkin	RAL	Rail (Semiconductor)
FLO	Flo-bin	RCK	Rack
FLX	Liner Bag Liquid <i>A rubber liner used in a standard container for liquid material</i>	REL	Reel
FRM	Frame	ROL	Roll
FSK	Flask	RVR	Reverse Reel
FWR	Forward Reel	SAK	Sack
GOH	Garments on Hangers	SBC	Liner Bag Dry <i>A plastic liner used in container designed for the carriage of dry free-flowing material</i>
HED	Heads of Beef	SHK	Shook
HGH	Hogshead	SID	Side of Beef
HPT	Hopper Truck	SKD	Skid
HRB	On Hanger or Rack in Boxes	SKE	Skid, elevating or lift truck
HRK	Half-standard Rack	SLP	Slip Sheet <i>Shipping containers utilizing slip sheets, which are cardboard platforms used to hold product for storage or transportation</i>
HTB	Half-Standard Tote Bin	SLV	Sleeve
JAR	Jar	SPI	Spin Cylinders
JUG	Jug <i>A bottle (usually 1/2 gallon or larger) fitted with a handle</i>	SPL	Spool
KEG	Keg	TBE	Tube
KIT	Kit	TBN	Tote Bin
KRK	Knockdown Rack	TKR	Tank Car
KTB	Knockdown Tote Bin	TKT	Tank Truck
LBK	Liquid Bulk	TLD	Intermodal Trailer/Container Load (Rail)
LIF	Lifts	TNK	Tank
LOG	Log	TRC	Tierce
LSE	Loose	TRI	Triwall Box <i>A sturdy box made of three-ply cardboard</i>
LUG	Lug	TRK	Trunk and Chest
LVN	Lift Van	TRY	Tray
MRP	Multi-Roll Pack	TSS	Trunk, Salesmen Sample
NOL	Noil	TTC	Tote Can <i>A reusable stainless steel container with handles; used for liquid material</i>
OVW	Overwrap <i>A cardboard bottom is put down on a pallet; the bags are stacked in layers; the top of the cardboard slides down over the bags to meet the bottom; if any of the bags tear, the product always stays inside the cardboard</i>	TUB	Tub
PAL	Pail	UNP	Unpacked
PCK	Packed - not otherwise specified	UNT	Unit
		VEH	Vehicles
		VPK	Van Pack
		WHE	On Own Wheel
		WLC	Wheeled Carrier
		WRP	Wrapped

212 Unit Price

TYPE=R MIN=1 MAX=17

Price per unit of product, service, commodity, etc.

CODE DEFINITION & EXPLANATION

AR	Appurtenance (Enhancements/Additions to Equipment)
BA	Barrels <i>Identifies a billable unit expressed as a type of container</i>
BX	Box
CC	Cubic Centimeter
CF	Cubic Foot
CM	Centimeter
DK	Kilometers
DM	Miles
DR	Drivers <i>Identifies a billable unit expressed as persons operating equipment</i>
EA	Each
FR	Flat Rate
FT	Foot
GC	100 Gallons
GL	Gallon
KG	Kilogram
LB	Pound
LC	100 Pounds
LH	100 Liters
LR	Liter
MR	Mileage
MT	Measurement Ton
MV	Monetary Value
NB	Barge
NC	Car
ND	Cord <i>A volume measurement</i>
NG	Nights <i>Identifies a billable unit expressed as nights; one night is the period between 6 p.m. of a given day to 6 a.m. of the next</i>
NL	Load
NN	Train
NP	Piece
NR	Container
NT	Trailer
NU	Unit <i>A specific measurement in rating shipments</i>
NV	Vehicle
OR	Other
PK	Package
PR	Persons <i>Identifies a billable unit expressed as persons performing an additional service other than the operation of equipment</i>
RV	Release Value

CODE DEFINITION & EXPLANATION

SP	Stops <i>Identifies a billable unit expressed as stops that are authorized as part of a shipment of goods</i>
ST	Number of States
SY	Square Yards
TD	Days
TH	Hours
TN	Tons <i>Identifies a billable unit expressed as short tons (2000 pounds)</i>
TR	Time
VA	Actual Volume
VC	Chargeable Volume
VM	Volume Metric Unit

222 Hazardous Endorsement

TYPE=ID MIN=4 MAX=25

The placard endorsement that is to be shown on the shipping papers for the hazardous commodity.

CODE DEFINITION & EXPLANATION

- A1** Plant Equipment Number
Item identifier is a plant equipment number
- A2** Department of Defense Identification Code (DoDIC)
Qualifies a code that uniquely identifies a type of explosive or ammunition
 SEE CODE SOURCE 196
- A3** Locally Assigned Control Number
Item identifier is a locally assigned control number used to catalog and manage material
- A4** Subsistence Identification Number
Item identifier is a brand-name resale subsistence item
- A6** Document Identification Code
Item identifier subclassifies the intended use of the transaction
- A7** Subline Item Number
A further subdivision of a contract or exhibit line item that identifies a specific part of that contract or exhibit line item
- A8** Exhibit Line Item Number
The line item of a document referenced in and appended to a procurement instrument which establishes a delivery requirement
- A9** Health Care Financing Administration National Standard Format Podiatry Codes
 SEE CODE SOURCE 265
- AA** American Trucking Associations Assembly
Assembly within the vehicle system that contains the causal part
- AB** Assembly
- AC** Aggregation Code (Used to Consolidate Part Families)
- AD** American Dental Association Codes
This association's membership consists of U.S. dentists. It sets standards for the dental profession
 SEE CODE SOURCE 135
- AE** Serial Item and Contribution Identifier (Defined in ANSI Z39.56)
- AF** Front Axle Serial Number
- AG** Age
The period during which, after distillation and before bottling, distilled spirits have been stored in oak containers
- AH** Billboards Commercial
- AI** Alternate ISBN
- AJ** Piggyback Commercial
- AK** Refined Product Code
 SEE CODE SOURCE 306
- AL** Axle Serial Number
- AM** Allocation Methodology Identification Code
- AN** Asset Number

CODE DEFINITION & EXPLANATION

- AO** GAS*FLOW Product or Service Charge Code
- AP** American Trucking Associations Part
System within the vehicle that contains the causal part
SEE CODE SOURCE 293
- AR** ARINC Part Number
- AS** Rear Axle Serial Number
- AT** Assortability Code
- AW** Well Number
SEE CODE SOURCE 308
- AX** Assembly Lot Number
A serialization number identifying good's manufacturing location
- AY** American Trucking Associations System
- AZ** Axle Ratio
- B1** Volume Set
- B2** Library of Congress Code
- B3** Edition Code
- B4** Binding Code
- B5** Title Code
- B6** Author Code
- B7** Publisher Code
- B8** Batch Number
- BA** Bale Number
- BB** Print Color Standard Reference
Customer decides after trial run of a print on a pre-dyed fabric a point of reference for the shade of the print color, light or darknes of the print; this reference then becomes a standard for the finisher to go by - as a customer orders fabric this code is used to identify to finisher the shade of the print on the fabric
- BC** Supplier Brand Code
- BD** Buyer Ground Shade Identifier
For each color there are various degrees of the color red for instance has degrees chinese red, fire engine red, etc; to each degree a symbol called ground shade is established by both the buyer and seller; to the buyer it might be fire engine red, whereas to the seller the same classification might have a different symbol; need to identify both in a purchase order
- BE** Buyer's Engineering Change Level Number
- BF** Vendor Ground Shade Identifier
For each color there are various degrees of the color red for instance has degrees chinese red, fire engine red, etc; to each degree a symbol called ground shade is established by both the buyer and seller; to the buyer it might be fire engine red, whereas to the seller the same classification might have a different symbol; need to identify both in a purchase order
- BG** Ground Shade Standard Reference
Buyer established shade reference at time first lot was dyed; this refers seller (dyer) back to a previous lot to match the shade

CODE DEFINITION & EXPLANATION

- BH** Finish/Hand Standard Reference
Fabrics can be finished in many types of finish: water repellent, Scotch Guard, etc.; within each finish a mill can create a degree of softness or hardness depending on how fabric should feel to the customer; this degree is assigned a reference number for reordering purposes
- BL** Brand/Label
- BM** Beam Number
- BN** Bar-Coded Serial Number
- BO** Buyers Color
- BP** Buyer's Part Number
- BS** Bill Subgroup Code
- BT** Volume Type Identification Code
- BU** Bus Body Serial Number
- BX** Bill Credit Code
- CA** Case
- CB** Buyer's Catalog Number
- CC** Compatible Cut Number
- CD** Motor Vehicle-Line Designator
- CE** Class of Contract Code
- CF** Chassis Serial Number
- CG** Commodity Grouping
- CH** Country of Origin Code
SEE CODE SOURCE 5
- CI** Common Language Equipment Identifier (CLEI)
- CJ** Current Procedural Terminology (CPT) Codes
Published by the AMA. It is a listing of descriptive terms and identifying codes for reporting medical services and procedures performed by physicians. The uniform language accurately designates medical, surgical, and diagnostic services, and thereby provides reliable communications among physicians, patients, and payers
SEE CODE SOURCE 133
- CK** Candidate Oil
- CL** Color
- CM** National Retail Merchants Association Color Code
SEE CODE SOURCE 88
- CN** Commodity Name
- CO** Chemical Abstract Service (CAS) Registry Number
SEE CODE SOURCE 69
- CP** Carry-over Part Number
- CQ** Equipment Code per COPAS standard
SEE CODE SOURCE 61
- CR** Contract Number
- CS** Service code per COPAS standard
SEE CODE SOURCE 61
- CT** Continuation (ID Number Spans Multiple Product ID Data Elements)
- CU** Cut Number
- CV** Customer Provided Equipment
The termination equipment being used will be provided by the customer
- CY** Customer Company Registry Number

CODE DEFINITION & EXPLANATION

- CAF** Cost and Freight
The seller must pay the costs and freight necessary to bring the goods to the named destination, but the risk of loss or damage to the goods, as well as any cost increases, is transferred from the seller to the buyer when the goods pass the ship's rail in the port of the shipment
- CFR** Cost and Freight
Seller pays cost and freight to named port of destination; buyer assumes all risks of loss and damage and additional costs incurred once goods are delivered on board the vessel; these are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment
- CIF** Cost, Insurance, and Freight
Seller pays cost and freight to named port of destination; buyer assumes all risks of loss and damage and additional costs incurred once goods are delivered onboard the vessel; risks are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment; seller must in addition procure (i.e. contract and pay for) marine insurance against the buyer's risk of loss or damage during shipment
- CIP** Carriage and Insurance Paid To
Seller pays cost and freight to named port of destination; buyer assumes all risk of damage or loss and additional costs incurred once goods are delivered on board the vessel; these risks are assumed by the buyer when the goods pass over the rail of the ship at the port of shipment; seller must procure (i.e. contract and pay for) marine insurance against the buyer's risk of loss or damage during carriage; seller must in addition procure (i.e. contract and pay for) cargo insurance against the buyer's risk of loss or damage to the goods during carriage

CODE DEFINITION & EXPLANATION

- CPT** Carriage Paid To
Seller pays freight charges named to destination; the risk of loss or damage to the goods, as well as any additional costs due to events occurring after the time the goods have been delivered to the carrier, is transferred from the seller to the buyer when the goods have been delivered into the custody of the carrier
- DAF** Delivered at Frontier
Seller fulfills obligation to deliver when goods have been made available, cleared for export, at the named point and place at the frontier, but before the border of the adjoining country
- DDP** Delivered Duty Paid
Seller bears costs and risks involved in bringing goods to the named place in the country of importation including duties, taxes, and other official charges payable upon import
- DDU** Deliver Duty Unpaid
Seller bears costs and risks involved in bringing goods to the named place in country of importation exclusive of duties, taxes, or other official charges payable upon import, and the costs and risks of carrying out import formalities
- DEQ** Delivered Ex Quay
Seller bears all costs and risks involved, including duties, taxes, and other charges involved in delivering the goods to the quay (wharf) at the named port of destination, cleared for import; seller's obligation ends when the goods are available to the buyer on the quay (this term used only for sea or inland waterway shipments)
- DES** Delivered Ex Ship
Seller bears all costs and risks involved in bringing goods to the named port of destination; seller's obligation ends when goods are available to buyer on board the ship uncleared for import at named port of destination (this term used only for sea or inland waterway shipments)
- DOM** Domestically Supplied
Duty paid at the border, making the material equivalent to being supplied by a domestic source
- DUP** Delivered; Duty Unpaid
Seller bears costs and risks involved in bringing goods to a named place in the country of importation as well as risks and costs of carrying out customs formalities, but excluding duties, taxes, and other official changes payable upon importation
- EXQ** Ex Quay
- EXS** Ex Ship
- EXW** Ex Works
Buyer bears all costs and risks in taking the goods from the seller's premises to the desired location
- FAS** Free Alongside Ship
Seller's obligation ends when goods have been placed alongside the vessel on the quay or in lighters at the named port of shipment; buyer bears all costs and risks thereafter

CODE DEFINITION & EXPLANATION

FCA	Free Carrier <i>Seller fulfills his obligation when goods are handed over, cleared for export, and into the charge of the carrier named by the buyer at the named place or location</i>
FCI	Freight Carriage and Insurance Paid To
FCP	Freight Carriage Paid To
FOB	Free on Board
FOR	Free on Rail
FOT	Free on Truck
NPF	Non-privileged Foreign <i>Duty not paid at the border and in the U. S. Customs category of "non-privileged foreign"</i>
PPF	Privileged Foreign <i>Duty not paid at the border and in the U. S. Customs category of "privileged foreign"</i>
ZZZ	Mutually Defined

336 Terms Type Code

- FR** Freight Tender
A tender of rates for services provided by a commercial carrier to move all classifications of Government freight other than personal property shipments
- HR** Personal Property Tender
A tender of rates offered by a carrier for the movement and/or storage of Government sponsored personal property shipments
- LS** Load Summary
- LT** Load Tender
Used by a shipper to inform carrier that a particular load is available or becoming available for movement; also signifies an advance pick-up notification
- MF** Manifest
- PI** Pro Forma Invoice
- PL** Paid List (All Debits)
- RD** Deposit Reconciliation
- RO** Reassociation Report
- RP** Partial Account Reconciliation
- RR** Range Reconciliation
- SL** Shipper's Letter of Instruction
Used by a shipper to inform recipient of documentation requirements (completion, preparation, and distribution of paperwork) required for the movement of goods
- SS** Single Shipment Status
- TG** Government Guaranteed Traffic Tender
- TM** Trailer Manifest
- ZZ** Mutually Defined

347 Hash Total

TYPE=R MIN=1 MAX=10

Sum of values of the specified data element. All values in the data element will be summed without regard to decimal points (explicit or implicit) or signs. Truncation will occur on the left most digits if the sum is greater than the maximum size of the hash total of the data element.

Example:

-.0018 First occurrence of value being hashed.
 .18 Second occurrence of value being hashed.
 1.8 Third occurrence of value being hashed.
 18.01 Fourth occurrence of value being hashed.
 ----- 1855 Hash total prior to truncation. 855
 Hash total after truncation to three-digit field.

CODE DEFINITION & EXPLANATION

- 42** Temporary Record
Preliminary data that will be replaced with permanent information once verification of accuracy and completeness has been performed
- 43** Request Permission to Service
- 44** Rejection
- 45** Followup
A second or subsequent transmission of the transaction set when an expected response has not yet been received
- 46** Cancellation with Refund
- 47** Transfer
- 48** Suspended
- 49** Original - No Response Necessary
- 50** Register
To provide such trading partner profile information as may be necessary to request registration as a trading partner in a system (e.g., be authorized to render quotes to the government)
- 51** Historical Inquiry
- 52** Response to Historical Inquiry
- 53** Completion
- 54** Approval
- 5C** Chargeable Resubmission
- 77** Simulation Exercise
- CN** Completion Notification
Signifies that the order is complete and the information contained within is final for the service request purchase order
- CO** Corrected
- RH** Release Hold
- SU** Status Update
- ZZ** Mutually Defined

354 Number of Line Items

TYPE=NO MIN=1 MAX=6

Total number of line items in the transaction set.

CODE DEFINITION & EXPLANATION

- 01** Actual Pounds
- 02** Statute Mile
- 03** Seconds
- 04** Small Spray
- 05** Lifts
- 08** Heat Lots
- 10** Group
- 11** Outfit
- 12** Packet
- 13** Ration
- 14** Shot
- 15** Stick
- 16** 115 Kilogram Drum
A cylindrical container whose contents weigh 115 kilograms when full
- 17** 100 Pound Drum
A cylindrical container whose contents weigh 100 pounds when full

CODE DEFINITION & EXPLANATION

- 18** 55 Gallon Drum
A cylindrical container whose volume is equal to 55 gallons
- 19** Tank Truck
A liquid-carrying highway vehicle whose volume is variable according to the customer's needs and which is used as a measure of goods ordered, sold, and delivered; differs from a tank car which transports liquids by rail
- 1A** Car Mile
One freight car moving one mile
- 1B** Car Count
The number of freight cars moving over a specified track
- 1C** Locomotive Count
The number of locomotives moved over a specified track
- 1D** Caboose Count
The number of cabooses moved over a specified track
- 1E** Empty Car
Unloaded or empty cars moving over a specified track
- 1F** Train Mile
The first locomotive in a train moving one mile
- 1G** Fuel Usage (Gallons)
The number of gallons of diesel fuel used to move a train or all trains over specified trackage
- 1H** Caboose Mile
One caboose moving one mile
- 1I** Fixed Rate
Indicates a predetermined or set rate for usage of a facility
- 1J** Ton Miles
Tons of freight multiplied by the number of times moved; includes non-revenue freight such as material used to maintain trackage and right-of-way
- 1K** Locomotive Mile
One locomotive moving one mile
- 1L** Total Car Count
The sum of cars, locomotives, and cabooses moving over a specified track; the conversion rate for locomotives and cabooses is set by contract
- 1M** Total Car Mile
The sum of car miles, locomotive miles, and caboose miles moved over a speified track; the conversion rate for locomotives and cabooses is set by contract
- 1N** Count
- 1O** Season
- 1X** Quarter Mile
- 20** 20 Foot Container
A sea-land rectangular container box whose capacity is defined by its longest dimension and by which product shipments are measured and billed
- 21** 40 Foot Container
A sea-land rectangular container box whose capacity is defined by its longest dimension and by which product shipments are measured and billed
- 22** Deciliter per Gram
Represents viscosity, Cuene intrinsic viscosity, and limit intrinsic viscosity

CODE DEFINITION & EXPLANATION

- 23** Grams per Cubic Centimeter
Represents product density
- 24** Theoretical Pounds
- 25** Grams per Square Centimeter
Represents product basis weight
- 26** Actual Tons
- 27** Theoretical Tons
- 28** Kilograms per Square Meter
Represents product basis weight
- 29** Pounds per 1000 Square Feet
Represents product basis weight
- 2A** Radians Per Second
Measure of angular velocity
- 2B** Radians Per Second Squared
Measure of angular acceleration
- 2C** Roentgen
Unit of X-radiation or gamma radiation equal to the amount of radiation that produces in one cubic centimeter of dry air at 0 degrees Celsius and standard atmospheric pressure ionization of either sign equal to one electrostatic unit of charge
- 2F** Volts Per Meter
Measure of electrical field strength
- 2G** Volts (Alternating Current)
Measure of electrical potential
- 2H** Volts (Direct Current)
Measure of electrical potential
- 2I** British Thermal Units (BTUs) Per Hour
British thermal units per hour
- 2J** Cubic Centimeters Per Second
Rate of flow
- 2K** Cubic Feet Per Hour
Rate of flow
- 2L** Cubic Feet Per Minute
Rate of flow
- 2M** Centimeters Per Second
Rate of speed
- 2N** Decibels
A unit for expressing the relative intensity of sounds on a scale of 0 for the least perceptible sound to about 130 for the average pain level
- 2P** Kilobyte
Unit of computer storage capacity equal to 1000 bytes
- 2Q** Kilobecquerel
Unit of radiation
- 2R** Kilocurie
Unit of radiation
- 2U** Megagram
Unit of mass
- 2V** Megagrams Per Hour
- 2W** Bin
Storage container used as a unit of measurement
- 2X** Meters Per Minute
Measure of linear speed
- 2Y** Milliorentgen
Unit of radiation

CODE DEFINITION & EXPLANATION

- 2Z** Millivolts
Unit of electrical potential
- 30** Horsepower Days per Air Dry Metric Tons
Represents the energy requirements for processing a product
- 31** Catchweight
- 32** Kilograms per Air Dry Metric Tons
Represents chemical addition rate during product manufacture or chemical addition within the finished product
- 33** Kilopascal Square Meters per Gram
Represents burst index measurement for pulp products
- 34** Kilopascals per Millimeter
Represents hardness index of pulp products
- 35** Milliliters per Square Centimeter Second
Represents porosity of a sheet of material
- 36** Cubic Feet per Minute per Square Foot
Represents porosity of a sheet of material
- 37** Ounces per Square Foot
Represents sheet weight
- 38** Ounces per Square Foot per 0.01 Inch
Represents sheet density
- 3A** Newton
Unit of force
- 3B** Megajoule
Unit of energy or heat
- 3C** Manmonth
Measure of work output by a single person during a typical work month
- 3E** Pounds Per Pound of Product
- 3F** Kilograms Per Liter of Product
- 3G** Pounds Per Piece of Product
- 3H** Kilograms Per Kilogram of Product
- 3I** Kilograms Per Piece of Product
- 40** Milliliter per Second
Represents rate of absorbency
- 41** Milliliter per Minute
Represents rate of absorbency
- 43** Super Bulk Bag
A cloth, plastic, or paper-based bag having the dimensions of the pallet on which it is constructed and varying in height according to the weight and density of product contained; typically transports dry, loose materials in bulk form
- 44** 500 Kilogram Bulk Bag
A flexible container for bulk goods whose contents weigh 500 kilograms when full
- 45** 300 Kilogram Bulk Bag
A flexible container for bulk goods whose contents weigh 300 kilograms when full
- 46** 25 Kilogram Bulk Bag
A flexible container for bulk goods whose contents weigh 25 kilograms when full
- 47** 50 Pound Bag
A flexible container whose contents weigh 50 pounds when full

CODE DEFINITION & EXPLANATION

- 48** Bulk Car Load
A fully loaded rail car containing dry bulk loose materials
- 4A** Bobbin
A cylinder or spindle on which yarn or thread is wound
- 4B** Cap
Designates that the cap of a container is manufactured to dimensions that enable it to be used as a measuring device when mixing the contents of the container with another substance
- 4C** Centistokes
 1×10^{-6} square meters/second
- 4D** Curie
A unit of radioactivity equal to 3.7×10^{10} disintegrations per second
- 4E** 20-Pack
Pack containing 20 units
- 4F** 100-Pack
Pack containing 100 units
- 4G** Microliter
1/1,000,000 liter
- 4H** Micrometer
1/1,000,000 meter
- 4I** Meters Per Second
Measure of linear speed
- 4J** Meters Per Second Per Second
Measure of acceleration
- 4K** Milliampere
Unit of electrical current
- 4L** Megabyte
Unit of computer storage capacity
- 4M** Milligrams Per Hour
Unit of flow
- 4N** Megabecquerel
Unit of radiation
- 4O** Microfarad
Unit of electrical capacitance
- 4P** Newtons Per Meter
Unit of measure for surface tension
- 4Q** Ounce Inch
Unit of torque
- 4R** Ounce Foot
Unit of torque
- 4S** Pascal
Unit of pressure
- 4T** Picofarad
Unit of electrical capacitance
- 4U** Pounds Per Hour
Rate of flow
- 4V** Cubic Meter Per Hour
Rate of flow
- 4W** Ton Per Hour
Rate of flow
- 4X** Kiloliter Per Hour
Rate of flow
- 50** Actual Kilograms
- 51** Actual Tonnes

CODE DEFINITION & EXPLANATION

52	Credits
53	Theoretical Kilograms
54	Theoretical Tonnes
56	Sitas
57	Mesh <i>Linear measurement of the open area of screen, net, weave, or similarly constructed item</i>
58	Net Kilograms
59	Parts Per Million
5A	Barrels per Minute <i>The number of 42 gallon barrels pumped or mixed in a time period of one minute</i>
5B	Batch <i>The quantity of material produced at one operation</i>
5C	Gallons per Thousand <i>The number of gallons of a component material used per one thousand gallons of a process made</i>
5E	MMSCF/Day <i>One million standard cubic feet of gas per day</i>
5F	Pounds per Thousand <i>The number of pounds of solid material used in each 1000 gallons of fluid, mixed or pumped</i>
5G	Pump <i>The number of pumps used on a specific job</i>
5H	Stage <i>A period or step in a process or development</i>
5I	Standard Cubic Foot <i>One cubic foot of gas measured at a fixed temperature and pressure; the value used for the temperature and pressure varies depending on the type of gas being measured</i>
5J	Hydraulic Horse Power <i>A calculated measure of Horse Power using the formula rate (barrels per minute) times pressure (pounds per square inch) divided by 40.8</i>
5K	Count per Minute
5P	Seismic Level
5Q	Seismic Line
60	Percent Weight
61	Parts Per Billion
62	Percent Per 1000 Hours
63	Failure Rate In Time
64	Pounds Per Square Inch Gauge
65	Coulomb <i>Unit of charge</i>
66	Oersteds
67	Siemens <i>Unit of admittance</i>
68	Ampere
69	Test Specific Scale
70	Volt
71	Volt-Ampere Per Pound
72	Watts Per Pound
73	Ampere Turn Per Centimeter
74	Milli Pascals

CODE DEFINITION & EXPLANATION

76	Gauss
77	Mil
78	Kilogauss
79	Electron Volt
80	Pounds Per Square Inch Absolute
81	Henry <i>Unit of inductance</i>
82	Ohm <i>Unit of resistance</i>
83	Farad <i>Unit of capacitance</i>
84	Kilo Pounds Per Square Inch (KSI)
85	Foot Pounds
86	Joules
87	Pounds per Cubic Foot
89	Poise
90	Saybold Universal Second
91	Stokes
92	Calories per Cubic Centimeter
93	Calories per Gram
94	Curl Units
95	20,000 Gallon Tankcar <i>A 20,000 gallon liquid capacity enclosed rail car</i>
96	10,000 Gallon Tankcar <i>A 10,000 gallon liquid capacity enclosed rail car</i>
97	10 Kilogram Drum <i>A cylindrical container whose contents weigh 10 kilograms when full</i>
98	15 Kilogram Drum <i>A cylindrical container whose contents weigh 15 kilograms when full</i>
A8	Dollars per Hours <i>A rate expressed in dollars per hour to be charged for each hour worked</i>
AA	Ball
AB	Bulk Pack
AC	Acre
AD	Bytes <i>Number of bytes of data transmitted</i>
AE	Amperes per Meter
AF	Centigram <i>A unit of metric weight equal to 0.01 gram or 0.000035 ounce</i>
AH	Additional Minutes <i>The minutes, usually associated with usage-sensitive pricing of telecommunication services, which are above the minutes allowed for that particular service</i>
AI	Average Minutes Per Call <i>The total number of minutes of a category of calls divided by the total number of calls within the category for telephone services calculated to provide call summary details</i>
AJ	Cop <i>A cylindrical or conical mass of thread, yarn, or cable on a quill or a tube</i>

CODE DEFINITION & EXPLANATION

AK	Fathom <i>A unit of length equal to 6.0 feet or 1.829 meters</i>
AL	Access Lines <i>Number of lines subject to Carrier Access Line Charges</i>
AM	Ampoule
AN	Minutes or Messages <i>Number of minutes or messages contracted or used in telephone services where either the number of minutes or messages are the unit of measure for the calculation of charges</i>
AP	Aluminum Pounds Only
AQ	Anti-hemophilic Factor (AHF) Units <i>Intravenous administering of blood products that have been tested for potency against the U.S. medical unit of measure</i>
AR	Suppository
AS	Assortment
AT	Atmosphere <i>Equal to the pressure of the air at sea level, or approximately 14.7 pounds per square inch</i>
AU	Ocular Insert System <i>A drug delivery system which is placed in the lower conjunctival fornix from which the drug diffuses through a membrane at a constant rate over a seven-day period</i>
AV	Capsule <i>A compact metallic or plastic container for liquids or solids</i>
AW	Powder-Filled Vials <i>Standard unit of intravenous blood product that has to be reconstituted with a liquid before being administered</i>
AX	Twenty <i>20 each of an item of supply</i>
AY	Assembly
AZ	British Thermal Units (BTUs) per Pound
B0	British Thermal Units (BTUs) per Cubic Foot
B1	Barrels per Day
B2	Bunks
B3	Batting Pound
B4	Barrel, Imperial
B5	Billet
B6	Bun
B7	Cycles
B8	Board
B9	Batt
BA	Bale
BB	Base Box
BC	Bucket
BD	Bundle
BE	Beam
BF	Board Feet
BG	Bag
BH	Brush

CODE DEFINITION & EXPLANATION

BI	Bar
BJ	Band
BK	Book
BL	Block
BM	Bolt
BN	Bulk
BO	Bottle
BP	100 Board Feet
BQ	Brake horse power <i>Quantity of product ordered for shipment but not available so a replenishment stock has been ordered</i>
BR	Barrel
BS	Basket
BT	Belt
BU	Bushel
BV	Bushel, Dry Imperial
BW	Base Weight
BX	Box
BY	British Thermal Unit (BTU)
BZ	Million BTU's
C0	Calls <i>Number of calls handled</i>
C1	Composite Product Pounds (Total Weight)
C2	Carset
C3	Centiliter
C4	Carload
C5	Cost
C6	Cell
C7	Centipoise (CPS)
C8	Cubic Decimeter
C9	Coil Group
CA	Case
CB	Carboy
CC	Cubic Centimeter
CD	Carat
CE	Centigrade, Celsius
CF	Cubic Feet
CG	Card
CH	Container
CI	Cubic Inches
CJ	Cone
CK	Connector
CL	Cylinder
CM	Centimeter
CN	Can
CO	Cubic Meters (Net)
CP	Crate
CQ	Cartridge
CR	Cubic Meter
CS	Cassette
CT	Carton

CODE DEFINITION & EXPLANATION

CU	Cup
CV	Cover
CW	Hundred Pounds (CWT)
CX	Coil
CY	Cubic Yard
CZ	Combo
D2	Shares
D3	Square Decimeter <i>Metric unit of area</i>
D5	Kilogram Per Square Centimeter <i>Unit of pressure</i>
D8	Draize Score
D9	Dyne per Square Centimeter
DA	Days
DB	Dry Pounds
DC	Disk (Disc)
DD	Degree
DE	Deal
DF	Dram
DG	Decigram
DH	Miles
DI	Dispenser
DJ	Decagram
DK	Kilometers
DL	Deciliter
DM	Decimeter
DN	Deci Newton-Meter <i>One tenth of a Newton-meter, representing torque. A Newton-meter represents force times distance</i>
DO	Dollars, U.S.
DP	Dozen Pair
DQ	Data Records <i>Number of Data Records handled</i>
DR	Drum
DS	Display
DT	Dry Ton
DU	Dyne <i>The unit of force in the cgs system equal to the force that would give a free mass of one gram an acceleration of one centimeter per second</i>
DX	Dynes per Centimeter <i>Unit of surface tension</i>
DY	Directory Books <i>Number of directory books delivered to customer</i>
DZ	Dozen
E1	Hectometer <i>A unit of metric length equal to 109.36 yards or 0.062 mile</i>
E3	Inches, Fraction--Average
E4	Inches, Fraction--Minimum
E5	Inches, Fraction--Actual
E7	Inches, Decimal--Average
E8	Inches, Decimal--Actual

CODE DEFINITION & EXPLANATION

E9	English, (Feet, Inches)
EA	Each
EB	Electronic Mail Boxes <i>Number of Electronic Mail Boxes established for an account</i>
EC	Each per Month
ED	Inches, Decimal--Nominal
EF	Inches, Fraction--Nominal
EM	Inches, Decimal--Minimum
EP	Eleven pack
EQ	Equivalent Gallons <i>Represents number of gallons that syrup and concentrate make of product</i>
EV	Envelope
EX	Feet, Inches and Fraction
EY	Feet, Inches and Decimal
EZ	Feet and Decimal
F1	Thousand Cubic Feet Per Day <i>The unit of measure of the rate of production of a gas</i>
F9	Fibers per Cubic Centimeter of Air
FA	Fahrenheit
FB	Fields
FC	1000 Cubic Feet
FD	Million Particles per Cubic Foot
FE	Track Foot <i>Represents rails, all ties and fittings, and subgrade</i>
FF	Hundred Cubic Meters <i>A unit of metric volume equal to 131.0 cubic yards</i>
FG	Transdermal Patch <i>A drug delivery system which is placed on the skin and releases a drug at a constant rate through the skin</i>
FH	Micromolar <i>One millionth of a mole; a mole is a standard chemical unit</i>
FL	Flake Ton
FM	Million Cubic Feet
FO	Fluid Ounce
FP	Pounds per Sq. Ft.
FR	Feet Per Minute <i>Measure of linear speed</i>
FS	Feet Per Second <i>Measure of linear speed</i>
FT	Foot
FZ	Fluid Ounce (Imperial) <i>A liquid unit of measure equal to 1/20 (.05) pint (Imperial), 28.416 cubic centimeters, or 28.416 milliliters</i>
G2	U.S. Gallons Per Minute <i>Rate of flow</i>
G3	Imperial Gallons Per Minute <i>Rate of flow</i>
G4	Gigabecquerel <i>Unit of radiation equal to 27 millicuries</i>

CODE DEFINITION & EXPLANATION

G5	Gill (Imperial) <i>A unit of liquid or dry measure equal to 5 fluid ounces, 8.669 cubic inches, or 142.066 cubic centimeters</i>
G7	Microfiche Sheet <i>A film that contains photographed documents greatly reduced in size</i>
GA	Gallon
GB	Gallons/Day
GC	Grams per 100 Grams
GD	Gross Barrels
GE	Pounds per Gallon
GF	Grams per 100 Centimeters
GG	Great Gross (Dozen Gross)
GH	Half Gallon
GI	Imperial Gallons
GJ	Grams per Milliliter
GK	Grams per Kilogram
GL	Grams per Liter
GM	Grams per Sq. Meter
GN	Gross Gallons
GO	Milligrams per Square Meter
GP	Milligrams per Cubic Meter
GQ	Micrograms per Cubic Meter
GR	Gram
GS	Gross
GT	Gross Kilogram <i>Represents kilograms of product and package or container</i>
GV	Gigajoules <i>One billion joules; standard method of expressing absolute heating value of natural gas regardless of volume in the Canadian oil and gas industries</i>
GW	Gallons Per Thousand Cubic Feet
GX	Grain <i>A small unit of weight equal to 1/480 (.002083) troy ounce, or 0.0648 gram</i>
GY	Gross Yard
GZ	Gage Systems
H1	Half Pages - Electronic <i>Number of electronic half pages of data delivered</i>
H2	Half Liter <i>Unit of capacity equal to 1/2 liter</i>
H4	Hectoliter <i>Metric measure for 100 liters</i>
HA	Hank <i>One hundred feet of rope</i>
HB	Hundred Boxes
HC	Hundred Count
HD	Half Dozen
HE	Hundredth of a Carat
HF	Hundred Feet
HG	Hectogram
HH	Hundred Cubic Feet
HI	Hundred Sheets

CODE DEFINITION & EXPLANATION

HJ	Horsepower
HK	Hundred Kilograms
HL	Hundred Feet - Linear
HM	Miles Per Hour
HN	Millimeters of Mercury
HO	Hundred Troy Ounces
HP	Millimeter H2O <i>Unit of pressure</i>
HR	Hours
HS	Hundred Square Feet
HT	Half Hour
HU	Hundred
HV	Hundred Weight (Short)
HW	Hundred Weight (Long)
HY	Hundred Yards
HZ	Hertz
IA	Inch Pound <i>Unit of torque</i>
IB	Inches Per Second (Vibration Velocity) <i>Measure of vibration velocity</i>
IC	Counts per Inch
IE	Person
IF	Inches of Water <i>The maximum differential pressure for which a given meter will measure accurately and is expressed in inches of water</i>
IH	Inhaler <i>Metered-dose pressurized method of getting medication into the lungs or nasal passages</i>
II	Column-Inches <i>A unit of area one column wide and one inch high</i>
IL	Inches per Minute
IM	Impressions
IN	Inch
IP	Insurance Policy <i>An individual insurance contract</i>
IT	Counts per Centimeter
IU	Inches Per Second (Linear Speed) <i>Measure of linear speed</i>
IV	Inches Per Second Per Second (Acceleration) <i>Measure of acceleration</i>
IW	Inches Per Second Per Second (Vibration Acceleration) <i>Measure of vibration acceleration</i>
J2	Joule Per Kilogram <i>Measure of specific energy</i>
JB	Jumbo
JE	Joule Per Kelvin <i>Measure of heat capacity</i>
JG	Joule per Gram <i>Joule is unit of energy and gram is unit of mass</i>
JK	Mega Joule per Kilogram <i>"Mega" means "millions" and "kilo" means "thousands"</i>

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
JM	Megajoule/Cubic Meter <i>A megajoule is one million joules; conventional measurements for expressing the heating value available in a given volume of gas</i>	KX	Milliliters per Kilogram
JO	Joint	L2	Liters Per Minute <i>Measure of the rate of flow</i>
JR	Jar	LA	Pounds Per Cubic Inch
JU	Jug	LB	Pound
K1	Kilowatt Demand <i>Represents potential power load measured at predetermined intervals</i>	LC	Linear Centimeter
K2	Kilovolt Amperes Reactive Demand <i>Reactive power that must be supplied for specific types of customer's equipment; billable when kilowatt demand usage meets or exceeds a defined parameter</i>	LD	Liters Per Day
K3	Kilovolt Amperes Reactive Hour <i>Represents actual electricity equivalent to kilowatt hours; billable when usage meets or exceeds defined parameters</i>	LE	Lite
K4	Kilovolt Amperes <i>Measure of electrical power</i>	LF	Linear Foot
K5	Kilovolt Amperes Reactive <i>Measure of electrical power</i>	LG	Long Ton
K6	Kiloliter <i>One thousand liters</i>	LH	Labor Hours
K7	Kilowatt <i>Measure of electrical power</i>	LI	Linear Inch
KA	Cake	LJ	Large Spray
KB	Kilocharacters <i>Kilocharacters of data transmitted</i>	LK	Link
KC	Kilograms per Cubic Meter	LL	Lifetime <i>A duration ending with the death of the individual</i>
KD	Kilograms Decimal	LM	Linear Meter
KE	Keg	LN	Length
KF	Kilopackets <i>Kilopackets of data transmitted</i>	LO	Lot
KG	Kilogram	LP	Liquid Pounds
KH	Kilowatt Hour	LQ	Liters Per Day <i>Measure of liquid flow over a given time period</i>
KI	Kilograms/Millimeter Width	LR	Layer(s)
KJ	Kilosegments <i>Kilosegments of data transmitted</i>	LS	Lump Sum
KK	100 Kilograms	LT	Liter
KL	Kilograms/Meter	LX	Linear Yards Per Pound
KM	Kilograms per Square Meter, Kilograms, Decimal	LY	Linear Yard
KO	Millequivalence Caustic Potash per Gram of Product <i>Acid number and saponification number test results have a unit of measure of Millequivalence KOH per Gram</i>	M0	Magnetic Tapes <i>Number of Magnetic Tapes delivered with data</i>
KP	Kilometers Per Hour	M1	Milligrams per Liter
KQ	Kilopascal <i>Represents pressure</i>	M2	Millimeter-Actual
KR	Kiloroentgen <i>Measure of radiation</i>	M3	Mat
KS	1000 Pounds per Square Inch	M4	Monetary Value
KT	Kit	M5	Microcurie
KV	Kelvin	M6	Millibar
KW	Kilograms per Millimeter	M7	Micro Inch
		M8	Mega Pascals
		M9	Million British Thermal Units per One Thousand Cubic Feet <i>Represents conversion from a volume of gas to the heat value of the gas</i>
		MA	Machine/Unit
		MB	Millimeter-Nominal
		MC	Microgram
		MD	Air Dry Metric Ton
		ME	Milligram
		MF	Milligram per Sq. Ft. per Side
		MG	Metric Gross Ton
		MH	Microns
		MI	Metric
		MJ	Minutes
		MK	Milligrams Per Square Inch

CODE DEFINITION & EXPLANATION

ML	Milliliter
MM	Millimeter
MN	Metric Net Ton
MO	Months
MP	Metric Ton
MQ	1000 Meters
MR	Meter
MS	Square Millimeter
MT	Metric Long Ton
MU	Millicurie
MV	Number of Mults
MW	Metric Ton Kilograms
MX	Mixed
MY	Millimeter-Average
MZ	Millimeter-minimum
N1	Pen Calories <i>Daily calories prescribed to be taken for parenteral/enteral therapy</i>
N2	Number of Lines
N3	Print Point <i>A print point is approximately .0138"</i>
N4	Pen Grams (Protein) <i>Grams of amino acids prescribed to be taken for parenteral/enteral therapy</i>
N6	Megahertz <i>One million cycles per second</i>
N9	Cartridge Needle <i>Used with auto-injector units only, a disposable, filled cartridge that includes a needle</i>
NA	Milligrams per Kilogram
NB	Barge
NC	Car
ND	Net Barrels
NE	Net Liters
NF	Messages <i>Number of Messages transmitted, or delivered</i>
NG	Net Gallons
NH	Message Hours <i>Number of hours used, calculated at some rate basis such as Minutes/message carried</i>
NI	Net Imperial Gallons
NJ	Number of Screens <i>Number of data screens handled, or transmitted</i>
NL	Load
NM	Nautical Mile
NN	Train
NQ	Mho <i>The basic unit of electrical conductivity, having a unity value when one ampere of current flows through a conductor to which a one volt difference in electrical potential is applied</i>
NR	Micro Mho <i>The typical unit of electrical conductivity measurement - one millionth of an Mho</i>

CODE DEFINITION & EXPLANATION

NS	Short Ton <i>Two thousand pounds</i>
NT	Trailer
NU	Newton-Meter <i>Unit of energy or torque</i>
NV	Vehicle
NW	Newton <i>Represents force in the International Metric System (SI); equal to the force that produces an acceleration of 1 meter per second on a mass of 1 kilogram</i>
NX	Parts Per Thousand
NY	Pounds Per Air-Dry Metric Ton <i>A measure of chemical addition rate during manufacture and product constituent analysis</i>
OA	Panel
ON	Ounces per Square Yard
OP	Two pack
OT	Overtime Hours
OZ	Ounce - Av
P0	Pages - Electronic <i>Number of electronic pages of data delivered</i>
P1	Percent
P2	Pounds per Foot
P3	Three pack
P4	Four-pack
P5	Five-pack
P6	Six pack
P7	Seven pack
P8	Eight-pack
P9	Nine pack
PA	Pail
PB	Pair Inches
PC	Piece
PD	Pad
PE	Pounds Equivalent
PF	Pallet (Lift)
PG	Pounds Gross
PH	Pack (PAK)
PI	Pitch
PJ	Pounds, Decimal - Pounds per Square Foot - Pound Gage
PK	Package
PL	Pallet/Unit Load
PM	Pounds-Percentage
PN	Pounds Net
PO	Pounds per Inch of Length
PP	Plate
PQ	Pages per Inch
PR	Pair
PS	Pounds per Sq. Inch
PT	Pint
PU	Mass Pounds

CODE DEFINITION & EXPLANATION

PV	Half Pint
PW	Pounds per Inch of Width
PX	Pint, Imperial
PY	Peck, Dry U.S.
PZ	Peck, Dry Imperial
Q1	Quarter (Time)
Q2	Pint U.S. Dry <i>Volume equal to 33.6003125 cubic inches</i>
Q3	Meal <i>A group of food items packaged together for human consumption</i>
Q4	Fifty <i>A unit of issue in which a group of 50 items are consolidated and measured as a single entity</i>
Q5	Twenty-Five <i>A unit of issue in which a group of 25 items are consolidated and measured as a single entity</i>
Q6	Thirty-Six <i>A unit of issue in which a group of 36 items are consolidated and measured as a single entity</i>
Q7	Twenty-Four <i>A unit of issue in which a group of 24 items are consolidated and measured as a single entity</i>
QA	Pages - Facsimile <i>Number of FAX pages transmitted</i>
QB	Pages - Hardcopy <i>Number of printed pages delivered</i>
QD	Quarter Dozen
QH	Quarter Hours <i>Number of 15 minute increments of usage handled</i>
QK	Quarter Kilogram <i>A unit of metric weight equal to 250 grams</i>
QR	Quire
QS	Quart, Dry U.S.
QT	Quart
QU	Quart, Imperial
R1	Pica <i>Approximately .166 inches measured from the top of the ascender (the upward stroke in a lowercase letter, such as "t") to the bottom of the descender (the downward stroke in a lowercase letter, such as "p"). Twelve points equal one pica; six picas equal approximately one inch (.996)</i>
R2	Becquerel <i>Unit of radiation equal to 3.7×10^{10} of a curie</i>
R3	Revolutions Per Minute
R4	Calorie <i>The amount of heat it takes to raise the temperature of one gram of water one degree Centigrade at a pressure of one atmosphere</i>
R5	Thousands of Dollars
R6	Millions of Dollars
R7	Billions of Dollars
R9	Thousand Cubic Meters
RA	Rack
RD	Rod

CODE DEFINITION & EXPLANATION

RE	Reel
RG	Ring
RH	Running or Operating Hours <i>Measure of accumulated time of machine or piece of equipment has been running</i>
RK	Roll-Metric Measure
RL	Roll
RM	Ream
RN	Ream-Metric Measure
RO	Round
RP	Pounds per Ream
RS	Resets <i>Number of times a transmission is reset due to line drop, interrupt, etc.</i>
RT	Revenue Ton Miles <i>One ton of revenue-generating freight moving one mile</i>
RU	Run
S3	Square Feet per Second
S4	Square Meters per Second
S5	Sixty-fourths of an Inch
S6	Sessions <i>Number of interactive sessions handled</i>
S7	Storage Units <i>Number of storage increments used</i>
S8	Standard Advertising Units (SAUs) <i>A predefined partition of advertising page consisting of column-inch multiples</i>
S9	Slip Sheet <i>A cardboard platform used for holding product for storage or transportation</i>
SA	Sandwich
SB	Square Mile
SC	Square Centimeter
SD	Solid Pounds
SE	Section
SF	Square Foot
SG	Segment
SH	Sheet
SI	Square Inch
SJ	Sack
SK	Split Tanktruck
SL	Sleeve
SM	Square Meter
SN	Square Rod
SO	Spool
SP	Shelf Package
SQ	Square
SR	Strip
SS	Sheet-Metric Measure
ST	Set
SU	Short Ton
SV	Skid
SW	Skein

CODE DEFINITION & EXPLANATION

SX	Shipment
SY	Square Yard
SZ	Syringe <i>Glass or plastic barrels used to administer fluid medication under the skin, into a vein artery, or into a muscle</i>
T0	Telecommunications Lines in Service <i>Snapshot sample of lines in service</i>
T1	Thousand pounds gross
T2	Thousandths of an Inch
T3	Thousand Pieces
T4	Thousand Bags
T5	Thousand Casings
T6	Thousand Gallons
T7	Thousand Impressions
T8	Thousand Linear Inches
T9	Thousand Kilowatt Hours
TA	Tenth Cubic Foot
TB	Tube
TC	Truckload
TD	Therms
TE	Tote
TF	Ten Square Yards
TG	Gross Ton
TH	Thousand
TI	Thousand Square Inches
TJ	Thousand Sq. Centimeters
TK	Tank
TL	Thousand Feet (Linear)
TM	Thousand Feet (Board)
TN	Net Ton (2,000 LB).
TO	Troy Ounce
TP	Ten-pack
TQ	Thousand Feet
TR	Ten Square Feet
TS	Thousand Square Feet
TT	Thousand Linear Meters
TU	Thousand Linear Yards
TV	Thousand Kilograms
TW	Thousand Sheets
TX	Troy Pound
TY	Tray
TZ	Thousand Cubic Feet
U1	Treatments
U2	Tablet <i>A compressed or molded block of solid material; a collection of sheet paper glued together at one edge</i>
U3	Ten <i>10 each of an item of supply</i>
U5	Two Hundred Fifty <i>250 each of an item of supply</i>

CODE DEFINITION & EXPLANATION

UA	Torr <i>Pressure</i>
UB	Telecommunications Lines in Service - Average <i>Average number of lines in service specific to equal access requirements</i>
UC	Telecommunications Ports <i>Number of network access ports</i>
UD	Tenth Minutes <i>Number of 6 second increments of usage</i>
UE	Tenth Hours <i>Number of 6 minute increments of usage</i>
UF	Usage per Telecommunications Line - Average
UH	Ten Thousand Yards
UL	Unitless <i>Unit of Measure for properties or test results without units of measure</i>
UM	Million Units <i>Measure used to indicate large quantities in multiples of one million</i>
UN	Unit
VA	Voltampere per Kilogram
VC	Five Hundred <i>500 each of an item of supply</i>
VI	Vial
VS	Visit <i>A quantitative measure of the number of visits to a provider by the patient</i>
VT	Voltage
W2	Wet Kilo <i>Weight of product plus liquid solution</i>
WA	Watts per Kilogram
WB	Wet Pound
WE	Wet Ton
WG	Wine Gallon
WH	Wheel
WI	Weight per Square Inch
WK	Week
WM	Working Months
WP	Pennyweight
WR	Wrap
WT	Wattage
WU	Wattage Hours <i>Rate of electrical consumption 1 watt for 1 hour</i>
WW	Milliliters of Water
X1	Chains (Land Survey)
YD	Yard
YL	100 Lineal Yards
YR	Years
YT	Ten Yards
Z1	Lift Van
Z2	Chest
Z3	Cask
Z4	Hogshead
Z5	Lug

CODE DEFINITION & EXPLANATION

Z6 Conference Points
A participant on a conference call

Z8 Newspaper Agate Line

ZP Page

ZZ Mutually Defined

356 Pack

TYPE=N0MIN=1MAX=6

Number of inner pack units per outer pack unit.

SEGMENTS USED IN (AS SIMPLE):

PI Purchase Order Inquiry - Shipped Items Only
PK Packed-to-Date as of (Date)

CODE DEFINITION & EXPLANATION

PL	Part Lot, Stop Off <i>Shipment contains material for more than one producer and indicates a drop off of material</i>
PN	In Process - No Shipping Schedule
PO	Purchase Order Inquiry - Unshipped Items Only
PP	Purchase Order Inquiry - Specific Items
PR	Partial Shipment
PS	In Process, Scheduled to Ship On (Date)
PT	Part Lot <i>Material in a shipment for one producer which is part of a multi-producer shipment</i>
QN	Quantity Net Due
QP	Quantity Past Due
RC	Released to Carrier (Date) <i>Code indicating that material was given to a carrier for shipment</i>
RD	Revised Expect to Ship By (Date)
RT	Received Total
RW	Revised Expect to Ship Week of (Date)
SA	Shipment Quantity Increase <i>A shipment which contains a quantity of items greater than the quantity called for by contract</i>
SB	Seconds Available to Ship - Billed Quantity
SC	Shipment Quantity Decrease <i>A shipment which contains a quantity of items less than the quantity called for by contract</i>
SD	Shipped Damaged
SE	Replacement Shipment <i>A shipment of items replacing a previous shipment of items</i>
SF	Shipped and Held in Bond at Contractor's Plant <i>A technical "shipment" so that an invoice can be processed for payment, but the goods actually remain in bond at a facility awaiting further use or movement</i>
SG	Shipped and Held as Government-Furnished Property <i>A technical "shipment" so that an invoice can be processed for payment, but the goods actually remain at a facility for incorporation, a government-furnished property, into a further work product</i>
SH	Shipped (Date)
SI	Shipment Late, Scheduled to Ship on (Date)
SJ	Shipped or Performed as Indicated <i>A shipment or performance made according to the terms and conditions of a contract</i>
SK	Shipment Underrun Quantity <i>A shipment which contains a quantity of items less than the expected quantity of items but the contract allows for the lesser (unknown) quantity to be accepted in satisfaction of the contract requirement</i>
SL	Shipped - to - Date through (Date)
SP	Scheduled for Production at Factory on (Date)
SQ	Scheduled to ship (Summary quantity)
SS	Split Shipment
ST	Stop Off <i>Intermediate stops will be made by the carrier to drop off material</i>

CODE DEFINITION & EXPLANATION

SU	Seconds Available to Ship - Unbilled Quantity
UB	Unbilled Quantity Balance
UN	Unavailable
UR	Unsolicited Report
WS	Item Invoiced - Shipment to Follow
ZZ	Mutually Defined

238	Schedule Release <i>Planned release date for an item or product</i>
239	Baseline <i>The baseline or original plan that progress is measured against</i>
240	Baseline Start <i>The start date of baseline or original plan</i>
241	Baseline Complete <i>The complete date of the baseline or original plan</i>
242	Actual Start <i>The actual start date for a task or activity</i>
243	Actual Complete <i>The actual complete date for a task or activity</i>
244	Estimated Start <i>The revised plan or estimate of the start date for a task or activity</i>
245	Estimated Completion <i>The revised plan or estimate of the complete date for a task or activity</i>
246	Start no earlier than <i>Fixed start date for a task or activity - cannot begin before this date</i>

CODE DEFINITION & EXPLANATION

- 247** Start no later than
Fixed start date for a task or activity - cannot begin after this date
- 248** Finish no later than
Fixed finish date for a task or activity - cannot end after this date
- 249** Finish no earlier than
Fixed finish date for a task or activity - cannot end before this date
- 250** Mandatory (or Target) Start
Fixed start date - must begin on this date
- 251** Mandatory (or Target) Finish
Fixed finish date - must finish on this date
- 252** Early Start
The earliest date a task or activity can begin
- 253** Early Finish
The earliest date a task or activity can end
- 254** Late Start
The latest date a task or activity can begin
- 255** Late Finish
The latest date a task or activity can end
- 256** Scheduled Start
The scheduled start for a task or activity based on resource needs
- 257** Scheduled Finish
The scheduled finish for a task or activity based on resource needs
- 258** Original Early Start
The saved baseline or planned early start before current changes
- 259** Original Early Finish
The saved baseline or planned early finish before current changes
- 260** Rest Day
A non-working day such a Saturday or Sunday
- 261** Rest Start
The beginning of a range for rest days (from)
- 262** Rest Finish
The end of a range of rest days (to)
- 263** Holiday
A non-working day reserved for a company or national holiday
- 264** Holiday Start
The beginning of a range for holidays (from)
- 265** Holiday Finish
The end of a range of holidays (to)
- 266** Base
The start of base date for a calendar reference - all dates fall after it
- 267** Timenow
The current reporting period reference, or current status
- 268** End Date of Support
- 269** Date Account Matures
- 270** Date Filed
- 271** Penalty End
Date on which penalty period ends

CODE DEFINITION & EXPLANATION

- 272** Exit Plant Date
Date at which the product leaves the manufacturing site
- 273** Latest On Board Carrier Date
Latest date on which the cargo must be on board the carrier
- 274** Requested Departure Date
- 275** Approved
Date report was approved by contractor representative
- 276** Contract Start
The start date for a contract
- 277** Contract Definition
The date the contract was definitized
- 278** Last Item Delivery
The date the last item will be delivered to the customer
- 279** Contract Completion
The finish date for a contract
- 280** Date Course of Orthodontics Treatment Began or is Expected to Begin
- 281** Over Target Baseline Month
The date a budget baseline went over the target budget amount
- 282** Previous Report
The date a previous report was submitted
- 283** Funds Appropriation - Start
The date that funds appropriation begins
- 284** Funds Appropriation - End
The date that funds appropriation ends
- 285** Employment or Hire
Date on which the subscriber or dependent is hired
- 286** Retirement
Date on which the subscriber became retired
- 287** Medicare
Range of dates when the subscriber or dependent is eligible to receive medicare benefits
- 288** Consolidated Omnibus Budget Reconciliation Act (COBRA)
Range of COBRA coverage
- 289** Premium Paid to Date
Range of dates for which premium has been paid
- 290** Coordination of Benefits
Range for which coordination of benefits between insurers applies
- 291** Plan
Range of dates for which the plan is in effect
- 292** Benefit
Range of benefit coverage
- 293** Education
Range of dates when the subscriber or dependent is a student
- 294** Earnings Effective Date
Date on which earnings become effective for applicable benefits
- 295** Primary Care Provider
Range of dates for which the services of the primary care provider are in effect
- 296** Return to Work

CODE DEFINITION & EXPLANATION

297	Date Last Worked
298	Latest Absence <i>Latest occurrence of which the subscriber did not report to work</i>
299	Illness
300	Enrollment Signature Date <i>Date subscriber or dependent signed policy enrollment card</i>
301	Consolidated Omnibus Budget Reconciliation Act (COBRA) Qualifying Event <i>Date of the qualifying event which initiated COBRA benefits</i>
302	Maintenance <i>Date on which the maintenance was performed</i>
303	Maintenance Effective <i>Date on which the maintenance is effective</i>
304	Latest Visit or Consultation <i>Date subscriber or dependent last visited or consulted with a physician</i>
305	Net Credit Service Date <i>Date assigned by the employer to an employee who previously worked for them</i>
306	Adjustment Effective Date <i>Date on which the adjustment went into effect</i>
307	Eligibility <i>Range of dates when the subscriber or dependent were eligible for benefits</i>
308	Pre-Award Survey
309	Plan Termination <i>Date on which the plan terminated</i>
310	Date of Closing <i>The date a property is sold</i>
311	Latest Receiving Date/Cutoff Date
312	Salary Deferral <i>Date on which the subscriber begins to defer a portion of their salary</i>
313	Cycle <i>Range of dates as they pertain to a period of time</i>
314	Disability <i>Range of dates on which the physical or mental condition rendered the subscriber or dependent disabled</i>
315	Offset <i>Range of dates for which the subscriber or dependent will be receiving other income</i>
316	Prior Incorrect Date of Birth <i>The incorrect date of birth that was previously transmitted</i>
317	Corrected Date of Birth <i>Replaces previously transmitted incorrect date of birth</i>
318	Added
319	Failed
320	Date Foreclosure Proceedings Instituted <i>The date the first legal action is taken to terminate an owner's interest in realty begins</i>
321	Purchased <i>Date product/extended coverage was purchased</i>

CODE DEFINITION & EXPLANATION

322	Put into Service <i>Date product, subassembly, or replacement part was put in-service</i>
323	Replaced
324	Returned
325	Disbursement Date
326	Guarantee Date
327	Quarter Ending
328	Changed <i>Changes have been made in the address, routing, administrative contact, etc., of the dealer</i>
329	Terminated <i>Any condition previously reported by the carrier as preventing the completion of a move or service has been terminated</i>
330	Referral Date <i>The date when an educational official or teacher recommends that a student be evaluated for placement in a special education or other program</i>
331	Evaluation Date <i>The date on which a student was assessed for placement in a special education or other program</i>
332	Placement Date <i>The date which identifies when a student was enrolled in a special education or other program</i>
333	Individual Education Plan (IEP) <i>The date on which the plan specifying the special education instruction and services which a student is to receive was approved</i>
334	Re-evaluation Date <i>The date on which the student's placement in special education or other programs will be re-assessed</i>
335	Dismissal Date <i>The date on which the student exited from a special education or other program</i>
336	Employment Begin <i>Date on which the subscriber or dependent became employed</i>
337	Employment End <i>Date on which the subscriber or dependent ceased to be employed</i>
338	Medicare Begin <i>Date on which medicare benefits went into effect</i>
339	Medicare End <i>Date on which medicare benefits ceased to be in effect</i>
340	Consolidated Omnibus Budget Reconciliation Act (COBRA) Begin <i>Date on which COBRA benefits begin</i>
341	Consolidated Omnibus Budget Reconciliation Act (COBRA) End <i>Date on which COBRA benefits end</i>
342	Premium Paid to Date Begin <i>Date for which premium began to be applied</i>
343	Premium Paid to Date End <i>Date for which premium is paid through</i>
344	Coordination of Benefits Begin <i>Date on which Coordination of Benefits begin</i>

CODE DEFINITION & EXPLANATION

345	Coordination of Benefits End <i>Date on which Coordination of Benefits end</i>
346	Plan Begin <i>Date on which the plan begins</i>
347	Plan End <i>Date on which plan ends</i>
348	Benefit Begin <i>Date on which the subscriber's or dependent's benefit begin</i>
349	Benefit End <i>Date on which the subscriber's or dependent's benefit ends</i>
350	Education Begin <i>Date on which the subscriber or dependent became a student</i>
351	Education End <i>Date on which the subscriber or dependent ceased to be a student</i>
352	Primary Care Provider Begin <i>Date on which the subscriber's or dependent's primary care provider became effective</i>
353	Primary Care Provider End <i>Date on which the primary care provider's service ended</i>
354	Illness Begin <i>Date on which illness began</i>
355	Illness End <i>Date on which illness ended</i>
356	Eligibility Begin <i>Date on which eligibility begins</i>
357	Eligibility End <i>Date on which eligibility ends</i>
358	Cycle Begin <i>Date on which the cycle begins</i>
359	Cycle End <i>Date on which the cycle ends</i>
360	Disability Begin <i>Date on which the disability begins</i>
361	Disability End <i>Date on which the disability ends</i>
362	Offset Begin <i>Date subscriber or dependent begins receiving other income</i>
363	Offset End <i>Date other income benefits cease</i>
364	Plan Period Election Begin <i>Date on which the pledged contribution begins</i>
365	Plan Period Election End <i>Date on which the pledged contribution ended</i>
366	Plan Period Election <i>Range of dates for which the subscriber has pledged to contribute toward a benefit</i>
367	Due to Customer <i>Date an item is due to a customer</i>
368	Submittal <i>Date an item was submitted to a customer</i>
369	Estimated Departure Date

CODE DEFINITION & EXPLANATION

370	Actual Departure Date
371	Estimated Arrival Date
372	Actual Arrival Date
373	Order Start
374	Order End <i>Point after which data can no longer be used (or becomes invalid for use)</i>
375	Delivery Start <i>The date that deliveries will begin</i>
376	Delivery End <i>The date that deliveries will end</i>
377	Contract Costs Through <i>Date through which the costs reported in the contractor's request for progress payment are current</i>
378	Financial Information Submission <i>Date of the submission of contractor financial information</i>
379	Business Termination
380	Applicant Signed
381	Cosigner Signed
382	Enrollment
383	Adjusted Hire <i>Date of rehire is adjusted to give an employee credit for prior years of service, after a break in service has occurred</i>
384	Credited Service <i>Range of employment service used to determine the amount of plan benefits due the employee</i>
385	Credited Service Begin <i>The start date from which an employee's length of service, as defined in the plan document, will be calculated</i>
386	Credited Service End <i>The end date to be used in the calculation of an employee's length of service, as defined in the plan document</i>
387	Deferred Distribution <i>Date to which the participant has elected to defer the distribution of plan benefits (for lump sum payments)</i>
388	Payment Commencement <i>Date of the initial benefit payment (for installment payments)</i>
389	Payroll Period <i>The applicable payroll date for the financial transaction</i>
390	Payroll Period Begin <i>The start date of the payroll cycle for the financial transaction</i>
391	Payroll Period End <i>The end date of the payroll cycle for the financial transaction</i>
392	Plan Entry <i>Date the employee's participation in the plan is effective</i>
393	Plan Participation Suspension <i>Date the participant is suspended from the plan</i>
394	Rehire <i>Date the participant is rehired, after termination</i>

CODE DEFINITION & EXPLANATION

- 395** Retermination
Date the participant ends employment, after being rehired
- 396** Termination
Date the participant ends employment
- 397** Valuation
The date when the participant's total account balance is calculated
- 398** Vesting Service
Range of employment service used to determine vesting for distribution of plan benefits
- 399** Vesting Service Begin
The start date from which an employee's vesting percentage, as defined in the plan document, will be calculated
- 400** Vesting Service End
- 401** Duplicate Bill
- 402** Adjustment Promised
- 403** Adjustment Processed
- 404** Year Ending
- 405** Production
Used to identify dates and times that operations or processes were performed
- 406** Material Classification
Used to identify dates and times materials were classified or reclassified
- 408** Weighed
- 409** Date of Deed in Lieu
The date a voluntary conveyance of a property by deed in lieu is recorded
- 410** Date of Firm Commitment
The date an obligation to ensure the mortgage is issued
- 411** Expiration Date of Extension to Foreclose
The last day of a given time limit to commence foreclosure
- 412** Date of Notice to Convey
The date of the authorization to assign the contractual rights of a mortgage
- 413** Date of Release of Bankruptcy
The date of release from bankruptcy status
- 414** Optimistic Early Start
Best case earliest date a task or activity can begin
- 415** Optimistic Early Finish
Best case earliest date a task or activity can end
- 416** Optimistic Late Start
Best case latest date a task or activity can begin
- 417** Optimistic Late Finish
Best case latest date a task or activity can end
- 418** Most Likely Early Start
Most likely earliest date a task or activity can begin
- 419** Most Likely Early Finish
Most likely earliest date a task or activity can end
- 420** Most Likely Late Start
Most likely latest date a task or activity can begin
- 421** Most Likely Late Finish
Most likely latest date a task or activity can end

CODE DEFINITION & EXPLANATION

- 422** Pessimistic Early Start
Worst case earliest date a task or activity can begin
- 423** Pessimistic Early Finish
Worst case earliest date a task or activity can end
- 424** Pessimistic Late Start
Worst case latest date a task or activity can begin
- 425** Pessimistic Late Finish
Worst case latest date a task or activity can end
- 426** First Payment Due
- 427** First Interest Payment Due
- 428** Subsequent Interest Payment Due
- 429** Irregular Interest Payment Due
- 430** Guarantor Received
- 431** Onset of Current Symptoms or Illness
Date first symptoms appeared
- 432** Submission
Date on which claim billing information was sent to payer
- 433** Removed
- 434** Statement
Date on which billing document was created
- 435** Admission
Date of entrance to a health care establishment
- 436** Insurance Card
- 437** Spouse Retirement
Date on which patient's husband or wife has retired from his or her place of employment
- 438** Onset of Similar Symptoms or Illness
Date symptoms related to current illness first appeared
- 439** Accident
Date mishap occurred
- 440** Release of Information
Date patient signified it was acceptable to distribute pertinent information to other parties
- 441** Prior Placement
Date medical device was last placed or arranged
- 442** Date of Death
Date life terminated
- 443** Peer Review Organization (PRO) Approved Stay
Start and end date of approved confinement
- 444** First Visit or Consultation
Date patient first sought medical assistance
- 445** Initial Placement
Date medical device was positioned or arranged
- 446** Replacement
Date medical device was reinstalled or rearranged
- 447** Occurrence
Date on which an event happened
- 448** Occurrence Span
Start and end date on which a span of events happened
- 449** Occurrence Span From
Date on which span of events started
- 450** Occurrence Span To
Date on which span of events ended

CODE DEFINITION & EXPLANATION

- 451** Initial Fee Due
Date the first of one or more payments is due
- 452** Appliance Placement
Date orthodontic devices were arranged
- 453** Acute Manifestation of a Chronic Condition
Date serious symptoms were exhibited for a long term illness
- 454** Initial Treatment
Date medical treatment first began
- 455** Last X-Ray
Date of the most recent x-ray
- 456** Surgery
Date on which operation was performed
- 457** Continuous Passive Motion (CPM)
Date patient began using a device to provide uninterrupted motion not produced by active efforts
- 458** Certification
Date of a document attesting to a fact
- 459** Nursing Home From
Date on which patient entered nursing home
- 460** Nursing Home To
Date on which patient was released from nursing home
- 461** Last Certification
Date of the most recent document attesting to a fact
- 462** Date of Local Office Approval of Conveyance of Occupied Real Estate Property
The date local office approves of the transfer of an occupied property
- 463** Begin Therapy
Date treatment of physical or mental disorder started
- 464** Oxygen Therapy From
Date treatment with oxygen started
- 465** Oxygen Therapy To
Date treatment with oxygen ceased
- 466** Oxygen Therapy
Begin and end dates of treatment with oxygen
- 467** Signature
Date on which the accompanying signature was received
- 468** Prescription Fill
Date on which drug order was filled
- 469** Provider Signature
Date supplier of medical service signified the service in question was, in fact, provided
- 470** Date of Local Office Certification of Conveyance of Damaged Real Estate Property
The date local office approves of the transfer of a damaged property or the date of the mortgagee's certification that adequate fire insurance was not obtainable
- 471** Prescription
Date on which prescription was written
- 472** Service
Begin and end dates of the service being rendered
- 473** Medicaid Begin
Date patient became eligible for Medicaid benefits

CODE DEFINITION & EXPLANATION

- 474** Medicaid End
Date patient no longer eligible for Medicaid benefits
- 475** Medicaid
Start and end of effective period for Medicaid
- 476** Peer Review Organization (PRO) Approved Stay From
Date start of confinement was approved
- 477** Peer Review Organization (PRO) Approved Stay To
Date confinement approval ceased
- 478** Prescription From
Start of prescription period
- 479** Prescription To
End of prescription period
- 480** Arterial Blood Gas Test
Date of test to determine gas content in blood circulating from the heart, at rest, breathing room air
- 481** Oxygen Saturation Test
Date on which oxygen saturation testing occurred
- 482** Pregnancy Begin
Date pregnancy estimated to begin
- 483** Pregnancy End
Date pregnancy end, whether normal or abnormal delivery
- 484** Last Menstrual Period
- 485** Injury Begin
Date damage was inflicted to the body by an external source
- 486** Injury End
Date damage inflicted to the body by an external source ceased
- 487** Nursing Home
Facility for those unable to care for themselves
- 488** Collateral Dependent
Range of collateral dependent coverage
- 489** Collateral Dependent Begin
Date on which collateral dependent coverage begins
- 490** Collateral Dependent End
Date on which collateral dependent coverage ends
- 491** Sponsored Dependent
Range of sponsoring dependent coverage
- 492** Sponsored Dependent Begin
Date on which sponsored dependent coverage begins
- 493** Sponsored Dependent End
Date on which sponsored dependent coverage ends
- 494** Deductible
Date for which deductible is applied
- 495** Out-of-Pocket
Date for which out of pocket is applied
- 496** Contract Audit Date
- 497** Latest Delivery Date at Pier
- 498** Mortgagee Reported Curtailment Date
The date the mortgagee failed to meet a mandatory time requirement
- 499** Mortgagee Official Signature Date
The date the mortgagee's representative signs the claim for mortgage insurance benefits form

CODE DEFINITION & EXPLANATION

- 500** Resubmission
Date when original transaction should be resubmitted for further consideration
- 501** Expected Reply
Date when response may be expected
- 502** Dropped to Less than Half Time
Date on which the student ceased to be enrolled at least half time
- 503** Repayment Begin
Date on which repayment of the loan begins
- 504** Loan Servicing Transfer
Date on which the loan is transferred from one servicer to another servicer
- 505** Loan Purchase
Date on which the ownership of the loan changes
- 506** Last Notification
Date on which the lender was last notified of the less-than-half time information
- 507** Extract
Date on which the file was extracted from the database
- 508** Extended
The extended date for a performance requirement
- 509** Servicer Signature Date
The date an authorized representative of the lender servicing the mortgage signs the claim for mortgage insurance benefits form
- 510** Date Packed
- 511** Shelf Life Expiration
- 512** Warranty Expiration
- 513** Overhauled
- 514** Transferred
- 515** Notified
- 516** Discovered
- 517** Inspected
- 518** Voucher (Date of)
- 519** Date Bankruptcy Filed
Date of last bankruptcy action
- 520** Date of Damage
The date that the property became damaged
- 521** Date Hazard Insurance Policy Cancelled
The date the hazard insurance policy was cancelled
- 522** Expiration Date to Submit Title Evidence
The last day of an approved extension to submit title evidence without penalty
- 523** Date of Claim
The date the claim form is prepared
- 524** Date of Notice of Referral for Assignment
The date mortgagors are notified in writing that it is their lender's opinion that they are qualified for an assignment program and that their defaulted mortgage should be assigned
- 525** Date of Notice of Probable Ineligibility for Assignment
The date mortgagors are notified in writing that it is their lender's opinion that they are not qualified for an assignment program but they may apply directly to the program sponsor for consideration

CODE DEFINITION & EXPLANATION

- 526** Date of Foreclosure Notice
The date the mortgagee notifies the mortgage insurer that foreclosure has been initiated
- 527** Expiration of Foreclosure Timeframe
The last day of an extension of the time requirement to institute foreclosure proceedings on an insured mortgage
- 528** Date Possessory Action Initiated
The date the mortgagee initiates action to take possession of a property secured by a mortgage in default
- 529** Date of Possession
The date a mortgagee acquires possession of a property secured by a mortgage in default
- 530** Date of Last Installment Received
- 531** Date of Acquisition of Title
The date the mortgagee acquires good and marketable title to a property secured by a mortgage in default
- 532** Expiration of Extension to Convey
The last day of an extension of the time requirement to convey a property
- 533** Date of Assignment Approval
The date approval is given to assign the contract rights of a mortgage
- 534** Date of Assignment Rejection
The date a request to assign the contract rights of a mortgage is rejected
- 535** Curtailment Date from Advice of Payment
The date to which interest was curtailed
- 536** Expiration of Extension to Submit Fiscal Data
The date of the expiration of extension given to submit fiscal data
- 537** Date Documentation, or Paperwork, or Both Was Sent
- 538** Makegood Commercial Date
- 539** Policy Effective
- 540** Policy Expiration
- 541** Employee Effective Date of Coverage
- 542** Date of Representation
- 543** Last Premium Paid Date
- 544** Date Reported to Employer
- 545** Date Reported to Claim Administrator
- 546** Date of Maximum Medical Improvement
- 547** Date of Loan
- 548** Date of Advance
- 549** Beginning Lay Date
First date a vessel may call at the port
- 550** Certificate Effective
- 551** Benefit Application Date
- 552** Actual Return to Work
- 553** Released Return to Work
- 554** Ending Lay Date
Date by which the vessel will call at the port
- 555** Employee Wages Ceased
- 556** Last Salary Increase
- 557** Employee Laid Off

CODE DEFINITION & EXPLANATION

- 558** Injury or Illness
- 559** Oldest Unpaid Installment
The due date of the oldest complete mortgage payment that has not been paid
- 560** Preforeclosure Acceptance Date
The date that the mortgagor and the mortgagee accepts a preforeclosure acceptance plan
- 561** Preforeclosure Sale Closing Date
The date that the mortgagor and the mortgagee accept a preforeclosure sales closing plan
- 562** Date of First Uncured Default
- 563** Date Default Was Cured
- 564** Date of First Mortgage Payment
- 565** Date of Property Inspection
- 566** Date Total Amount of Delinquency Reported
- 567** Date Outstanding Loan Balance Reported
- 568** Date Foreclosure Sale Scheduled
- 569** Date Foreclosure Held
- 570** Date Redemption Period Ends
- 571** Date Voluntary Conveyance Accepted
The date voluntary conveyance of the property by the mortgagee holding the defaulted mortgage is accepted by the Federal Housing Commissioner
- 572** Date Property Sold
- 573** Date Claim Paid
- 574** Action Begin Date
The date a resolution action such as scheduling a repayment plan or a delay action such as Chapter 7 bankruptcy filing begins
- 575** Projected Action End Date
- 576** Action End Date
- 577** Original Maturity Date
- 578** Date Referred to Attorney for Foreclosure
- 579** Planned Release
- 580** Actual Release
- 581** Contract Period
- 582** Report Period
- 583** Suspension
- 584** Reinstatement
- 585** Report
- 586** First Contact
- 587** Projected Foreclosure Sale Date
- 589** Date Assignment Filed for Record
The date the transfer of the contract right to real estate is filed for record with the recording authority
- 590** Date of Appraisal
The date the value of a property is assessed
- 591** Expiration Date of Extension to Assign
The last day of a given time limit to assign the contractual rights of a mortgage
- 592** Date of Extension to Convey
The last day of a given time limit to complete the transfer of real property

CODE DEFINITION & EXPLANATION

- 593** Date Hazard Insurance Policy Refused
The date the insurance carrier refused to renew the policy on a property
- 594** High Fabrication Release Authorization
The date of the purchaser's program number that authorizes the highest amount of material production
- 595** High Raw Material Authorization
The date of the purchaser's program number that authorizes the highest amount of raw material or purchased components in their original state to be secured for production
- 596** Material Change Notice
- 597** Latest Delivery Date at Rail Ramp
- 598** Rejected
- 599** Repayment Schedule Sent
- 600** As Of
- 601** First Submission
- 602** Subsequent Submission
- 606** Certification Period Start
- 607** Certification Revision
- 608** Continuous Coverage Date(s)
- 609** Prearranged Deal Match
- 610** Contingency End
- 611** Oxygen Therapy Evaluation
The date the patient was last examined by the physician to determine the need for oxygen therapy
- 612** Shut In
The date when the valves are closed or the pump is stopped at the wellhead
- 613** Allowable Effective
The date the report is effective for allowable purposes
- 614** First Sales
- 615** Date Acquired
- 616** Interviewer Signed
- 617** Application Logged Date
- 618** Review Date
- 619** Decision Date
- 620** Previously Resided
- 621** Reported
- 622** Checked
- 623** Settled
- 624** Presently Residing
- 625** Employed in this Position
- 626** Verified
- 627** Second Admission Date
Date of second admission to a health care facility which occurred during the service period of this claim
- 628** Inquiry
- 629** Account Opened
- 630** Account Closed
- 631** Property Acquired
- 632** Property Built
- 633** Employed in this Profession
- 634** Next Review Date

CODE DEFINITION & EXPLANATION

635 Initial Contact Date
 636 Date of Last Update
 637 Second Discharge Date
Date of second discharge from a health care facility which occurred during the service period of this claim

CODE DEFINITION & EXPLANATION

- F6** Indirect Offset Excess
Other income defined under the contract which is deducted after the calculation of an employee's net benefit. This figure is then compared against a predefined aggregate percent to derive maximum payable benefit
- F7** Black Lung Disease
- F8** Rehabilitation
- F9** Educational Benefit
- G1** Profit Sharing
- G2** Workmen's Compensation
Liability on employers to pay benefits and furnish care to employees injured and to pay benefits to dependents of employees killed in the course of and because of their employment
- G3** Pension
- G4** Other Disability Plan
- G5** Other Income
- G6** Salary Continuance
- G7** Short-term Disability
- G8** Permanent and Total Disability
A physical or mental condition that makes an insured incapable of performing one or more duties for any occupation
- G9** State Disability Plan
A unique disability plan defined by state. This plan applies only to specific states
- GA** Free Goods
- GB** Coupon Related
- GC** Market Development Fund Deduction
- GD** Samples
- GE** Slotting Charge
- GF** Invalid
- GG** Unsalable Merchandise
- GH** Billback Allowance Deduction
- GJ** Unsalable Payments Deduction
- GK** Split Commission Deduction - Basis Amount
- GL** Unresolved Customer Deduction
- GM** Split Commissions Deduction - Commission Amount
- H1** Information Forthcoming
Awaiting paper correspondence with associated details
- H2** Payment Previously Sent
Payee received compensation at a prior time
- H3** Loan Paid in Full
Mortgage company no longer has interest in property loan is paid-up
- H4** Bill Insured
Non-escrowed policy, collect premium directly from policyholder
- H5** Loan Service Released
Mortgage companies, servicing rights to a loan were sold to another company; therefore the mortgage company no longer has an interest in the property
- H6** Partial Payment Remitted
Total compensation was not sent

CODE DEFINITION & EXPLANATION

- H7** Payment Forthcoming
Total compensation will sent in the future
- H8** Bill Mortgagee
The mortgage company is informing the insurance company that they are escrowing for a policy that the insurance company indicated as nonescrow
- H9** Coverage Summary Needed
The mortgage company is informing the insurance company that coverage information was not provided with the renewal notification
- IA** Invoice Amount Does Not Match Account Analysis Statement
- IC** Interest Charge-Rate Reduced to New York Prime Rate
- IE** Interest Charge - Rate Reduced to Earnings Credit Rate
- IL** Interest Charge-Rate Reduced to London Inter-bank Offer Rate (LIBOR)
- J1** Nonreimbursable
- J2** Transportation Discrepancy Report (TDR) Submitted
- J3** Promised Adjustment Not Received
- J4** Deficiency Report Authorized Adjustment
- J5** Duplicate Summary Billing (Same Bill Number)
- J6** Duplicate Summary Billing (Different Bill Number)
- J7** Duplicate Summary Billing (Second Billing)
- J8** Unable to Process
- J9** Noninterfund Bill
- K1** Other Coverage Placed
An indication that the insured has obtained permanent insurance from a firm other than the one that is currently billing
- K2** Invalid Policy Number
The lender was not able to identify policy for which a notification was received
- K3** Renewal Not Received
The lender is informing the insurance company that they have a loan with an expiring policy for which a renewal notification was not received
- L1** Audit
An itemized charge has been adjusted to this amount due to a pre-audit being performed; that audit identified a variance between the amount authorized by the receiver of that goods/service and the amount charged by the provider of the goods/service
- L2** Discount
The dollar value of the discount applied which reduces the payment amount due the payee
- L3** Penalty
The dollar value of the penalty assessed a business entity for a past due debt
- L4** Administrative Fees
The dollar value of the administrative fee assessed a business entity for handling a debt
- L5** Interest Due
The dollar value of interest assessed a business entity for a past due debt

CODE DEFINITION & EXPLANATION

L6	Interest Owed <i>The dollar value of interest owed a business entity for a past due payment</i>
L7	Miscellaneous Deductions <i>A deduction taken from the amount due a business entity for which not specific reason code exists; this code must be accompanied by a free-form explanation of the deduction</i>
L8	Miscellaneous Credits <i>An amount that increases the payment due a business entity for which no specific reason code exists; this code must be accompanied by a free-form explanation of the credit</i>
L9	Military Distribution Adjustment

480 Version / Release / Industry Identifier Code

TYPE=AN MIN=1 MAX=12

Code indicating the version, release, subrelease, and industry identifier of the EDI standard being used, including the GS and GE segments. If code in DE455 in GS segment is X, then in DE 480 positions 1-3 are the version number; positions 4-6 are the release and subrelease, level of the version; and positions 7-12 are the industry or trade association identifiers (optionally assigned by user). If code in DE455 in GS segment is T, then other formats are allowed.

 21 Original Cost of Property Amount
 22 Owner's Estimate of Value Amount
 23 Appraised Value Amount
 24 Gross Monthly Income Amount
 25 Assets at Bankruptcy
 26 Negotiated Cost
The estimated cost negotiated in a Cost-Plus-Fixed-Fee contract or the negotiated contract target cost in either a Fixed-Price-Incentive contract or a Cost-Plus-Incentive-Fee contract
 27 Authorized Unpriced Work
Effort for which written authorization has been received but defined costs have not been agreed to
 28 Target Price
The negotiated contract cost plus profit or fee applicable to the defined contract effort
 29 Estimated Price
The latest revised estimate of the total cost at complete for a contract

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
30	Contract Ceiling <i>The ceiling price applicable to defined effort</i>	46	Cumulative Cost Variance (CV) <i>The cumulative difference between the cumulative Budgeted Cost for Work Performed and the cumulative Actual Cost for Work Performed</i>
31	Estimated Contract Ceiling <i>The estimated ceiling price applicable to all authorized contract effort (both defined and undefined)</i>	47	Reprogram Cost Variance <i>Adjustments to previously reported variances due to reprogramming efforts</i>
32	Target Fee or Profit Amount <i>The fee (can also be percent) of profit that will apply to defined contract effort</i>	48	Reprogram Budget <i>Adjustments to the budget due to reprogramming efforts</i>
33	Original Contract Target Cost <i>Value of the original negotiated contract</i>	49	At Complete Budget (BAC) <i>The total budget assigned to a work package or task; also, the total budget of any summary of these work tasks</i>
34	Negotiated Contract Changes <i>The cumulative cost (excludes fee and profit) applicable to defined contract changes that have occurred since the beginning of the contract</i>	50	At Complete Latest Revised Estimate (LRE) <i>Latest estimate of cost at completion including over or under runs for all authorized work. It is the sum or the actuals to date plus the estimate of remaining work (Estimate to Complete or ETC)</i>
35	Current Target Cost <i>Sum of Original Contract Target Cost and Negotiated Contract Changes</i>	51	At Complete Variance <i>The difference between the Budget at Complete and the Estimate at Complete</i>
36	Contract Budget Base (CBB) <i>Sum of Current Target Cost and Estimated Cost of Authorized, Unpriced Work</i>	52	Total Allocated Budget <i>Sum of all budgets allocated to the performance of a contract</i>
37	Current Budgeted Cost for Work Scheduled (BCWS) <i>The planned cost for a defined scope of work or portion of work that is scheduled to be done during a given period</i>	53	Difference (Contract Budget Base - Total Allocated Budget) <i>The difference between the Contract Budget Base and the Total Allocated Budget</i>
38	Current Budgeted Cost for Work Performed (BCWP) <i>The sum of budgets for completed work packages and completed portions of open work packages, plus the applicable portion of the budgets for level of effort and apportioned effort; also known as earned value</i>	54	Forecast <i>Alternate term for Estimate to Complete (amount of work remaining); or a number to compare to an Estimate to Complete</i>
39	Current Actual Cost of Work Performed (ACWP) <i>The costs incurred and recorded for work performed in a given period</i>	55	At Complete Forecast <i>Alternate term for Estimate at Complete (actual costs plus estimate of remaining work ETC); or to compare to an Estimate at Complete</i>
40	Current Schedule Variance (SV) <i>The difference between the Budgeted Cost for Work Performed and the Budgeted Cost for Work Scheduled</i>	56	Current Cost Performance Index (CPIe) - Efficiency (BCWP/ACWP) <i>An indication of cost efficiency for work that has been done</i>
41	Current Cost Variance (CV) <i>The difference between the Budgeted Cost for Work Performed and the Actual Cost of Work Performed</i>	57	Current Cost Performance Index (CPIp) - Planned (ACWP/BCWP) <i>Alternate calculation for Code 56</i>
42	Cumulative Budgeted Cost for Work Scheduled (BCWS) <i>The cumulative planned cost for a defined scope of work or portion of work that is scheduled to be done during a given period</i>	58	Current Schedule Performance Index (SPI) <i>A cumulative indication of schedule efficiency for work that has been done</i>
43	Cumulative Budgeted Cost for Work Performed (BCWP) <i>The cumulative sum of budgets for completed work package and completed portions of open work packages, plus the applicable portion of the budgets for level of effort and apportioned effort; also known as earned value</i>	59	Cumulative Cost Performance Index (CPIe) - Efficiency (BCWP/ACWP) <i>A cumulative indication of cost efficiency for work that has been done</i>
44	Cumulative Actual Cost of Work Performed (ACWP) <i>The cumulative cost incurred and recorded for work performed in a given period</i>	60	Cumulative Cost Performance Index (CPIp) - Planned (ACWP/BCWP) <i>Alternate calculation for Code 59</i>
45	Cumulative Schedule Variance (SV) <i>The cumulative difference between the cumulative Budgeted Cost for Work Performed and the cumulative Budgeted Cost for Work Scheduled</i>	61	Cumulative Schedule Performance Index (SPI) <i>An indication of schedule efficiency for work that has been done</i>

CODE DEFINITION & EXPLANATION

- 62** To Complete Performance Index (TCPI) for Budget at Complete (BAC)
An indication of the efficiency level necessary to meet the budget target
- 63** To Complete Performance Index (TCPI) for Estimate At Complete (EAC)
An indication of the efficiency level necessary to meet the estimate target
- 64** Initial Contract Price Target
Value of initial negotiated contract target price
- 65** Initial Contract Price Ceiling
Value of initial negotiated contract ceiling price
- 66** Adjusted Contract Price Target
Value of initial contract plus supplemental agreements
- 67** Adjusted Contract Price Ceiling
Value of adjusted ceiling price
- 68** Funds Authorized to Date
Value of contract fund authorized from the beginning through the current reporting period
- 69** Accrued Expenditures
Actual cost to date
- 70** Open Commitments
Value of supplies or other items committed to for payment (such as on delivery of products)
- 71** Forecast of Billings
This is a forecast of billings to the government; includes cumulative amounts already billed (including progress or advance payments) and a forecast of amounts that will be billed to the government
- 72** Estimated Termination Costs
Cost that would be necessary to liquidate all government obligations if the contract were to be ended in that reporting period
- 73** Accrued Expenditures plus Open Commitments
Sum of actual costs and committed costs
- 74** Contract Work Authorized - Definitized
The estimated price for the authorized work including profit or fee, and incentive and cost sharing associated with projected over or under runs
- 75** Contract Work Authorized - Not Definitized
The estimate of the fund requirements for performing required work that firm contract prices have not yet been agreed to
- 76** Contract Work Authorized - Total
Sum of Contract Work Authorized - Definitized and Contract Work Authorized - Not Definitized
- 77** Forecast of Work - Not Yet Authorized
An estimate of fund requirements including fee or profit for changes proposed, but not yet directed by the customer
- 78** Forecast of Work - All Other
An estimate of fund requirements for additional work that the contractor expects to do
- 79** Forecast of Work - Total
Sum of Forecast Work - Not Yet Authorized and Forecast of Work - All Other
- 80** Funding - Total Requirements
The estimate of total fund requirements for contract work authorized and forecast

CODE DEFINITION & EXPLANATION

- 81** Funds Carryover
For incrementally funded contract, this is the amount that the prior Federal fiscal year funding was in excess of the prior year's requirement
- 82** Net Funds Required
An estimate of net funds required, less funds carryover
- 83** Contract Work Authorized (with fee/profit) Actual or Projected
These are the cumulative and projected values for the contract
- 84** Contract Work Authorized (with fee/profit) Actual or Projected - At Complete
The cumulative value from the start to the end of the contract
- 85** Optimistic Estimate at Complete (EAC)
Best case estimate of cost at the completion for risk analysis calculations
- 86** Pessimistic Estimate at Complete (EAC)
Worst case estimate of cost at completion for risk analysis calculations
- 87** Most Likely Estimate at Complete (EAC)
Most likely estimate of cost completion for risk analysis calculations
- 88** "As Is" Appraisal Amount
- 89** "Subject To" Appraisal Amount
- 90** "Completion Per Plans" Appraisal Amount
- 91** Site Value Amount
- 92** Compensation
All eligible monies paid to the employee, as defined in the plan document
- 93** Contribution
Amount of contribution made to the plan
- 94** Death Benefit
Total benefit amount to be distributed to the employee's beneficiaries
- 95** Death Benefit Decrement
Periodic benefit amount to be distributed to the employee's beneficiaries, until the account balance is exhausted
- 96** Employee Account Balance
Total benefit amount owed to an employee from a defined contribution plan
- 97** Loan Repayment
Amount of loan repayment made to the plan
- 98** Prior W2
Taxable compensation, as reported on the IRS W2 form, for the prior tax year
- 99** Single Premium
Total amount available for purchasing plan benefits
- A1** Average Negative Ledger Balance
Aggregate amount of overdrafts divided by number of days overdrawn in analysis period
- A2** Average Positive Collected Balance
Aggregate amount of positive daily collected balances divided by number of days in analysis period that collected balances were positive

CODE DEFINITION & EXPLANATION

- A3** Average Negative Collected Balance
Aggregate amount of negative daily collected balances divided by number of days in analysis period that collected balances were negative
- A4** Average Positive Ledger Balance
Aggregate amount of positive daily ledger balances divided by number of days in analysis period that ledger balances were positive
- A5** Disallowed - Estimated
Approximate value rejected to the individual
- A6** Disallowed - Actual
Calculated value rejected to the individual
- A7** Noncovered Charges - Estimated
Approximate value not covered by the benefit plan
- A8** Noncovered Charges - Actual
Calculated value not covered by the benefit plan
- A9** Allowed - Estimated
Approximate amount considered for payment under the provisions of the contract prior to determination of actual amount
- AA** Allocated
- AB** Adjusted Collected Balance
- AC** Average Collected Balance
- AD** Adjusted Total
- AE** Arrearage
- AF** Average Float
- AG** Adjusted Gross Income
- AH** Loan Balance Difference
The difference between the unpaid loan balance due as originally claimed and the correct unpaid loan balance
- AI** Sale Amount
The amount for which the property was sold
- AJ** Funds Held by Mortgagee
Cash amount held or deposited in the account of a borrower by a lender of a mortgage
- AK** Attorney Fees
- AL** Average Ledger Balance
- AM** Amount Financed
- AN** Bankruptcy Fee
Fee paid to attorney for bankruptcy procedure
- AO** Amount Override
Used when the commission payment is not based on sales and is an agreed upon flat dollar amount
- AP** Amount Prior to Fractionalization
Full charge amount for the service per service period, prior to pro-rated fractionalization due to partial period billing
- AQ** Average Price Per Call
The total amount of money associated with a category of calls divided by the total number of calls within the category calculated to provide call summary details
- AR** Fees to Public Officials for Foreclosure
The fees paid to public officials for the foreclosure of a property with a defaulted mortgage

CODE DEFINITION & EXPLANATION

- AS** Average Price Per Minute
The total amount of money associated with a category of calls divided by the total number of minutes within the category calculated to provide call summary details
- AT** Total Received
- AU** Coverage Amount
The dollar amount of property coverage provided by a specific policy contract
- AV** Actual Cash Value
An amount indicating the replacement cost, less depreciation, less prior damage, plus betterment
- AW** Replacement Cost
The estimate replacement dollar amount of the insured's property
- AX** Previous Price
- AY** Title Cost
The costs of obtaining a good and marketable title to a property
- AZ** Other Foreclosure and Acquisition Expenses
Any additional expense incurred to foreclose on and acquire property with a defaulted mortgage excluding attorney fees and transfer taxes
- B0** Bond
- B1** Benefit Amount
- B2** Bonuses and Commissions Divided Over 12 Months
- B3** Bonuses Divided Over 12 Months
- B4** Bonuses and Commissions
- B5** Budgeted
- B6** Allowed - Actual
Amount considered for payment under the provisions of the contract
- B7** Deductible - Estimated
Approximate amount, deducted by the payer, from the allowed amount in order to meet the contract deductible provisions
- B8** Co-insurance - Estimated
Approximate value still to be paid by the individual under the co-insurance provisions of the benefit contract
- B9** Co-insurance - Actual
Calculated value still to be paid by the individual under the co-insurance provisions of the benefit contract
- BA** Bargain
- BB** Mortgage Insurance Premiums
The premium paid to an insurer to obtain (and maintain) mortgage insurance on a mortgage
- BC** Billing Cycle Net Fee Position (Excess/Deficit)
- BD** Balance Due
- BE** Disbursements for Authorized Repair
- BF** Hazard Insurance Premium
Premium paid to an insurer for an insurance policy covering the loss of property and other structures
- BG** Eviction Attorney Fees
The fees paid to the attorney handling the forcing out of the occupants and their belongings from a property

CODE DEFINITION & EXPLANATION

BH	Eviction Expenses <i>The cost incurred by the landlord or lender of the mortgage to force the occupants and their belongings from the property</i>
BI	Property Taxes
BJ	Disbursements Not Shown Elsewhere <i>Monies paid out but not recorded or shown elsewhere</i>
BK	Disbursements for Protection and Preservation <i>Monies paid out for protection and preservation of a property</i>
BL	Disbursements for Inspections and Boarding <i>The funds paid out for inspecting the property and boarding</i>
BM	Adjustments
BN	Rental Income
BO	Rental Expense <i>Expenses incurred in the management and in the maintenance of rental properties</i>
BP	Average Net Collected Balance
BQ	Bail
BR	Adjusted Insured Loss Amount
BS	Mortgage Note Interest
BT	Bank Reject Total
BU	Overhead Costs
BV	Uncollected Interest
BW	Amount Due from Buyer at Closing
BX	Amount Owed to Buyer at Closing
BY	Additional Closing Expenses <i>Any additional cost incurred at closing in the disposal of real estate property</i>
BZ	Deficiency Judgment Expenses <i>The expenses incurred by a mortgagee in seeking a judgment from the court against a mortgagor to attach the mortgagor's assets for repayment on the defaulted mortgage</i>
C1	Co-Payment Amount <i>Partial payment of medical services' expenses required in group health insurance, in addition to the membership fee. For example, for each visit to a physician a member may be required to pay \$5, regardless of the expense of the services rendered. Or for each prescription for drugs and medicines, the member may have to pay a flat fee of \$2 regardless of the actual cost</i>
C2	Child Rider Coverage
C3	Prior Payment - Estimated <i>Approximate amount paid at an earlier time</i>
C4	Prior Payment - Actual <i>Amount paid in reality at an earlier time</i>
C5	Claim Amount Due - Estimated <i>Approximate value rightfully belonging to the individual</i>
C6	Claim Amount Due - Actual <i>Amount to be distributed for medical care</i>
C7	Payor Responsibility - Estimated
C8	Payor Responsibility - Actual

CODE DEFINITION & EXPLANATION

C9	Disallowed Cost Containment - Actual <i>Amount disallowed by the payer due to the failure of either the provider or insured to meet the cost containment provisions of the insurance contract, managed care contract or preferred provider organization contract under which payment has been requested for this claim</i>
CA	Contractor Cumulative to Date
CB	Collected Balance Required
CC	Chargeback Claim Amount
CD	Overpaid Section 235 Subsidy <i>The excess amount of assistance payment paid pursuant to Section 235 of the National Housing Act</i>
CE	Summary Amount <i>The total and condensed amount</i>
CF	Appraisal Fees
CG	Commission Fees Deducted
CH	Change Amount
CI	Funds Held for Insured <i>Funds to which the loan servicer has retained the right of possession as security for a loan</i>
CJ	Other Deductions <i>Funds deductible according to mortgage insurer's guidelines for which no specific categories exist</i>
CK	Adjustments <i>Adjustments to claim amount required by mortgage insurer's guidelines</i>
CL	Outstanding Balance Current Lender
CM	Claimant Requested Total <i>The total monies requested for a claim</i>
CN	Special Assessments <i>Any additional assessment, other than property taxes, on a property by the local tax jurisdiction for which a lien is or could be attached</i>
CO	Taxes on Deed <i>Taxes imposed on a deed by which a property was acquired by the lender and transferred to the mortgage insurer</i>
CP	Statutory Disbursements <i>Expenses required by state or local statutes, including court cost, filing fees, publication cost, etc.</i>
CQ	Net Claim Amount <i>Total disbursements plus interest minus deductions from the claim</i>
CR	Contractor at Complete
CS	Commission Sales <i>Those sales used to calculate commission payments</i>
CT	Contract <i>Indicates the value stated in the contract</i>
CU	Subcontractor Cumulative to Date
CV	Subcontractor at Complete
CW	Earned Value
CX	Actual
CY	Cumulative Budget
CZ	Cumulative Earned Value

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
D1	Deferred Compensation Commissions <i>An income amount comprised of deferred commissions and or bonuses</i>	DQ	Settlement
D2	Deductible Amount <i>The amount of covered expenses that must be incurred by the insured before benefits become payable to the insurer</i>	DR	Alimony Expense
D3	Deferred Compensation Commissions and Bonuses <i>An income amount comprised of deferred commissions and or bonuses</i>	DS	Alimony Income
D4	Deferred Compensation	DT	Child Support Expense
D5	Dependent Care Contribution	DU	Child Support Income
D6	Disallowed Cost Containment - Estimated <i>Approximate amount disallowed by the payer due to the failure of either the provider or insured to meet the cost containment provisions of the insurance contract, managed care contract or preferred provider organization contract under which payment has been requested for this claim</i>	DV	Separate Maintenance Expense
D7	Dispensing Fee <i>A charge to prepare and distribute medicines to those who are to use them</i>	DW	Separate Maintenance Income
D8	Discount Amount <i>A reduction from the usual price</i>	DX	Deductible Waived
D9	Cumulative Actual	DY	Per Day Limit
DA	Original Mortgage <i>The original loan obligation amount on a mortgage note before any mortgage payment is made</i>	DZ	Job-related Expense
DB	Unapplied Section 235 Funds <i>The amount of the earned Section 235 assistance payments pursuant to Section 235 of the National Housing Act that have not been applied</i>	E1	Employer Year to Date Contribution
DC	Unapplied Buydown Fund <i>The amount of buydown fund (amount of discount in rate a lender gives to a borrower) that has not been applied</i>	E2	Employee Annual Pledge Amount
DD	Direct Deposit	E3	Employee Current Contribution
DE	Estimate of Damage <i>The approximation or assessment of damage sustained by a property</i>	E4	Employer Pledge Amount
DF	Authorized Bid <i>The balance remaining in the escrow account after all appropriate disbursements have been made on the date of the assignment or conveyance</i>	E5	Employer Current Contribution
DG	Escrow Balance <i>The amount authorized to be bid at a foreclosure sale or sales price in a preforeclosure sale</i>	E6	Eligible Wage Amount
DH	Total Disbursements <i>The total of all funds disbursed for hazard insurance premiums, taxes, eviction, and other expenses</i>	E7	Employee Year to Date Contribution
DI	Charge Off	E8	Education Contribution
DJ	Liens Amount Original	E9	Initial Fee <i>Beginning charge before any reductions</i>
DK	Release of Lien	EA	Earnings Allowance
DL	Debit	EB	Collected Balance (Excess/Deficit)
DM	Asset	EC	Allowance (Excess/Deficit)
DN	Liability	ED	Estimated Cost of Attendance
DO	Satisfaction	EE	Other Expense
DP	Exemption	EF	Estimated Financial Aid
		EG	Other Income
		EH	Amount of Mortgages and Liens
		EI	Mortgage Payment(s)
		EJ	Insurance, Maintenance, Taxes and Miscellaneous
		EK	Net Rental Income
		EL	Present Market Value
		EM	Gross Rental Income
		EP	Employer Annual Pledge Amount <i>The yearly amount that is being pledged by the employer</i>
		EQ	Condominium Association Fees
		ER	Homeowner Association Fees
		ES	Mortgage Insurance Proceeds
		ET	Net Proceeds from Sale of Real Estate Property
		EU	Insurance Proceeds (Primary Settlement)
		EV	Presale Proceeds
		EW	Pledged Savings
		EX	As Is Broker's Opinion <i>Value, in the opinion of the real estate broker, of the real estate property "as is"</i>
		EY	Subject To Broker's Opinion <i>Value, in the opinion of the real estate broker, of the real estate property subject to repairs</i>

CODE DEFINITION & EXPLANATION

- F1** Maximum Allowable Cost (MAC) Penalty Copay
Amount paid by individual purchasing drugs when the maximum allowable cost for the drug as determined by the Health Care Financing Administration has been exceeded
- F2** Patient Responsibility - Actual
Calculated value one receiving medical care is obliged to pay
- F3** Patient Responsibility - Estimated
Approximate value one receiving medical care is obliged to pay
- F4** Postage Claimed
Monetary amount rightfully deserved for mailing
- F5** Patient Amount Paid
Monetary amount value already paid by one receiving medical care
- F6** Provider Reserves
- F7** Sales Tax
Monetary amount that a taxing entity requires be added on to the cost of an item based upon the sales price of the item
- F8** Usual and Customary Charge - Estimated
Approximate charge that is commonly assessed for a service rendered
- F9** Usual and Customary - Actual
Charge that is commonly assessed for a service rendered
- FA** Coordination Fee
- FB** Calculation Fee
- FC** Expected Family Contribution
- FD** Direct Deposit Flipped to Check
- FE** Fee
- FF** Application Fee
- FG** Licensing Fee
- FH** Regulatory Fee
- FI** First Interest Payment Amount
- FJ** Waiver Fee
- FK** Other Unlisted Amount
- FL** Float
- FM** Fair Market Value
- FN** Fine
- FO** Fees Paid
- FP** Fees Paid Year to Date
- G1** Indicated Value by Sales Comparison Approach
- G2** Indicated Value by Income Approach
- G3** Price per Unit Area
- G4** Reconciliation of Final Value Estimate
- G5** Estimated Monthly Market Rent
- G6** Adjusted Sales Price
- G7** Sales or Financing Concessions
- G8** Indicated Value by Cost Approach
- G9** As-is Value of Site Improvements
- GA** Depreciated Value of Improvements
- GB** Price, High Value

CODE DEFINITION & EXPLANATION

- GC** Price, Low Value
- GD** Physical Depreciation
- GE** Functional Depreciation
- GF** External Depreciation
- GG** Adjusted Sales Price of Comparable Sales
- GH** Predominate Value
- GV** Gross Value
- I1** Investment Income
- IB** Investable Balance
- IC** Accrued Unpaid Interest To Be Capitalized
- ID** Import Duty Amount
- IE** Excise Tax Amount
- II** Irregular Interest Payment Amount
- IP** Interest Payable During Repayment Period
- IR** Insurance Recovery
The amount of reimbursement received from a hazard insurance policy on losses sustained
- IU** Accrued Unpaid Interest Not To Be Capitalized
- J1** Current Face Amount
- J2** Original Face Amount
- JA** Assessment
- JC** Counter Claim
- JG** Asset Cost Applicable to Entire Contract
- JH** Asset Cost Applicable to Portion of Contract
- JU** Judgment
- K1** Unpaid Security Balance
- K2** Total Unpaid Security Balance
- K3** Veterans Affairs Funding Fee
The fee a home buyer pays to the Department of Veterans Affairs (VA) to secure a VA-guaranteed mortgage loan from a VA-approved lender
- K4** Initial Target Fee
- K5** Minimum Fee
- K6** Maximum Fee
- K8** Special Accounting Classification Reference Number (ACRN) Amount
- K9** New Price
- KA** Estimated Contract
The estimated total amount of a contract
- KB** Estimated Net Adjustment
The estimated net adjustment to be made to a previously transmitted amount
- KC** Obligated
An amount a party has an obligation to pay upon a successful performance by another party, (e.g., funds obligated on a contract)
- KD** Undefined
An indicator that the amount has not yet been established but will be established at a future date
- KE** Annual Revenue
The sum of all incomes generated by a business over a period of one year
- KF** Net Paid Amount
- KG** Net Collected Amount

CODE DEFINITION & EXPLANATION

KH	Deduction Amount
KI	Net Variance Amount
KJ	Minimum Contract Amount
KK	Item Gross Amount
KL	Collected Amount
KM	Disbursed Amount
KN	Gross Amount of Payment
KO	Committed Amount
KP	Principal and Interest
KQ	Incremental Order Amount
KS	Taxes and Insurance
KT	Default Principal
KU	Default Interest
KW	Default Taxes and Insurance
KX	Miscellaneous Fee Collections
KY	Not-To-Exceed Price
KZ	Mortgagor's Monthly Obligations
L1	Legal Contribution
L2	Leasehold Insurance Amount
LC	Lessor's Cost
LE	Loan Eligibility Amount
LI	Line Item Unit Price
LM	Limit
LN	Lien Payoff <i>The amount of a lien which must be paid in order to obtain clear title to a property, including Internal Revenue Services lien, superior liens and Mechanics liens</i>
LP	List Price
LW	Tax and Insurance Escrow Fund Balance <i>Balance of taxes and insurance funds in escrow or impound account at prescribed cutoff date</i>
LX	Loan Expense
LY	Total Remaining Principal Balance for the Issuer <i>The total principal balance of all the issuer's mortgage loans remaining unpaid</i>
LZ	Delinquent Payment
M1	Maximum Out of Pocket Amount
M2	Medical Contribution
M3	Tax rate expressed as a flat fee
M4	Minimum amount of tax to be paid
M5	Minimum amount to which tax rate is applied
M6	Maximum amount of tax to be paid
M7	Maximum amount to which tax rate is applied
M8	Markup Amount
MA	Maximum Amount
MB	Undistributed Budget <i>Budget applicable to contract effort, but not yet assigned to a specific task or activity</i>
MC	Cost of Money <i>The costs associated with investing capital in the facilities used on government contracts</i>
MN	Monthly Limit

CODE DEFINITION & EXPLANATION

MO	Minimum Order Value <i>Minimum value of order allowed</i>
MP	Monthly Payment Amount
MR	Management Reserve <i>An amount of the total allocated budget withheld for management control purposes</i>
MS	Past-Due Taxes and Assessment Remaining Unpaid
MZ	Valuation Price
N1	Net Worth
NA	Net Adjustment
NB	Net Compensation Position
NC	Negative Collected Balance
ND	Per Person Monthly Limit
NE	Net Billed <i>Amount billed, less allowable payments from other sources</i>
NF	Monthly Net Fee Position (Excess/Deficit)
NG	Medicare Copayment <i>Medicare determined Copayment</i>
NH	Medicare Deductible <i>Medicare determined deductible</i>
NI	Medicare Paid <i>Medicare determined payment</i>
NJ	Other Insurance Paid Amount <i>Actual amount paid by a Non-Medicare third party</i>
NL	Negative Ledger Balance
NO	Non Commission Sales <i>Those sales not included for commission payment calculation</i>
NP	Net to Pay Total
NQ	Adjusted Nonrecurring
NR	Nonrecurring
NS	Net Savings Amount <i>Amount of dollar saving resulting from the use of service, such as Optional Calling Plans</i>
NY	Net Year to Date (Excess/Deficit)
O1	Amount of First Mortgage Being Refinanced
OB	Outstanding Loan Balance
OF	Contractor's Offer
OL	Outstanding Balance Other Lender
OP	Original Payment Total
P1	Partner's Calendar Year Salary
P2	Prior Plan Year Gross Salary
P3	Premium Amount <i>The periodic payment required to keep a policy in force</i>
P4	Prior Year's Wage
P5	Partner's Tax Year Salary
P6	Premium Due
P7	Partner's K1 Tax Year Amount
P8	Partner's K1 Calendar Year Amount
P9	Current Mortgage Principal Balance
PA	Payment Cancellation Total
PB	Billed Amount <i>Total amount due on the period bill</i>

CODE DEFINITION & EXPLANATION

PC	Positive Collected Balance
PD	Credit
PE	Plan Period Election <i>The amount of money the employee has pledged to contribute to a flexible spending account for a specified period of time</i>
PF	Principal
PG	Payoff
PH	Per Occurrence Deductible
PI	Per Occurrence Monthly Limit
PJ	Past Due
PL	Positive Ledger Balance
PM	Last Premium Amount
PN	Prior Gross Invoice Total
PO	Percent Override <i>The percentage used to calculate the additional commission payment for a Beauty Advisor; this is normally used for a Counter Manager</i>
PP	Payment Prior to Advance
PQ	Advance Amount
PR	Per Occurrence Limit
PS	Per Occurrence per Day Limit
PT	Per Occurrence Aggregate Limit
PU	Unsecured Priority Claim
PV	Prepetition Charges
PW	Per Occurrence Maximum per Week Limit
PX	Per Person Maximum per Week Limit
PY	Per Person per Day Limit
PZ	Original Principal Balance
Q1	Proposed
QN	Quarterly Net Fee Position (Excess/Deficit)
RA	Accelerated Royalty
RB	Per Person Deductible
RC	Refund Check
RD	Per Person Limit
RE	Royalty Due
RF	Restitution
RH	Per Person Aggregate Limit
RP	Repair
RR	Reserve Requirement Amount <i>Funds required to be put aside and excluded from earnings on balances; nominally 12%; expressed in dollars</i>
RS	Reserves
RT	Last Payment
RW	Total Delinquency
RZ	Lender's Total Delinquency <i>The total amount of delinquent payments due on the mortgage loans held by a lender</i>
S1	Salary Amount
S2	Salary with Bonuses
S3	Salary with Commissions
S4	Salary with Subchapter S Corporation Income

CODE DEFINITION & EXPLANATION

S5	Salary with Partner's Bonuses
S6	Subchapter S Corporation
S7	Sole Proprietorship
S8	Period Rental
S9	Secured Claim Allowed
SA	Campaign Summary Amount
SB	Stated Amount
SC	Total Service Charge
SE	Service Charges Which Cannot Be Compensated by Balances <i>Specifically excluded from compensating balance arrangements and must be paid by other means such as fee remittance or direct debt</i>
SI	Subsequent Interest Payment Amount
SM	Supplemental
SP	Sales Price
SR	Secured Claim
SS	Campaign Summary Amount to be Shared
ST	State
SU	Surcharge
SX	Severance Tax
T1	Teacher
T2	Total Claim Before Taxes <i>The total monies requested for a single claim before any taxes were included</i>
T3	Total Submitted Charges
T4	Total Current Balance
TA	Total Annual Sales
TB	Total Annual Sales to Customer
TC	Proposed Cost <i>The cumulative total of all the costs proposed</i>
TD	Proposed Profit <i>The amount of profit proposed for the successful performance of a proposed contract action</i>
TE	Proposed Fee <i>The amount of fee proposed for the successful performance of a proposed contract action</i>
TF	Total Proposed Price <i>The total of the total proposed cost, cost of money, and either total proposed profit or total proposed fee being proposed for successful performance</i>
TG	Alternate Proposed Price <i>An amount not supported by the aggregation of mathematical calculations contained in the proposal that will be accepted by the proposer for the successful performance of a proposed contract action</i>
TH	Total Claim Allowed
TI	Title Insurance Amount on Loan
TK	Total Amount of Contract
TL	Total Prior Loan Amount Owed
TP	Total payment amount
TS	Total Sales <i>The total of commission and non commission sales needed to calculate intersell amount</i>
TT	Total Transaction Amount

625 COD Method of Payment Code

TYPE=ID MIN=1 MAX=1

Code indicating method of payment acceptable for C.O.D. charge collection.

SEGMENTS USED IN (AS SIMPLE):

G82 W66

TRANSACTION SETS USED IN:

894 940

CODE DEFINITION & EXPLANATION

- 1 Certified or Cashier's Check Only
- 2 Certified or Cashier's or Company Check Only
- 3 Certified or Cashier's or Company or Personal Check Only
- 4 Cash or Certified Check Only

626 Excess Transportation Reason Code

TYPE=ID MIN=1 MAX=2

Code identifying the reason for shipment via premium transportation rather than the normal mode of transportation.

SEGMENTS USED IN (AS SIMPLE):

ETD

TRANSACTION SETS USED IN:

856

CODE DEFINITION & EXPLANATION

- A Schedule Increase, Forecast Change or Special Car Order
- B Engineering Change or Late Release
- C Specification (Schedule) Error/Overbuilding
- D Shipment Tracing Delay
- E Plant Inventory Loss
- F Building Ahead of Schedule
- G Vendor Behind Schedule
- H Failed to Include In Last Shipment or Unauthorized Premium

CODE DEFINITION & EXPLANATION

- I Carrier Loss Claim
- J Transportation Failure
- K Insufficient Weight For Carload
- L Reject or Discrepancy
- M Transportation Delay
- N Lack of Railcar or Railroad Equipment
- P Releasing Error
- R Record Error or Late Reported Discrepancy Report
- T Common or Peculiar Part Schedule Increase
- U Alternate Supplier Shipping for Responsible Supplier
- V Direct Schedule or Locally Controlled
- W Purchasing Waiver Approval
- X Authorization Code to be Determined
- Y Pilot Material, Samples or Pre-Production
- ZZ Mutually Defined

627 Excess Transportation Responsibility Code

TYPE=ID MIN=1 MAX=1

Code identifying the organization responsible for paying the premium transportation costs.

SEGMENTS USED IN (AS SIMPLE):

ETD

TRANSACTION SETS USED IN:

856

CODE DEFINITION & EXPLANATION

- A Customer Plant (Receiving Location)
- B Material Release Issuer
- S Supplier Authority
- X Responsibility to be Determined
- Z Mutually Defined

628 Hierarchical ID Number

TYPE=AN MIN=1 MAX=12

A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.

SEGMENTS USED IN (AS SIMPLE):

HL

CODE DEFINITION & EXPLANATION

028 Due on Transfer
029 Transfer of Ownership Pending
030 Fraud
031 Unable to Contact Borrower
A01 Missed Delivery
Transportation carrier missed customer delivery
A02 Release Signature or Release Number
A03 Incorrect Address
Shipment has been returned to carrier's terminal; address correction is required
A04 Indirect Delivery
A05 Unable To Locate
Transportation carrier is unable to find customer location
A06 Address Corrected - Delivery Attempt
A07 Refused by Consignee
A08 Not In On Delivery Completed
A09 Damaged - Delivery Completed
A10 Damaged - Delivery Not Completed
Shipment completely damaged or destroyed; delivery not attempted
A11 Business Closed
A12 Package Sorted To Wrong Route
Delay caused by carrier sorting shipment incorrectly
A13 Other
A14 Returned to Shipper
A15 Business On Strike
A16 Payment Received
A17 Customer Requested Future Delivery
Delay in delivery per the customer's (consignee's) request
A18 Mis-sort
A19 Restricted Articles Incompatible
A20 Restricted Articles Unacceptable
A21 Bulk Plane
A22 Package Missed Inbound Plane At Origin Station
A23 Customer Dropped Off Package After Aircraft Depart
A24 Accident
Delay caused by shipment being contained in vehicle involved in accident
A25 Package Rec'd At Destination Sta. Without Airbill
A26 Consignee Related
Unspecified delay caused by consignee
A27 Driver Related
The driver returned the shipment to the terminal
A28 Package Missorted During Aircraft Unload
A29 Hold Changed To Delivery Package
A30 Mechanical Breakdown
A31 Arrived In Station After Courier Dispatch
A32 Aircraft Arrived Late In Hub
A33 Other Carrier-Related
Delivery delay caused by a non-specified carrier related reason
A34 Package Shipped From Overgoods

CODE DEFINITION & EXPLANATION

A36 Holding In Overgoods
A37 Damaged Rewrapped In Hub
A38 Detached Airbill
A39 Previous Stop
Customer previous to this stop caused delay
A40 Shipper Related
Unspecified delay caused by the shipper
A41 Standard Air Package
A42 Holiday - Closed
A43 Weather or Natural Disaster Related
Shipment delayed by natural disaster or severe weather
A45 Delivery Not Completed
Delivery stopped for unidentified reason
A46 Recipient Unavailable -- Delivery Delayed
A49 ODA/Cartage Agent
Agent delayed load at drop lot
A50 Improper International Paperwork
A51 Carrier Keying Error
A keying error that has caused a delay in the shipment
A52 No Requested Arrival Date
The shipper or consignee has to provide the required date of delivery
A55 Hold Due to Customs/Documentation
A58 Unable to Contact Recipient For Broker Information
A59 Hold At Location
A61 International Manifest
A63 Puerto Rican Tax Authorities Holding Package
A64 Non-FEC Broker Advised
A65 Commercial Customs Release
A73 Package Delivered Before Commitment
Customer accepted shipment early
A74 Package Delivered After Commitment
A84 Civil Event Related Delay
A85 Customer-requested Early Delivery
A91 Exceeds Service Limitations
A95 Past Cutoff Time
A96 Insufficient Pickup Time
Load tendered to the carrier late
A98 Missed Pickup
Carrier missed pickup appointment
A99 Alternate Carrier Delivered
ABN Abnormal
A code specifying that health screening results for a student were not in the expected range of findings
ACC Actual Contractor-Caused Delay
Delay actual rather than anticipated; caused by the contractor rather than the government
ACD Anticipated Contractor-Caused Delay
Delay anticipated rather than actual; caused by the contractor rather than the government
AGC Actual Government-Caused Delay
Delay actual rather than anticipated; caused by the government rather than the contractor

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
AGD	Anticipated Government-Caused Delay <i>Delay anticipated rather than actual; caused by the government rather than the contractor</i>	B26	International diploma or certificate (such as International Baccalaureate)
B01	Reconsigned <i>The shipper or consignee redirected the shipment</i>	B27	Student is eligible to continue or return or both
B02	Appointment or Pre-Arranged Delivery Date <i>Shipment is being held pending an appointment or pre-arranged delivery date</i>	B28	Student is on suspension or dismissal
B03	Trap for Customer <i>According to a customer's request, shipment is being held at a terminal before delivery</i>	B29	Student is expelled (from PreK - grade 12)
B04	Held for Payment <i>Delay caused by required payment not available</i>	B30	Currently enrolled but courses in progress not included
B05	Held for Consignee <i>Customer unable to accept order as specified</i>	B31	Not currently enrolled
B06	Consignee Closed (Inventory, Vacation, Etc.) <i>Shipment is being held because consignee is closed</i>	B32	Previous enrollment. Used for entry or exit or both at school other than the sending school
B07	Dock Pick-Up <i>Shipment is awaiting pickup at carrier's dock</i>	B33	Unreported - Information is not available in record
B08	Improper Unloading Facility or Equipment <i>Shipment is on hold pending correct unloading facility or equipment</i>	B34	Currently enrolled and courses in progress are included
B09	Receiving Time Restricted <i>Shipment is being held, consignee's receiving time is restricted</i>	B35	Highest Honors
B10	Order Notify <i>Shipment is being held pending notification of order</i>	B36	Second Highest Honors
B11	Held for Protective Service <i>Shipment is being held pending assignment of protective service</i>	B37	Third Highest Honors
B12	Connecting Line or Cartage Pick-Up <i>Shipment is awaiting connecting line or cartage company pickup</i>	B38	Dropped
B13	Held per Shipper <i>Plant held order for any reason</i>	B39	Probation
B14	Missing Documents <i>Shipment is being held because of missing documents</i>	B40	Suspended
B15	Border Clearance <i>Shipment is being held pending clearance at a border point</i>	B41	Requested record will not be sent. Cannot identify student.
B16	Road Conditions <i>Shipment is being delayed due to road conditions</i>	B42	Requested record will not be sent electronically. Paper copy will be sent.
B17	Did not complete secondary school	B43	Requested record will not be sent. Have student contact us.
B18	Standard high school diploma	B44	Part of requested record being sent. Remainder to be sent by hard copy.
B19	Advanced or honors diploma	B45	Requested record will not be sent. No record of student.
B20	Vocational diploma	B46	Requested record will not be sent. Degree or Diploma not yet awarded.
B21	Special education diploma	B47	Requested record will not be sent. Institutional policy requires student release. Have student contact us.
B22	Certificate of completion or attendance	B48	Record being sent at request of student
B23	Special certificate of completion	B49	Record being sent to replace one previously sent
B24	General Education Development Diploma (GED) <i>A high school equivalency diploma awarded as a result of successfully passing the American Council on Education General Education Development Tests</i>	B50	Requested record being sent
B25	Other high school equivalency diploma <i>A high school equivalency diploma awarded on a basis other than the American Council on Education General Education Development Tests</i>	B51	Student on Suspension or Dismissal; Eligible to Apply for Re-entry
		B52	According to established regulations or statutes, the student is considered to be a "dropout"
		BW2	Bottom Well Cannot Handle Two or More Units
		BWL	Bottom Well Cannot Handle Unit Assigned because of Length
		BWT	Bottom Well Cannot Handle Unit Assigned because of Type
		BWW	Bottom Well Cannot Handle Unit Assigned because of Width
		C01	Waiting for Customer Pick-up <i>Consignee will pick up shipment at dock</i>
		C02	Credit Hold <i>Customer on credit hold</i>
		C03	Suspended at Customer Request
		C04	Customer Vacation
		C05	Customer Strike
		C06	Waiting Shipping Instructions

CODE DEFINITION & EXPLANATION

- C07** Waiting for Customer Specified Carrier
C08 Collect on Delivery Required
C09 Cash Not Available from Consignee
C10 Customs (Import/Export)
Delivery delayed by customs
C11 No Requested Arrival Date Provided To Carrier By Shipper
Shipper failed to provide arrival date
C12 No Requested Arrival Time Provided To Carrier By Shipper
C13 Loan Paid in Full
C14 Loan Refinanced, Insured by Insurer Receiving Report
C15 Loan Refinanced, Insured by Other Insurance Carrier
C16 Loan Refinanced, No Insurance Required
C17 Coverage No Longer Required
C18 No Outstanding Commitments
CDE Clearance to Destination Exceeded
D01 Carrier Dispatch Error
Shipment has been delayed for delivery or pickup because of a carrier dispatch error
D02 Driver Not Available
D03 Student has attended a nonpublic school or home education program in- or out-of-state this year, but is entering a public school in this state for the first time this school year
D04 Student was received from another attendance reporting unit in the same school
D05 Student was received from a school in the same district
D06 Student was received from another public school outside the district either in- or out-of-state
D07 Student was received from a nonpublic school either in or out of the district or has returned after having been enrolled in a home education program. The student must have been enrolled previously in a public school this year
D08 Student unexpectedly reentered the same school after withdrawing or being discharged
D09 Student was expected to attend a school but did not enter as expected for unknown reasons
D10 Student was promoted, retained, or transferred to another attendance-reporting unit in the same school
D11 Student was promoted, retained, or transferred to another school in the same district
D12 Student withdrew to attend another public school in the same district
D13 Student withdrew to attend another public school in- or out-of-state
D14 Student over compulsory attendance age who leaves school voluntarily with no intention of returning
D15 Student who graduated from school with a standard diploma
D16 Student who graduated from school with a special diploma
D17 Student who left school with a certificate of completion

CODE DEFINITION & EXPLANATION

- D18** Student who left school with a special certificate of completion
D19 Student who left school with a State General Education Development (GED) High School Diploma
D20 Student Withdrew to Attend a Non-Public School or Home Education Program In- or Out-of-State.
D21 Student withdrew from school due to hardship
D22 Student has not entered any school in this or any other state this school year
D23 Previously attended out-of-state public school but is entering a public school in this state for the first time this school year
D24 Returned to Regular Education Program
D25 Reclassified Fully English Proficient
D26 Retained in Current Grade
D27 Placed in Next Grade After Expected Grade
D28 Placed in Transitional Program (K-1)
D29 Status Pending Completion of Summer School (K-12)
D30 Declined Services
D50 Delayed
EB1 Deceased
EB2 Did not Attend this Semester
EB3 Withdrawn
EB4 Graduated
EB5 Never Attended
EB6 Full-Time Enrollment
EB7 Half-Time Enrollment
EB8 Less Than Half-Time Enrollment
EB9 Approved Leave of Absence
EBA No Record Found
ENR Export Release Not Required
The foreign military sales (FMS) shipment for which this Notice of Availability is provided will not require an Export Release
ERR Export Release Required
The foreign military sales (FMS) shipment for which this Notice of Availability is provided will require that an Export Release be obtained
EXD Excessive Dimension Cannot be Accepted
F73 Non-express Clearance Delay
F74 International Non-carrier Delay
HZM Hazardous Material Placement
IV1 Failed Material Returned for Repair
IV2 Material Shipped Between Intermediate Points
MP2 Middle Position Cannot Handle Two or More Units
MPL Middle Position Cannot Handle Unit Assigned because of Length
MPT Middle Position Cannot Handle Unit Assigned because of Type
MPW Middle Position Cannot Handle Unit Assigned because of Width
NOR Normal
A code indicating that health screening results for a student were in the expected range of findings

CODE DEFINITION & EXPLANATION

P01	Processing Delay
P02	Waiting Inspection
P03	Production Falldown <i>Shipper held order for stock</i>
P04	Held for Full Carrier Load <i>Minimum number of shipments or weight is required by the consignee for delivery</i>
P05	Waiting Test Results
P06	Producer Strike
P07	Producer Vacation
S01	Delivery Shortage <i>Delivery of shipment not complete due to misdirected pieces of freight</i>
T01	Tractor With Sleeper Car Not Available
T02	Tractor, Conventional, Not Available
T03	Trailer Not Available
T04	Trailer Not Usable Due to Prior Product
T05	Trailer Class Not Available
T06	Trailer Volume Not Available
T07	Insufficient Delivery Time
TP2	Top Position Cannot Handle Two or More Units
TPL	Top Position Cannot Handle Unit Assigned because of Length
TPT	Top Position Cannot Handle Unit Assigned because of Type
TPW	Top Position Cannot Handle Unit Assigned because of Width
UCD	Unknown Cause of Delay <i>Reason and responsibility for the delay cannot be determined</i>
UND	Undetermined
W01	Out of Stock
W02	Equipment Cut
W03	Booking Location Request
W04	On Hold
W05	Order Discrepancy
W06	Receiving Location Request
W07	Inventory Discrepancy

831 Missing or Invalid Cancellation Type Code
832 Invalid Request or Cancellation Flag
833 Invalid Cancellation Request (Item Not in Financial Warehouse to Cancel)
834 Missing or Invalid Effective Payment Date

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
847	Closed/Non-Existent Account Number	IWT	Invalid Weight
ASA	Associated Authorization <i>Other vehicles contained on a multilevel railcar have different shipper authorized destinations than this vehicle</i>	LOC	Invalid Damage Area Code <i>The Damage Area Code (DE556) reported is invalid</i>
ASV	Associated Vehicle Identification Number(s) Unknown <i>Other vehicles contained on a multilevel railcar are unknown to the shipper</i>	MBL	Multiple Bills of Lading <i>Multiple Bills of Lading have been transmitted for a 3 for 2 shipment (only one bill of lading is required)</i>
AVE	Associated Vehicle Identification Number(s) Invalid <i>Vehicle Identification Numbers (DE539) for other vehicles contained on a multilevel railcar fail check digit verification</i>	MDN	Missing Department Number
CAL	Currency Calculation <i>The amount calculated using the specified exchange rate exceeds the maximum length of the application data field</i>	MID	Missing Identification Code
COV	Conflicting Authorizations <i>Commodities are moving on same Freight Bill which have conflicting contract rates or terms</i>	MQT	Missing Quantity
CUR	Invalid Currency Code <i>Currency Code (DE100) reported is invalid</i>	MWT	Missing Weight
DBL	Duplicate Bill of Lading Number <i>Carrier has reused a shippers authorization number assigned to another shipment</i>	NAU	Not Authorized <i>The move/service reported by the carrier has not been authorized by the shipper</i>
DDT	Departure Date Invalid <i>The move/service date precedes the authorized date</i>	NCL	No Clearance Authorization <i>The vessel clearance reported by the carrier has not been authorized by the shipper</i>
DRC	Duplicate Railcar Departure <i>The railcar reported has a conflicting previous departure on the same date</i>	NCR	No Clearance Reported <i>The freight bill submitted by the carrier precedes the vessel clearance</i>
DTE	Incorrect Date <i>The reported date is incorrect (e.g. premature date for transaction or non-existent date such as February 30)</i>	NDP	No Departure Reported <i>The railcar arrival has been received prior to the railcar departure</i>
DUP	Duplicate Transaction <i>The identical transaction has been transmitted more than once within the same input file</i>	NDT	No Termination Date <i>The move/service/status change reported requires termination of a previously transmitted Vehicle Status Code (DE1094)</i>
ICA	Invalid Claim Amount <i>Claim Total does not equal total of claim Line Item Totals</i>	NIF	Invalid Status Location <i>The location reported with the Status Code (DE1094) does not match any move/service locations authorized by the shipper</i>
ICG	Invalid Charge Allowance Qualifier <i>The Charge Allowance Qualifier (DE538) reported is invalid</i>	NOD	Not on Departure <i>Vehicle Identification Numbers reported on railcar arrival do not match Vehicle Identification Numbers reported on railcar departure</i>
IDC	Invalid Decline/Amend Reason Code <i>The Decline/Amend Reason Code (DE548) reported is invalid</i>	NRA	No Railcar Arrival <i>A subsequent shipper authorized move/service has been reported prior to reported arrival of a railcar</i>
IDN	Invalid Department Number	OTH	Other <i>Unspecified application error</i>
IID	Invalid Identification Code	PND	Pending Payment <i>The freight bill/invoice/waybill has previously been transmitted and is awaiting maturity of credit terms prior to payment</i>
IMD	Invalid Railcar Type <i>The Equipment Description Code (DE40) reported is invalid</i>	PPD	Previously Paid <i>The freight bill/invoice/waybill has previously been paid</i>
INC	Incomplete Transaction <i>Optional Element(s) required by the application are missing</i>	PRM	Primary Inspection Not Received <i>A Motor Vehicle Inspection Details transaction containing a Supplemental Inspection indicator (DE835) has been reported prior to the primary inspection</i>
INF	Invalid Status Code <i>The Vehicle Status Code (DE1094) reported is invalid</i>	QTY	Quantity <i>The number of items on the freight bill/invoice/waybill does not equal the number of unique segments which specifically identify those items</i>
IPR	Status Code Previously Reported <i>The status code reported has previously been processed by the receiver</i>	RAT	No Rate Available <i>The shipper is unable to determine the rate for the move/service reported by the carrier</i>
IQT	Invalid Quantity		

CODE DEFINITION & EXPLANATION

RTE	Invalid Shipper's Route Code <i>The shippers route code reported by the carrier is invalid</i>
SCA	Invalid SCAC <i>The Standard Carrier Alpha Code (DE140) reported is invalid</i>
SCD	Invalid Vehicle Service Code <i>The Vehicle Service Code (DE1062) reported is invalid</i>
SEV	Invalid Damage Severity Code <i>The Damage Severity Code (DE541) reported is invalid</i>
SPL	Invalid SPLC Code <i>The Standard Point Location Code (DE154) is invalid</i>
STR	Invalid Storage Days Calculation <i>The number of storage days billed does not equal the difference between arrival date and departure date less grace days</i>
TRN	Turnover <i>The vessel clearance reported was authorized by the consignee rather than by the shipper</i>
TYP	Invalid Damage Type Code <i>The Damage Type Code (DE540) reported is invalid</i>
UAU	Used Authorization <i>The move/service reported has previously been reported as completed</i>
UCN	Unknown Claim Number <i>The claim number reported by the carrier is unknown to the claimant</i>
UKN	Unknown Move/Service <i>The move/service reported has not been mutually defined by the trading partners</i>
UNV	Unknown Vehicle Identification Number <i>The reported Vehicle Identification Number (DE539) is unknown to the shipper</i>
VIN	Invalid Vehicle Identification Number <i>The reported Vehicle Identification Number (DE53) fails the check digit calculation</i>
VND	Vehicle Not Departed <i>Storage charges have been billed prior to reported departure of a vehicle from storage</i>
VOS	Offsite Storage <i>Storage charges have been reported for an item known to be at another location</i>
ZDS	Zero Storage Days <i>The arrival and departure dates are equal, per diem storage charges have not accrued</i>
ZZZ	Mutually Defined

648 Price Multiplier Qualifier

TYPE=ID MIN=3 MAX=3

Code indicating the type of price multiplier.

1N	Scrap allowed <i>Amount of scrap allowed during production</i>	48	Secondary Net Quantity
1O	Calendar Units <i>The number of calendar units such as 1 per day or 1 per week</i>	49	Number of Signed Bills of Lading
1P	Resource (Quantity) available <i>Resource amount such as labor hours or material dollars available for a task or activity</i>	50	Number of Copies of Bill of Lading
1Q	Total Resource (Quantity) <i>Total amount of the resources available for the total duration of the task or activity</i>	51	Number of Unsigned Bills of Lading
1R	Level Resource (Quantity) <i>The amount of resources available for each time unit for the duration of the task or activity</i>	52	Number of Originals
1S	Late <i>The amount that is late</i>	53	Original payment item count.
1T	Number of Delinquent Installments	54	Bank reject item count.
1U	Number of Loans	55	Net to pay item count.
1V	Total Number of Mortgagees	56	Minimum Contract Quantity
1W	Total Number of Loan Detail Records	57	Minimum Order Quantity
1X	Prescription Effective Period <i>Length of time that the prescription is effective.</i>	58	Payment Cancellation Item Count
20	Unusable Quantity	60	Total Authorized Quantity
21	Cumulative Quantity Shipped Short- Disposition Pending	61	Remaining Authorized Quantity
22	Cumulative Quantity Shipped Short- Disposition Challenged	62	Number of Days Covered by Inventory
23	Cumulative Quantity Shipped Long- Disposition Pending	63	On Order Quantity
24	Cumulative Quantity Shipped Long- Disposition Challenged	64	Past Due Quantity
25	OEM Inventory	65	Previous Month's Usage
26	Total Inventory	66	Minimum Fabrication Quantity
27	Committed Quantity	67	Minimum Ship Quantity
28	Quantity Available for Return	68	Maximum Number of Shipments Allowed
29	Projected Available Inventory	69	Incremental Order Quantity
2I	CO2 Injection Volume	70	Maximum Order Quantity
30	Quote Quantity on Inventory	72	Minimum Stock Level
31	Additional Demand Quantity	73	Maximum Stock Level
32	Quantity Sold	74	Damaged Goods
33	Quantity Available for Sale (stock quantity)	75	Receipts
34	Noncommitted Inventory on Shelf	76	Returns
35	Inventory on Shelf + Work in Progress	77	Stock Transfers In
36	Distributor Inventory	78	Stock Transfers Out
37	Work In Process	79	Billing Unit(s) Per Pricing Unit
38	Original Quantity	80	Pricing Unit(s) Per Billing Unit
39	Shipped Quantity	81	Prepaid Quantity Shipped
40	Remaining Quantity	82	Prepaid Quantity Not Shipped
41	Number of Batches	83	Submitted Quantity Sold
42	Number of Checks	84	Submitted Quantity Returned
45	Cumulative quantity on order	85	Lot Size
46	Total transactions	86	Nonconformance Quantity
		87	Quantity Received
		88	Beds
		89	Operating Beds
		90	Acknowledged Quantity <i>Network Recognition for message receipt</i>
		91	Additional Usage Quantity <i>The amount of usage incurred above the allotted or allowable use for a service</i>
		92	Allotted Usage Quantity <i>The amount of allowable usage related to a service</i>
		93	Attendant-Handled Quantity <i>Manual Recognition for message receipt</i>

CODE DEFINITION & EXPLANATION

94	Billable Quantity <i>Number of billable units used</i>
95	Data Storage Quantity <i>Number of storage units used</i>
96	Non-Billable Quantity <i>Number of non-billable units</i>
97	Non-Urgent Delivery Quantity <i>Number of units delivered in non-urgent status</i>
98	Overflow Quantity <i>Number of overflow messages, (Busy condition count for 800 service)</i>
99	Quantity Used <i>Quantity of units used</i>
A1	Acceptable Unserviceable Quantity <i>Indicates what portion of the total requested quantity may be accepted in an unserviceable condition</i>
A2	Optimistic Duration <i>Best case amount of the time needed to complete a task or activity</i>
A3	Most Likely Duration <i>Most likely amount of time needed to complete a task or activity</i>
A4	Pessimistic Duration <i>Worst case amount of time needed to complete a task or activity</i>
A5	Adjusted Quantity
A7	Years in School
A8	Number of Dependents
A9	Years on Job
AA	Unacknowledged Quantity <i>Message received without network, or attendant recognition</i>
AB	Urgent Delivery Quantity <i>Number of units delivered in urgent status</i>
AC	Voice Storage Quantity <i>Number of voice storage units used</i>
AD	Maintenance Units <i>Number of units of maintenance provided</i>
AE	Minimum Average Time Requirement (MATR) Units <i>Number of units calculated at a minimum usage rating basis, such as X minutes per message</i>
AF	Wide Area Telephone Service (WATS)/800 Service Units <i>Number of units of usage, for WATS or 800 service</i>
AG	Number of End Users <i>Number of participating users</i>
AH	Number of Message Recipients <i>Number of recipients</i>
AI	Number of Operator Credits <i>Number of operator credits given</i>
AJ	Daily Adjustments
AK	Years in this Line of Work/Profession
AO	Verified Receipts
AP	Order Quantity Multiple <i>Product must be ordered in multiples of a number</i>
AQ	Contribution Total
AR	Loan Repayment Total

CODE DEFINITION & EXPLANATION

AS	Participant Total
AT	Actual
AU	Cumulative Actual
AV	Budget
AW	Cumulative Budget
AX	Number of Insured Lives
AY	Forecast
AZ	Forecast at Complete
B1	Number of Mortgagors
B2	Pool Count
B3	Requested Amount
B4	Approved Amount
B5	Additional Amount
B6	Pre-op Days
B7	Post-op Days
BA	Due-In <i>An anticipated receipt quantity</i>
BB	Contractor Cumulative to Date
BC	Budget At Complete
BD	Contractor at Complete
BE	Subcontractor Cumulative to Date
BF	Age Modifying Units <i>Anesthesia modifying units requested for anesthesia complicated by extreme age of patient, under one year or over seventy years</i>
BG	Subcontractor at Complete
BI	Book Inventory
BQ	Backorder Quantity
BR	Blood Record
CA	Covered - Actual <i>Days covered on this service</i>
CB	Closing Statement Balance
CD	Co-insured - Actual
CE	Covered - Estimated <i>Estimated days covered on this service</i>
CF	Co-insured - Estimated
CG	Cumulative Gas Volume <i>Oil and gas production volume from well completion to current reporting period</i>
CH	Cumulative Effect of Prior Period Adjustment
CI	Cumulative Gas Injection Volume <i>Amount of gas injected into an oil well since well completion to displace liquid volumes in the reservoir and stimulate production</i>
CL	Cumulative Liquid Injection Volume <i>Amount of liquid injected into a gas well since well completion to displace gas volumes in the reservoir and stimulate production</i>
CN	Continuance Duration
CO	Cumulative Oil/Condensate Volume <i>Volume of crude oil and natural gas condensate produced from a well or property since well completion</i>
CP	Current Period Imbalance

CODE DEFINITION & EXPLANATION

CR	Certified Registered Nurse Anesthetist (CRNA) Number of Concurrent Procedures
CS	Current Service Life
CW	Cumulative Water Volume <i>Volumes of water and brine produced from a well or property since well completion</i>
D3	Number of Co-insurance Days
DA	Dependent's Age
DB	Deductible Blood Units <i>Amount of blood units not reimbursed due to plan deductible limits</i>
DG	Gas Used for Drilling
DO	Days Operated <i>Number of days a well or well equipment is in use</i>
DP	Days Produced <i>Number of days a well actively produced oil or gas since well completion or during a specific month</i>
DR	Direct Workers
DT	Dependent Total
DY	Days
E1	Course Segments <i>The number of CRS segments in the original transaction set being referenced</i>
E2	Degree Segments <i>The number of DEG segments in the original transaction set being referenced</i>
E3	Employed on this job
E4	Employed in this Profession
E5	Employed by this Company
EC	Use of Extracorporeal Circulation <i>Anesthesia modifying unit requested for anesthesia complicated by extra-corporeal circulation heart pump oxygenator bypass or pump assist which is not a usual part of the surgical procedure</i>
EM	Emergency Modifying Units <i>Anesthesia modifying units requested for anesthesia complicated by emergency conditions; an emergency is defined as existing when delay in treatment of the patient would lead to a significant threat to life or body part</i>
EP	Product Exchange Amount
ES	Ending Stock
ET	Employee Total
EW	Evaporated Water
F1	Off Lease Fuel
FB	Furnished Blood Units
FC	Fuel Consumed or Burned Amount
FD	Vehicular Radios
FE	Portable Radios
FF	Flare or Flash
FG	Marine Radios
FH	Pagers
FI	Conventional Mobiles
FJ	Trunked Channels
FK	Mobile Loading Allocation

CODE DEFINITION & EXPLANATION

FL	Units
FM	Aircraft Radios
FS	Gas Used for Fuel System
FT	Forecast to Complete
GI	Gas Injection Volume <i>Volume of gas injected into an oil well to displace liquid volumes in the reservoir and stimulate production on a monthly basis</i>
GL	Gas Lift Volume <i>Volume of excess gas produced from the well and reinjected to lift liquids such as oil and condensate from the well bore</i>
GP	Gross Production
GQ	Government Reporting Quantity
GR	Gas Receipt Volume
GT	Grade Transfer Amount
GV	Gas Volume <i>Reported volume of natural gas</i>
HM	Use of Hypothermia <i>Anesthesia modifying units requested for anesthesia complicated by total body hypothermia</i>
HO	Use of Hypotension <i>Anesthesia modifying units requested for anesthesia complicated by utilization of controlled hypotension</i>
HP	Use of Hyperbaric Pressurization <i>Anesthesia modifying units requested for anesthesia complicated by use of hyperbaric pressure</i>
HR	Use of Hypertension
HS	Hours
II	Number of Irregular Interest Payments
IN	Indirect Workers
IP	Number of Interest Payments
IQ	In-Transit Quantity
IT	Intertank Transfer Amount
JS	Judicial Stay Duration
K6	Drafts
KA	Estimated <i>The quantity shown is an estimated quantity</i>
KB	Net Quantity Increase <i>The resultant quantity represents a net increase to a previously transmitted quantity, after adjustments have been made</i>
KC	Net Quantity Decrease <i>The resultant quantity represents a net decrease to a previously transmitted quantity, after adjustments have been made</i>
KD	Expenditure Quantity
KE	Originals
KF	Duplicates
KG	Completed Line Items
KH	Completed Contracts
KI	Active Contracts Delinquent-Buying Party Caused
KJ	Active Contracts Delinquent
KK	Active Contracts Delinquent-Contractor Caused
KL	Active Contracts Delinquent-Unknown Causes

CODE DEFINITION & EXPLANATION

KM	Active Line Items Delinquent
KN	Active Line Items Delinquent-Buying Party Caused
KO	Active Line Items Delinquent-Contractor Caused
KP	Active Line Items Delinquent-Unknown Causes
KQ	Contracts Completed Delinquent-Buying Party Caused
KR	Contract Completed Delinquent-Contractor Caused
KS	Contracts Completed Delinquent-Unknown Causes
KU	Reported Deficiencies
KV	Line Items Completed Delinquent-Buying Party Caused
KW	Line Items Completed Delinquent-Contractor Caused
KX	Line Items Completed Delinquent-Unknown Causes
KY	Corrective Action Requests-Verbal
KZ	Corrective Action Requests-Written
LA	Life-time Reserve - Actual <i>Medicare hospital insurance includes extra hospital days to be used if the patient has a long illness and is required to stay in the hospital over a specified number of days; this is the actual number of days in reserve</i>
LB	Loss Allowance
LE	Life-time Reserve - Estimated <i>Medicare hospital insurance includes extra hospital days to be used if the patient has a long illness and is required to stay in the hospital over a specified number of days; this is an estimate of the number of days in reserve</i>
LG	Loss or Gain
LH	Lost Gas
LI	Liquid Injection Volume <i>Volume of liquids injected into a gas well to displace gas volumes in the reservoir and stimulate production on a monthly basis</i>
LK	Corrective Action Requests-Method C
LL	Corrective Action Requests-Method D
LM	Corrective Action Requests-Method E
LN	Aged Active Line Items Delinquent-Contractor Caused
LO	Lost Oil
LP	Lease Periods
LQ	Aged Line Items Delinquent
LR	Aged Line Items Completed-Contractor Caused
LT	Tariff Loss Allowance
LV	Oil/Condensate Volume <i>Volumes of crude oil and natural gas condensate produced from a well or property for a specific month</i>
LW	Lost Work Time Actual
LX	Lost Work Time Estimated
M1	Matching Equipment
MA	Miscellaneous Allowance
MI	Miles
MN	Month
MO	Minimum Order Package Level
MQ	Maximum Ship Quantity
NA	Number of Non-covered Days

CODE DEFINITION & EXPLANATION

NB	Number of Units (Housing)
NC	Number of Claimants
NE	Non-Covered - Estimated
NF	Number of Full-Time Employees
NN	Number of Hospitals
NO	Number of Physicians
NP	Number of Members
NQ	Number of Franchisees
NR	Not Replaced Blood Units
NS	Number of Stations <i>Number of stations, or terminating points, which are in use, deleted, added, etc. for service delivery; ports or lines on a computer, for example</i>
NV	Net
OD	Other Miscellaneous Disposition
OH	Other Injection Volume
OI	Opening Statement Balance
OR	Original
OT	Number of Operating Periods at Failure <i>A measurement of the elapsed time or usage before equipment failure occurred</i>
OU	Outlier Days
OV	Overage
P3	Physical Status III <i>Anesthesia modifying units requested for Physical Status III patient, as defined by the American Society of Anesthesiologists</i>
P4	Physical Status IV <i>Anesthesia modifying units requested for Physical Status IV patient, as defined by the American Society of Anesthesiologists</i>
P5	Physical Status V <i>Anesthesia modifying unit requested for Physical Status V, as defined by the American Society of Anesthesiologists</i>
P6	Number of Services or Procedures
PA	Pipeline Adjustment or Allowance
PB	Pressure Base
PC	Prior Cumulative Imbalance
PE	Period of Employment
PF	Gas Used for Plant Fuel
PO	Percentage of Ordered Quantity <i>Owners of fabric that have third parties finish their fabric must have a way to convey on the purchase order the quantities of various levels of quality acceptable; i.e. 80% first, 10% second, 8% off quality, 2% unmerchantable</i>
PP	Purchase of Product
PQ	Cumulative Quantity Required Prior to the First Scheduled Period
PR	Requirement Quantity that was Previously Released
PS	Prescription
PW	Pitted Water
PX	Prior Units Accepted
Q1	Minimum quantity to which tax rate applies

CODE DEFINITION & EXPLANATION

Q2	Maximum quantity to which tax rate applies
QA	Quantity Approved <i>Quantity allowed by the company processing the claim</i>
QB	Quantity Dispensed <i>Number of refills given</i>
QC	Quantity Disapproved
QD	Quantity Delivered
QE	Quantity Deferred <i>Quantity required for orders, but not reserved</i>
QF	High Fabrication Authorization Quantity <i>The highest quantity of material authorized for production</i>
QH	Quantity on Hold <i>Product which cannot be shipped at the present time for any reason, exclusive of damaged quantity</i>
QO	Operating Quantity
QP	Quantity by Position
QR	High Raw Material Authorization Quantity <i>The highest quantity of raw material or purchased components in their original state authorized to be secured for production</i>
QS	Quantity Per Skid
QU	Quantity Serviced
QV	Quantity Cancelled
RA	Refills Authorized <i>Number of times a drug prescription may be refilled</i>
RB	Replaced Blood Units
RC	Number of Items Authorized at Store
RD	Number of Items Authorized at Warehouse
RE	Gas Returned to Earth
RF	Number of Items in Stock
RG	Gas Used for Repressuring or Pressure Maintenance
RH	Number of Shelf Tags
RJ	Quantity Available on Shelf
RL	Gas Returned to Property for fuel
RQ	Royalty
RS	Number of Shelf Facings
RW	Water Re-injected on Property
S1	Planned Unit Development (PUD) Units
S2	Rooms, Finished Area Above Grade
S3	Dwelling Area
S4	Garage or Carport Area
S5	Units for Sale
S6	Gross Rent Multiplier
S7	Age, High Value
S8	Age, Low Value
S9	Bedrooms, Finished Area Above Grade
SA	Shipments
SB	Solicited
SC	Bathrooms, Finished Area Above Grade
SD	Criminal Sentence Duration
SE	Gross Living, Finished Area Above Grade
SF	Site

CODE DEFINITION & EXPLANATION

SG	Swan-Ganz <i>Anesthesia modifying units requested for the insertion of a Swan-Ganz catheter attendant to the administration of anesthesia</i>
SH	Shortage
SI	Rooms
SJ	Area of Level
SK	Gas Shrinkage
SL	Predominate Age
SM	Minimum Criminal Sentence Duration
SN	Age
SO	Oil Sedimentation
SP	Days Supply <i>Estimate of the number of days the supply will last</i>
SQ	Product Sales Amount
SR	Effective Age
ST	Standard
SX	Maximum Criminal Sentence Duration
TA	Tank Allowance
TB	Oil Theft
TC	Total at Complete
TD	Total to Date
TE	Number of Theatres
TH	Theoretical Quantity
TJ	Duration in Current Job
TO	Total
TP	Time in Position
TR	Trips <i>Number of trips in the ambulance</i>
UG	Gas Used on Property
V1	Retention Quantity
V2	Available Quantity
V3	Transfer Quantity
VA	Volume Shrinkage Adjustment or Allowance
VG	Gas Vented
VR	Variance
VS	Visits
WA	Total number of Workers' Compensation First Reports
WB	Total number of Workers' Compensation Subsequent Reports
WC	Total number of Workers' Compensation Combined Reports
WD	Units Worked per Day
WO	Operator's Working Interest
WP	Number of Producing Wells Remaining on Property or Facility
WR	Number of Producing Wells Remaining on Royalty Account
WT	Total Working Interest
WV	Water Volume <i>Volume of water produced with the oil or gas</i>
X1	Producing Wells

CODE DEFINITION & EXPLANATION

XA	Total of Issuable Assets
XB	Total System Backorder Quantity, High Priority
XC	Total Service Backorder Quantity, High Priority
XD	Total System Backorder Quantity, Low Priority
XE	Total Service Backorder Quantity, Low Priority
XG	On Hand and Due-In <i>The total quantity on hand and on order</i>
XJ	Other War Reserve Material Requirements Protectable (OWRMRP) Quantity <i>Total of all War Reserve material to be protected</i>
XO	Circulating Oil
XT	Protected Quantity
XU	Reserved
XV	Requisitioning Objective
XX	Authorized Retention Level
XY	Safety Level
XZ	Backorder Lines <i>Total Number of transactions held in backorder status</i>
YA	Total Demand Quantity <i>Sum total of all demands</i>
YB	Total Demand Orders <i>Total number of demand transactions reflected in total demand quantity</i>
YC	First Quarter Recurring Demand <i>Total quantity of recurring demands received in first past quarter</i>
YD	First Quarter Recurring Orders <i>Total number of recurring demand transactions received in first past quarter</i>
YE	First Quarter Non-recurring Demand <i>Total quantity of non-recurring demands received in first past quarter</i>
YF	First Quarter Non-recurring Orders <i>Total number of non-recurring demand transactions received in first past quarter</i>
YG	Second Quarter Recurring Demand <i>Total quantity of recurring demands received in second past quarter</i>
YH	Second Quarter Recurring Orders <i>Total number of recurring demand transactions received in second past quarter</i>
YJ	Second Quarter Non-recurring Demand <i>Total quantity of non-recurring demands received in second past quarter</i>
YK	Second Quarter Non-recurring Orders <i>Total number of non-recurring demand transactions received in second past quarter</i>
YL	Third Quarter Recurring Demand <i>Total quantity of recurring demands received in third past quarter</i>
YM	Third Quarter Recurring Orders <i>Total number of recurring demand transactions received in third past quarter</i>
YN	Third Quarter Non-recurring Demand <i>Total quantity of non-recurring demands received in third past quarter</i>

CODE DEFINITION & EXPLANATION

YP	Third Quarter Non-recurring Orders <i>Total number of non-recurring demand transactions received in third past quarter</i>
YQ	Fourth Quarter Recurring Demand <i>Total quantity of recurring demands received in fourth past quarter</i>
YR	Fourth Quarter Recurring Orders <i>Total number of recurring demand transactions received in fourth past quarter</i>
YS	Fourth Quarter Non-recurring Demand <i>Total quantity of non-recurring demands received in fourth past quarter</i>
YT	Fourth Quarter Non-recurring Orders <i>Total number of non-recurring demand transactions received in fourth past quarter</i>
YW	Reorder Point Quantity <i>Quantity at which a reorder should take place</i>
YX	Contract Line Item Quantity <i>The quantity of material cited under a specific contract line item</i>
YY	Years
Z1	Units Worked Last Day
Z2	Units Worked per Week
Z3	Units Worked per Quarter
Z4	Number Weeks Paid
Z6	Unused Accumulated Sick Days
ZA	Federal Medicare or Medicaid Claim Mandate - Category 1
ZB	Federal Medicare or Medicaid Claim Mandate - Category 2
ZC	Federal Medicare or Medicaid Claim Mandate - Category 3
ZD	Federal Medicare or Medicaid Claim Mandate - Category 4
ZE	Federal Medicare or Medicaid Claim Mandate - Category 5
ZF	Federal Pension Mandate - Category 1
ZG	Federal Pension Mandate - Category 2
ZH	Federal Pension Mandate - Category 3
ZI	Holding Period <i>The length of time material can be held while awaiting processing</i>
ZJ	Federal Pension Mandate - Category 5
ZK	Federal Medicare or Medicaid Payment Mandate - Category 1
ZL	Federal Medicare or Medicaid Payment Mandate - Category 2
ZM	Federal Medicare or Medicaid Payment Mandate - Category 3
ZN	Federal Medicare or Medicaid Payment Mandate - Category 4
ZO	Federal Medicare or Medicaid Payment Mandate - Category 5
ZP	Federal Pension Mandate - Category 4
ZR	Extended Term
ZS	Amortization Term

675 Schedule Type Qualifier

TYPE=ID MIN=2 MAX=2

Code identifying the type of dates used when defining a shipping or delivery time in a schedule or forecast.

SEGMENTS USED IN (AS SIMPLE):

BFR BSS

TRANSACTION SETS USED IN:

830 862 866

CODE DEFINITION & EXPLANATION

AD Authorized Delivery Based
 AS Authorized Shipment Based
 BB Customer Production (Consumption) Based
 DL Delivery Based
 JS Buyer Production Sequence Schedule
 KB Kanban Signal
 PD Planned Delivery Based
 PR Planned Requirement Based
 PS Planned Shipment Based
 SH Shipment Based
 ZZ Mutually Defined

676 Schedule Quantity Qualifier

TYPE=ID MIN=1 MAX=1

Code identifying the type of quantities used when defining a schedule or forecast.

SEGMENTS USED IN (AS SIMPLE):

BFR BSS

TRANSACTION SETS USED IN:

830 862 866

CODE DEFINITION & EXPLANATION

A Actual Discrete Quantities
 C Cumulative Quantities
 D Net Change Quantities
 R Replacement Quantities

678 Ship/Delivery or Calendar Pattern Code

TYPE=ID MIN=1 MAX=2

Code which specifies the routine shipments, deliveries, or calendar pattern.

SEGMENTS USED IN (AS SIMPLE):

CAL DH HSD SDP WS

TRANSACTION SETS USED IN:

128 148 196 271 278 806 830 837 839 862

CODE DEFINITION & EXPLANATION

1 1st Week of the Month
 2 2nd Week of the Month
 3 3rd Week of the Month
 4 4th Week of the Month
 5 5th Week of the Month
 6 1st & 3rd Weeks of the Month
 7 2nd & 4th Weeks of the Month
 8 1st Working Day of Period
 9 Last Working Day of Period
 A Monday through Friday
 B Monday through Saturday
 C Monday through Sunday
 D Monday
 E Tuesday
 F Wednesday
 G Thursday
 H Friday
 J Saturday
 K Sunday
 L Monday through Thursday
 M Immediately
 N As Directed
 O Daily Mon. through Fri.
 P 1/2 Mon. & 1/2 Thurs.
 Q 1/2 Tues. & 1/2 Thurs.
 R 1/2 Wed. & 1/2 Fri.
 S Once Anytime Mon. through Fri.
 T 1/2 Tue. & 1/2 Fri.
 U 1/2 Mon. & 1/2 Wed.
 V 1/3 Mon., 1/3 Wed., 1/3 Fri.
 W Whenever Necessary
 X 1/2 By Wed., Bal. By Fri.
 Y None (Also Used to Cancel or Override a Previous Pattern)
 Z Mutually Defined
 SG Tuesday through Friday
 SL Monday, Tuesday and Thursday
 SP Monday, Tuesday and Friday
 SX Wednesday and Thursday
 SY Monday, Wednesday and Thursday
 SZ Tuesday, Thursday and Friday

679 Ship/Delivery Pattern Time Code

TYPE=ID MIN=1 MAX=1

Code which specifies the time for routine shipments or deliveries.

SEGMENTS USED IN (AS SIMPLE):

HSD SDP

TRANSACTION SETS USED IN:

271 278 830 837 862

CODE DEFINITION & EXPLANATION

- A 1st Shift (Normal Working Hours)
- B 2nd Shift
- C 3rd Shift
- D A.M.
- E P.M.
- F As Directed
- G Any Shift
- Y None (Also Used to Cancel or Override a Previous Pattern)
- Z Mutually Defined

680 Forecast QualifierTYPE=ID_{MIN}=1 MAX=1

Code specifying the sender's confidence level of the forecast data or an action associated with a forecast

SEGMENTS USED IN (AS SIMPLE):

FST

TRANSACTION SETS USED IN:

830 840 843 862

CODE DEFINITION & EXPLANATION

- A Immediate
- B Pilot/Prevolume
- C Firm
- D Planning
- E Rounded Container Quantity
- F Potential Order Increase
- G Average Plant Usage
- H First Time Reported Firm
- K Final Model Year Requirements or Orders
- L Engineering Change Pending
- M Maximum Tooling Capacity
- N Normal Tooling Capacity
- P Prototype
- S Strike Protection
- T Required Tooling Capacity
- U Cooperative Logistics Planning
Estimated future material requirements in support of a Department of Defense (DoD) foreign military sales case
- V Cooperative Logistics Firm
Actual future material requirements in support of a Department of Defense (DoD) foreign military sales case
- W Cancellation
- X Modification
- Z Mutually Defined

681 Forecast Timing QualifierTYPE=ID_{MIN}=1 MAX=1

Code specifying interval grouping of the forecast.

SEGMENTS USED IN (AS SIMPLE):

FST

TRANSACTION SETS USED IN:

830 840 843 862

CODE DEFINITION & EXPLANATION

- A Annually (Calendar Year)
- C Daily
- D Discrete
- F Flexible Interval (from Date X through Date Y)
- M Monthly Bucket (Calendar Months)
- Q Quarterly (Calendar Quarters)
- S Semi-Annually (Calendar Year)
- T Four week bucket (13 buckets per year)
- W Weekly Bucket (Monday through Sunday)
- X Weekly Bucket (7 day interval)
- Z Mutually Defined

682 Part Release Status CodeTYPE=ID_{MIN}=1 MAX=2

Code identifying the status of the specific part number being released or forecast or being used in an engineering change

SEGMENTS USED IN (AS SIMPLE):

PRS

TRANSACTION SETS USED IN:

830 841 842 862

CODE DEFINITION & EXPLANATION

- 1 Fabrication Authorization Quantity is Final Model Year Requirement. The Part is a Non carryover Item for the Subsequent Model Year from the Supplier.
- 2 Material Authorization Quantity is Final Model Year Requirement. The Part is a Non carryover Item for the Subsequent Model Year from the Supplier.
- 3 Part will be Canceled at the Material Quantity
- 4 Part is a Carryover Item from Subsequent Model Year from the Supplier
- 5 Part is a New Item for the Subsequent Model Year
- 6 Part is a New Item Due to an Interim Engineering Release
- 7 Final Release for this Cancelled Part
- 8 Planning Quantity is Final Model Year Requirement The Part is a Non-Carryover Item for the Subsequent Model Year From the Supplier.
- 9 Final Forecast for this Cancelled Part.

CODE DEFINITION & EXPLANATION

- A** All Time Buy. Unless Specifically Stated, This Code is Not to be Interpreted as Authorization for Tool Scrap.
- B** Balance-Out Part; Eng. Change Pending
- D** Terminal Buy
- E** Systems Automated Buy
- F** Corporation Campaign Buy
- G** Source Surplus
- H** Reschedule
- I** Merchandizing Act Promotion Buy
- J** Minimum or Lot Buy
- K** Die Tie
- L** Landau Specification
- M** Mill Run Purchase
- N** Solicitation
- P** Pilot/Pre-production
- Q** Special Large Quantity Buy
- R** Replacement Orders
- S** Initial Orders
- T** Trim Order
- U** Confirming Phone Order
- W** Cover Overshipment - Do Not Reship
- X** Economic Order Quantity
Release quantity that takes advantage of price per piece break based upon volume of release, which may vary from the order quantity
- Y** Production Year End Surplus

687 Class of Trade CodeTYPE=**ID** MIN=2 MAX=2

Code indicating class of trade.

SEGMENTS USED IN (AS SIMPLE):

CTP G13 G43

TRANSACTION SETS USED IN:

124	304	536	810	821	822	830	832	836	837

CODE DEFINITION & EXPLANATION

- AG** Agent
- BG** Buying Group
- BR** Broker
- CN** Consolidator (Master Distributor)
- CO** Contractor
- CR** Chain Store Retail
- CX** Confection
Candy distributor, jobber, or wholesaler
- CY** Convenience Store
- DE** Dealer
- DF** Doctors' Offices
- DI** Distributor

CODE DEFINITION & EXPLANATION

- DR** Drug Store
- EX** Exporter
- FS** Food Service
Institutions, restaurants, schools
- GA** Grocery Accounts
Grocery chains, wholesalers, and independents
- GM** General Merchandise
Discount/Department stores, mass merchandisers, variety stores, general merchandisers
- GR** General Retail
- GV** Government
- HS** Hospitals
- ID** Industrial
- IN** Institutional
- IR** Independent Retail
- JB** Jobber
- LC** Long-term Care
- MC** Managed Care
- MF** Manufacturer
- ML** Military
- OE** OEM
- PF** Professional
- PH** Outpatient Pharmacy
- PT** Pet Supply Store
- PY** Private Label
- RS** Resale
- SE** Securities
- ST** Stationer
- TR** General Trade
- WC** Warehouse Clubs
Membership club stores dealing in large volume direct shipments in both food and nonfood items
- WH** Wholesaler
- WS** User

704 Paperwork/Report Action CodeTYPE=**ID** MIN=1 MAX=2

Code specifying how the paperwork or report that is identified in the PWK segment relates to the transaction set or to identify the action that is required.

COMPOSITE DATA ELEMENTS USED IN:

C002

SEGMENTS USED IN (AS COMPONENT):

713 Installment Group Indicator

TYPE=NO MIN=2 MAX=2

The installment group indicator is a 2-digit serial number beginning with 01 (i.e., 01, 02, 03 or 04). It is used to group "elective" terms types in an installment payment situation. The same indicator must be used for all segments in the same installment.

SEGMENTS USED IN (AS SIMPLE):

G23

TRANSACTION SETS USED IN:

875 876 880 882 888 889 894 895

714 Goods and Services Tax Reason Code

TYPE=ID MIN=1 MAX=1

Code required to identify the reason for a 0% rated goods and services tax.

SEGMENTS USED IN (AS SIMPLE):

BX

TRANSACTION SETS USED IN:

404 417 426 858

CODE DEFINITION & EXPLANATION

- 1 Inbound Goods and Services Tax Declaration
- 2 Outbound Goods and Services Tax Declaration
- 3 Goods and Services Tax Inbound/Outbound Declaration Documentary Evidence Filed at Origin

715 Functional Group Acknowledge Code

TYPE=ID MIN=1 MAX=1

Code indicating accept or reject condition based on the syntax editing of the functional group.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK9

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- A Accepted
- E Accepted, But Errors Were Noted.
- M Rejected, Message Authentication Code (MAC) Failed
- P Partially Accepted, At Least One Transaction Set Was Rejected
- R Rejected
- X Rejected, Content After Decryption Could Not Be Analyzed

716 Functional Group Syntax Error Code

TYPE=ID MIN=1 MAX=3

Code indicating error found based on the syntax editing of the functional group header and/or trailer.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK9

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- 1 Functional Group Not Supported
- 2 Functional Group Version Not Supported
- 3 Functional Group Trailer Missing

CODE DEFINITION & EXPLANATION

- 4 Group Control Number in the Functional Group Header and Trailer Do Not Agree
- 5 Number of Included Transaction Sets Does Not Match Actual Count
- 6 Group Control Number Violates Syntax
- 10 Authentication Key Name Unknown
- 11 Encryption Key Name Unknown
- 12 Requested Service (Authentication or Encryption) Not Available
- 13 Unknown Security Recipient
- 14 Unknown Security Originator
- 15 Syntax Error in Decrypted Text
- 16 Security Not Supported
- 17 Incorrect Message Length (Encryption Only)
- 18 Message Authentication Code Failed
- 19 S1E Security End Segment Missing for S1S Security Start Segment
- 20 S1S Security Start Segment Missing for S1E End Segment
- 21 S2E Security End Segment Missing for S2S Security Start Segment
- 22 S2S Security Start Segment Missing for S2E Security End Segment

717 Transaction Set Acknowledgment Code

TYPE=ID MIN=1 MAX=1

Code indicating accept or reject condition based on the syntax editing of the transaction set.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

A3 AK5

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- A Accepted
- E Accepted But Errors Were Noted
- M Rejected, Message Authentication Code (MAC) Failed
- R Rejected
- X Rejected, Content After Decryption Could Not Be Analyzed

718 Transaction Set Syntax Error Code

TYPE=ID MIN=1 MAX=3

Code indicating error found based on the syntax editing of a transaction set.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK5

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- 1 Transaction Set Not Supported
- 2 Transaction Set Trailer Missing
- 3 Transaction Set Control Number in Header and Trailer Do Not Match
- 4 Number of Included Segments Does Not Match Actual Count
- 5 One or More Segments in Error
- 6 Missing or Invalid Transaction Set Identifier
- 7 Missing or Invalid Transaction Set Control Number
- 8 Authentication Key Name Unknown
- 9 Encryption Key Name Unknown
- 10 Requested Service (Authentication or Encrypted) Not Available
- 11 Unknown Security Recipient
- 12 Incorrect Message Length (Encryption Only)
- 13 Message Authentication Code Failed
- 15 Unknown Security Originator
- 16 Syntax Error in Decrypted Text
- 17 Security Not Supported
- 19 S1E Security End Segment Missing for S1S Security Start Segment
- 20 S1S Security Start Segment Missing for S1E Security End Segment
- 21 S2E Security End Segment Missing for S2S Security Start Segment
- 22 S2S Security Start Segment Missing for S2E Security End Segment
- 23 Transaction Set Control Number Not Unique within the Functional Group

719 Segment Position in Transaction Set

TYPE=N0 MIN=1 MAX=6

The numerical count position of this data segment from the start of the transaction set; the transaction set header is count position 1.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK3 TED

TRANSACTION SETS USED IN:

824 997

720 Segment Syntax Error Code

TYPE=ID MIN=1 MAX=3

Code indicating error found based on the syntax editing of a segment

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK3

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- 1 Unrecognized segment ID
- 2 Unexpected segment
- 3 Mandatory segment missing
- 4 Loop Occurs Over Maximum Times
- 5 Segment Exceeds Maximum Use
- 6 Segment Not in Defined Transaction Set
- 7 Segment Not in Proper Sequence
- 8 Segment Has Data Element Errors

721 Segment ID Code

TYPE=ID MIN=2 MAX=3

Code defining the segment ID of the data segment in error. See Appendix A - Number 77.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

CODE SOURCES:

77

SEGMENTS USED IN (AS SIMPLE):

AK3 E03 E13 E20 TED

TRANSACTION SETS USED IN:

824 868 997

722 Element Position in Segment

TYPE=N0 MIN=1 MAX=2

This is used to indicate the relative position of a simple data element, or the relative position of a composite data structure with the relative position of the component within the composite data structure, in error; in the data segment the count starts with 1 for the simple data element or composite data structure immediately following the segment ID

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

COMPOSITE DATA ELEMENTS USED IN:

723 Data Element Syntax Error Code

TYPE=ID MIN=1 MAX=3

Code indicating the error found after syntax edits of a data element.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK4

TRANSACTION SETS USED IN:

997

CODE DEFINITION & EXPLANATION

- | | |
|----|--|
| 1 | Mandatory data element missing |
| 2 | Conditional required data element missing. |
| 3 | Too many data elements. |
| 4 | Data element too short. |
| 5 | Data element too long. |
| 6 | Invalid character in data element. |
| 7 | Invalid code value. |
| 8 | Invalid Date |
| 9 | Invalid Time |
| 10 | Exclusion Condition Violated |

724 Copy of Bad Data Element

TYPE=AN MIN=1 MAX=99

This is a copy of the data element in error.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

SEGMENTS USED IN (AS SIMPLE):

AK4 TED

TRANSACTION SETS USED IN:

824 997

725 Data Element Reference Number

TYPE=NO MIN=1 MAX=4

Reference number used to locate the data element in the Data Element Dictionary.

MANAGEMENT DATA ELEMENT - NOT INTENDED TO CONVEY DATA TO AN APPLICATION

CODE SOURCES:

77

SEGMENTS USED IN (AS SIMPLE):

AK4 E24 E26 E30 TED

TRANSACTION SETS USED IN:

728 Returnable Container Load Make-Up Code

TYPE=ID MIN=1 MAX=2

Code identifying the load make-up of the returnable containers in the shipment.

SEGMENTS USED IN (AS SIMPLE):

SN1

TRANSACTION SETS USED IN:

325 856 857 861

CODE DEFINITION & EXPLANATION

- | | |
|----|--|
| B | Loaded with empty 4-block for blocking purposes. |
| D | Empty containers with dunnage. |
| E | Empty Containers |
| L | Loaded with production material. |
| M | Mixed empty and loaded. |
| O | Obsolete material. |
| P | Loaded with returned excess production material. |
| R | Loaded with rejected material. |
| S | Service part obsolete container. |
| U | Loaded with returned processed material. |
| ZZ | Mutually Defined |

731 Transit Direction Code

TYPE=ID MIN=2 MAX=2

The point of origin and point of direction.

SEGMENTS USED IN (AS SIMPLE):

TD5

TRANSACTION SETS USED IN:

180	317	830	838	840	843	850	852	853	855
856	857	860	861	862	865	870			

CODE DEFINITION & EXPLANATION

- | | |
|----|---|
| BS | Buyer to Seller |
| SB | Seller to Buyer |
| SC | Subcontractor to Seller |
| SD | Seller to Drop-Ship Designated Location |
| SF | Seller to Freight Forwarder |
| SS | Seller to Subcontractor |
| ZZ | Mutually Defined |

732 Transit Time Direction Qualifier

TYPE=**ID** MIN=2 MAX=2

Code specifying the value of time used to measure the transit time.

SEGMENTS USED IN (AS SIMPLE):

TD5

TRANSACTION SETS USED IN:

180	317	830	838	840	843	850	852	853	855

CODE DEFINITION & EXPLANATION

AA Air Hours
AD Air Days
CD Calendar Days (Includes weekends and Holidays)
CW Calendar Weeks (7 Day)
HO Hours
SD Surface Days
SH Surface Hours
WD Working Days (Excludes weekends and holidays)
WW 5 Day Work Week
ZZ Mutually Defined

733 Transit Time

TYPE=**R** MIN=1 MAX=4

The numeric amount of transit time.

SEGMENTS USED IN (AS SIMPLE):

TD5

TRANSACTION SETS USED IN:

180	317	830	838	840	843	850	852	853	855
856	857	860	861	862	865	870			

734 Hierarchical Parent ID Number

TYPE=**AN** MIN=1 MAX=12

Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to.

SEGMENTS USED IN (AS SIMPLE):

HL

TRANSACTION SETS USED IN:

148	196	270	271	276	277	278	536	561	805
811	816	841	842	847	856	857	869	870	

735 Hierarchical Level Code

TYPE=**ID** MIN=1 MAX=2

Code defining the characteristic of a level in a hierarchical structure.

SEGMENTS USED IN (AS SIMPLE):

HL

TRANSACTION SETS USED IN:

148	196	270	271	276	277	278	536	561	805
811	816	841	842	847	856	857	869	870	

CODE DEFINITION & EXPLANATION

- 1** Service/Billing Provider
Code identifying the telecommunications company providing service/billing
- 2** Billing Arrangement
Code identifying a specified billing arrangement
- 3** Sub-Billing Arrangement
Code identifying a more detailed billing arrangement
- 4** Group
Code identifying a group of charges on the bill
- 5** Category
Code identifying the sub-division of the group
- 6** Sub-Category
Code identifying a further breakdown of the category
- 7** Type
Code identifying a further breakdown of the sub-category
- 8** Charge Detail
Code identifying the lowest level of charges within a billing arrangement
- 9** Line Detail
Code identifying the supporting detail associated with the charge or group
- A** Assembly
- B** Buyer's Location
- C** Date
- D** Product Description
- E** Transportation Equipment
- F** Component
- G** Quality Characteristics
A historical record of product quality characteristics and or discrepancies for a given item of supply
- H** Bill of Materials
 - I** Item
 - J** Part Characteristic
 - K** Kit
 - L** Supplier's Location
 - M** Measurement
 - O** Order
 - P** Pack
 - Q** Subpack
 - R** Quantity
 - S** Shipment
 - T** Shipping Tare
 - U** Subassembly
 - V** Address Information
The HL loop will identify entities associated with the shipment notice transaction

CODE DEFINITION & EXPLANATION

- W** Transaction Reference Number
The HL loop will identify shipment notice information for each reported transaction reference number
- X** Serial Number
Serial numbers applicable to a referenced item of supply
- Y** Suffix
The HL loop will identify shipment notice information for each reported suffix
- 19** Provider of Service
- 20** Information Source
Identifies the payor, maintainer, or source of the information
- 21** Information Receiver
Identifies the provider or party(ies) who are the recipient(s) of the information
- 22** Subscriber
Identifies the employee or group member who is covered for insurance and to whom, or on behalf of whom, the insurer agrees to pay benefits
- 23** Dependent
Identifies the individual who is affiliated with the subscriber, such as spouse, child, etc., and therefore may be entitled to benefits
- 24** Supergroup
- 25** Subgroup
- 26** Member
- 27** Ancillary Facility or Department
- 28** Hospital
- 29** Franchisor
- 30** Franchisee
- 31** Franchisee Association
- 32** Health Industry Business Communications Council (HIBCC) Health Industry Number (HIN) Database
- 34** Location Record
- 35** Company/Corporation
Any company or business
- 36** Operating Unit
Any operating business unit within a company or corporation
- 37** Property
Any, building, structure, or body of land that is considered a single thing
- 38** Tradename
A name by which the public identifies a business or product that is owned by a company or business
- 56** Statement of Work
A part of a description of what work needs to be performed under a contract
- AL** Alternate Specification - Lift Level
Designates the hierarchical level detail specifications of the largest warehouse/shop floor applications; alternate specification to be used as an option when the primary can not be provided
- CB** Contractholder Branch Office
- CC** Cost Center
A location to which incurred costs accrue

CODE DEFINITION & EXPLANATION

- CE** Cost Element
A element of cost within a total proposed price
- CH** Contractholder
- CL** Claimant
- CT** Cost Type
A breakdown of the type of cost being incurred
- DP** Department
An organization entity within a larger business entity
- EL** Exhibit Line Item
A number for a document referenced in and appended to a procurement instrument that establishes a delivery requirement
- FC** Function Code
A function within a larger set describing the total work to be performed
- GC** Group Coverage Options
- IA** Subline Item
A subdivision of the line item, typically used to describe a separate point of delivery
- IB** Contract
An agreement between partners
- IC** Contract Data Requirements List (CDRL)
- ML** Manufacturing Level
Nesting category for use in the HL segment that defines manufacturing or processing stages associated with specification, characteristics, controls, activities, or measurements
- PA** Primary Administrator
- PC** Project Code
A part of a larger effort
- PH** Product Characteristic
- PL** Primary Specification - Lift Level
Designates the hierarchical level detailing specifications of the largest unitized configuration to be handled mechanically in warehouse/shop floor applications; "primary" indicates preferred or mandatory, and all subsequent "HL" segments contain specifications of upper or interior levels of the lift level as required
- RA** Reporting Agency
- RP** Report
The level of the hierachial structure used to identify basic report information
- SA** Secondary Administrator
- SB** Substitute
- SC** Subcontract Line Item
A further subdivision of a contract line item number, used for information or when a separate delivery is involved
- SE** Subexhibit Line Item
A further subdivision of a contract exhibit line item
- SS** Services
- SY** System
A completed system typically composed of several items
- UT** Unit or Lot

CODE DEFINITION & EXPLANATION

- WB** Work Breakdown Structure
An individual element of work portrayed in tree structure stages of the total performance of a contract
- ZZ** Mutually Defined

736 Hierarchical Child CodeTYPE=**ID** MIN=**1** MAX=**1**

Code indicating whether if there are hierarchical child data segments subordinate to the level being described.

SEGMENTS USED IN (AS SIMPLE):

HL

TRANSACTION SETS USED IN:

148	196	270	271	276	277	278	536	561	805
811	816	841	842	847	856	857	869	870	

CODE DEFINITION & EXPLANATION

- 0** No Subordinate HL Segment in This Hierarchical Structure.
- 1** Additional Subordinate HL Data Segment in This Hierarchical Structure.

737 Measurement Reference ID CodeTYPE=**ID** MIN=**2** MAX=**2**

Code identifying the broad category to which a measurement applies

SEGMENTS USED IN (AS SIMPLE):

MEA STA

TRANSACTION SETS USED IN:

135	142	175	180	185	195	196	304	404	410

861	863	865	866	867	869	870	888		

CODE DEFINITION & EXPLANATION

- 9L** Ninth Layer
- AA** Meter reading-beginning actual/ending actual
- AE** Meter reading-beginning actual/ending estimated
- AF** Actual Total
- AG** Compliance Total
- AH** Gross Compliance Total
- AI** Net Compliance Total
- AR** Annual Result
- AV** Average Reading
- BA** Base Point
- BD** Billed Dimensions
- BL** Bundle Limitation

CODE DEFINITION & EXPLANATION

- BM** Base Metal
Original or base product to which coatings are to be applied
- BO** Meter Reading as Billed
Used when billing charges are based on contractual agreements or pre-established usage and not on actual usage
- BP** Bearing Piece Limitation
- BT** Batch Limits
Limits set on test results from all product made for one unit or period of production
- BZ** Batten Size
- C1** Conformance Property Status
- CA** Coating
Material or product added to another product (base metal) to enhance its characteristics
- CF** Conversion Factor
- CH** Chemistry
- CN** Core Notch Dimensions
- CO** Concentration
- CS** Core Size
- CT** Counts
- CV** Cumulative Test Period
The total period during which a series of tests are conducted
- DE** Defects
- DT** Dimensional Tolerance
- EA** Meter reading-beginning estimated/ending actual
- EE** Meter reading-beginning estimated/ending estimated
- EF** Evaluation Factors
- EL** Electrical Characteristics
- EN** Environmental Conditions
The data values to be reported reflect the environmental conditions surrounding a situation including but not limited to test environments
- FC** First of Campaign Result
- FD** Finished Dimensions
Dimensions of the final or end-use product
- FH** Radio Operations
- FJ** Antenna Characteristics
- FV** Firing Values
- HR** Historical Result
- IN** Incrustation
- IR** Interpolated Result
A test result value calculated by interpolation between two physical tests
- LC** Limited Weight/Size Coils
- LL** Lift Limitation
- LM** Layer of Multiple Layered Product
- LS** Lot Status
- LT** Lot Limits
Limits set on test results from all product contained in a single shipment (which may involve any multiple or fraction of transportation carrier units) to one customer
- MR** Base Material Result

CODE DEFINITION & EXPLANATION

NC	Net Change
NX	Net Explosive Weight
OD	Ordered Dimensions
OG	Original
OL	Order Limits
P1	Platform Limitation
PA	Pallet Dimensions
PC	Parting Cut (Sawcut)
PD	Physical Dimensions (Product Ordered)
PK	Package Dimensions
PL	Package Limitations
PM	Permitted <i>The condition or activity approved by the appropriate regulatory agency</i>
PO	Position
PR	Product Dimension Range Price Bracket
PS	Product Characteristic Specification
PT	Pretest Period <i>The nominal period that a tested device is preconditioned</i>
QR	Quarterly Result
R1	Opening Reading
R2	Closing Reading
RA	Reject Amount
RG	Regulatory Limit
RL	Receiving Facility Limitations
RN	Lengths Limitation
RO	Roll Limits <i>Limits set on test results from one roll of product shipped to a customer</i>
RP	Relative Position
RQ	Requested <i>The condition or activity submitted for approval by the appropriate regulatory agency</i>
RS	Response Time
RT	Replacement
SA	Spacing/Margin
SD	Shipped Dimensions
SE	Property Specifications <i>Indicates that the data to follow are target specifications</i>
SF	Shelf Life
SH	Shipping Tolerance
SK	Skid Dimensions
SL	Skid Limitations
SM	Shade
SP	Splices
SR	Surface Roughness
ST	Surface Treatment
SU	Surface
TD	Splice Tape Dimensions
TE	Temperature

CODE DEFINITION & EXPLANATION

TI	Time
TL	Transportation Equipment Limitations
TO	Total Dimensions
TP	Test Period <i>The nominal period that a test is conducted</i>
TR	Test Results <i>Indicates that the data to follow are the results test measurements</i>
TS	Single Test Limits <i>Limits set on each measurement of the specified product characteristic or manufacturing process so that any single test whose value falls outside these limits causes the product or process to be declared out-of-specification</i>
WA	Waste Amount
WT	Weights
ZP	Log Zero Point of Reference <i>The physical location on the well, measured above or below the ground surface, from which the wireline well log measurements, such as the Kelly bushing and casing head flange, are adjusted</i>

738 Measurement Qualifier

TYPE=ID MIN=1 MAX=3

Code identifying a specific product or process characteristic to which a measurement applies

SEGMENTS USED IN (AS SIMPLE):

CID MEA STA

CODE DEFINITION & EXPLANATION

A	Consolidated Weight
B	Billed Weight
C	Actual New Repeated for Combination
D	Destination Weight Agreement
E	Estimated New Weight
F	Deficit Weight
G	Gross Weight
L	Legal Weight
M	Minimum Weight (for Weight)
N	Actual Net Weight
O	Excess Weight Over Maximum
R	Per Unit Dunnage
S	State Weight
T	Tare Weight
U	Weight per Unit
X	Maximum Weight (for Rate)

CODE DEFINITION & EXPLANATION

- 1F** Radio Frequency
2F Alternate Radio Frequency
3A Target Depth
3B Current Depth
3C Total Depth
3D Well Test Before Oil
3E Well Test Before Gas
3F Well Test Before Water
3G Well Test After Oil
3H Well Test After Gas
3I Well Test After Water
3J Estimated Depth of Operations
4F Squelch Tone
5F Height above Ground
6F Gain
7F Range Value
8F Directional Height above Average Terrain
A1 Acids
A value, normally shown as a percent of the total, showing the content of all acidic structures contained in a solution of a known product
A2 Adsorption
A value defining the adhesion in an extremely thin layer of molecules (as of gases, solutes, or liquids) to the surfaces of solid bodies or liquids with which they are in contact
A3 Ageing Time
The time taken, once a product has been initially manufactured, to come to a desired quality through undisturbed rest or curing; also, the time taken to bring to a desired use or maturity
A4 Aromatics
A value, normally shown as a percent of the total, showing the content of all molecules in a product containing at least one benzene ring
A5 Average Differential Pressure
Average difference between the upstream and downstream pressure through an orifice plate; expressed in inches of water
A6 Average Static Pressure
Pressure of the flowing gas stream; expressed in pounds per square inch
A7 Flame Projection Distance
The distance that a flame would project from an aerosol can containing the subject material if ignited
A9 Exposure
A measure of the quantity of a specified form of energy or mass coming into contact with another specified object or space
AA Alternating Current
AB Activation Energy
AC Actinium
AD Ambient Temperature
AE Argon
AF Angle of Bend
AG Americium

CODE DEFINITION & EXPLANATION

- AH** Astatine
AI Acidity
AJ Aim Gage
Physical dimension a producer is to "aim" toward producing or supplying
AK Volatile Organic Compounds (VOCs)
Organic compounds whose existence is calculable or detectable by methods specified by the U.S. Environmental Protection Agency
AL Spine Show
AP Average Pressure
AS Ash Fusion Temperature
AT Additive
AZ Arbor Size
B1 Base Number
A number that identifies the ability of a compound to react with an acid to either take up a proton from the acid or to give up unshared electrons to an acid to form a salt
B5 Octanol/Water Partition Coefficient
A scientific measure of the relative solubility of a material in octanol versus its solubility in water
BA Barium
BB Beryllium
BC Billet Size
BD Bias
BE Boron Factor
BF Brinell
BG Berkelium
BH Bromine
BJ Burst Index
The burst pressure of a paper or pulp sheet expressed per unit basis weight
BK Bulk
BL Blisters
BN Bend
The ability of the product to undergo bending operation in forming
BO Lateral Bow (Camber)
BP Boiling Point
BQ Breaks
BR Brightness
BT Bursts
BU Buckles
BW Basis Weight
C1 Carbonyl
The measurement of the bivalent carbon-oxygen radical occurring in aldehydes, ketones, carboxylic acids, esters, acid halides, and amides; also, the measurement of the compound carbonyl radical with a metal

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
C2	Catalyst <i>The measurement of any number of substances used in the production of a final product or retained in the final product that initiates a chemical reaction and enable the product to proceed under milder conditions than otherwise possible</i>	DD	Depth of Dents
C3	Maximum Contraction <i>A result from a process that measures the total contraction of a sample</i>	DE	Defects
CA	Caliper	DF	Distance Across Flats
CC	Celsius	DG	Direct Current
CD	Compression	DH	Dysprosium
CE	Capacitance In	DI	Diameter
CF	Capacitance Out	DJ	Dominant Wave Length
CG	Cadmium	DL	Delta Value L
CH	Cesium	DM	Dual Amplitude
CI	Curium	DN	Density
CJ	Cycle Time	DP	Depth
CK	Californium	DR	Delta R <i>Planar variation of r value which is defined by the following equation: $(r0 - 2r45 + r90)/2$</i>
CL	Cladding Thickness(% of Composite Thickness)	DS	Distance Between Points
CM	Cures	DT	Distance From Base Point
CN	Chlorine	DU	Draw Tension
CO	Core Loss	DW	Width, Boxcar Door
CP	Crimp	DY	Dyeability
CQ	Cuts	E1	End <i>Identifies a value measured at the end of a testing process or range of test results</i>
CR	Crosswise Spacing	EA	Elongation
CS	Cross Section	EB	Edge Burr
CT	Center-to-center	EC	English Coil Dimensions
CU	Coil Curvature	ED	Eddy
CW	Cuttable Width	EE	Einsteinium
CX	Calculated Value	EF	Europium
CY	Contamination <i>The yellowness of cotton; correlates with the spotted and light spotted part of the classer grade; higher values represent more yellowness</i>	EG	Equivalent Temperature
D1	Maximum Dilatation <i>A result from a process that measures the total expansion of a sample</i>	EH	Erbium
D2	Dispersing Agent <i>The measurement of the amount of substance that promotes the formation and stabilization of a dispersion of one substance in another</i>	EI	Expansion
D3	Drying Agent <i>The measurement of the amount of substance in a product that is used to extract liquid from either the manufacture or use of a product</i>	EJ	Electrical Conductivity
D4	Dry Point <i>A temperature measurement used in a distillation process to identify the temperature at which a product becomes dry</i>	EL	Elasticity <i>The springiness or rebound of a deformed material</i>
D5	Wear <i>Measure of deterioration</i>	EM	Elmendorf Tear
DA	Delta Value A	EN	Entanglement
DB	Delta Value B	EP	Exciting Power
DC	Ductile Class	ES	Edge
		EW	Empty Weight
		EX	Eccentricity
		F1	Fire Point <i>The measurement of the temperature at which combustion initially begins for any number of substances</i>
		F2	Radiated Power
		F3	Output Power (Peak Envelope)
		F4	Height above Average Terrain
		F5	Ground Elevation
		F6	Height to Tip
		F7	Radius from a Location
		F8	Radius from Coordinates
		F9	Operating Hours

CODE DEFINITION & EXPLANATION

FA	Fluorine
FB	Flare
FC	Short Cycle Flatness
FD	Frequency of Operation
FE	Fermium
FF	Francium
FG	Freezing Point
FH	Finish
FI	Filament Count
FJ	Face Width <i>The width of the oscillate wound material</i>
FK	Fluid Consistency <i>Descriptor of a fluid expressed as the ratio, by weight, of total suspended solids to liquid</i>
FL	Longitudinal Flatness
FN	Flatness
FP	Flashpoint
FQ	Frequency
FR	Flow Rate
FS	Fold Strength
FT	Flange Thickness
FU	Azimuth
FV	Transverse Flatness
FW	Flange Width
FX	Filler
FY	Beam
FZ	Output Power (Mean RF)
G1	Gutter
G2	Grain Size <i>The internal grain morphology of a sample</i>
G3	Tilt
GA	Grain
GB	Guided Bends Root
GC	Gadolinium
GD	Gold
GE	Guided Bends Face
GF	Guided Bends Side
GG	Gauge
GH	Gallium
GI	Grit, Brushed <i>The percentage of a sample of TiO₂ (water dispersed) which remains on a 325 mesh screen after washing and brushing the screen and surface to break apart soft agglomerates</i>
GJ	Grit, Unbrushed <i>The percentage of a sample of TiO₂ (water dispersed) which remains on a 325 mesh screen after washing the screen surface</i>
GK	Tinting Strength <i>A measure of the hiding power of a titanium dioxide sample obtained by comparing the green (Y) reflectance of a tinted waterbased formula against that of a standard</i>
GL	Gloss

CODE DEFINITION & EXPLANATION

GM	Emulsion Gloss <i>The 60-degree gloss of a pigment sample in a waterbased paint formula</i>
GN	Gross to Net Conversion Factor
GO	Particle End Point <i>The reading on a Hegman gauge, below the fineness line, at which the population of scattered particles stops</i>
GP	Group Package Separation
GQ	Scattered Particles <i>The number of scattered particles (visible defects) in a drawdown on a Hegman gauge between the fineness line and the particle end point</i>
GR	Gravity
GS	Carbon Black Undertone <i>The blue/amber ratio (Z/X) of the reflectance of a paste made of titanium dioxide and carbon black; a measure of the TiO₂ particle size</i>
GT	Glass Transition Temperature <i>Temperature at which an amorphous material changes from a brittle to a plastic state</i>
GW	Gross Weight, Maximum
H1	Heavies <i>A relative term that is used to identify the weight percent of all molecules beyond the peak identified as the molecule being tested for in a gas chromatograph result; also, all molecules that have a boiling point higher than the molecule being tested</i>
HA	Hydro Pressure
HB	Heavy Aluminas
HC	Helium
HD	High Propagation Delay Time <i>The time between the specified reference points on the input and output waveforms, with the output changing from the defined low level to the defined high level</i>
HE	Heavy Silicates
HF	Hardness
HG	Heavy Sulfides
HH	Heavy Globular Oxides
HI	Hafnium
HJ	Holmium
HK	Human Factors
HL	Heat Loss <i>Quantity of original thermal energy removed</i>
HM	Height, Maximum
HO	Holes
HP	Height of Tread Plate Pattern
HR	Height of Runners
HT	Height
HZ	Hazepoint
IB	Impact Energy
IC	Incremental Distance
ID	Inside Diameter
IF	Input Low Voltage

CODE DEFINITION & EXPLANATION

IG	Granulated Ingot Size
IH	Input Current
II	Input Setup Time
IJ	Input Hold Time
IK	Iridium
IM	Iridium
IN	Input Low Current <i>The current flowing out of input when a specified low-level voltage is applied to that input</i>
IO	Input High Current <i>The current flowing out of an input when a specified high level voltage is applied to that input</i>
IP	Input Leakage Current <i>The current flowing into an input when the maximum allowed voltage is applied to that input</i>
IQ	Input Clamp Diode Voltage <i>The most negative voltage at an input when the specified current is forced out of that input terminal</i>
IR	Ideal Diameter
IS	Input High Voltage
IT	Interrupt Pulse Period
IU	Interrupt Setup Time
IV	Iodine
IW	Incrustation Factor
IX	Inside Diameter, Minimum
IY	Induction <i>Magnetic force</i>
IZ	Ingot Pound Size
JA	Junction Temperature
KA	Knoop
KB	Krypton
KN	K&N Holdout
L1	Lights <i>A relative term that is used to identify the weight percent of all molecules below the peak identified as the molecule being tested for in a gas chromatograph result; also, all molecules that have a boiling point lower than the molecule being tested</i>
LA	Lanthanum
LB	Lithium
LC	Low Propagation Delay Time <i>The time between the specified reference points on the input and output waveforms, with the output changing from high level to the defined low level</i>
LD	Lawrencium
LE	Lutetium
LF	Long Fibers
LG	Leg
LL	Long Leg
LM	Length, Maximum
LN	Length
LO	Long Length
LP	Camber of Pattern Line
LS	Short Leg

CODE DEFINITION & EXPLANATION

LT	Lengthwise Spacing
LW	Long Width
M1	Melt Range <i>A range of temperatures used to identify at what point compounds start to transform from a solid to a liquid state</i>
M2	Maximum Differential Pressure <i>The largest differential pressure reading at which this device will measure the differential pressure accurately</i>
M3	Maximum Static Pressure <i>Largest flowing gas pressure at which this device will measure volumes accurately</i>
M4	Area
MA	Mean Average
MB	Mendelevium
MC	Min./Max Cuttable Width
MD	Measurement Voltage <i>The reference voltage level on AC waveforms for determining AC performance</i>
ME	Maximum Input Low Voltage <i>The guaranteed input low threshold</i>
MF	Minimum Input High Voltage <i>The guaranteed input high voltage</i>
MG	Mercury
MH	Melting Point
MI	Minimum
MJ	Major Section (Stepped)
MK	Microseperometer (MSEP)
MM	Management
MN	Minimum Average
MO	Mottles
MP	Mullen Pop
MQ	MCQuaid <i>Austenitic grain morphology of a sample</i>
MR	Module R (R Bar) <i>Ratio of true width strain to true thickness strain; indicates the ability of the material to resist thinning and deform in draw</i>
MS	Minor Section (Stepped)
MT	Moisture Content
MU	Multiplier
MV	Maximum Average
MW	Molecular Weight
MX	Maximum
MY	Magnetizing Field
NA	No. per Package
NB	No. per Bundle
NC	No. per Coil Group
ND	Neodymium
NF	Neon
NG	Nobelium
NH	Number of Items per Package Label
NI	Number of Splices per Package Label
NJ	Number of Sheets per Package Label

CODE DEFINITION & EXPLANATION

NK	Nesting Factor
NL	No. per Lift
NM	No. Pkgs. per Master Pack
NO	Nominal (Target, Aim)
NP	Percent of Specified
NS	No. per Skid
NU	No. per Unit
NV	N Value <i>The work hardening rate capability of material and predicts the ability to deform in stretch, plane strain, and bending</i>
O1	Orifice - Inside Diameter
OA	Offset
OB	Osmium
OC	Output Low Voltage <i>The maximum guaranteed low voltage at an output terminal sinking the specified load-current output low current</i>
OD	Outside Diameter
OE	Output Low Current <i>The current flowing into an output which is in the low state</i>
OF	Output High Voltage <i>The minimum guaranteed high voltage at an output terminal for the specified output current 'output high current' and at the minimum VCC value</i>
OG	Output High Current <i>The leakage current flowing into a turned-off, open-collector output with a specified high output voltage applied</i>
OH	Overhead Height, Receiving Door
OI	Output Off Current Low <i>The current flowing out of a disabled three-state output with a specified low output voltage applied</i>
OJ	Output Off Current High <i>The current flowing into a disabled three-state output with a specified high output voltage applied</i>
OK	Output Short-Circuit Current <i>The current flowing out of an output which is in the high state when that output is short circuit to ground</i>
OL	Output Disable Time from Low Level of a 3-State Output <i>The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from the low level to a high impedance 'off' state</i>
OM	Outside Diameter, Maximum
ON	Output Disable Time from High Level of a 3-State Output <i>The delay time between the specified reference points on the input and output voltage waveforms with three-state output changing from the high level to a high impedance 'off' state</i>

CODE DEFINITION & EXPLANATION

OO	Output Enable Time from Low Level of a 3-State Output <i>The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from the high impedance 'off' state to the low level</i>
OP	Openness
OQ	Output Enable Time from High Level of a 3-State Output <i>The delay time between the specified reference points on the input and output voltage waveforms with the three-state output changing from high impedance 'off' state to the high level</i>
OR	Distance Between Outside Runners
OS	Open Circuits
OT	Output Delay Time
OV	Opacity
OW	Overall Width
OX	Ownership Share
OY	Operating Weight
P1	Price
PA	Package Separation
PB	Pressure
PC	Per Hundred Linear Yards
PD	Platinum
PE	Potassium
PF	Promethium
PG	Polonium
PH	Pulse Setup Time <i>The interval immediately preceding the active transition of the timing or preceding the transition of the control input to its latching level</i>
PI	Pulse Hold Time <i>The interval immediately following the active transition of the timing pulse or following the transition of control input to its latching level</i>
PJ	Pulse Width <i>The time between the specified reference points on the leading and trailing edges of a pulse</i>
PK	Pulse Recovery Time <i>The time between the reference point on the trailing edge of an asynchronous input control pulse and the reference point on the activating edge of a synchronous pulse input such that the device will respond to the synchronous input</i>
PL	Percent Defective
PM	Practice
PN	Palladium
PO	Percent of Order (-, +) <i>Expression of allowable variance of order expressed either as absolute (for example 92% to 110%) or relative percent (for example - 8% to + 10%)</i>
PP	Powder/Paste Package Size
PQ	Plutonium
PR	Praseodymium
PS	Protactinium

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
PT	Pits	SG	Slit Width <i>Width into which a customer wants a material slit (cut) length wise</i>
PU	Pressure Base	SH	Strontium
PV	Picks	SI	Supply Current <i>The current flowing into the VCC supply terminal of the circuit with specified input conditions and open outputs</i>
PW	Purchased Width	SJ	Short Circuits
PX	Purity	SK	Shrinkage
PY	Percent of Water	SL	Short Length
PZ	Pipe Size Nominal	SM	Shear
QA	Quality Index	SN	Stain
QL	Quality	SO	Sort Code CIE LCH
RA	Relative Humidity	SP	Splinter Count
RB	Range Value	SQ	Shipped Quantity
RC	Radius of Corner	SR	Selvage Right
RD	Readpoint	SS	Silver
RE	Ream Weight	ST	Stop Recovery Startup Time
RF	Resistivity	SU	Shipped Units
RG	Radium	SV	Scandium
RH	Rhenium	SW	Short Width
RI	Rubidium	SX	Sodium
RJ	Rockwell-C	SY	Service Interrupt Duration
RK	Rockwell-B	SZ	Skid Height
RL	Reduction Ratio	T1	Tire Pressure
RM	RMS Range (Side 1)	T2	Tube - Inside Diameter
RN	Required Interrupt Release	T3	Technical
RO	Reset Pulse Width	TA	Thickness Heavy End (Tapered/Stepped)
RP	Reduction of Area	TB	Thickness Small End (Tapered/Stepped)
RQ	Radon	TC	Temperature
RR	Reduction Ratio	TD	Thin Aluminas
RS	RMS Range (Side 2)	TE	Tenacity
RT	Rounds Ammunition/Military	TF	Tensile
RU	Rhodium	TG	Thin Sulfides
RV	Ruthenium	TH	Thickness
RW	Rolling Width	TI	Thin Silicates
RX	Ridges	TJ	Total Supply Current
RY	Ratio	TK	Timer Pulse Width
S1	Smoothness	TL	Tapered/Stepped Length Type
S2	Selvage on Beam	TM	Length Type: Multiples
S3	Sheffield Smoothness	TN	Timer Period
S4	Surface Strength	TO	Terbium
S5	Stiffness	TP	Thorium
S6	Saturation	TQ	Thin Globular Oxides
S7	Sediment	TR	Length Type: Random
S8	Solubility	TS	Length Type: Specific
S9	Site Atmospheric Pressure <i>Ambient pressure of the metering location</i>	TT	Time
SA	Sort Code CIE LAB	TU	Technetium
SB	Sort Code CMC	TV	Thallium
SC	Schedule Number (Pipe Size)	TW	Top
SD	Strength		
SE	Selvage Left		
SF	Samarium		

CODE DEFINITION & EXPLANATION

TX	Thulium
TY	Tear Strength
UA	Uranium
UG	Usage
VH	Height, Van Door
VO	Voltage
VW	Width, Van Door
WA	Weight per Unit of Area
WB	Web
WC	Web Depth/Height
WD	Width
WE	Wolfram
WF	Wait Recovery Startup Time
WH	Whiteness
WL	Wall Thickness
WM	Width, Maximum
WR	Wrinkles
WT	Weight
WU	Weight per Unit of Length
WX	Wax Pick
XA	Xenon
XH	Side Height, Flat Bed With Removable Sides
XP	Specified
XQ	Squareness
XZ	Spool Size
YA	Yttrium
YB	Yield
YC	Ytterbium
ZA	Power Factor <i>Relationship between watts and volt - amperes necessary to supply electric load</i>
ZB	Boron
ZC	Carbon
ZD	Load Factor <i>Relationship between watt hours and watt demand necessary to supply electric load</i>
ZF	Sulfate Sulfur <i>An oxidation product present in sulfur</i>
ZG	Organic Sulfur <i>The total sulfur less the percentage sums of sulfate sulfur and pyritic sulfur</i>
ZH	Hydrogen
ZN	Nitrogen
ZO	Oxygen
ZP	Phosphorous
ZR	Pyritic Sulfur <i>A heavy mineral (pyrite) found in sulfur</i>
ZS	Sulphur
ZV	Vandium
ZW	Tungsten

CODE DEFINITION & EXPLANATION

AAP	AC-apparent Power <i>Power measurement of a material subject to a magnetic induction</i>
ABO	Absorbance <i>The negative base 10 logarithm of the ratio of the radiant power transmitted by a sample to the radiant power incident upon the sample</i>
ABR	Abrasion <i>The qualitative ability of a surface to wear, grind, and rub away or to be worn away</i>
ABS	Absorbency <i>The rate at which a specimen takes up liquids or the amount of liquid required to saturate the specimen</i>
ACN	Acid Number <i>The quantity of base required to titrate acidic constituents present</i>
ADH	Adhesion <i>The molecular attraction between two or more bodies in contact</i>
AGE	Inventory Age <i>The age of inventory from the date or time of production to the present date or time</i>
ALK	Alkalinity <i>The quantitative capacity of aqueous media to react with hydrogen ions</i>
ALN	Alkalinity Number <i>The quantity of acid required to titrate basic constituents present</i>
ALP	Alpha-Cellulose <i>The average molecular chain length of pure long-chain cellulose in pulp</i>
AMI	Amines <i>Content of basic compounds derived from ammonia by replacement of hydrogen by one or more univalent hydrocarbon radicals or other non-acidic organic radicals</i>
AMW	Average Molecular Weight <i>The average of the sums of the weights of molecules' constituent atoms in an object which contains more than one type of molecule</i>
AOX	Antioxidant <i>A substance that increases a product's oxidation resistance</i>
API	API Gravity <i>A special hydrometer scale recommended for exclusive use in the U.S. Petroleum Industry for liquids lighter than water</i>
APP	Appearance <i>The visible impression of an item</i>
ASH	Ash <i>The inorganic component of product</i>
ASY	Assay <i>The quantitative determination of the amount of the major or active component of an item</i>
AVT	Average Temperature
BDP	Perforation Bottom Depth <i>The deepest depth below surface level for perforations in the well casing</i>

CODE DEFINITION & EXPLANATION

BHF	Bottomhole Pressure - Flowing <i>Fluid pressure at the deepest depth in the well bore while production is flowing from the well; measured during well testing and completion operations</i>
BHS	Bottomhole Pressure - Shutin <i>Fluid pressure at the deepest depth in the well bore with the well annulus closed; measured during well testing and completion operations</i>
BIC	Bark in Chips <i>The ratio of tree bark to wood chips; indicates the level of one type of contamination in production of wood pulp</i>
BND	Amount Bound in Material <i>Amount that cannot be removed by volatilization, solvent extraction, or melting</i>
BOR	Boiling Range <i>The temperatures normally used or required to bring a substance to boil at different barometric pressures</i>
BRS	Breaking Strength <i>The greatest longitudinal stress a substance can bear without tearing apart</i>
BSW	Percent Bottom Sediment and Water
BUD	Bulk Density
CAU	Caustic Reaction Severity <i>The severity of chemical reaction due to caustic present as the primary reactant</i>
CCF	Composite Corrected Factor
CGR	Color Grayness RD <i>Lightness or darkness of cotton</i>
CHA	Chemical Addition Rate <i>The quantity of chemical expressed by weight or volume added to manufacturing or testing process per unit of time</i>
CHC	Concentration of Hazardous Component
CHG	Rate of Change <i>The increase or decrease in polarity and amount of a change per unit of time</i>
CHL	Chlorides <i>Amount of chlorides in the water or brine produced from a well</i>
CIV	Cuene Intrinsic Viscosity <i>The average molecular weight of cellulose molecules in product</i>
CLA	Clarity <i>The clearness or transparency of an item</i>
CLN	Cleanliness <i>The impurities remaining in and/or on the product</i>
COH	Coercive Force <i>Magnetizing force at which magnetic induction is zero</i>
COL	Color <i>The aspect of appearance dependent upon the wavelength of incident, reflected or transmitted, and observed light</i>
CON	Concentration <i>The relative amount of a component of a sample of product containing multiple components</i>
COR	Corrosiveness <i>The ability to destroy gradually by chemical reaction</i>

CODE DEFINITION & EXPLANATION

COS	Cost
COT	Content <i>The amount of specified material contained</i>
CPF	Casing Pressure - Flowing <i>Fluid pressure within the casing, or outermost tubing used to isolate the well from the surrounding geology, while production is flowing from the well; measured during well testing and completion operations</i>
CPS	Casing Pressure - Shutin <i>Fluid pressure within the casing, or outermost tubing used to isolate the well from the surrounding geology, with the well annulus closed; measured during well testing and completion operations</i>
CSC	Choke Size - Casing <i>The diameter of the orifice in the casing through which liquids flow</i>
CSR	Cost Realism
CST	Choke Size - Tubing <i>The diameter of the orifice in the tubing through which liquids flow</i>
CTG	Coating <i>Product applied to the top of a substrate or base</i>
CUT	Cure Time <i>The time required to prepare a product by chemical or physical processing for storage or use</i>
CWT	Charge Weight
CYB	Color Yellowness (+B)
DAT	Datum Depth <i>Depth below ground surface at which a measurement is taken within a well</i>
DCT	Dirt Count <i>The amount of visible contamination</i>
DEM	De Minimis Level <i>A measurable level of significance below which a requirement does not apply</i>
DIR	Distillation Range <i>The temperature range in which a defined amount of material boils under specified conditions</i>
DIS	Dispersion <i>The ease with which one substance mixes with another</i>
DME	Dichloromethane Extract <i>The volatile components of pulp products</i>
DMF	Distributed Meter Factor
DPM	Degree of Polymerization <i>The average number of monomer units per polymer molecule in product</i>
DRY	Dryness <i>A product specification in pulp, paper, and chemicals</i>
DWP	Dew Point <i>The temperature at which a vapor begins to condense</i>
ELC	Exposure Ceiling: Threshold Limit Value
ELE	Elevation
ELI	Immediately Dangerous to Life and Health <i>A measurable level beyond which the most stringent safety measures, such as evacuation, must be taken</i>
ELL	Explosion Limit

CODE DEFINITION & EXPLANATION

ELO	Occupational Safety and Health Administration (OSHA) Permissible Exposure Limit
ELP	Occupational and Safety Health Administration (OSHA) Permissible Exposure Limit Ceiling
ELS	American Conference of Government Industrial Hygienists (ACGIH) Threshold Limit Value: Short-Term Exposure
ELT	American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value: Time Weighted Average
ELV	Unshielded Exposure Rate
ELW	American Industrial Hygienists Association (AIHA) Work Environment Exposure Level (WEEL)
ELX	American Industrial Hygienists Association (AIHA) Work Environmental Exposure Level (WEEL): Time Weighted Average
EVL	Evaporation Loss <i>The amount of material lost under specified conditions</i>
EVR	Evaporation Rate
EXH	Exhaust Benzene Emissions <i>Benzene emissions from the exhaust system</i>
EXT	Extractables <i>Material removed by solvent extraction</i>
FBP	Acetate Break Point <i>The chemical reactivity of cellulose in the acetylation process</i>
FIL	Filter Number <i>The filterability of a solution expressed in units combining the porosity of the filter medium and the time required for a standard volume of solution to pass through the filter at specific pressures</i>
FIN	Fineness <i>Mean fiber width in micrograms per inch</i>
FIT	Filterability <i>The ability of a substance to pass through a given medium under specified conditions</i>
FLD	Fluid Point <i>The point at which the fused mass has spread out in a nearly flat layer with a maximum height of 1/16 in. (1.6 mm)</i>
FLN	Fiber Length <i>Instrument method of measuring length in hundredths of an inch</i>
FLP	Fluid Level Above Pump <i>The depth of well liquids above the location of a subsurface pump unit</i>
FML	Flammability Limits
FMZ	Flammability
FNL	Fines Retained on Screen <i>Amount of particles in a material that is larger than a defined unit</i>
FNS	Fines <i>The amount of particles in a material that are smaller than a defined limit</i>
FOA	Foam <i>The dispersion of gas in a liquid or solid</i>

CODE DEFINITION & EXPLANATION

FOI	Fouling Index <i>The result of a procedure which represents the accumulation of deposits of ash on superheater, boiler and economizer tubes</i>
FOR	Foreign Matter <i>The visible contamination in a material</i>
FPV	Acetate Plugging Value <i>The weight of a liquid that passes through a given area of filter at a constant filtration pressure before the filter becomes completely blocked or plugged; denotes the filtration quality of viscose or solutions of cellulose acetate</i>
FSI	Free Swelling Index <i>The result of a procedure regarding the caking properties of coal when burned as fuel</i>
GEL	Gel <i>Viscous jelly-like material</i>
GGR	Gas Gravity <i>The density of the produced gas relative to the density of air at standard temperature and pressure</i>
GIR	Gas Injection Test Rate <i>Volume of gas injected into the well bore during a 24-hour test period</i>
GLE	Ground Level Elevation <i>The distance above sea level at a drilling site</i>
GOR	Gas-to-Oil Ratio <i>A measure of the gas produced from a hydrocarbon well relative to the oil produced</i>
GRA	Gas Test Rate <i>Volume of gas produced from a well during a 24-hour test period</i>
GRI	Graininess <i>The crystallinity of a substance</i>
H2O	Water Volume
HAR	Hardening Rate
HAZ	Haze
HHW	Hemispherical Point <i>The point at which the cone has fused down to a hemispherical lump at which point the height is one half the width of the base as shown by the fourth cone</i>
HIB	High Boilers <i>The components of a mixture which boil at a higher temperature than the rest of the mixture</i>
HOC	Heat of Combustion
HTE	Heat Equivalency
HVM	Heavy Metals <i>The metals of atomic weight greater than sodium that form soaps of reaction with fatty acids</i>
HWS	Softening Point <i>The point at which the cone has fused down to a spherical lump in which the height is equal to the width at the base</i>
HYD	Hydroxyl Number <i>The alkalinity of oil, fat, wax or other substances</i>
HZC	Hazardous Component
IDE	Identification <i>The distinguishing characteristics of a material for verification purposes</i>

CODE DEFINITION & EXPLANATION

IGA	Autoignition Temperature
IGR	Input Gas Rate <i>Volume of gas input during a 24-hour test period</i>
IMP	Impurities <i>The amount of components other than the major or active components in an item</i>
IND	Initial Deformation Point <i>The point at which the first rounding of the apex of the cone occurs</i>
INS	Insolubles <i>The residue remaining after dissolving an item in a solvent</i>
IPI	Primary Irritation Index
IRA	Inclusion Rating <i>The internal nonmetallic particles in the product</i>
JOM	Jominy Hardenability <i>The product's hardness and depth of hardening</i>
LC5	Lethal Concentration, 50% ("LC-50") <i>The lowest value of concentration which will result in the death of exactly one half of a given biological test population</i>
LD5	Lethal Dose, 50% ("LD-50") <i>The lowest value of dose which will result in the death of exactly one half of a given biological test population</i>
LDH	Limited Dome Height (LDH) <i>Response to simulated drawing operation</i>
LEF	Leaf <i>Percentage of leaf in fiber as determined by trash count and trash area</i>
LIR	Liquid Injection Test Rate <i>Volume of liquids, such as oil, mud, and water, which are injected into the well during a 24-hour test period</i>
LIV	Limit Intrinsic Viscosity <i>The percent of cellulose in a crystalline rather than amorphous form</i>
LOI	Loss on Ignition <i>Loss (of material) that occurs when a sample is ignited</i>
LOS	Loss on Drying <i>The amount of material lost after heating to a constant weight at a specified temperature</i>
LOW	Low Boilers <i>The components of a mixture which boil at a lower temperature than the rest of the mixture</i>
LPG	Liquified Petroleum Gas Factor
LPR	Line Pressure <i>Fluid pressure of the production line between the well and the separator unit or gathering line</i>
LSS	Linear Sheet Swelling <i>The increased size of a sheet of pulp when immersed in caustic during pulping</i>
LTD	Liner Top Depth <i>Depth below the surface of the top of a liner string; liner is a tube within the casing used to separate different strata but does not extend to the surface</i>
MAT	Maturity <i>Swelling and compression of fiber</i>
MCN	Magnetic Contamination
MEF	Meter Factor

CODE DEFINITION & EXPLANATION

MEL	Melt Time <i>The time between the first appearance of liquid and the total disappearance of solid</i>
MER	Efficient Rate-Reservoir <i>The maximum daily oil or gas withdrawal rate from a hydrocarbon reservoir</i>
MIC	Micronaire <i>Fiber fineness; the higher the value, the courser the fiber</i>
MOI	Moisture <i>The amount of water in an item</i>
MOR	Mortality
MPR	Production Rate-Well <i>The maximum daily rate of at which oil or gas may be produced from a hydrocarbon well</i>
MTD	Maximum Total Depth <i>Total distance along the well bore to the final bottom hole location</i>
MUL	Mullen <i>The energy required to burst a sheet with one of several standard pluggers</i>
NEU	Neutralization Number <i>The quantity of acid or base required to neutralize basic or acidic constituents in a substance</i>
NIL	Nil Ductility Test <i>The condition required to initiate brittle fracture</i>
NOC	Number of Cosigners
NON	Non-Volatile Matter <i>The amount of residue remaining after an analytical process</i>
NOR	Number of References
NOX	NOx Emissions Performance <i>Difference in exhaust NOx emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline</i>
OAP	Observed American Petroleum Institute Gravity
OBT	Observed Temperature
OCG	Oil/Condensate Gravity <i>Production fluid density relative to the density of water</i>
OCR	Oil/Condensate Test Rate <i>Volume of oil and natural gas condensate produced during a 24-hour test period</i>
ODR	Odor <i>The quality of a substance that stimulates the olfactory organ</i>
OIL	Oil <i>Liquid, slippery, viscous, relatively nonvolatile chemical</i>
OLE	Olefins <i>Hydrocarbons containing double bonds</i>
ORC	Organic Carbon <i>The amount of carbon which is bonded to another carbon or hydrogen or both</i>
OTE	Others Each <i>Identifies the maximum value of any single metallic element not listed in the chemical composition limits standard</i>
OTH	Odor Threshold

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
OTT	Others Total <i>Identifies the total value of all metallic elements not listed in the chemical composition limits standard</i>	R10	Relative Fraction of Pure Long-Chain Cellulose <i>The ratio by weight of pure long-chain and degraded cellulose to pulp where cellulose molecules of various chain lengths occur</i>
OXI	Oxidizable Substance <i>Represents the amount of a substance that can undergo oxidation</i>	R18	Relative Fraction of Total Cellulose <i>The ratio by weight of total cellulose to pulp</i>
OXS	Oxidizing Substance <i>A substance which removes electrons from other substances</i>	RAD	Radius
PAR	Particle Size <i>The diameter of solid and liquid particles</i>	RAF	Roof Adjustment Factor
PBD	Plug Back Total Depth <i>Well depth after plug back operations to abandon a lower producing horizon or formation</i>	REA	Reactivity <i>The rate at which a substance reacts or the amount of substance that reacts</i>
PDE	Casing/Liner Tubing Depth <i>Depth to the bottom of the casing/liner string</i>	RED	Reducing Substance <i>A substance which donates electrons to other substances</i>
PDG	Pump Depth from Ground <i>The distance from the ground surface to the subsurface pump unit</i>	REF	Refining <i>The severity of mechanical processing stage expressed by the amount of energy applied and length of time product is retained within equipment</i>
PER	Magnetic Permeability <i>The ease with which a material can be magnetized and how much better it is as a path for magnetic fields than air</i>	REI	Refractive Index <i>The ratio of the velocity of light in a vacuum to the velocity of light in the liquid</i>
PFO	Perforation Feet Open <i>Linear distance of all perforations of the well casing string</i>	REL	Reflectance <i>The fraction of the total radiant flux incident upon a surface that is reflected and that varies according to the wavelength distribution of the incident variation</i>
PHA	pH	RES	Resistance <i>The property of a conductor causing electric energy to be transformed into heat; equal to the voltage across the conductor divided by the electrical current flowing in the conductor; measured in ohms</i>
PHW	Hardwood Fiber <i>The amount of threadlike, primarily cellulosic material derived from the wood portion of hardwood trees</i>	RTB	Reporting Temperature Base
PIC	Pick Off	RUD	Usage Deviation (Applies to Kilowatt Hours, Kilowatt Demand and Reactive Demand)
POC	Completion	RVP	Reid Vapor Pressure
POD	Physical Description - Outer Diameter	S10	Pulp Impurities <i>The percent hemicellulose polysaccharides and degraded cellulose in pulp fibers</i>
POP	Pour Point <i>The lowest temperature at which an oil is observed to flow when cooled</i>	S12	Start <i>Identifies a value measured at the start of a testing process or range of test results</i>
PPS	Proprietary Shade <i>Identifies to customers when a textile company is using the customer's proprietary shade code versus the standard industry shade code</i>	S18	Hemicellulose <i>The percent hemicellulose polysaccharides in pulp fibers</i>
PRE	Prior Experience	SAP	Saponification Number <i>The number of milligrams of potassium hydroxide that is consumed by 1 gram of sample</i>
PRF	Pressure Factor	SCH	Schedule
PRL	Product Level	SEV	Severity
PRO	Processability <i>A rating of the ability to process</i>	SHA	Shelf Life
PRQ	Product Reportable Quantity	SIL	Silica (Silicon Dioxide)
PRY	Porosity	SLD	Solderability <i>A measure of the ability of a material or component to be soldered</i>
PSA	Percent Solution Actual	SLI	Slagging Index <i>The result of a procedure for obtaining information regarding the accumulation of ash deposits on radiant heat exchange surfaces in the furnace</i>
PSP	Past Performance		
PSW	Softwood Fiber <i>The amount of threadlike, primarily cellulosic material derived from the wood of softwood trees</i>		
PWA	Processed Waste		
PWE	Physical Description - Weight		
QUR	Reportable Quantity		

CODE DEFINITION & EXPLANATION

SOD	Solids <i>The non-volatile material remaining after an analytical process</i>
SOF	Softening Range <i>The temperature range in which material without a melting point goes from a rigid to a soft condition</i>
SPG	Specific Gravity
SPR	Separator Pressure <i>Operating pressure of the oil/water/gas separating unit</i>
STA	Stability <i>The property of a chemical compound which is not readily decomposed and does not react with other compounds</i>
STL	Short Term Exposure Limit
STP	Staple <i>Conventional method of measuring fiber length as pulled by hand</i>
SUM	Suspended Matter <i>The mixture of fine, non-settling particles of a solid within a liquid or gas</i>
SUR	Surface Roughness
SUT	Surface Tension <i>The force acting on the surface of a liquid which tends to minimize the area of the surface</i>
SVL	Survival
SXX	S10 Minus S18 Value <i>The percent degraded cellulose in pulp fibers</i>
T50	T50 <i>Temperature at which 50% of the volume of a mixture being distilled has been evaporated</i>
T90	T90 <i>Temperature at which 90% of the volume of a mixture being distilled has been evaporated</i>
TAS	Taste <i>The chemical sense by which flavors are perceived depending on taste, tactile, and warm and cold receptors in the mouth, as well as smell receptors in the nose</i>
TDP	Perforation Top Depth <i>The depth from the ground surface to the top, or shallowest, portion of the well casing perforations</i>
TEE	Autodecomposition Temperature
TES	Storage Temperature
TEX	Texture <i>The property of a solid substance which is dependent on the size, form, order, and grouping of the smaller parts of which it is made and the way in which these parts are united</i>
TOA	Aquatic Toxicity
TOR	Torque <i>A force that produces rotation or torsion</i>
TOX	Toxics Emissions Performance <i>Difference in exhaust toxics emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline</i>
TPF	Temperature Factor

CODE DEFINITION & EXPLANATION

TPL	Tubing Pressure - Flowing <i>Fluid pressure within the inner tubing used to isolate different production streams from the surrounding well while production is flowing from the well; measured during well testing and completion operations</i>
TPQ	Threshold Planning Quantity
TPS	Tubing Pressure - Shutin <i>Fluid pressure within the casing, the outermost tubing used to isolate the well from the surrounding geology, with the well annulus closed; measured during well testing and completion operations</i>
TRA	Trash Area <i>The number of pixels dotted by trash</i>
TRC	Trash Count <i>Amount of trash in the court fiber</i>
TRN	Transmittance <i>The fraction of the emitted light of a given wavelength which is not reflected or absorbed but passes through a substance</i>
TUR	Turbidity <i>The extent of cloudiness in an item in which colloidal dispersed particles are present</i>
TVD	Maximum True Vertical Depth <i>Total verticle distance from a surface location directly above the bottom hole location</i>
UCB	Cube <i>The external cubic dimensions of a specified product</i>
UNI	Uniformity <i>The degree of uniformity of fibers in a sample</i>
UNK	Unknowns <i>Substances that are quantitated but of unknown identity</i>
VAD	Vapor Density
VAP	Vapor Pressure
VIN	Vinyl <i>A chemical having the vinyl group CH₂=CH-</i>
VIS	Viscosity
VOC	VOC Emissions Performance <i>Difference in exhaust VOC (Volatile Organic Compounds) emissions attributed to a gasoline formulation as compared to the 1990 baseline gasoline</i>
VOL	Volume
VOT	Volatiles <i>The gas or vapor material given off by an item under defined conditions</i>
VOV	Volatiles by Volume
VOW	Volatiles by Weight
VSO	Volume Split to Others
VWT	Volume Weight
WDE	Water Depth <i>The depth of the water at an offshore location; measured from sea or lake bottom to the mean tidal level</i>
WEL	Weight Loss <i>The amount of substance by weight that a material loses when subjected to specified conditions</i>
WOD	Water-Oil Distribution Coefficient <i>A measure of the miscibility of oil and water</i>

CODE DEFINITION & EXPLANATION

WPF	Wellhead Pressure-Flowing <i>The pressure as measured at the wellhead of a hydrocarbon well during a flow test</i>
WPL	Water/Product Level
WPS	Wellhead Pressure Shutin <i>The pressure as measured at the wellhead of a hydrocarbon well during a shutin condition</i>
WRA	Water Test Rate <i>The volume of water produced during a 24-hour test period</i>
WTB	Water/Tank Bottom Level
ZAL	Aluminum
ZAS	Arsenic
ZBI	Bismuth
ZBT	N-Butane <i>Relative concentration of N-Butane in the gas stream being measured</i>
ZBZ	Benzene
ZCA	Calcium
ZCB	Columbium
ZCD	Carbon Dioxide <i>Relative concentration of carbon dioxide in the gas stream being measured</i>
ZCE	Cerium
ZCO	Cobalt
ZCR	Chromium
ZCU	Copper
ZET	Ethane <i>Relative concentration of ethane in the gas stream being measured</i>
ZFE	Iron
ZFL	Newspaper--Full Page
ZFS	Iron plus Silicon
ZGE	Germanium
ZHP	Heptane <i>Relative concentration of heptane in the gas stream being measured</i>
ZHS	Hydrogen Sulfide <i>Relative concentration of hydrogen sulfide in the gas stream being measured</i>
ZHX	Hexane <i>Relative concentration of hexane in the gas stream being measured</i>
ZIB	I-Butane <i>Relative concentration of I-Butane in the gas stream being measured</i>
ZIP	I-Pentane <i>Relative concentration of I-Pentane in the gas stream being measured</i>
ZMG	Magnesium
ZMN	Manganese
ZMO	Molybdenum
ZMT	Methane <i>Relative concentration of methane in the gas stream being measured</i>
ZNB	Niobium

CODE DEFINITION & EXPLANATION

ZNI	Nickel
ZNP	Neo-Pentane <i>Relative concentration of neo-pentane in the gas stream being measured</i>
ZOC	Octane <i>Relative concentration of octane in the gas stream being measured</i>
ZPB	Lead
ZPP	Propane <i>Relative concentration of propane in the gas stream being measured</i>
ZPT	N-Pentane <i>Relative concentration of N-Pentane in the gas stream being measured</i>
ZSB	Antimony
ZSE	Selenium
ZSI	Silicon
ZSN	Tin
ZTA	Tantalum
ZTB	Newspaper--Tabloid Page
ZTE	Tellurium
ZTI	Titanium
ZZN	Zinc
ZZR	Zirconium
ZZZ	Mutually Defined

739 Measurement ValueTYPE=R_{MIN}=1 MAX=20

The value of the measurement.

 C5 Controlled Substance - Class 5
 C6 Controlled Substance-Class 3N (Non-narcotic)
 CH Chassis
 CL Color - Lower Body
 CM Compliance Method
Identification of a set of equations used to predict a fuel's emissions performance based on parametric inputs

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
CP	Coupling <i>In piping, a metal collar with internal threads used to join sections of threaded pipe</i>	R3	Proof <i>Strength of a liquor as measured in proof spirit where 50% alcohol by volume is equal to 100 proof</i>
CS	Coating or Paint System Code <i>A code established by the coating/paint manufacturer that identifies a procedure used to apply the coating/paint; used in conjunction with a paint manufacturer name or system name</i>	RA	Route of Administration <i>The way a medicine is given to or taken by the patient</i>
CU	Color - Upper Body	RX	Prescription Drug
CW	Coating or Paint System Name	TC	Therapeutic Class <i>A way of categorizing medicines</i>
DE	Drug Efficacy Study Implementation	TE	Therapeutic Equivalency Evaluation <i>When there is more than one source for a drug that is identical by its active ingredients, the FDA publishes a rating of each source's therapeutic equivalence in order to aid state formularies to choose effective drugs to prescribe at lower costs to the insurer, state and consumers</i>
DF	Dosage Form <i>A description of the product's physical form, such as caplet, tablet, or capsule</i>	TF	Filtering <i>Type of filter used in processing</i>
DM	Dimensional	TP	Typeface <i>The design of the characters in a font</i>
EC	Escrow Code <i>Indicates whether or not a policy is being escrowed by a mortgage</i> SEE CODE SOURCE 264	TR	Trimming
FA	Failure Analysis Process <i>Physical construction analysis that typically determines the root cause of a product failure</i>	TZ	Bureau of Alcohol, Tobacco and Firearms Type Code <i>A subcategory of the Bureau of Alcohol, Tobacco and Firearms Class Code; it is a more detailed and descriptive term that further defines the class of an alcoholic beverage, i.e., "Irish Whiskey" as opposed to "Whiskey"</i> SEE CODE SOURCE 321
FC	Fold Configurations <i>The orientation and sequencing of folds</i>	VC	Volatile Organic Compound Control <i>A set of process conditions used to produce VOC controlled reformulated gasoline</i>
GD	Grain Direction	WD	Warranty Description <i>The warranty description for the final consumer, which the retailer needs to keep on file, in case the consumer has a claim against the warranty</i>
GM	General Merchandise	BLM	Bottomhole Location Method Code
HB	Health and Beauty Aids	BPI	Bottomhole Pressure Method Indicator Code
HY	Hydraulics	CCN	Common Chemical Name
HZ	Hazardous Material	CFC	Company Field Code
LO	Coordinate Description Code <i>An industry code that locates a coordinate upon a surface</i>	CHF	Chemical Family
MA	Material Status, Outside Processor <i>Material status of product assigned by the outside processor</i>	CLT	Casing/Liner/Tubing Type
MS	Medical Supplies	CMS	Commercial Status <i>Material status assigned by the commercial department</i>
NH	Non-Hazardous Material	DAC	Damage Code <i>Type of damage</i>
OC	Options	DAF	Damage Fault <i>Party responsible for damage</i>
OD	Odorized	DIR	Directional Indicator <i>The type of well characterized by the way in which it was drilled; code values contained in the WODEX implementation guide available from the American Petroleum Institute</i>
OR	Orientation <i>The relationship of the back printing on a form to the front printing on the same form</i>	FCD	Field Code (EIA/DOD)
OT	Over-the-Counter Drug	FDD	Forecast Deviation
P6	Percentage of Alcohol <i>The percentage of alcohol as measured against the total volume of a product such as cordials, liqueurs, cocktails, highballs, bitters and other such specialty alcoholic beverages</i>	FMR	Formula
PD	Physical Form: As Diluted	GEN	General Description
PF	Physical Form: Concentrate		
PG	Program <i>A set of process conditions used to produce Oxygenated program reformulated gasoline</i>		
PP	Process/Production Unit		
PR	Manufacturing Process <i>Production operations performed on the product being reported</i>		

CODE DEFINITION & EXPLANATION

HZR	Hazard Rating System <i>A system for both classifying and measuring hazardous characteristics of materials</i>
ING	Ingredient
MAC	Material Classification <i>Class of material, e.g. prime, secondary, etc.</i>
MBU	Minerals Management Service/Bureau of Land Management (Indian Land) Property/Unit Number <i>Numbers assigned to a property or unit by federal agencies, such as the Minerals Management Service or Bureau of Land Management, if required</i>
MSG	Market Segment <i>General market classification for which a product is intended</i>
ODR	Odor
PFA	Physical Form
PFC	Perforation Continuity Indicator <i>Well perforation top and bottom depths</i>
PFG	Physical Form: Gas
PFI	Perforation Interval(s) <i>Identification of specific perforations in the well bore; codes assigned by the operating company</i>
PFK	Physical Form: Aerosol
PFL	Physical Form: Liquid
PFM	Physical Form: Emulsion
PFN	Physical Form: Semisolid
PFP	Physical Form: Powder
PFS	Physical Form: Solid
PFT	Perforation Type
PRO	Proprietary
PSC	Pipeline Stream
PUB	Public Information
PUR	Pure Form
QAS	Quality Assurance Status <i>Material status assigned by the quality assurance department</i>
RCC	Reservoir Code (Company) <i>A company-assigned number which identifies the producing formation, or formation into which injection is taking place</i>
RSD	Regulatory (State) District <i>State-assigned code for each producing district</i>
RSE	Regulatory (State) Entity Code <i>State-assigned codes for each producing entity (lease or property)</i>
SEC	Secret or Confidential Information <i>Trade secret information available only to those who have agreed to non-disclosure</i>
SIZ	Sizing <i>A material added to yarn prior to weaving strands of yarn into a fabric; sizing improves the weaving ability of yarn</i>
SLM	Surface Location Method Code
SOL	Solubility
SYN	Synonym
THR	Threshold

CODE DEFINITION & EXPLANATION

TIR	Tire
TRN	Trade Name
TWF	Theoretical Weight Formula <i>Used to calculate a material weight</i>
WLC	Well Classification
WTT	Well Test Type

751 Product Description CodeTYPE=**AN** MIN=1 MAX=12

A code from an industry code list which provides specific data about a product characteristic.

754 Packaging Description Code

TYPE=AN MIN=1 MAX=7

A code from an industry code list which provides specific data about the marking, packaging or loading and unloading of a product.

CODE SOURCES:

39

SEGMENTS USED IN (AS SIMPLE):

PKD PKG

TRANSACTION SETS USED IN:

180	536	810	830	832	840	841	843	846	847
848	850	855	856	857	860	862	865	867	870

755 Report Type Code

TYPE=ID MIN=2 MAX=2

Code indicating the title or contents of a document, report or supporting item

SEGMENTS USED IN (AS SIMPLE):

BCI BIA BPP BPT BTR CFT CRT IMM PWK SPI

TRANSACTION SETS USED IN:

124	130	143	147	175	176	186	195	196	251

CODE DEFINITION & EXPLANATION

01 Product Transfer
02 Resale
11 Chemical Analysis
12 Mechanical Properties
13 Certified Test Report
14 Core Loss Test Report
20 Process Plan
21 Recovery Plan
22 Functional Plan
23 Contractual Plan
24 Non-Contractual Plan
25 Purchase Plan
26 Production Plan
27 Contract Delivery Schedule
28 Master Delivery Schedule

CODE DEFINITION & EXPLANATION

29	Assembly Plan
30	Lead Time Chart
31	Master Schedule
32	Master Production Schedule
33	Manufacturing Flow Diagram
34	Lot Release Plan
35	Subcontractor Plan
36	Development Plan
A1	Air Emissions Statements
A2	Anti-Dumping Gasoline Program Report
AA	Agent Inventory Report
AB	Assembly Drawing
AC	Assay Certificate <i>A written statement prepared showing the properties of the product shipped, lot numbers, etc.</i>
AD	Agent/Distributor Inventory Report
AE	Attachment
AF	Aid Form <i>Application for approval of commodity eligibility of certain products going to certain countries</i>
AG	Actual
AM	Ambulance Certification <i>Information to support necessity of ambulance trip</i>
AO	Average Outgoing Quality Report
AP	Advanced Problem Notification
AR	Asset Reclassification Extension Request
AS	Admission Summary <i>A brief patient summary; it lists the patient's chief complaints and the reasons for admitting the patient to the hospital</i>
AT	Purchase Order Attachment
AU	Automobile Claim Report
AV	Averaging Areas Report
AW	Air Waybill <i>Forwarding or carrying agreement between shipper and air carrier and is obtained from the airline used to ship the goods in question; used as a receipt for cargo and contract of carriage</i>
AX	Asset Reclassification Extension Response
B1	Batch Report
BA	Budget
BB	Buy or Sell Exchange Contract Status Statement
BC	Bill of Lading Copy
BE	Benzene Content Averaging Report
BL	Bill of Lading
BM	Bill of Material
BN	Beneficiary Certificate <i>Letter prepared by the documentation editor or by a forwarder stating that certain conditions, as called for in a letter of credit, have been complied with</i>
BO	Bill of Lading Original
BR	Benchmark Testing Results
BS	Baseline
BT	Blanket Test Results

CODE DEFINITION & EXPLANATION

BW	Bill of Sale
BY	Biennial Report
C1	Cost Data Summary
C2	Functional Cost and Hour
C3	Progress Curve
C4	Plant-Wide Data
C5	Certified Cost and Price Data
C6	Wage Determination
C7	Credit Transfer Summary Report
C8	Chemical/Radiological Report
CA	Certificate of Analysis
CB	Chiropractic Justification <i>Lists the reasons chiropractic is just and appropriate treatment</i>
CC	C.A.A. Certificate of Conformance (British CAA)
CD	Customer/Distributor Inventory Report
CE	Constable Report
CF	Capability
CG	Certificate of Origin <i>Certified document that shows the national origin of goods, is presented to customs authorities upon their importation; in some cases, it is necessary that they be legalized by a consul of the country of destination; in some cases, they may be certified by a stateside organization such as a local chamber of commerce</i>
CH	Certificate of Weight <i>A list itemizing the material in each package; indicates the type of package; shows the individual net, tare, and gross weights for each package; shows the batch number for each package</i>
CI	Certificate of Inspection Report
CL	Cable <i>Required sometimes to bank advising shipping information and details of invoice; required sometimes to be sent to customer when insurance is covered by buyer; is required usually on China shipments</i>
CM	Customer/Manufacturer Inventory Report
CN	Customer's Report of Nonconformance
CO	Consignment Order
CP	Certificate of Compliance (Material Certification)
CQ	County Record
CR	Letter of Credit <i>A written undertaking of a bank (issuing bank) acting at the request and on the instruction of its customer (the applicant for the credit) to make payment to, or to the order of, a third party (beneficiary), pay or accept drafts drawn by the beneficiary, or authorize another bank to effect payment or to pay, accept or negotiate drafts against stipulated documents; terms and conditions of the credit must be complied with before payment, negotiation, or acceptance can be made</i>
CS	Consigned Inventory Sales Report
CT	Certification
CU	Customer Notification Letter
CW	Corrective Work Order

CODE DEFINITION & EXPLANATION

- CX** Cost/Schedule Status Report (C/SSR)
Contract status report showing budget, performance, actual, cost variance, schedule variance, budget at complete, estimate at complete, and variance at complete at specified levels of the work breakdown structure
- CY** Contract Funds Status Report (CFSR)
Status report for funds appropriation including commitments, actual cost, forecast of billings, and estimated termination costs
- CZ** Campus Police Report
- DA** Dental Models
Cast of the teeth; they are usually taken before partial dentures or braces are placed
- DB** Durable Medical Equipment Prescription
Prescription describing the need for durable medical equipment; it usually includes the diagnosis and possible time period the equipment will be needed
- DC** Distributor/Customer Inventory Report
- DD** Distributor Inventory Report
- DE** Certificate of Quality
Certification, in the form of a letter, that product complies with the quality specifications in the letter of credit; may also state that packing is suitable for long distance travel
- DF** DA59 Special Customs Invoice for South Africa
- DG** Diagnostic Report
Report describing the results of lab tests x-rays or radiology films
- DH** Nitrogen Certificate
A statement that lines were plugged with nitrogen prior to loading and a blanket of nitrogen was placed on top of product after loading to assure that the product stays dry and oxygen free
- DI** Directory
Reports that provide information about a subject, name, product, etc
- DJ** Discharge Monitoring Report
- DL** Draft and Transmittal Letter
Written order by the drawer (exporter or principal) directing the drawee (importer) to make payment at sight or at a determinable future date
- DM** Distributor/Manufacturer Inventory Report
- DN** Deviation/Nonconformance Test Results and Request for Action
- DQ** Delinquency
- DR** Datalog Report
- DS** Discharge Summary
Report listing the condition of the patient upon release from the hospital; it usually lists where the patient is being released to, what medication the patient is taking and when to follow-up with the doctor
- DT** Department of Transportation
- DW** Drawing(s)
- E1** Exporter's Certificate and Agreement
- EA** Electrical Average Outgoing Quality Report

CODE DEFINITION & EXPLANATION

- EB** Explanation of Benefits (Coordination of Benefits or Medicare Secondary Payor)
Summary of benefits paid on the claim
- EC** Engineering Change Order
- EL** Eligibility
- EP** Experimental Material Purchase Order
- ER** Engineering Change Request
- EX** Shippers Export Declaration
An official document submitted by a U.S. exporter whenever a shipment of merchandise goes from the U.S. to a foreign destination; joint bureau of the Census-International Trade Administration issues this form used for compiling U.S. export control laws
- EY** Barrel for Barrel Exchange Contract Status Statement
- F1** Cost Performance Report (CPR) Format 1
Detailed contract status report including current reporting month values at specified levels of the work breakdown structure
- F2** Cost Performance Report (CPR) Format 2
Detailed contract status report at specified levels of the organization breakdown structure
- F3** Cost Performance Report (CPR) Format 3
Contract baseline report that summarizes changes to the contract over a given reporting period with beginning and ending values
- F4** Cost Performance Report (CPR) Format 4
Contract resource summary report that forecasts labor requirements for the remainder of a contract
- F5** Cost Performance Report (CPR) Format 5
Contract summary or detail report explaining significant cost or schedule variances
- F6** Transportation Carrier Inspection Report
- F7** Government Inspection Report
- F8** Inspection Waiver (Written)
- F9** Inspection Waiver (Oral)
- FB** Federal Bureau of Investigation
- FC** Fumigation Certificate
- FD** Federal Specification Compliance
- FE** Federal Emergency Management Agency
- FH** Limitation of Heavy Elements
- FI** Fire Report
- FS** Certificate of Free Sale
- GP** Gas Processor's Report
- GT** Gas Transporter's Report
- HC** Health Certificate
- HR** Health Clinic Records
- HW** Hazardous Waste Manifest
- I2** Consular Invoice
Document required by some foreign countries; describes a shipment of goods and shows other information such as the consignor, consignee, and shipment's value; used by the country's customs officials to verify the value, quantity, and nature of the shipment, and certified by a consular official of the foreign country

CODE DEFINITION & EXPLANATION

- I3** Customs Invoice
A few countries require the use of a special invoice form; usually in place of a seller's commercial invoice, this form requires all of the usual data required in a commercial invoice; if the shipment is being made to a customer, a commercial invoice will still be mailed to the customer
- I4** Forwarder's Invoice
The invoice the forwarder receives from shipper and completes by adding ocean freight amount, vessel name, sailing date, estimated time of arrival, FOB amount, etc.
- IA** Insurance Attachment
A sheet that states shipments made from one date are covered under an open cover policy, up to \$2,500,000
- IC** Insurance Certificate
Required when the seller provides ocean marine insurance; the certificate is a negotiable document; must be endorsed before it can be submitted to the bank
- IM** Import License
Some national governments issue and require this document to authorize imports into their countries
- IP** Inventory Parameter Report
- IR** State School Immunization Records
- IS** Index System
- IT** Certified Inspection and Test Results
- IV** Invoice
- KA** Contract Data Requirements List (CDRL)
- KC** Kosher Certificate
- LA** Laboratory Results
- LB** Legalized Bill of Lading
A bill of lading that must be taken to the consulate of a foreign country to be legalized
- LC** Location Inventory Report
- LD** Laboratory Quality Review Variation, Deviation
- LE** Latest Revised Estimate
- LG** Legalized Certificate of Origin
A certificate of origin that must be legalized by a consulate of a foreign country
- LI** Legalized Invoice
An invoice that must be legalized by a consulate of a foreign country
- LO** Laboratory Quality Review Order, Waiver
- LP** Labor Plan
- LR** Laboratory Quality Review Order, Deviation
- LS** Lease Settlement Statement
- LT** License Application Attachment
- LW** Laboratory Quality Review Variation, Waiver
- MA** Manufacturer/Agent Inventory Report
- MB** Manufacturer/Distributor Inventory Report
- MC** Manufacturer/Customer Inventory Report
- MD** Material Data Sheets
- ME** Major Deviation Request

CODE DEFINITION & EXPLANATION

- MF** Manufacturing Specification
Instructions and or recipes to be followed in the manufacture of a product, or component of a product
- MG** Migrant Student Records Transfer System (MSRTS) Record
- MI** Mortgage Insurance Certification
- MM** Manufacturer Inventory Report
- MN** Minor Deviation Request
- MO** Manufacturer's Statement of Origin
- MR** Material Inspection and Receiving Report
- MS** Material Safety Data Sheet
- MT** Models
- MV** Metered Volumes
The result of measurements of the gas flow through a pipe at a specific physical location
- NA** National Insurance Crime Bureau Assignment
- NC** Certificate of Quantity
Certification, in the form of a letter, that the quantity invoiced agrees with the quantity shown on the packing list; certificate of quantity may be included with the certificate of quality
- ND** Commercial Invoice
A bill for goods from the buyer to the seller; should include basic information such as description of the goods, address of shipper and seller, delivery and payment terms, etc.; buyer needs invoice to prove ownership and to arrange payment; used by some governments to assess customs duties; serves as the basis in preparing all other documents covering the shipment
- NI** National Insurance Crime Bureau
- NL** National Insurance Crime Bureau Total Loss
- NM** Monthly Contractor Financial Management Report
- NN** Nursing Notes
Notes kept by the nurse regarding a patient's physical and mental condition, what medication the patient is on and when it should be given
- NO** National Insurance Crime Bureau Other than Theft
- NQ** Quarterly Contractor Financial Management Report
- NR** NOx Emissions Averaging Report
- NT** National Insurance Crime Bureau Total Theft
- OB** Operative Note
Step-by-step notes of exactly what takes place during an operation
- OC** Oxygen Content Averaging Report
- OL** Ocean Bill of Lading
- OP** Outside Production Operation Sheet
- OR** Oil Storer's Report
- OS** Organization Breakdown Structure
- OT** Oil Transporter's Report
- OX** Oxygen Therapy Certification
- OZ** Support Data for Claim
Medical records that would support procedures performed; tests given and necessary for a claim
- P1** Packing List
- P2** Protest

CODE DEFINITION & EXPLANATION

P3 Receipt
PA Part Drawing
PB Product Catalog
PC Process Change Notice
PD Proof of Delivery
PE Parenteral or Enteral Certification
PF Product Specification
Specifications, generated by the supplier/manufacturer, detailing the properties or performance characteristics of a finished product
PG Packaging Specification
Specifications detailing how individual products, or groups of products, are to be packaged for shipment
PH Production History - Property Level
PI Product Availability Inquiry
PJ Purchasing Specification
Specifications, generated by a customer, setting acceptance limits on the properties or performance of the product being purchased; purchasing specifications may additionally supply instructions for packaging, transportation, delivery, and payments
PK Storage Information Inquiry
PL Property Insurance Loss Register
PM Proof of Insurance
PN Physical Therapy Notes
PO Prosthetics or Orthotic Certification
PP Proposal
PR Purchase Report
PS Pipeline/Shipper Inventory Report
PT Inter-Plant Inventory Report
PV Police Report
PW Production History - Well Level
PX Production, Injection and Disposition Report
PY Physician's Report
PZ Physical Therapy Certification
QC Cause and Corrective Action Report
QD Quality Review Order, Purchasing
QE Quality Detail
Signifies lot by lot detail
QM Quality Review Order, Manufacturing
QR Quality Report
QS Quality Review Order Supplement
QT Quality Summary
Summarizes quality lot or lots
R1 Reformulated Gasoline/Anti-Dumping Company Registration
R2 Reformulated Gasoline/Anti-Dumping Facility Registration
RA Revision Announcement
RB Radiology Films
X-rays, videos, and other radiology diagnostic tests
RC Request for Cause and Corrective Action Report
RF Reliability Fail Rate Report
RM Request for Manufacturing Engineer Appraisal

CODE DEFINITION & EXPLANATION

RN Supplier's Report of Nonconformance
RO Regular Order
RR Radiology Reports
Reports prepared by a radiologists after the films or x-rays have been reviewed
RT Report of Tests and Analysis Report
RV Reid Vapor Pressure (RVP) Averaging Report
S1 Supply and Shipment Status Report
Report contains 100 percent status on stockage and shipment
S2 Supply Status Report
Report contains 100 percent status on stockage
S3 Exception Supply Status Report
Report contains exception status on stockage
S4 Exception Supply and Shipment Status Report
Report contains exception status on stockage and shipment
S5 Product Quality Deficiency Report Category I
A report identifying a product deficiency which has the potential to cause death, injury, severely restricts combat readiness or results in a production line stoppage
S6 Product Quality Deficiency Report Category II
A report identifying all product deficiencies not covered by a Category I report
S7 "Walsh-Healey Act" Manufacturer or Regular Dealer
A report required to be rendered by a quoting party when the quote exceeds \$10,000.00
S8 Report of Findings
S9 Representation
A statement (report) by a prospective contractor that makes a representation about a specific condition
SA State Police Report
SB Sample Approval and Rejection List
A listing of approved and disapproved cotton bales along with a reading of tests done and reasons for rejection sent by a textile mill to a merchant
SC Sanitary Certificate
Certificate of purity usually supplied by a health department
SD Support Data for a Request for Quote
SE Security Police Report
SF Contract Security Classification Specification
SH Sheriff Report
SI Seller Inventory Report
SL Sample Bale List
SM Shipping Manifests
SN Shipping Notice
SO Secretary Certificate
SP Specification
SQ Statistical Quality Documents
SR Statistical Report
SS Seller Sales Report
ST Student Educational Record (Transcript)

CODE DEFINITION & EXPLANATION

SU	Supplier's Certificate <i>A form that has to do with commission that is being paid to a representative because he took the order from the customer for shipper's products</i>
SV	Survey
SW	Sea Waybill
SX	Steamship Due Bill
T1	Title Bill
T2	Preliminary Title Work
T3	Loan Documents
T4	Tax Information
T5	Toxics Emissions Performance Averaging Report
T6	Toxics Release Inventory
TA	Asset Support Inquiry <i>An inquiry as to the abilities of an organization to support contingency or operational plans or projects</i>
TB	Asset Support Advice <i>A response detailing the capabilities of an organization to support contingency or operational plans or projects</i>
TC	Physical Inventory Request <i>A request for or notification of a physical inventory action</i>
TD	Asset Reclassification Response
TE	Asset Reclassification Request
TF	Transaction History Request
TH	Total Theft Claim Report
TI	Asset Status Inquiry
TJ	Asset Status Advice
TK	Logistics Transfer Inquiry <i>An inquiry as to the current status of material transfers between inventory managers</i>
TL	Logistics Transfer Advice <i>A response to an inquiry for the current status of material transfers between inventory managers</i>
TM	Stock Sale Report
TN	Delayed Sale Report <i>A standard transaction to establish, reverse, or cancel a backorder</i>
TO	Demand Report
TP	Treatments Certificate <i>Form required for New Zealand and Australia that states that the container has been cleaned prior to loading shipment and certifies that no straw, rice hulls, or similar plant materials were used as packing materials</i>
TQ	Storage Information Advice
TR	Transmittal Letter <i>The section of information attached to a draft which shows the drawee and address (sold to), draft number (seller's order number), tenor, letter of credit amount, and lists the documents that the bank should get; It also shows the U.S. bank name/address to which the forwarder mails the documents indicated</i>
TT	Title Transfer
TX	Tax-exempt Certificate

CODE DEFINITION & EXPLANATION

U1	Survey Report
UA	Union Agreement
US	"BUY AMERICA" Certification of Compliance
VA	Variance Analysis
VC	Volatile Organic Compounds (VOC) Emissions Averaging Report
VD	Data Request for Vendor's Specifications or Drawings.
VM	Visual/Mechanical Average Outgoing Quality Report
W1	Safe Drinking Water Bacteriological Report
W2	Safe Drinking Water Report
WB	Work Breakdown Structure
WI	Well Information
WP	Work Progress
WT	Well Test Information
XE	Equipment Test Results
XP	Photographs
ZB	Conventional Ammunition Suspension Report <i>An action that suspends or freezes continued use of a specified quantity of conventional ammunition</i>

756 Report Transmission Code

TYPE=ID MIN=1 MAX=2

Code defining timing, transmission method or format by which reports are to be sent

SEGMENTS USED IN (AS SIMPLE):

B2 B11 PWK

TRANSACTION SETS USED IN:

CODE DEFINITION & EXPLANATION

1	Summary Electronic Invoice
2	Full Electronic Invoice
3	Printed Invoice Sent by Mail
4	Summary Electronic Invoice and Printed Invoice Sent by Mail
5	Full Electronic Invoice and Printed Invoice Sent by Mail
6	No paper Invoice
7	Summary Electronic Invoice and No paper Invoice
8	Full Electronic Invoice and No Paper Invoice
AE	Electronically After Shipping
AM	By Mail After Shipping
AU	By Data Pattern <i>Indicates that a report will be transmitted across a telecommunications network using fixed-record images</i>
BE	By Mail and Electronically
BM	By Mail
BW	Best Way (Sender's Option)
CF	Courier

CODE DEFINITION & EXPLANATION

DA Data
EL Electronically Only
FX By Fax
GS On General Services Administration (GSA) Form 10050
Indicates that a report will be transmitted via GSA Form 10050
IA Electronic Image
IE Electronically with Invoice
IM By Mail with Invoice
NS Not Specified
Indicates that a report will be transmitted via a nonspecified medium
PO Printed Original Required
SE Electronically Before Shipping
SM By Mail Before Shipping
SN With Ship Notice
TE Separately, Electronically at Time of Shipping
TM Separately, by Mail at Time of Shipping
TX Text
VO Voice
WS With Shipment (With Package)

757 Report Copies NeededTYPE=**N0**MIN=1MAX=2

The number of copies of a report that should be sent to the addressee.

892 Line Item Change Reason Code

TYPE=ID MIN=2 MAX=2

Code defining reason for any difference between quantity ordered and quantity shipped for a line item.

SEGMENTS USED IN (AS SIMPLE):

W12

TRANSACTION SETS USED IN:

945

CODE DEFINITION & EXPLANATION

- 01 Out of Stock
- 02 Equipment Cut
- 03 Booking Location Request
- 04 On Hold
- 05 Order Discrepancy
- 06 Receiving Location Request
- 07 Inventory Discrepancy
- 08 Material Shortage
- 09 Substitution
- 10 Diverted Item
- 11 Loading Error
Warehouse, central customer pickup, or common carrier loaded wrong product
- 12 Inbound Carrier Failure
Carrier failed to deliver consignment product on time (and damage free) when shipped from the origin location with sufficient lead time
- 13 Product Allocation Exceeded
Order requested more product than was allocated for production or shipment or order requested shipment before or after availability period
- 14 Improperly Sized Order
Order requested more product than vehicle could accommodate based on weight, cube, or pallet considerations
- 15 Wrong Equipment
Improperly sized equipment, wrong configuration, lacking required temperature controls, etc.
- 16 Insufficient Equipment Space
Insufficient space on customer or common carrier equipment due to other previously loaded product
- 17 Discontinued Item
- 20 Late Stock Transfer
- 21 Inadequate Lead Time
- 22 Stock Transfer Not Set Up
- 23 Item Not Stocked at Shipping Location
- 24 Product Withdrawn
- 25 Addition Requested by Customer
- 26 Bacteria Clearance
- ZZ Mutually Defined

893 Warehouse Detail Adjustment Identifier

TYPE=ID MIN=1 MAX=1

Code to identify detail line item as an adjustment to inventory levels.

SEGMENTS USED IN (AS SIMPLE):

W07 W12

TRANSACTION SETS USED IN:

944 945

CODE DEFINITION & EXPLANATION

- 1 Adjustment Having Normal Effect on Inventory for Type of Transaction Set in which Code is Used
- 2 Adjustment Having Reversal Effect on Inventory for Type of Transaction Set in Which Code is Used

897 Vessel Code Qualifier

TYPE=IDMIN=1MAX=1

Code specifying vessel code source.

19 In Water
20 At 1 Atmosphere Pressure
21 Where Ether = 1
22 Actual
23 Predicted
24 Air-dried Basis
A condition representative of a partially dried sample
25 As-received Basis
A condition representative of a sample as it arrived at a laboratory, before any processing or conditioning

CODE DEFINITION & EXPLANATION

- 26** Dry Basis
A condition representative of no moisture in the sample
27 Equilibrium Basis
A condition representative of material in its natural state
28 Moisture and Ash-Free Basis
A condition representative of no moisture and no ash in the sample
29 Oxidizing Atmosphere
The presence of oxidizing gases during testing
30 Reducing Atmosphere
The presence of reducing gases during testing
31 Calculated
32 Scaled Weight
A weight that is taken from a scale rather than calculated
34 Ratchet
Highest previously attained value
35 Saturated Vapor
Measurement applies to the maximum amount of product material that can be held in vapor form without condensing
36 Unconditional
Measurement applies with no further conditions beyond those already specified
37 Short-term
Measurement applies only over the short-term specified
38 Time-weighted
Measurement signifies that the measurement for each event is weighted by the time duration of that event
39 Corrected
40 Uncorrected
41 Off Peak
42 On Peak
43 Intermediate
44 Average
Calculated Value was based on an average parameter or standard
45 Per Gallon
Calculated Value was based on per gallon parameter or standard

936 Measurement Attribute Code

TYPE=ID_{MIN}=2_{MAX}=2

Code used to express an attribute response when a numeric measurement value cannot be determined.

Tax applied to the utility and petroleum industries

EV Environmental Tax

F1 FICA Tax

F2 FICA Medicare Tax

F3 FICA Social Security Tax

FD Federal Tax
Usage tax imposed by federal (US and Canadian) government

CODE DEFINITION & EXPLANATION

FF	Fuel Super Fund Tax
FI	Federal Income Tax Withholding
FL	Fuel L.U.S.T. Tax (Leaking Underground Storage Tank)
FR	Franchise Tax <i>Tax imposed by municipality for the right to provide service</i>
FS	Fuel Spill Tax
FT	Federal Excise Tax
GR	Gross Receipts Tax
GS	Goods and Services Tax <i>Canadian value-added tax</i>
HS	Public Health and Education Tax <i>Canadian tax levied to fund public care and education</i>
HT	Handicap Tax <i>Tax assessed to assist the handicapped</i>
LO	Local Tax (Not Sales Tax) <i>Service tax imposed on a local level</i>
LS	State and Local Sales Tax
LT	Local Sales Tax (All Applicable Sales Taxes by Taxing Authority Below the State Level)
LU	Leaky Underground Storage Tank (LUST) Tax (federal) <i>Leaky Underground Storage Tank (LUST) Tax (federal); tax imposed in the U.S., at the federal level, for clean-up of leaky underground storage tanks</i>
LV	Leaky Underground Storage Tank (LUST) Tax (state) <i>Leaky Underground Storage Tank (LUST) Tax (state); tax imposed in the U.S., at the state level, for clean-up of leaky underground storage tanks</i>
MP	Municipal Tax <i>Service tax imposed by a municipality</i>
MT	Metropolitan Transit Tax
OT	Occupational Tax <i>Tax imposed on telecommunication companies for the right to provide service</i>
PG	State or Provincial Tax on Goods
PS	State or Provincial Tax on Services
SA	State or Provincial Fuel Tax
SC	School Tax <i>Tax collection by taxing authority for schools</i>
SE	State Excise Tax <i>Usage tax imposed by state of provincial government</i>
SF	Superfund Tax <i>Superfund is a U.S. government fund created for the clean up or eradication of sites at which toxic waste, hazardous to the environment, has been dumped</i>
SL	State and Local Tax <i>State and Local tax funds, exclusive of State and Local Sales tax</i>
SP	State/Provincial Tax <i>State tax levied which excludes sales or excise taxes</i>
SR	State Rental Tax <i>Levied by a state government against the periodic fee paid by a customer in return for the right to use the property of another party</i>
ST	State Sales Tax

CODE DEFINITION & EXPLANATION

SU	Sales and Use Tax <i>Tax on Equipment and Service provided</i>
SX	Enhanced 911 - State Excise Tax <i>A tax imposed to pay for enhanced 911 services such as automatic call identification</i>
T1	Pre-threshold Tax
T2	Post Threshold Tax
TD	Telecommunications Device for the Deaf (TDD) Service Excise Tax <i>Tax imposed to recover the cost of providing TDD equipment</i>
TT	Telecommunications Tax <i>Tax imposed on telecommunications companies for the right to provide service or usage tax imposed. (This could be an excise tax)</i>
TX	All Taxes <i>Total of all applicable taxes</i>
UL	License Tax <i>Tax used to report the amount of license tax which is passed to the consumer</i>
UT	Utility Users' Tax <i>City or county tax for natural gas usage that is imposed upon customers</i>
VA	Value Added Tax
WS	Well Service
ZA	911-City Tax <i>Tax levied to recover the cost of providing 911 emergency services within a city</i>
ZB	911-County Tax <i>Tax levied to recover the cost of providing 911 emergency service within a county</i>
ZC	911-Excise Tax <i>Usage tax imposed to recover the cost of 911 service</i>
ZD	911-State Tax <i>Tax levied to recover the cost of providing 911 emergency service within a State</i>
ZE	911-Tax <i>Tax to recover the cost of 911 service</i>
ZZ	Mutually Defined

810	811	838	839	840	843	846	850	851	855
858	859	860	865						

CODE DEFINITION & EXPLANATION

- 1 Lease Rate Factor
- 2 Early Termination Rate
- 3 Renewal Rate
- 4 Renewal Rate Cap
- 5 One Family
- 6 2-4 Family
- 7 Multifamily
- 8 Commercial
- 9 Other
- 05 Target Fee or Profit
The negotiated contract fee or profit applicable to one defined contract effort
- 06 Current Schedule Variance
The percent difference between the budgeted cost for work performed and the budgeted cost for work scheduled

CODE DEFINITION & EXPLANATION

07	Current Cost Variance <i>The percent difference between the budgeted cost for work performed and actual cost of work performed</i>
08	Cumulative Schedule Variance <i>The cumulative percent difference between the budgeted cost for work performed and the budgeted cost for work scheduled</i>
09	Cumulative Cost Variance <i>The cumulative percent difference between the budgeted cost for work performed and actual cost of work performed</i>
10	Complete <i>The percent of work completed for a given activity, task, or event</i>
11	Remaining <i>The percent of remaining work for a given activity, task, or event</i>
12	Vacant
13	Owner Occupancy
14	Availability Factor <i>A resource availability percentage</i>
15	Efficiency Factor
16	Scrap or Rework Yield
17	Physical (Percent) Completed <i>A percent measure of the actual work completed versus the passage of time</i>
18	Percent of Value
19	Premium Rate
20	Loan-to-Value Balance Remaining
21	Annual Demand Quantity Weighting Factor
22	Annual Demand Value Weighting Factor
23	Essentiality Weighting Factor
24	Procurement Leadtime Weighting Factor
25	Months To Procurement Weighting Factor
26	Annual Demand Frequency Weighting Factor
27	Tenant Occupancy
30	Active Contracts Delinquent-Contractor Caused
31	Active Contracts Delinquent-All Causes
32	Active Line Items Delinquent-Contractor Caused
33	Active Line Items Delinquent-All Causes
34	Contracts Completed Delinquent-Contractor Caused
35	Contracts Completed Delinquent-All Causes
36	Line Items Completed Delinquent-Contractor Caused
37	Line Items Completed Delinquent-All Causes
38	Delinquent Active Line Items in the Aging Population
AN	Annual Limit
CP	Contract to Lease
CR	Contractor Share Ratio
CS	Customer Share Ratio
DF	Decrement Factor
DY	Per Day Limit
EF	Escalation Factor

CODE DEFINITION & EXPLANATION

KA	Variation in Quantity Over <i>The percent over a stated quantity in an order or line item on a contract, which the buyer agrees to accept and pay for, if delivered in an acceptable condition</i>
KB	Variation in Quantity Under <i>The percent under a stated quantity in an order or line item on a contract, which will constitute an acceptable performance, if less than the stated quantity delivered</i>
LM	Limit
MN	Monthly Limit
OF	Offtake <i>The percentage of production actually taken by an interest holder</i>
OH	Outside Hours <i>Percent of (labor) hours related to outside suppliers</i>
PA	Lease Production
PC	Primary Coverage
PF	Per Person Deductible
PH	Per Occurrence Deductible
PM	Per Person Monthly Limit
PN	Per Occurrence Monthly Limit
PP	Per Person Limit
PR	Per Occurrence Limit
RP	Royalty
SC	Subcontracted Costs <i>Percent of costs related to subcontractors</i>
TP	Tract
WI	Working Interest
WK	Per Week Limit

1005 Hierarchical Structure Code

TYPE=IDMIN=4MAX=4

Code indicating the hierarchical application structure of a transaction set that utilizes the HL segment to define the structure of the transaction set.

SEGMENTS USED IN (AS SIMPLE):

BHT BSN

TRANSACTION SETS USED IN:

270 271 276 277 278 816 847 856 857

CODE DEFINITION & EXPLANATION

0001	Shipment, Order, Packaging, Item
0002	Shipment, Order, Item, Packaging
0003	Shipment, Packaging, Order, Item
0004	Shipment, Order, Item
0010	Information Source, Information Receiver, Provider of Service, Subscriber, Dependent
0011	Information Receiver, Information Source, Provider of Service, Subscriber, Dependent
0012	Information Source, Provider of Service, Subscriber, Dependent

CODE DEFINITION & EXPLANATION

- 0013** Provider of Service, Information Source, Subscriber, Dependent
- 0014** Provider of Service, Information Source, Information Receiver, Subscriber, Dependent
- 0015** Information Receiver, Provider of Service, Subscriber, Dependent
- 0016** Provider of Service, Subscriber, Dependent
- 0017** Subscriber, Dependent
- 0018** Information Receiver, Subscriber, Dependent

CODE DEFINITION & EXPLANATION

- 01 Pre-existing Conditions
Disease that existed prior to a person's effective date of coverage
 02 Diagnosis
Cause of the patient complaint
 03 Condition
Diagnosis for which the patient will be confined in a health care facility
 04 Occurrence
Episode defining a significant event
 05 Occurrence Span
Several episodes over a period of time
 06 Value
 07 Ambulance Certification

CODE DEFINITION & EXPLANATION

- 08 Chiropractic Certification
Reasons why chiropractic care is just and appropriate treatment
 09 Durable Medical Equipment Certification
Prescription describing the need for durable medical equipment; usually included are the diagnosis and estimated duration of need
 10 Enteral or Parenteral Therapy Certification
 11 Oxygen Therapy Certification
 12 Admitting Diagnosis
Condition for which the patient will be confined in a health care facility
 13 Principal Diagnosis
Condition established after study to be chiefly responsible for the patient's complaint
 14 Pre-Existing Physical Condition
Any physical condition that exists prior to the effective date of coverage under a contract
 15 Pre-Existing Mental Condition
Any mental condition that exists prior to the effective date of coverage under a contract

 45 Source of Injury
 46 Job
 47 Loss Prevention
 48 Managed Care
 49 Risk Management
 50 Claim Handling
 51 Event or Exposure
 52 Equipment or Materials or Chemicals
 53 Coverage
 54 Overbite
Vertical overlap of the upper teeth over the lower teeth; overlapping of mandibular incisors by maxillary incisors
 55 Overjet
The horizontal overlap of the upper teeth over the lower teeth; projection of maxillary incisors beyond mandibular incisors
 56 Profile
An outline of the shape or form of the face from the lateral view
 57 Crossbite
An abnormal line of occlusion between the two arches
 58 Arch Asymmetry
An asymmetrical condition in the curved structure of the natural dentition or alveolar ridge
 59 Dentition Midline
An imaginary dividing line through the middle of the natural teeth in the dental arch following eruption
 60 Crowding
A condition in which teeth assume altered position
 61 Molars
The three teeth in each quadrant that are located distal to the second bicuspid
 62 Cuspids
The four pointed teeth located between the lateral incisor and first bicuspid in each quadrant of the mouth
 69 Anti-fungal Therapy
 70 Hospice

CODE DEFINITION & EXPLANATION

- MM** Month of Year in Numeric Format
The month of the year consecutively numbered from one for January to twelve for December and expressed using a lead zero if the number of the month is less than ten
- TM** Time Expressed in Format HHMM
Time expressed in the format HHMM where HH is the numerical expression of hours in the day based on a twenty-four hour clock and MM is the numerical expression of minutes within an hour
- TQ** Date Expressed in Format MMY
- TR** Date and Time Expressed in Format DDMMYYHHMM
- TS** Time Expressed in Format HHMMSS
Time expressed in the format HHMMSS where HH is the numerical expression of hours in the day based on a twenty-four hour clock, MM is the numerical expression of minutes within an hour, and SS is the numerical expression of seconds within a minute
- TT** Date Expressed in Format MMDDYY
- TU** Date Expressed in Format YYDDDD
- YM** Year and Month Expressed in Format YYMM
- YY** Last Two Digits of Year Expressed in Format CCYY
The year in the century (00 to 99)
- DTS** Range of Date and Time Expressed in Format CCYYMMDDHHMMSS-CCYYMMDDHHMMSS
- RD2** Range of Years Expressed in Format YY-YY
- RD4** Range of Years Expressed in Format CCYY-CCYY
- RD6** Range of Dates Expressed in Format YYMMDD-YYMMDD
- RD8** Range of Dates Expressed in Format CCYYMMDD-CCYYMMDD
A range of dates expressed in the format CCYYMMDD-CCYYMMDD where CCYY is the numerical expression of the century CC and year YY, MM is the numerical expression of the month within the year, and DD is the numerical expression of the day within the year; the first occurrence of CCYYMMDD is the beginning date and the second occurrence is the ending date
- RDM** Range of Dates Expressed in Format YYMMDD-MMDD
- RDT** Range of Date and Time, Expressed in Format CCYYMMDDHHMM-CCYYMMDDHHMM
A range of dates and times expressed in the format CCYYMMDDHHMM-CCYYMMDDHHMM where CCYY is the numerical expression of the century CC and year YY, MM is the numerical expression of the month within the year, DD is the numerical expression of the day within the month, HH is the numerical expression of hours in the day based on a twenty-four hour clock, and MM is the numerical expression of minutes within an hour; the first occurrence of CCYYMMDDHHMM is the starting time and the second is the ending time
- RMD** Range of Months and Days Expressed in Format MMDD-MMDD

CODE DEFINITION & EXPLANATION

- RTM** Range of Time Expressed in Format HHMM-HHMM
A range of times expressed in the form HHMM-HHMM where HH is the numerical expression of hours in the day based on a twenty-four hour clock and MM is the numerical expression of minutes within an hour; the first occurrence of HHMM is the starting time and the second is the ending time
- RTS** Date and Time Expressed in Format CCYYMMDDHHMMSS

1251 Date Time Period

CODE DEFINITION & EXPLANATION

- 0** Document Identification Code
Codes that subclassify a transaction
SEE CODE SOURCE 350
- 1** Free On Board Site Code
The destination site where the seller agrees to deliver merchandise on board the conveyance without extra charge
SEE CODE SOURCE 350
- 2** Type of Business Code
The classification of a contractor's business
SEE CODE SOURCE 350
- 3** Kind of Contract Code
Various kinds of contracts for tailoring reports
SEE CODE SOURCE 350
- 4** Type of Contract Code
Types of contract pricing provisions
SEE CODE SOURCE 350
- 5** Criticality Designator Code
Classifies the order of importance of contracts for production and performance surveillance
SEE CODE SOURCE 350
- 6** Special Contract Provision Code
Certain contract clauses and provisions that require special attention
SEE CODE SOURCE 350
- 7** Quality Assurance Site Code
The site at which quality assurance is performed
SEE CODE SOURCE 350
- 8** Acceptance Site Code
The site at which assent to ownership of contract line items takes place
SEE CODE SOURCE 350
- 9** Indicator Code
A specific condition applies to the contract
SEE CODE SOURCE 350
- B** Bank Administration Institute (BAI)
SEE CODE SOURCE 325
- C** Canadian Inter*EDI
SEE CODE SOURCE 326
- I** Identifying Characteristics
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- S** Society for Worldwide Interbank Financial Telecommunications (SWIFT)
SEE CODE SOURCE 327
- W** Court Issued Warrant Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- 10** Transaction Status Indicator Code
A transaction other than normal and therefore requiring special handling
SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- 11** Contract Delivery Date Revision Agent Code
The kind of organization that caused an item to be undeliverable within the contract time schedule
SEE CODE SOURCE 350
- 12** Reason for Contract Delivery Date Revision Code
The reason why delivery of an item will not be made by the contract delivery date
SEE CODE SOURCE 350
- 13** Recommendations Regarding Delayed Deliveries Code
Describes which actions should be taken on delayed deliveries from contractors
SEE CODE SOURCE 350
- 14** Contract Shipment Advice Code
Information about a shipment of material from a contractor to the government
SEE CODE SOURCE 350
- 16** Cash Discount Stipulation Code
When cash discount terms for prompt payment apply to the contract
SEE CODE SOURCE 350
- 17** Shipment Acceptance Discrepancy Explanation Code
Either the reason for a difference between the quantity shipped and accepted, or why documentation is missing or incomplete
SEE CODE SOURCE 350
- 19** Contract Close-out Group Code
Classifies contracts to evaluate the closing of physically complete contracts against the established time standard
SEE CODE SOURCE 350
- 20** Payment Type Code
Type of payment made to a contractor in anticipation of performance, actual performance, or partial performance of a contract
SEE CODE SOURCE 350
- 21** Contract Fund Reporting Transaction Code
Type of cash record specified in a notice of contract payment
SEE CODE SOURCE 350
- 22** Contract Payment Deduction or Collection Code
Authorized deduction and collection conditions that can be used to adjust gross amounts or reflect monies collected
SEE CODE SOURCE 350
- 23** Obligation Variance Code
Codes that indicate a difference that changes the gross amount to be paid to the contractor from those amounts recorded as payable by the contract
SEE CODE SOURCE 350
- 24** Plus or Minus Indicator Code
Codes that signify whether a data field is to be considered algebraically positive or negative
SEE CODE SOURCE 350
- 25** Reason for Delayed Closing of Contract File Code
Factors that contribute to the delay in closing a contract file within the time period established as the norm
SEE CODE SOURCE 350

CODE	DEFINITION & EXPLANATION	CODE	DEFINITION & EXPLANATION
26	Contract Payment Line Item Status Code <i>Status of a contract line item after a particular payment or collection has been applied</i> SEE CODE SOURCE 350	42	Estimated Time of Arrival Code <i>The number of days a shipment will be in transit</i> SEE CODE SOURCE 350
27	Special Reimbursable Provisions Code <i>Requirements expressing contractor responsibilities not directly involving performance for which the contractor may be reimbursed</i> SEE CODE SOURCE 350	43	Military and Civilian Grade Code <i>The grade of the owners of personal property shipments</i> SEE CODE SOURCE 350
28	Kind of Modification Code <i>Specific conditions concerning the modification of header records</i> SEE CODE SOURCE 350	44	Seavan Ownership Code <i>The owner of a seavan</i> SEE CODE SOURCE 350
29	Purchasing Contract Officer (PCO) Instructions Code <i>Instructions in response to recommended actions regarding actual or anticipated changes to contract line item delivery dates</i> SEE CODE SOURCE 350	45	Ocean Carrier Code <i>An ocean carrier</i> SEE CODE SOURCE 350
30	Type of Delay Code <i>Identifies the nature of a delay in delivery</i> SEE CODE SOURCE 350	46	Voyage Document Number Code <i>Identifies the booking office and assigns an area subdivision serial number</i> SEE CODE SOURCE 350
32	Container and Roll-on/Roll-off Number Code <i>Specific containers, unitized pallets, or roll-on/roll-off trailers</i> SEE CODE SOURCE 350	47	Voyage Manifest Reference Code <i>The sequence in which manifests were issued</i> SEE CODE SOURCE 350
33	Air Commodity and Special Handling Code <i>An air commodity and its special handling requirements</i> SEE CODE SOURCE 350	48	Vessel Status and Terms of Carriage Code <i>Specifies the type of shipping and payment and who loads and unloads the vessel</i> SEE CODE SOURCE 350
34	Water Commodity and Special Handling Code <i>A water commodity and its special handling requirements</i> SEE CODE SOURCE 350	49	Vessel Sustaining Code <i>The physical capability of the ship's gear to load and unload cargo</i> SEE CODE SOURCE 350
35	Air Dimension Code <i>A shipment has one or more outsized dimensions, or is consolidated, or both</i> SEE CODE SOURCE 350	52	Billing Advice Code <i>The nature of the request or problem</i> SEE CODE SOURCE 350
36	Air Terminal Identifier Code <i>Identifies the name and location of air terminals worldwide</i> SEE CODE SOURCE 350	53	Billing Status Code <i>Codes that reply to requests for billing adjustments</i> SEE CODE SOURCE 350
37	Water Terminal Identifier Code <i>Identifies water ports worldwide</i> SEE CODE SOURCE 350	54	Type of Bill Code <i>The purpose of the billing</i> SEE CODE SOURCE 350
38	Consolidation and Containerization Point Code <i>Activities that consolidate cargo for overseas movement</i> SEE CODE SOURCE 350	55	Recipient of Billing Status Code <i>The organization to receive the billing reply and status</i> SEE CODE SOURCE 350
39	Transportation Mode or Method Code <i>The mode used for each segment of movement within the transportation system</i> SEE CODE SOURCE 350	56	Sales Price Condition Code <i>The amount of the billing record does not equal the unit price extension</i> SEE CODE SOURCE 350
40	Type Pack Code <i>The type of packaging, a conex container, who loaded it, and to what capacity</i> SEE CODE SOURCE 350	57	Delivery Source Code <i>Codes that provide an audit trail between performance and pricing requirements</i> SEE CODE SOURCE 184
41	Date Shipped or Received Code <i>Dates and times of a shipment</i> SEE CODE SOURCE 350	58	Transportation Bill Code <i>Earnings for "below-the-line" transportation of material</i> SEE CODE SOURCE 184
		59	Stock Fund or Non-stock Fund Code <i>The financing appropriation or a stock fund</i> SEE CODE SOURCE 184
		60	General Services Administration (GSA) Customer Supply Center Number Code <i>GSA customer supply centers</i> SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- 61** Information Indicator Code
Codes that convey special information to offices receiving an interfund bill
SEE CODE SOURCE 350
- 62** Communications Routing Identifier Code
Organizations involved in the communications process
SEE CODE SOURCE 181
- 63** Content Indicator Code
The content of communication messages
SEE CODE SOURCE 182
- 66** Suffix or Limit Code
Components that receive allocations under defense agency appropriations
SEE CODE SOURCE 185
- 67** Type of Assistance Code
Codes that distinguish between types of military assistance transactions
SEE CODE SOURCE 180
- 69** Foreign Military Sales Country Code
Foreign countries
SEE CODE SOURCE 180
- 71** Service and Agency Code
Military services, defense agencies, and certain civilian agencies of the United States Government
SEE CODE SOURCE 350
- 74** Demand Code
Identifies whether or not a material demand is recurring
SEE CODE SOURCE 350
- 75** Suffix Code
Differentiates partial actions of the same transaction
SEE CODE SOURCE 350
- 78** Project Code
Codes that relate a transaction to special programs, exercises, projects, operations, or other purposes
SEE CODE SOURCE 350
- 79** Priority Designator Code
The priority of a transaction
SEE CODE SOURCE 350
- 80** Advice Code
Instructions to transaction recipients when narratives cannot be transmitted
SEE CODE SOURCE 350
- 81** Status Code
Informs appropriate recipients about the status of a transaction or excess report
SEE CODE SOURCE 350
- 82** Shipment Hold Code
Explains why a shipping organization is delaying material after it has been picked, packed, marked, and prepared for shipment
SEE CODE SOURCE 350
- 83** Supply Condition Code
Classifies material by readiness for issue and use, describes actions underway to change the status of material, or identifies material as excess or not serviceable
SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- 84** Management Code
Supplemental information not covered by the transaction coding structure
SEE CODE SOURCE 350
- 85** Country and Activity Code
Countries, international organizations, and accounts that could receive material or services under the Foreign Military Sales System and through Military Assistance Program Grant Aid
SEE CODE SOURCE 350
- 87** Subsistence Type of Pack Code
A certain level of protection from the packing or outside shipping container for perishable and nonperishable subsistence items
SEE CODE SOURCE 350
- 88** Disposal Authority Code
Material being transferred to a Defense Reutilization and Marketing Office is authorized for disposal because of instructions from an item manager or inventory control point
SEE CODE SOURCE 350
- 89** Cooperative Logistics Program Support Code
Indicates whether or not a Foreign Military Sales transaction is a programmed or unprogrammed requirement
SEE CODE SOURCE 350
- 90** Precious Metals Indicator Code
Material containing precious metals and the content value of the metal
SEE CODE SOURCE 350
- 91** Automated Data Processing Equipment Identification Code
Automated data processing equipment
SEE CODE SOURCE 350
- 92** Reason for Disposal Code
Explains why material is being transferred for disposal
SEE CODE SOURCE 350
- 93** Type of Storage Code
The storage requirements for material
SEE CODE SOURCE 402
- 94** Identification Code
Parties or organizations not covered by other codes
SEE CODE SOURCE 350
- 95** Offer and Release Option Code
Allows countries participating in the Foreign Military Sales Program to advise supply sources whether or not prior notice to country representatives or freight forwarders is required before shipment
SEE CODE SOURCE 180
- 96** Shipment Release Code
Information about shipment release instructions
SEE CODE SOURCE 350
- 97** Ultimate Recipient Code
The ultimate receiver or buyer of material for reimbursement purposes
SEE CODE SOURCE 350
- 98** Reason for Requisitioning Code
Explains why material is needed
SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- 99** Purpose Code
Codes that inform the material owner why an inventory balance is being reserved
SEE CODE SOURCE 350
- A1** Ownership Code
Items included in the inventory records of an organization that is not the owner of the items
SEE CODE SOURCE 350
- A2** Customer Within Country Code
The receiving country and place of discharge within the country for Military Assistance Program Grant Aid or the country's mark-for or ship-to addresses in Foreign Military Sales transactions
SEE CODE SOURCE 350
- A3** Delivery Term Code
The delivery term for a Foreign Military Sales shipment
SEE CODE SOURCE 180
- A4** Case Designator Number
The case that a Foreign Military Sales transaction supports
SEE CODE SOURCE 180
- A5** Subcase Number
The line item or subcase that a Foreign Military Sales transaction supports
SEE CODE SOURCE 180
- A6** Freight Forwarder Number
Representatives designated by a country to accomplish or control shipments of Foreign Military Sales material
- A7** Record Control Number
A line item of the International Logistics Program
SEE CODE SOURCE 180
- A8** Program Year Code
Number defining the fiscal year in which the International Logistics Program Item is to be planned
SEE CODE SOURCE 180
- A9** Supplementary Address
Identifies the originating organization's unique logistics information
SEE CODE SOURCE 350
- AA** Country Code (Finance and Acquisition)
Countries in international balance of payment transactions
SEE CODE SOURCE 187
- AB** Defense Priorities and Allocations System Code
Identifies and prioritizes defense orders
SEE CODE SOURCE 186
- AD** Acquisition Advice Code
Denotes how and under what restrictions an item will be acquired
SEE CODE SOURCE 148
- AH** Acquisition Method Suffix Code
Supplements the acquisition method code description
SEE CODE SOURCE 188
- AI** Acquisition Method Code
Describes the method of acquisition used in obtaining material
SEE CODE SOURCE 188
- AJ** Utilization Code
Code identifying the purpose of the transaction
SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- AK** Distribution Code
Code identifying activities eligible to receive additional status
SEE CODE SOURCE 350
- AL** Special Requirements Code
Identifies special requirements impacting the processing of the transaction
SEE CODE SOURCE 350
- AP** American Psychiatric Association Diagnostic Statistical Manual of Mental Disorders (DSM IIIR)
SEE CODE SOURCE 438
- AR** Arrest Reason
SEE CODE SOURCE 447
SEE CODE SOURCE 448
- BA** Vessel Stowage Location Code
Specifies where cargo is stowed on the vessel
SEE CODE SOURCE 350
- BB** Business Type
SEE CODE SOURCE 224
- BC** Transportation Holding Delay Code
Identifies the reason for a transportation delay
SEE CODE SOURCE 350
- BD** Transportation Priority Code
Indicates the order of handling and the recommended method of material movement
SEE CODE SOURCE 350
- BE** Value
SEE CODE SOURCE 132
- BF** Diagnosis
SEE CODE SOURCE 131
- BG** Condition
SEE CODE SOURCE 132
- BH** Occurrence
SEE CODE SOURCE 132
- BI** Occurrence Span
SEE CODE SOURCE 132
- BJ** Admitting Diagnosis
SEE CODE SOURCE 131
- BK** Principal Diagnosis
SEE CODE SOURCE 131
- BL** Routine Foot Care Class Findings
SEE CODE SOURCE 265
- BM** Systemic Condition for Routine Foot Care
SEE CODE SOURCE 265
- BN** United States Department of Health and Human Services, Office of Vital Statistics E-code
SEE CODE SOURCE 131
- BO** Health Care Financing Administration Common Procedural Coding System
SEE CODE SOURCE 130
- BP** Health Care Financing Administration Common Procedural Coding System Principal Procedure
SEE CODE SOURCE 130
- BQ** International Classification of Diseases Clinical Modification (ICD-9-CM) Procedure
SEE CODE SOURCE 131
- BR** International Classification of Diseases Clinical Modification (ICD-9-CM) Principal Procedure
SEE CODE SOURCE 131

CODE DEFINITION & EXPLANATION

BS	Current Procedural Terminology (CPT) Codes SEE CODE SOURCE 133 SEE CODE SOURCE 224

EQ	Controlled Inventory Item Code <i>Categorizes pilferable items</i> SEE CODE SOURCE 148
ER	Department of Defense Identification Code <i>Commodities in Federal Supply Groups 13 and 14</i> SEE CODE SOURCE 196

CODE DEFINITION & EXPLANATION

- ET** Reject Advice Code
Indicates the reason a transaction was rejected
SEE CODE SOURCE 350
- EU** Request Code
The type of data requested and furnished on an asset support request
SEE CODE SOURCE 350
- EV** Review Period Indicator Code
Review period relative to decapitalization date
SEE CODE SOURCE 350
- EW** Small Arms Error Transaction Reject Code
The type of small-arms transaction error
SEE CODE SOURCE 350
- EX** Small Arms Transaction Code
Changes in small-arms status in the master file
SEE CODE SOURCE 350
- EY** Special Program Requirement Status Code
Informs of forecasting activities of action taken
SEE CODE SOURCE 350
- EZ** Type Inspection Code
The level of quality control
SEE CODE SOURCE 350
- FA** Type of Contractor Code
The type of contractor
SEE CODE SOURCE 350
- FB** Type of Media Code
The media for transmittal of transaction history
SEE CODE SOURCE 350
- FC** Type Physical Inventory or Transaction History Code
Identifies the type of inventory being conducted or requested, or identifies requests for transmission of custodial balances and history
SEE CODE SOURCE 350
- FD** Demilitarization Code
Identifies the action necessary to prevent the further use of equipment and material for its originally intended purpose
SEE CODE SOURCE 191
- FE** Shelf Life Code
The storage time period or perishability of an item
SEE CODE SOURCE 192
- FF** Essentiality Code
The essentiality of an item
SEE CODE SOURCE 193
- FG** Source Maintenance and Recoverability Code
Codes that provide source, maintenance, and recoverability data for material that can be repaired
SEE CODE SOURCE 194
- FH** Type of Location Reconciliation Request
SEE CODE SOURCE 350
- FI** Applicant Type
SEE CODE SOURCE 360
- FJ** Antenna Structure Type
SEE CODE SOURCE 360
- FK** Station Classification
SEE CODE SOURCE 360
- FL** Radio Frequency Type
SEE CODE SOURCE 361

CODE DEFINITION & EXPLANATION

- FM** Station Classification Type
SEE CODE SOURCE 360
- FN** Class of Operation
SEE CODE SOURCE 360
- FO** Antenna Polarization
SEE CODE SOURCE 360
- FP** Fund Purpose
SEE CODE SOURCE 350
- FQ** Radio System Type
SEE CODE SOURCE 360
- FR** Frequency Band
SEE CODE SOURCE 360
- FS** Area of Operation
SEE CODE SOURCE 360
- FT** Application Type
SEE CODE SOURCE 360
- FU** Authorization Type
SEE CODE SOURCE 360
- FV** Radio Service Type
SEE CODE SOURCE 360
- FW** Applicant Classification Type
- FX** Frequency
SEE CODE SOURCE 329
- G1** Uniform Residential Appraisal Attributes Code
Defines the attributes of a residential property
- GA** Action Code
The type of action being processed
SEE CODE SOURCE 350
- GB** Medium of Transmission Code
Method by which transactions are received
SEE CODE SOURCE 350
- GC** Management Indicator Code (Petroleum)
Supplemental data not indicated through the transaction coding structure
SEE CODE SOURCE 350
- GD** Gain or Loss Indicator Code
Identifies an inventory adjustment as a gain or loss
SEE CODE SOURCE 350
- GE** Type Adjustment Code
The reasons for gain or loss adjustment of a fuel inventory
SEE CODE SOURCE 350
- GF** Type Identity Change Code
Changes in the grade of petroleum products
SEE CODE SOURCE 350
- GG** Transportation Mode Reason Code
Excess transportation costs resulting from use of other than the lowest cost route or mode
SEE CODE SOURCE 350
- GI** Notification Indicator Code
Indicates that a transaction creates a condition requiring review
SEE CODE SOURCE 350
- GJ** Reject Indicator Code
Indicates that a transaction cannot be processed due to erroneous or conflicting data
SEE CODE SOURCE 350

CODE DEFINITION & EXPLANATION

- GK** Investigation Status Code
The status of the investigation of a shortage
SEE CODE SOURCE 350
- HA** Discrepancy Code
Describes a material discrepancy
SEE CODE SOURCE 350
- HB** Discrepancy Advice Code
Describes the type of action taken or requested for a supply discrepancy report
SEE CODE SOURCE 350
- HD** Discrepancy Status or Disposition Code
Provides advice to the reporting activity regarding disposition of the discrepant material
SEE CODE SOURCE 350
- IC** Collision Industry Electronic Commerce Association (CIECA) - Inspection
- J0** Summons Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J1** Judicial Hearing Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J2** Judicial Order Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J3** Judicial Sentence Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J4** Court Disposition Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J5** Court Appearance Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J6** Court Pleading Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J7** Defendant Plea Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J8** Trial Type Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- J9** Court Case Status Code
SEE CODE SOURCE 412
SEE CODE SOURCE 448
- JA** Physical Characteristics Code
Identifies the physical characteristics of an item
SEE CODE SOURCE 204
- JB** Weight or Fragility Code
The weight or fragility of an item
SEE CODE SOURCE 204
- JC** Preservation Material Code
Codes that identify the material needed to preserve an item
SEE CODE SOURCE 204
- JD** Quantity per Unit Pack Code
Identifies the number of units to be contained in a package
SEE CODE SOURCE 204

CODE DEFINITION & EXPLANATION

- JE** Preservation Data Code
Identifies the preservation data requirements for an item
SEE CODE SOURCE 204
- JF** Packing Requirement Level A Code
The Level A packing requirements for an item
SEE CODE SOURCE 197
- JG** Packing Requirement Level B Code
The Level B packing requirements for an item
SEE CODE SOURCE 197
- JH** Packing Requirement Level C Code
The Level C packing requirements for an item
SEE CODE SOURCE 197
- JI** Intermediate Container Code
The intermediate container requirements for an item
SEE CODE SOURCE 197
- JK** Intermediate Container Quantity Code
The number of units to be packed within each intermediate container
SEE CODE SOURCE 204
- JL** Special Marking Code
The special marking requirements for an item
SEE CODE SOURCE 204
- JM** Type and Cause Code
SEE CODE SOURCE 266
- JN** Mission Impact Statement Code
SEE CODE SOURCE 350
- JO** International Standard Designation System for Teeth and Areas of the Oral Cavity

Code indicating the disposition of a contested item

SEGMENTS USED IN (AS SIMPLE):

G38 RDR

TRANSACTION SETS USED IN:

180

CODE DEFINITION & EXPLANATION

- CR** Consumer Return to Vendor
Consumer sent return directly to the supplier, not the seller
- DI** Dispose
Destroy or dispose of the goods, do not ship
- KA** Keep with an Allowance
Supplier will give an allowance credit if goods are not returned
- KR** Keep and Repair
Supplier will pay for repair rather than authorize return
- MW** Manufacturer Warranty Service
Goods are under warranty, follow warranty instructions

CODE DEFINITION & EXPLANATION

- RA** Return with Authorization Number
Supplier authorizes return by issuing an RMA number
- RD** Request Denied
Supplier refuses to authorize return
- RF** Return for Factory Repair
Supplier authorizes shipment of goods to an authorized repair center
- RN** Return without Authorization Number
Supplier authorizes return, no RMA number
- RP** Return Authorization Pending
Authorization for return is pending approval
- RT** Ship to Third Party
- SC** Ship to Third Party for Charitable Contribution
- SD** Ship to Third Party for Disposal

1293 Return Request Reason Code

TYPE=ID MIN=2 MAX=2

Code indicating the reason for the return from the party returning, or requesting to return, the items

SEGMENTS USED IN (AS SIMPLE):

RDR

TRANSACTION SETS USED IN:

180

CODE DEFINITION & EXPLANATION

- BC** Beyond Code Date
- CO** Customer Ordering Error
Purchaser made error
- CV** Color Variance
Color not as expected or described
- DA** Damaged Product
- DI** Discontinued Product
- DM** Defective Merchandise or Store Inspection
Goods are defective as found by selling unit inspection
- DP** Defective Packaging
Packaging does not meet specifications
- DR** Defective Merchandise or Returned by Consumer
Consumer found goods to be defective
- DT** Damaged In Transit
- EI** Excess Inventory
Seller requests authorization to return excess goods
- EO** End of Season
Seller requests authorization to return carryover of seasonal goods
- EW** Excessive Wear
Goods have been worn more than expected with use
- LP** Label Problem
Label not as specified
- MD** Mark Downs
- NA** Not as Expected
Goods not as specified or described

CODE DEFINITION & EXPLANATION

OP	Outdated Packaging <i>Packaging is not as currently specified</i>
PE	Price Error <i>Price charged not as expected or quoted</i>
PF	Poor Fit <i>Goods do not meet size specifications</i>
PR	Product Recall
PS	Product Spoiled
PW	Poor Workmanship <i>Goods are of poor or haphazard workmanship</i>
RE	Recall
SD	Short-Dated Product <i>Not enough time before product expiration</i>
SM	Samples
SP	Shipped past Cancel Date <i>Supplier shipped goods after order cancel date</i>
SR	Stock Reduction Agreement <i>Per prior agreement, seller wishes to return surplus goods</i>
ST	Style Problem <i>Style does not meet current specifications or order</i>
TE	Termination
WG	Wrong Goods or Not Ordered <i>Supplier shipped wrong goods without an order</i>

1294 Return Response Reason Code

TYPE=ID MIN=2 MAX=2

Code indicating the response to a request to return items

SEGMENTS USED IN (AS SIMPLE):

RDR

TRANSACTION SETS USED IN:

180

CODE DEFINITION & EXPLANATION

EW	Excessive Wear and Tear <i>Supplier has determined goods were not used as intended</i>
FR	Freight or Retailer Damage <i>Damage to goods occurred after shipment</i>
IN	Item not Defective <i>Supplier finds goods in working condition</i>
IO	Item as Ordered <i>Goods as described or ordered</i>
MI	More Information Requested <i>Supplier cannot make authorization without additional information</i>
NR	No Record of Original Sale <i>Supplier will not authorize return of goods it did not sell</i>
OS	Out of Season or Discontinued Line Item <i>Supplier refuses return of or inactive goods</i>

CODE DEFINITION & EXPLANATION

PC	Pricing or Cost Difference <i>Supplier disallows return due to price or cost discrepancy</i>
PR	Picture Requested <i>Supplier requests a photograph of goods prior to authorization to determine condition of goods</i>
QD	Quantity Difference <i>Supplier indicates order or invoice quantity was different than quantity to be returned</i>
RR	Repair or Refurbish <i>Supplier is authorizing seller to keep goods, and supplier will pay an agreed upon amount to repair or refurbish</i>
RT	Return Time Limit Exceeded or Beyond Warranty Period <i>Supplier declines return based upon a specific date or window of time</i>
SR	Sample Requested <i>Supplier is pending authorization until a sample has been sent</i>
UI	Unidentifiable Item <i>Supplier does not recognize the goods in question</i>

1300 Service, Promotion, Allowance, or Charge Code

TYPE=ID MIN=4 MAX=4

Code identifying the service, promotion, allowance, or charge

CODE DEFINITION & EXPLANATION

- 01 Patient was admitted to a hospital
- 02 Patient was bed confined before the ambulance service
- 03 Patient was bed confined after the ambulance service
- 04 Patient was moved by stretcher
- 05 Patient was unconscious or in shock
- 06 Patient was transported in an emergency situation
- 07 Patient had to be physically restrained
- 08 Patient had visible hemorrhaging
- 09 Ambulance service was medically necessary
- 10 Patient is ambulatory
- 11 Ambulation is impaired and Walking Aid is Used for Therapy or Mobility
- 12 Patient is confined to a bed or chair
- 13 Patient is Confined to a Room or an Area Without Bathroom Facilities
- 14 Ambulation is Impaired and Walking Aid is Used for Mobility

CODE DEFINITION & EXPLANATION

- 15 Patient Condition Requires Positioning of the Body or Attachments Which Would Not be Feasible With the Use of an Ordinary Bed
- 16 Patient needs a trapeze bar to sit up due to respiratory condition or change body positions for other medical reasons
- 17 Patient's Ability to Breathe is Severely Impaired
- 18 Patient condition requires frequent and/or immediate changes in body positions
- 19 Patient can operate controls
- 1A Patient is receiving anti-fungal therapy
- 1B Property is occupied by owner
- 1C Property is occupied by tenant
- 1D Property is vacant
- 1E Location is urban
- 1F Location is suburban
- 1G Location is rural
- 1H Builtup over 75%
 - 1I Builtup 25 - 75%
 - 1J Builtup under 25%
- 1K Growth rate is rapid
- 1L Class I-Left
Normal relationship of the left side of the mouth by correct interdigitation of the upper and lower molars
- 1M Growth rate is stable
- 1N Growth rate is slow
- 1O Property values are increasing
- 1P Property values are stable
- 1Q Property values are declining
- 1R Class I-Right
Normal relationship of the right side of the mouth by correct interdigitation of the upper and lower molars
- 1S Demand or supply is in shortage
- 1T Demand or supply is in balance
- 1U Demand or supply is over supply
- 1V Marketing time is under 3 months
- 1W Marketing time is 3 to 6 months
- 1X Marketing time is over 6 months
- 1Y Predominant occupancy is the owner
- 1Z Predominant occupancy is the tenant
- 20 Siderails Are to be Attached to a Hospital Bed Owned by the Beneficiary
- 21 Patient owns equipment
- 22 Mattress or Siderails are Being Used with Prescribed Medically Necessary Hospital Bed Owned by the Beneficiary
- 23 Patient Needs Lift to Get In or Out of Bed or to Assist in Transfer from Bed to Wheelchair
- 24 Patient has an orthopedic impairment requiring traction equipment which prevents ambulation during period of use
- 25 Item has been prescribed as part of a planned regimen of treatment in patient home
- 26 Patient is highly susceptible to decubitus ulcers

CODE DEFINITION & EXPLANATION

- 27** Patient or a care-giver has been instructed in use of equipment
- 28** Patient has poor diabetic control
- 29** A 6-7 hour nocturnal study documents 30 episodes of apnea each lasting more than 10 seconds
- 2A** Patient is receiving oral anti-fungal therapy
- 2B** Predominant occupancy is vacant (0-5%)
- 2C** Predominant occupancy is vacant (over 5%)
- 2D** Developer or builder is in control of the Home Owners Association
- 2E** Site is a corner lot
- 2F** Zoning compliance is legal
- 2G** Zoning compliance is legal nonconforming (grandfather use)
- 2H** Zoning compliance is illegal
- 2I** There is no zoning
- 2J** Highest and best use as improved is the present use
- 2K** Highest and best use as improved is other use
- 2L** Class II-Left
The lower left first molar is posterior to the upper left first molar
- 2M** Property is located in a Federal Emergency Management Administration special flood hazard area
- 2N** Appraisal is made "as is"
- 2O** Appraisal is made subject to the repairs, alterations, inspections, or conditions listed
- 2P** Appraisal is made subject to the completion per plans and specifications
- 2Q** Project type is planned unit development (PUD)
- 2R** Class II-Right
The lower right first molar is posterior to the upper right first molar
- 2S** Project type is condominium
- 2T** Property rights are fee simple
- 2U** Property rights are leasehold
- 2V** Supervisor appraiser inspected the property per supervisory appraiser's certification
- 2W** Property was sold within last 12 months
- 2X** Appraiser signed statement of limiting conditions and disclaimer
- 2Y** Ownership interest in a property
- 30** Without the equipment, the patient would require surgery
- 31** Patient has had a total knee replacement
- 32** Patient has intractable lymphedema of the extremities
- 33** Patient is in a nursing home
- 34** Patient is conscious
- 35** This Feeding is the Only Form of Nutritional Intake for This Patient
- 36** Patient was administered premix
- 37** Oxygen delivery equipment is stationary
- 38** Certification signed by the physician is on file at the supplier's office
- 39** Patient Has Mobilizing Respiratory Tract Secretions

CODE DEFINITION & EXPLANATION

- 3A** Patient is receiving topical anti-fungal therapy
- 3L** Class III-Left
The lower left first molar is mesial to the upper left first molar
- 3R** Class III-Right
The lower right first molar is mesial to the upper right first molar
- 40** Patient or Caregiver is Capable of Using the Equipment Without Technical or Professional Supervision
- 41** Patient or Caregiver is Unable to Propel or Lift a Standard Weight Wheelchair
- 42** Patient Requires Leg Elevation for Edema or Body Alignment
- 43** Patient Weight or Usage Needs Necessitate a Heavy Duty Wheelchair
- 44** Patient Requires Reclining Function of a Wheelchair
- 45** Patient is Unable to Operate a Wheelchair Manually
- 46** Patient or Caregiver Requires Side Transfer into Wheelchair, Commode or Other
- 47** Advertisement Run Condition
- 48** Individual Paid for Last Day Worked
- 49** Full Wages Paid for Date of Injury
- 4A** Services are rendered within Hospice-elected period of coverage
- 50** Citation or Ticket Issued
- 51** Individual is Member of Policyholder's Household
- 52** Individual Permitted to Use Vehicle
- 53** Individual Wore Seatbelt
- 54** Child Restraint Device in Vehicle
- 55** Child Restraint Device Used
- 56** Individual Injured
- 57** Individual Transported to Another Location
- 58** Durable Medical Equipment (DME) Purchased New
- 59** Durable Medical Equipment (DME) Is Under Warranty
- 5A** Treatment is rendered related to the terminal illness
- 5B** Certified Aftermarket Parts Association (CAPA) Only
- 5C** Certified Aftermarket Parts Association (CAPA) Preferred
- 60** Transportation Was To the Nearest Facility
- 61** Employee is Exempt
- 62** Claimant is Covered on the Employer's Long-term Disability Plan
- 63** Employee's Job Responsibilities Changed Due to the Disabling Condition
- 64** Employer Has a Return to Work Policy for Disabled Employees
- 65** Open
- 66** Normal
- 67** Closed-moderate
- 68** Severe
- 69** Moderate
- 6A** Treatment is rendered by a Hospice employed physician

CODE DEFINITION & EXPLANATION

BM	Bellows Meter <i>A type recording instrument which employs flexible vessels that expand when pressure is applied; the movement or expansion of the vessels is an indicator of the pressure applied; bellows meters are commonly used in low pressure or differential pressure measurement; "Bellows Meter" terminology is used to indicate that corrections in volume calculations are applied with respect to Bellows recorder characteristics</i>
DM	Displacement Meter <i>A metering instrument in which mechanical displacement of known volume chambers are repeatedly filled and emptied; the volume of the chambers times the cycles of displacement is equal to the measure of volume; "Displacement Meter" terminology may also be used to define the application of volume calculation</i>
FT	Flange Tap <i>A critical parameter of design for orifice measurement where the pressure ports for the sensing of static and differential pressure are located one inch upstream and one inch downstream of the orifice plate; "Flange Tap" terminology is used to define the tap configuration employed</i>
MM	Mercury Meter <i>A type of recording instrument which employs mercury displacement in a fixed chamber when pressure is applied, the displacement is an indicator of the pressure applied; the mercury recorder is primarily used in low pressure differential pressure measurement; "Mercury Meter" terminology is used to indicate that corrections is volume calculations are applied with respect to mercury recorder characteristics</i>
OM	Orifice Meter <i>A metering instrument used to measure flowing fluid through a pipe by velocity displacement and employing orifice technologies; the orifice meter is an inferential device which senses the pressure differential created by the passage of a fluid through an orifice of critical diameter placed in the pipe; a rate of flow is calculated from the fluid flowing and instrument parameters to determine the measure of volume; "Orifice Meter" terminology may also be used to define the application of volume calculation</i>

CODE DEFINITION & EXPLANATION

PT Pipe Tap

A critical parameter of design for orifice measurement where the pressure ports for the sensing of static and differential pressure are located in a distance of two and one-half times the published inside diameter of the meter upstream of the orifice place and a distance of eight times the published inside diameter of the meter downstream of the orifice plate; "Pipe Tap" terminology is used to define the tap configuration employed

TM Turbine Meter

A type of metering instrument used to measure flowing fluid through a pipe by velocity displacement and employing turbine senses the rotation of a rotor axis turbine which is parallel to the axis of flow and proportional to the rate; the measure of volume is determined by counting the revolutions of the rotor; "Turbine Meter" terminology may also be used to define the application of volume calculation

Codes for Representation of Names of Countries, ISO 3166-(Latest Release)
Codes for Representation of Currencies and Funds, ISO 4217-(Latest Release)

AVAILABLE FROM

American National Standards Institute
11 West 42nd Street, 13th Floor
New York, NY 10036

ABSTRACT

This international standard provides a two-letter alphabetic code for representing the names of countries, dependencies, and other areas of special geopolitical interest for purposes of international exchange and general directions for the maintenance of the code. The standard is intended for use in any application requiring expression of entities in coded form. Most currencies are those of the geopolitical entities that are listed in ISO 3166, Codes for the Representation of Names of Countries. The code may be a three-character alphabetic or three-digit numeric. The two leftmost characters of the alphabetic code identify the currency authority to which the code is assigned (using the two character alphabetic code from ISO 3166, if applicable). The rightmost character is a mnemonic derived from the name of the major currency unit or fund. For currencies not associated with a single geographic entity, a specially-allocated two-character alphabetic code, in the range XA to XZ identifies the currency authority. The rightmost character is derived from the name of the geographic area concerned, and is mnemonic to the extent possible. The numeric codes are identical to those assigned to the geographic entities listed in ISO 3166. The range 950-998 is reserved for identification of funds and currencies not associated with a single entity listed in ISO 3166.

SOURCE

Coordinated Freight Classifications, NEB 100-H, 1983

AVAILABLE FROM

New England Motor Freight Bureau, Inc.
14 New England Executive Park
Burlington, MA 01803

ABSTRACT

A numeric identifier for commodities transported by New England carriers. The commodity code is a five-digit numeric of the form: dddddd

Participating carriers are listed with their ICC certificate or dock numbers.

10 Brussels Nomenclature

SIMPLE DATA ELEMENT/CODE REFERENCES:

23/H

SOURCE

Brussels Nomenclature Harmonized System (Harmonized BTN)

AVAILABLE FROM

Customs Co-operation Council
40 Rue Washington B-1050
Brussels
Belgium

ABSTRACT

The Brussels Nomenclature includes the rules for the interpretation of the nomenclature, the section and chapter notes, and the headings. Each heading is identified by four digits, the first two indicating the chapter number and the second two the numerical order in which the heading appears within that chapter. The heading numbers are shown in the first column, and the texts of the headings are printed in heavy type in the third column. These provisions (interpretative rules, section and chapter notes and numbers and texts of the headings), and they alone, form the Brussels Nomenclature. The third column also contains, in smaller type, the text of the statistical sub-headings recommended by the council for the purposes of correlation between the BTN and the SITC, revised. The number of the item in the SITC, revised, keyed to each BTN heading (or statistical sub-heading) is shown in the second column. The SITC, revised, Item Number can therefore be found for any BTN heading (or statistical sub-heading). Conversely, starting from a known SITC, revised, Item Number, the corresponding BTN heading (or statistical sub-heading) can be found by using the correlation table. The SITC, revised, Item Number can therefore be found for any BTN heading (or statistical sub-heading). Conversely, starting from a known SITC, revised, Item Number, the corresponding BTN heading (statistical sub-heading) can be found by using the correlation table.

11 National Motor Freight Classification

SIMPLE DATA ELEMENT/CODE REFERENCES:

SOURCE

National Motor Freight Classification, NMF 100 Series

AVAILABLE FROM

American Trucking Association
2200 Mill Road
Alexandria, VA 22314-4677

ABSTRACT

An identification code for commodities transported by motor carriers.

The commodity code is a six-digit numeric of the form: dddddd
A seventh digit is added where necessary to indicate supplementary information such as density ranges, different forms of shipment, special packaging requirements, etc.

12 Standard International Trade Classification

SIMPLE DATA ELEMENT/CODE REFERENCES:

23/S

SOURCE

Commodity Indexes for the International Trade Classification, Rev 2
Statistical Papers Series M No. 38/rev, Vols I & II
U.N. Publication E.81.XVII.3

AVAILABLE FROM

United Nations Publishing Service
New York, NY 10017

ABSTRACT

A classification and identification code for commodities that enter external trade, i.e., all goods whose movement into or out of the customs area of a country adds to or subtracts from the material resources of the country.

The SITC code is a 2 to 5 digit numeric of the form:

d=section

dd=division

ddd=group

ddd.d=subgroup ddd.dd=item

The code enables analysis of data at successively more detailed aggregates.

13 STCC Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

23/L 23/T

SOURCE

Standard Transportation Commodity Code (STCC)
Tariff STCC 6001-T, 1992

AVAILABLE FROM

Tariff Publishing Officer
Western Railroad Traffic Association
222 South Riverside Plaza
Chicago, IL 60606-5945

ABSTRACT

A numeric code that identifies commodities that are transported by multi-modal carriers in the U.S.

ABSTRACT

The STCC code is a 2 to 7 digit numeric that may identify a commodity, a product class, an individual industry, a minor industry group, or a major industry group. The code is of the form:

dd=2-digit level=major industry group

dd d=3 digit level=minor industry group

dd dd=4 digit level=an industry

dd ddd=5 digit level=product class

dd ddd dd=7 digit level=description of an article

The number of digits indicates the level of a given code in the hierarchical structure of the STCC. The higher the level number, the more detailed is the data represented by the code.

A code of 49 at the 2 digit level identifies a hazardous material or substance. This code is of the form:

dd=2 digit level=hazardous material or substance

dd dd=4 digit level=hazard class as designated by the U.S.

Department of Transportation

dd ddd=5 digit level=hazard class group

dd ddd dd=7 digit level=U.S. Department of Transportation proper shipping name or description (bridged to descriptions coded at 2 digit levels 01 through 47)

14 Identification Marking Code for Freight Containers

SIMPLE DATA ELEMENT/CODE REFERENCES:

24/-

SOURCE

Identification Marking Code for Freight Containers (ISO 2716-1972)

AVAILABLE FROM

American National Standards Institute
11 West 42nd Street, 13th Floor
New York, NY 10036

ABSTRACT

This international standard relates to an identification marking code for freight containers which is intended to provide information on both containers and the documentation and communications associated with their movement. The information is presented in such a manner as to be informative to operating personnel upon visual inspection and is suitable for automatic data processing.

Data elements are derived from: Annex B, Size Code
Designations: 2 numeric characters; Annex C, Type Code
Designations: 2 numeric characters.

15 STCC 49 Level Codes

SIMPLE DATA ELEMENT/CODE REFERENCES:

62/- 64/- 208/9

SOURCE

Hazardous Material Code (49 Level)

AVAILABLE FROM

Tariff Publishing Officer
Western Railroad Traffic Association
222 South Riverside Plaza
Chicago, IL 60606-5945

ABSTRACT

The hazardous materials section (group 49) of the STCC is organized according to the kind and degree of hazard associated with hazardous materials or hazardous substances, with special provision to relate the identified commodity to its product class with the established commodity code structure. Available on tape (Washington) or in book form (Chicago).

16 D-U-N-S Number

SIMPLE DATA ELEMENT/CODE REFERENCES:

66/1	66/9	860/-
------	------	-------

SOURCE

Dun & Bradstreet

AVAILABLE FROM

U.S. D-U-N-S Number assignment and lookup services are available through EDI, on-line, several types of mainframe and personal computer media, through a 900 Number Service (900-990-3867), and in print.

Dun & Bradstreet Information Services
Information Quality Department
D-U-N-S Number Administration
899 Eaton Avenue
Bethlehem, PA 18025-0001

ABSTRACT

The D-U-N-S Number is a non-indicative nine-digit number assigned and maintained by Dun & Bradstreet to identify unique business establishments. D-U-N-S Numbers are assigned to businesses worldwide. The ninth digit of the D-U-N-S Number is a Modulus Ten Check Digit which catches 100% of single digit errors and 98% of single transposition errors. D-U-N-S Numbers provide positive identification of business locations possessing unique, separate, and distinct operations. Through the D-U-N-S Number, Dun & Bradstreet maintains linkage between units of an organization to easily identify corporate family relationships, such as those between headquarters, branches, subsidiaries, and divisions. The D-U-N-S Number is the non-indicative computer "address" of a business for which detailed marketing and credit information is maintained by Dun & Bradstreet.

17 Standard Carrier Alpha Code (SCAC)

SIMPLE DATA ELEMENT/CODE REFERENCES:

66/2	99/-	140/-	296/-	298/-
307/-	309/RS			

SOURCE

Directory of Standard Multi-Model Carriers and Tariff Agents Codes (SCAC-STAC), NMF 101 Series

AVAILABLE FROM

National Motor Freight Association, Inc.
2200 Mill Road
Alexandria, VA 22314-4654

ABSTRACT

The standard carrier alpha code (SCAC) lists and codes transportation companies. The SCAC program contemplates that each company will be assigned a unique two to four letter (alpha) code for use as an abbreviation or to identify a particular company for transportation data processing purposes. The combination of letters used by any one carrier does not conflict with those assigned to other carriers, even though such other carriers may belong to a different mode.

The SCAC directory contains two sections. Section 1 is an alphabetical arrangement of carrier names. Section 2 is an alphabetical arrangement of carrier codes.

18 Federal Maritime Commission

SIMPLE DATA ELEMENT/CODE REFERENCES:

ABSTRACT

Listing of equipment and parts suppliers to the automotive, appliance, electronics, and railroad industries.

21 Standard Point Location Code (SPLC)

SIMPLE DATA ELEMENT/CODE REFERENCES:

66/20	120/SPLC	154/-	309/CS	309/SL
1244/-				

SOURCE

Continental Directory of Standard Point Location Codes (SPLC)

AVAILABLE FROM

The SPLC for motor carrier points in the United States, Canada, and Mexico and railroad stations in the United States and Mexico is copyrighted by, and available in hard copy and magnetic tape from:

National Motor Freight Traffic Association, Inc.

2200 Mill Road

Alexandria, VA 22314-4654

(703) 838-1822

A separate SPLC system for Canada, used by the railroad industry is available from:

National Transportation Agency of Canada

Ottawa, Ontario K1A 0N9

(819) 953-0985

The only factor common to both the NMFTA and NTA systems is that the basic code for a point in Canada begins with "0".

ABSTRACT

The standard point location code is designed to provide each point originating freight and each point receiving freight with a unique six-digit code number so constructed as to identify the point with its geographic location.

SPLC is based on a system of nesting recognized entities and numbering them in a standard geographic pattern. The system is state-county-city (point) using two digits to identify each. Different nomenclatures for areas equivalent to these three are substituted as they occur. Commonwealth, province and territory are synonymous with state, while parish, municipio and census district or census division are synonymous with county. Cities, borough, municipalities, rail stations, towns, villages, named rural areas, or the like, constitute the point list.

To identify motor carrier locations requiring definition beyond the six-digit level, as defined above, the SPLC is appended with an additional three digits referred to as the sub-code. The sub-code is assigned in conjunction with existing six-digit SPLC. Certain groups of sub-codes are reserved for use as follows:

Sub-Codes 001 - 199 Parts of (example: Georgetown part of Washington, DC).

Sub-Codes 200 - 239 Colleges, Universities, Hospitals, Prisons, Museums, Post Offices, Stadiums, Buildings - including government (non-military).

Sub-Codes 240 - 299 Military Facilities.

240 - 249 Air Force

250 - 259 Army

260 - 269 Coast Guard

270 - 279 Defense Logistics Agency

280 - 289 Marine Corps

290 - 299 Navy

Sub-Codes 300 - 499 Plant Sites, Warehouses, Power Stations, Docks, Piers.

Sub-Codes 500 - 599 Delivery Zones.

Sub-Codes 600 - 699 Resorts, Tracks, Parks, Racetracks, Amusement Centers, Zoos, Shopping Centers, Resorts, Historical Monuments, Miscellaneous.

Sub-Codes 700 - 999 Reserved for use by code subscribers for their internal usage to define locations peculiar to their own needs.

NOTES

The SPLC data element is assigned a field length of 9 to allow for a subcode when necessary to specify a rating point, switching point, or pier number.

Proposed Standards for Data Elements, District Identifier (93-9) and Circuit Identifier (93-10). Office of Automation and Technology (OAT), Data Administration Committee

AVAILABLE FROM

Office of Automation and Technology
Administrative Office of the U.S. Courts
Washington, DC 20544

ABSTRACT

Identifiers are provided for every federal district and circuit court. The codes for federal district courts are the two letter state abbreviation, followed by the one letter code for the district when needed (i.e., MOE for Eastern District of Missouri). The codes for the federal circuit courts are the circuit number for numbered circuits (i.e., 9 for the 9th US Circuit Court of Appeals), and an appropriate alphabetic abbreviation for the other circuit courts.

SOURCE

California Student Data Handbook

AVAILABLE FROM

California Department of Education
721 Capitol Mall, 4th Floor
Research, Evaluation and Technology
Sacramento, CA 95814

ABSTRACT

This document identifies codes and code tables for use by K-12 schools in California. The handbook establishes data standards for sharing student level information. The codes for ethnic subgroups are used to identify cultural and ethnic affiliation of students, beyond the general ethnic categories established by ASC X12 Standards.

AVAILABLE FROM

Uniform Code Council, Inc.

8163 Old Yankee Road, Suite J

Dayton, OH 45458

ABSTRACT

U.P.C. is a system of coding products whereby each item/multipack/case is uniquely identified. Codes are formatted as an optional digit which identifies the packing variations, one or two high order digit(s) identifying the system (grocery, drug, general merchandise, coupons), 5 digits which identify the manufacturer, 5 digits which identify the item and an optional 1 character check digit.

The USPS Domestic Mail Manual

AVAILABLE FROM

U.S. Postal Service
Washington, D.C. 20260

New Orders

Superintendent of Documents
P.O. Box 371954
Pittsburgh, PA 15250-7954

ABSTRACT

The ZIP Code is a geographic identifier of areas within the United States and its territories for purposes of expediting mail distribution by the U.S. Postal Service. It is five or nine numeric digits. The ZIP Code structure divides the U.S. into ten large groups of states. The leftmost digit identifies one of these groups. The next two digits identify a smaller geographic area within the large group. The two rightmost digits identify a local delivery area. In the nine-digit ZIP Code, the four digits that follow the hyphen further subdivide the delivery area. The two leftmost digits identify a sector which may consist of several large buildings, blocks or groups of streets. The rightmost digits divide the sector into segments such as a street, a block, a floor of a building, or a cluster of mailboxes.

The USPS Domestic Mail Manual includes information on the use of the new 11-digit zip code.

SOURCE

The Canadian Export Classification (based on the Harmonized System) Catalogue No. 12-578E Occasional.

AVAILABLE FROM

Mail order from:
Publication Sales Statistics Canada
Ottawa Ontario K1A 0T6
Canada

ABSTRACT

As a contracting party to the convention on the Harmonized Commodity Description and Coding System (Harmonized System or HS), Canada is obliged to conform its statistical nomenclature with the HS. The HS is an international goods classification system developed by the Custom Co-operation Council (CCC). Canada is adopting the HS as a basis for a new Canadian Tariff and Statistical Classification System.

ABSTRACT

With the implementation of HS, exporters or their agents will be required to apply Export HS Number to their B13 Export Declarations or to Summary Reports. The export HS Number consists of eight digits prefixed by the letters 'HS' and are to be shown in the following format: HS 5911.31.10

b) UCC/EAN Code 128 Application Identifier Standard

AVAILABLE FROM

Uniform Code Council, Inc.
8163 Old Yankee Rd., Suite J
Dayton, OH 45458

ABSTRACT

The UCC/EAN Serial Shipping Container Code is a 20 character code, developed by the GMAIC Retail Shipping Container Committee, that identifies shipping containers of non-standard product mix in code 128 barcode format. (Note: The Modulus 103 Check Character is never transmitted.)

2 Digits

UCC/EAN-128 Serial Shipping Container Code Application Identifier

1 Digit

Shipping Container Type: Identifies the type of serialized shipping container packaging.

2 Digits

U.P.C. Number System Character or EAN Country Flag: The first two or high order digits identify the number system character or the country flag (hence, this code can accommodate EAN as well as U.P.C.).

5 Digits

U.P.C./EAN Manufacturer ID Number

9 Digits

Shipping Container Serial Number Identifier: Identifies each shipping container.

1 Digit

Modulus 10 Check Character

Annual Report on Carcinogens (NTP Report), NTP 85-002 (or current year)

AVAILABLE FROM

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

ABSTRACT

For the purpose of this report, "known carcinogens" are defined as those substances for which the evidence from human studies indicates that there is a casual relationship between exposure to the substance and human cancer. Substances "which may reasonably be anticipated to be carcinogens" are defined as those for which there is a limited evidence of carcinogenicity in humans or sufficient evidence of carcinogenicity in experimental animals.

NIOSH Pocket Guide to Chemical Hazards, Publication #78-210

AVAILABLE FROM

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

ABSTRACT

This Pocket Guide to Chemical Hazards is presented as a source of general industrial hygiene and medical surveillance information for workers, employers, and occupational health professionals. The Pocket Guide does not attempt to present all pertinent data. Rather, it presents key information and data in an abbreviated tabular format for 397 individual chemicals or chemical types (e.g., cyanide, arsenic and compounds, etc.) found in the work environment and for which there are specific federal regulations. The implementation of the industrial hygiene and medical surveillance practices recommended in this Pocket Guide will assist in initiating and maintaining effective occupational health programs for the protection of workers.

Dun & Bradstreet Dun's SIC 2+2 Manual

AVAILABLE FROM

Dun & Bradstreet Information Services
Information Quality Department
Dun's SIC 2+2 Administration
899 Eaton Avenue
Bethlehem, PA 18025-0001

ABSTRACT

Dun's SIC 2+2 assignment and lookup services are available in several types of mainframe and personal computer media as well as in print. Dun's SIC 2+2 is a system of over 18,000 8-digit codes, each linked to a specific business description. This system is applied and maintained by Dun & Bradstreet to specifically define a company's operation. It extends the U.S. Government Standard Industrial Classification (SIC) beyond the general industry to the specific line of business level by attaching two sets of two digits to the industry SIC. The system is dynamic, which allows additional Dun's SIC 2+2 codes and descriptions to be added on demand to reflect industry growth and change.

Harmonized Commodity Description and Coding System

AVAILABLE FROM

Customs Co-operational Council
26-38 Rue de l'Industrie
B 1040 Brussels
Belgium

ABSTRACT

The Harmonized Commodity Description and Coding System, commonly referred to as the Harmonized System (HS), is a multipurpose goods nomenclature combining in a single integrated instrument the descriptions required for customs tariffs, statistical nomenclatures, and transport classifications. The role of the Harmonized System in many other areas such as for tariff-related negotiations, determination of origin of a commodity, etc. is becoming increasingly important. The Harmonized System consists of structured nomenclature (5,018 groups of goods identified by a six-digit code) and is provided with necessary definitions and rules to ensure its uniform applications. It is supplemented by Explanatory Notes, an Alphabetical Index, a Compendium of Classification Opinions, and Trailing Modules. An Electronic HS Commodity Data Base, providing an enormous listing of commodities traded internationally with their corresponding 6-digit HS code numbers, is now under preparation. All United Nations economic classifications use the HS subheadings as building blocks. Thus, for examples, all of 3,118 basic headings in the SITC, Revision 3 are correlated to the 5,018 HS subheadings. The content of each SITC heading corresponds to one or more of the HS subheadings to which it is keyed.

Director, Market Development
Petroleum Information
4150 Westheimer
Houston, TX 77027

Petroleum Industry Data Exchange
American Petroleum Institute
1220 L Street, NW
Washington, DC 20005

ABSTRACT

The PI GRID codes uniquely identify each natural gas facility at a physical location (latitude/longitude). These facilities include gas wellheads and active completions, interconnects, entry points to pipelines, delivery points to local distribution companies and end-users, gas processing points, compressors, offshore production platforms, storage facilities, and LNG import terminals. Due to the unique structure of the PI GRID Location and Facility Code, multiple facilities at a given location are easily identifiable.

The PI GRID Facility Code is a unique 16 character code. The first five characters of the PI GRID Facility Code utilize established American Petroleum Institute (API) state and county codes, while the sixth through the tenth characters are random. Together, the first ten characters uniquely identify a physical "point" on a map. These ten digits are referred to as the PI GRID Location Code. In some transactions, these 10 digits (composed of the state, county, and location codes) are all that must be communicated. The next six characters describe the type of facility, distinguish multiple facilities of a given type at a location, and may identify parts of a facility (e.g. intake or tailgate at a processing plant). Each PI GRID Facility Code is associated with a facility name and a facility operator. PI GRID Facility Codes are cross-referenced with the corresponding pipeline nonstandard codes (variously called meter numbers, station numbers, point of interest numbers, location codes, receipt point codes). By utilizing the PI GRID codes as a common code, natural gas industry participants may translate back and forth from PI GRID Location and Facility Codes to the individual nonstandard codes used by each pipeline.

Shelf Life Item Management Manual, DOD 4140.27-M

AVAILABLE FROM

Defense Logistics Agency
DLA-XPD
Cameron Station
Alexandria, VA 22304-6100

ABSTRACT

This publication provides a comprehensive set of policy and procedures related to material shelf life management, including a complete list of all related logistics management codes.

193 Integrated Material Management of Consumable Items

SIMPLE DATA ELEMENT/CODE REFERENCES:

1270/FF

SOURCE

Integrated Material Management of Consumable Items,
DOD 4140.26M

AVAILABLE FROM

Defense Logistics Agency
DLA-XPD
Cameron Station
Alexandria, VA 22304-6100

ABSTRACT

This publication provides a comprehensive set of policy and procedures related to consumable material management within the Department of Defense, including a complete list of all related logistics management codes.

194 Uniform Source, Maintenance and Recoverability Codes

SIMPLE DATA ELEMENT/CODE REFERENCES:

1270/FG

SOURCE

Packaging Requirement Codes, MIL-STD-2073-2

AVAILABLE FROM

Standardization Document Order Desk
Building 4D
700 Robbins Avenue
Philadelphia, PA 19111-5094

ABSTRACT

MIL-STD-2073-2C establishes and defines codes used in describing packaging material and techniques specified in Department of Defense contracts.

Data Element 1270

Code JF

Reference MIL-STD-2073-2C, Table IX. Provides a comprehensive list of Department of Defense codes which identify the Level A packing requirements for an item.

ABSTRACT

Code JG

Reference MIL-STD-2073-2C, Table IX. Provides a Reference MIL-STD-2073-2C, Table IX. Provides a comprehensive list of Department of Defense codes which identify the Level B packing requirements for an item.

Code JH

Reference MIL-STD-2073-2C, Table IX. Provides a comprehensive list of Department of Defense codes which identify the Level C packing requirements for an item.

Code JI

Reference MIL-STD-2073-2C, Table VII. Provides a comprehensive list of Department of Defense codes which identify the intermediate container requirements for an item.

SOURCE

Disbursing and Fiscal Station Numbers Directory

AVAILABLE FROM

Defense Logistics Management Standards Office
ATTN: Acquisition PRC
6301 Little River Turnpike, Suite 210
Alexandria, VA 22312-3508

ABSTRACT

This publication includes coded identities of disbursing officers.

200 International Air Transport Association (IATA) Dangerous Goods Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

208/T

SOURCE

Dangerous Goods Regulations

AVAILABLE FROM

International Air Transport Association (IATA)
Publications Department
200 Peel Street
Montreal, Quebec, H3A 2R4
Canada

ABSTRACT

Air courier regulations for the shipping and acceptance handling of dangerous goods. Based on the International Civil Aviation Organization (ICAO) Technical Instructions for the Safe Transport of Dangerous Goods by Air.

202 United Nations Location Code (UNLOCODE)

SIMPLE DATA ELEMENT/CODE REFERENCES:

309/UN

SOURCE

UNECE LOCODE (Code for Ports and Other Locations)

AVAILABLE FROM

United Nations
 Economic Commission for Europe
 Secretariat
 Working Party on Facilitation of International Trade Procedures
 Palais Des Nations
 CH-1211 Geneva 10
 Switzerland

ABSTRACT

The UNLOCODE is an international location code.

204 DoD Material Procedures for Development and Application of Packaging Req'mts

SIMPLE DATA ELEMENT/CODE REFERENCES:

753/HM	1270/JA	1270/JB	1270/JC	1270/JD

SOURCE

Department of Defense Material Procedures for Development and Applications of Packaging Requirements (Part 1 of 2 Parts), MIL-STD-2073-1

AVAILABLE FROM

Standardization Document Order Desk
 Building 4D
 700 Robbins Avenue
 Philadelphia, PA 19111-5094

ABSTRACT

Data Element 1270

Code JA

Reference MIL-STD-2073. Provides a comprehensive list of Department of Defense codes which identify item physical characteristics.

Code JB

Reference MIL-STD-2073-1. Provides a comprehensive list of Department of Defense codes which identify item weight and Fragility characteristics.

Code JC

Reference MIL-STD-2073-1. Provides a comprehensive list of Department of Defense codes which identify the material needed to preserve an item.

Code JD

Reference MIL-STD-2073-1. Provides a comprehensive list of Department of Defense codes which identify the number of units to be contained in a package for an item.

ABSTRACT**Code JE**

Reference MIL-STD-2073-1. Provides a comprehensive list of Department of Defense codes which identify the preservation data requirements for an item.

Code JK

Reference MIL-STD-2073-1. Provides a comprehensive list of Department of Defense codes which identify the number of units to be packed within each intermediate container for an item.

Code JL

Reference MIL-STD-22073-1. Provides a comprehensive list of Department of Defense codes which identify the special marking requirements for an item.

206 Government Bill of Lading Office Code

559/MI

SOURCE

An ABCD Convention for Electronic Data Interchange

AVAILABLE FROM

ABCD-The Microcomputer Industry Association
7903 Mt. Woodley Place
Alexandria, VA 22306

ABSTRACT

An ABCD Convention for Electronic Data Interchange is the microcomputer industry convention for the electronic transfer of purchase order documents, an industry convention based on ASC X12.1 Purchase Order Transaction Set 850. ABCD represents microcomputer industry resellers, distributors, hardware manufacturers, and software publishers.

249 Aerospace Material Specification (AMS)**SIMPLE DATA ELEMENT/CODE REFERENCES:**

559/SA

SOURCE

Technical Report for Each AMS
(See The Aerospace Material Specifications Index)

AVAILABLE FROM

Customer Service
Society of Automotive Engineers, Inc.
400 Commonwealth Drive
Warrendale, PA 15096-0001

ABSTRACT

The AMS Index is a collection of all AMS technical reports available. Each AMS referenced in the AMS Index has its own technical report describing its specifications.

250 Unified Numbering System (UNS)**SIMPLE DATA ELEMENT/CODE REFERENCES:**

559/SA

SOURCE

Metals and Alloys in the Unified Numbering System (UNS)

AVAILABLE FROM

Customer Service
Society of Automotive Engineers, Inc.
400 Commonwealth Drive
Warrendale, PA 15096-0001

ABSTRACT

This fifth edition contains approximately 4,000 designations as well as descriptions and cross-reference specifications related to these designations. Included are cross-references by specifications to applicable UNS designations as well as an expanded reference list of some of the common trade designations (e.g. SAE, ANSI, ASTM, AMS, ASME).

251 American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/ME

SOURCE

ASME Boiler and Pressure Vessel Code
An American National Standard
Section II - Material Specifications
Part A - Ferrous Materials
Part B - Nonferrous Materials
Part C - Welding Rods, Electrodes and Filler Metals

AVAILABLE FROM

American Society of Mechanical Engineers
United Engineering Center
345 East 47th Street
New York, NY 10017

CD-ROM Format Available From:
Information Handling Service
P.O. Box 1154
15 Inverness Way East
Englewood, CO 80150

ABSTRACT

Contains material specifications for ferrous materials, nonferrous materials, welding rods, electrodes and filler metals.

252 Federal Specification

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/GS

SOURCE

Individual QQ Specification Published in Its Own Document
(See Department of Defense Index of Specifications and Standards (DODISS))

AVAILABLE FROM

Individual QQ Specifications Available From:
Navy Publication and Printing Service
700 Robbins Avenue
Philadelphia, PA 19111-5094

DODISS Available From:
Government Printing Office
Washington, D.C. 20402

ABSTRACT

DODISS is a collection of all specifications and standards. Each QQ specification referenced in the DODISS has its own publication describing its specifications.

253 Military Specification

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/DD

SOURCE

Individual Military Specification Published in Its Own Document
(See Department of Defense Index of Specifications and Standards (DODISS))

AVAILABLE FROM

Individual Military Specifications Available From:
Navy Publications and Printing Service
700 Robbins Avenue
Philadelphia, PA 19111-5094

DODISS Available From:

Government Printing Office
Washington, D.C. 20402

ABSTRACT

DODISS is a collection of all specifications and standards. Each Military specification referenced in the DODISS has its own publication describing its specifications.

254 British Standard (BS)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/IM

SOURCE

There is an Individual Document for Each British Standard (E.G. BS 1449: Part 2)

AVAILABLE FROM

British Standards Institution
2 Park Street
London W1A 2BS
England

ABSTRACT

Each British Standard has its own document describing its specification. (E.G. BS 1449 Part 2 contains specification for stainless and heat-resisting steel plate, sheet and strip).

255 American Welding Society (AWS)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/AW

SOURCE

The American Welding Society Catalog of Standards, Codes, and Recommended Practices

AVAILABLE FROM
American Welding Society
550 Northwest LeJeune Road
Miami, FL 33126

ABSTRACT
Contains specific information for each AWS specification.

256 Deutsches Institut für Normung (DIN)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/DI

SOURCE
Individual DIN Handbook for Each DIN Standard
(See Catalogue of English Translation of German Standards)

AVAILABLE FROM
American National Standards Institute
11 West 42nd Street
New York, NY 10036

ABSTRACT
The catalogue lists all currently available official English translations (about 4,580) of Deutsches Institut für Normung (DIN) standards. Each DIN handbook contains specifications for a DIN standard.

257 Japanese Industrial Standard (JIS)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/JA

SOURCE
Individual Publications for each JIS specification

AVAILABLE FROM
American National Standards Institute
11 West 42nd Street
New York, NY 10036

ABSTRACT
Each publication contains information about one JIS specification.

260 Food and Drug Administration Therapeutic Equivalence Evaluation Codes

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/DA

SOURCE
Approved Drug Products with Therapeutic Equivalence Evaluations
11th Edition, 1991 (orange book)

AVAILABLE FROM
Government Printing Office
Superintendent of Documents
Washington, D.C. 20402-9371

ABSTRACT
This publication identifies currently marketed drug products approved on the basis of safety and effectiveness, along with therapeutic equivalence determinations for multisource products. States use the therapeutic equivalence evaluations to determine whether to add a product to its formulary of substitutable drug products in order to contain drug costs.

261 American Petroleum Institute (API)

SIMPLE DATA ELEMENT/CODE REFERENCES:

SOURCE
AVNET Implementation Guide
REGS Implementation Guide

AVAILABLE FROM
Order Desk
Publication Office
The American Petroleum Institute
1220 L Street, N.W.
Washington, DC 20005

ABSTRACT
These codes describe refined petroleum products.

262 Society of Automotive Engineers (SAE)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/SA

SOURCE
SAE Handbook (Four Volumes with the Same Index at the Beginning of Each Volume)

I Materials
II Parts and Components
III Engines, Fuels, Emissions, and Noise
IV On-Highway Vehicles and Off-Highway Machinery

AVAILABLE FROM
Customer Service
Society of Automotive Engineers, Inc.
400 Commonwealth Drive
Warrendale, PA 15096-0001

ABSTRACT
The SAE Handbook contains Ground Vehicle Standards.

263 National Association of Corrosion Engineers (NACE)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/CX

SOURCE

The NACE Book of Standards (Two Volumes)
I Recommended Practices
II Test Methods and Material Requirements

AVAILABLE FROM

National Association of Corrosion Engineers (NACE)
P.O. 218340
Houston, TX 77218

ABSTRACT

The Recommended Practices volume contains information on how to prevent different types of corrosion. The Test Methods and Material Requirements volume contains the test specifications of materials and coatings to verify these meet the anti-corrosion specifications.

264 Escrow Status

SIMPLE DATA ELEMENT/CODE REFERENCES:

750/EC

SOURCE

Escrow Code List

AVAILABLE FROM

Data Interchange Standards Association (DISA)
Suite 200
1800 Diagonal Road
Alexandria, VA 22314

ABSTRACT

Codes identifying the escrow status of a mortgage loan.

265 Health Care Financing Administration National Standard Format Podiatry Codes

SIMPLE DATA ELEMENT/CODE REFERENCES:

235/A9 1270/BL 1270/BM

SOURCE

Electronic Media Claims National Standard Format

AVAILABLE FROM

Health Care Financing Administration
Bureau of Programs Operations OPOP, DCPR
Chief, Electronic Claims Processing Branch
G-D-7 Meadows East Building
6325 Security Boulevard
Baltimore, MD 21207

ABSTRACT

A variety of codes describing Podiatry Class Findings and systemic conditions.

266 Type and Cause Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

1270/JM 1280/JM

SOURCE

Reporting of Transportation Discrepancies in Shipments Army Regulation 55-38, NAVSUP Instruction 4610.33C, Air Force Regulation 75-18, Marine Corps Order P4610.19D, Defense Logistics Agency Regulation 4500.15.)

AVAILABLE FROM

Defense Logistics Management Standards Offices
6301 Little River Turnpike
Suite 210
Alexandria, VA 22312-3508

ABSTRACT

This publication provides a comprehensive set of policy and procedures regarding the reporting of transportation discrepancies in shipments.

269 Contractor Establishment Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

128/ZF

SOURCE

Contractor Establishment Code (CEC) Listing

AVAILABLE FROM

Federal Procurement Data Center
Room 5652
7th and D Streets, S.W.
Washington, DC 20407

ABSTRACT

Publication is an alphabetic code listing of government contractors and their CEC number.

270 Military Ordnance Security Risk Number

SIMPLE DATA ELEMENT/CODE REFERENCES:

128/M6

SOURCE

Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives (DoD 5100.76-M Change 3 - Reprint November 1987)

AVAILABLE FROM

National Technical Service
5285 Port Royal Road
Springfield, VA 22161

ABSTRACT

This manual prescribes standards and procedures regarding the physical security of sensitive conventional arms, ammunition, and explosives in the custody of the Department of Defense.

276 Test Results Code

SIMPLE DATA ELEMENT/CODE REFERENCES:

ABSTRACT

Code lists maintained by DISA for use by the insurance industry in processing EDI transactions.

280 MIB Company Codes**SIMPLE DATA ELEMENT/CODE REFERENCES:**

66/MB

SOURCE

MIB Company Code Lists

AVAILABLE FROM

MIB, Inc.
160 University Avenue
Westwood, MA 02090

ABSTRACT

List contains company codes used by life insurance companies and medical labs to track test results and medical history of applicants.

282 Federal Jurisdiction**SIMPLE DATA ELEMENT/CODE REFERENCES:**

66/FJ

SOURCE

Federal Jurisdiction List

AVAILABLE FROM

International Association of Industrial Accident Boards & Commissions
1575 Aviation Center Parkway, Suite 512
Daytona Beach, FL 32114

ABSTRACT

A list of jurisdictions, created by federal statute, under which workers compensation claims are processed.

287 American Industrial Hygiene Association (AIHA)**SIMPLE DATA ELEMENT/CODE REFERENCES:**

559/AH

SOURCE

Workplace Environmental Exposure Level Guides (WEELs)

AVAILABLE FROM

American Industrial Hygiene Association
Attn: Publications
P.O. Box 901010
Cleveland, OH 44190

ABSTRACT

The completed WEEL guides summarize the available toxicology and human experience information on levels of exposures to certain chemical agents. Tables include the time-weighted and ceiling values for each agent.

288 Environment and Safety Data Exchange (ESDX)

SIMPLE DATA ELEMENT/CODE REFERENCES:

559/ES

SOURCE

Environment and Safety Data Format Guidelines

AVAILABLE FROM

Environment and Safety Data Exchange
Attn: Publications
P.O. Box 591
Palo Alto, CA 94302-0591

ABSTRACT

A guide to cross-industry data formats for exchanging environmental and safety data across regulatory jurisdictions and industry boundaries. Concise, aligned code table values for managing environmental and hazardous material regulatory information in computer databases. ESDX develops and maintains only those code table values that, for whatever reason, are either missing from, or are ambiguously stated in, published code tables from other private code reference sources or government agencies.

University Student Information System (USIS) Field of Study Classification

AVAILABLE FROM

Postsecondary Education Section
Education, Culture and Tourism Division
Statistics Canada
Ottawa K1A OT6
Canada

ABSTRACT

This document gives the coding structure and classification used by postsecondary educational institutions in Canada to report a student's major field of study or specialization to the Statistics Canada governmental agency. The format of the classification is N.NN.NN where N represents an integer. The integer before the first "." indicates the major classification and the remaining integers show a further breakdown within the broad category.

SOURCE

University Student Information System (USIS) Institution Codes

AVAILABLE FROM

Postsecondary Education Section
Education, Culture and Tourism Division
Statistics Canada
Ottawa K1A OT6
Canada

ABSTRACT

This document gives the coding structure and classification used for postsecondary educational institutions in Canada. This document gives a code for each postsecondary institution that reports data on students to the Statistics Canada governmental agency.

The format of the classification is NN NN NN where the first two digits identifies the province in which the institution is located, the second set of two digits identifies an institution complex and the third set of two digits identifies registration centres and facility centres within the complex.

SOURCE

National Association of Boards of Pharmacy Database and Listings

AVAILABLE FROM

National Council for Prescription Drug Programs
4201 North 24th Street, Suite 365
Phoenix, AZ 85016

ABSTRACT

A unique number assigned in the U.S. and its territories to individual clinic, hospital, chain, and independent pharmacy locations that conduct business at retail by billing third-party drug benefit payers. The National Council for Prescription Drug Programs (NCPDP) maintains this database under contract from the National Association of Boards of Pharmacy. The National Association of Boards of Pharmacy is a seven-digit numeric number with the following format SSNNNNNC, where SS=NCPDP assigned state code number, NNNN=NCPDP assigned pharmacy location number, and C=check digit calculated by algorithm from previous six digits.

SIMPLE DATA ELEMENT/CODE REFERENCES:

235/WC

SOURCE

Common Industry Material Identification Standard

AVAILABLE FROM

Petroleum Industry Data Exchange
American Petroleum Institute
1220 L Street, NW
Washington, DC 20005

ABSTRACT

The "World Code" is a universal part number derived from the Common Industry Material Identification Standard (CIMIS). Trading partners in the petroleum and construction industries are facilitating the creation, maintenance and distribution of a standard methodology and set of tools, known as CIMIS, to enable companies to globally exchange business information through the utilization of common material descriptions and codes. The "World Codes" generated universally identify products, eliminating the need for manufacturers, suppliers, and customers to cross reference from one company's part number to another.

ABSTRACT

Mandatory accounting rules and forms and arbitration rules and procedures for members of the Association of American Railroads.

APPENDIX 10H

DOD LOGISTICS QUALIFIER CODES

This appendix consists of the following:

1. DoD Logistics Qualifier Code Dictionary/Directory (Qualifier Code Sequence):

A Dictionary/Directory containing all logistics qualifier code values for use with the LM/LQ loop(s) in qualifier code sequence. An asterisk (*) identifies new codes which have not been formally approved through the ANSI ASC X12 review process. The Dictionary/Directory is also available via on-line access to DoD LOGDRMS. See chapter 10, subsection 10.2.7 and appendix 10F, of this volume, for specific information regarding DoD LOGDRMS.

2. Alphabetic Index (DoD Logistics Qualifier Code Dictionary/Directory):

This portion of the Dictionary/Directory is in name sequence (ascending order alphabetically).

3. Qualifier Code Sequence Index (DoD Logistics Qualifier Code Dictionary/Directory):

This portion of the Dictionary/Directory is in code sequence (numeric codes followed by alpha codes).

4. Index of Abbreviations (DoD Logistics Qualifier Code Dictionary/Directory).

5. Key-Word Index (DoD Logistics Qualifier Code Dictionary/Directory).

CODE

EXPLANATION

- 1 HIGHEST SENSITIVITY, CATEGORY I: ARMS, AMMUNITION, AND EXPLOSIVES. ITEMS WITH THIS CODE ARE NOT CLASSIFIED. A. ARMS NONNUCLEAR MANPORTABLE MISSILES IN A READY TO FIRE CONFIGURATION (E.G., REDEYE, STINGER, DRAGON, JAVELIN, LIGHT ANTI-TANK WEAPON (LAW)) (66MM). SHOULDER-LAUNCHED MULTIPURPOSE ASSAULT WEAPON (SMAW). ROCKET (83MM). MT136 (AT4) ANTIARMOR LAUNCHER AND CARTRIDGE (84MM). THOUGH NOT IN A READY TO FIRE CONFIGURATION, ARE STORED OR TRANSPORTED TOGETHER.
- 2 HIGH SENSITIVITY, CATEGORY II: ARMS, AMMUNITION, AND EXPLOSIVES. ITEMS WITH THIS CODE ARE NOT CLASSIFIED. A. ARMS: LIGHT AUTOMATIC WEAPONS UP TO AND INCLUDING .50 CALIBER AND 40MM MK 19 MACHINE GUNS. B. AMMUNITION: (1) GRENADES (HAND OR RIFLE); HIGH EXPLOSIVE AND WHITE PHOSPHORUS. (2) MINES: ANTI-TANK OR LESS EACH). (3) WARHEADS: HIGH EXPLOSIVE ROUNDS FOR MISSILES OR ROCKETS OTHER THAN CATEGORY I (UNPACKED WEIGHT OF 50 POUNDS OR LESS EACH). (4) EXPLOSIVES: USED IN DEMOLITION OPERATIONS (E.G., C-4, DYNAMITE, AND TNT WITH UNPACKED WEIGHT OF 100 POUNDS OR LESS). (5) THE BINARY INTERMEDIATES "BF" AND "QL" WHEN STORED SEPARATELY FROM EACH OTHER AND FROM THE BINARY CHEMICAL MUNITION BODIES IN WHICH THEY ARE INTENDED TO BE EMPLOYED (SEE DOD DIRECTIVE 5210.65) FOR SECURITY REQUIREMENTS FOR OTHER CHEMICAL AGENTS).
- 3 MODERATE SENSITIVITY, CATEGORY III: ARMS, AMMUNITION AND EXPLOSIVES. ITEMS WITH THIS CODE ARE NOT CLASSIFIED. A. ARMS: (1) LAUNCH TUBE AND GRIPSTOCK FOR STINGER MISSILE. (2) LAUNCH TUBE, SIGHT ASSEMBLY, AND GRIPSTOCK FOR REDEYE MISSILES. (3) TRACKER FOR DRAGON MISSILES. (4) MORTAR TUBES UP TO AND INCLUDING 81MM. (5) GRENADES LAUNCHERS. (6) ROCKET AND MISSILE LAUNCHERS (UNPACKED WEIGHT OF 100 POUNDS OR LESS). (7) FLAME THROWERS. (8) LAUNCHER OR MISSILE GUIDANCE SET OR OPTICAL SIGHT FOR THE TUBE-LAUNCHED OPTICALLY TRACKED WEAPON (TOW) AND QUALIFIER CODE: *3

CODE

EXPLANATION

HYDRA-70. B. AMMUNITION: (1) AMMUNITION, 50 CALIBER AND LARGER, WITH EXPLOSIVE FILLED PROJECTILE (UNPACKED WEIGHT OF 100 POUNDS OR LESS EACH). (2) GRENADES, (INCENDIARY) AND FUSES FOR HIGH EXPLOSIVE GRENADES. C. EXPLOSIVES: (1) BLASTING CAPS. (2) SUPPLEMENTARY CHARGES. (3) BULK EXPLOSIVES. (4) DETONATING CORD. (5) WARHEADS FOR SENSITIVE MISSILES AND ROCKETS WEIGHING MORE THAN 50 POUNDS BUT LESS THAN 100 POUNDS EACH.

4

LOW SENSITIVITY, CATEGORY IV: ARMS, AMMUNITION, AND EXPLOSIVES. ITEMS WITH THIS CODE ARE NOT CLASSIFIED. A. ARMS: (1) SHOULDER FIRED WEAPONS (OTHER THAN GRENADE LAUNCHERS), NOT FULLY AUTOMATIC. (2) HANDGUNS. (3) RECOILLESS RIFLES UP TO AND INCLUDING 106MM. B. AMMUNITION: (1) AMMUNITION WITH NONEXPLOSIVE PROJECTILE (UNPACKED WEIGHT OF 100 POUNDS OR LESS EACH). (2) AMMUNITION FOR ARMS IN CATEGORIES II, III, OR IV AND NOT OTHERWISE LISTED. (3) FUSES OTHER THAN FOR HIGH EXPLOSIVE GRENADES. (4) GRENADES (ILLUMINATION, SMOKE AND RIOT CONTROL AGENT FOR TEARGAS (CS)). C. CHEMICAL ITEMS: (1) INCENDIARY DESTROYERS. (2) RIOT CONTROL AGENTS (100 POUND PACKAGES OR LESS. (3) EXPLOSIVE COMPOUNDS OF SENSITIVE MISSILES AND ROCKETS (EXCEPT WARHEADS). (4) WARHEADS FOR PRECISION GUIDED MUNITIONS (PGM) WEIGHING MORE THAN 50 POUNDS (UNPACKED WEIGHT). (5) AMMUNITION FOR WEAPONS IN CATEGORIES II, III, OR IV AND NOT OTHERWISE CATEGORIZED.

5

HIGHEST SENSITIVITY, CATEGORY I: ARMS, AMMUNITION, AND EXPLOSIVES WITH A SECURITY CLASSIFICATION OF SECRET.

6

HIGHEST SENSITIVITY, CATEGORY I: ARMS, AMMUNITION, AND EXPLOSIVES WITH A SECURITY CLASSIFICATION OF CONFIDENTIAL.

8

HIGH SENSITIVITY, CATEGORY II: ARMS, AMMUNITION, AND EXPLOSIVES WITH A SECURITY CLASSIFICATION OF CONFIDENTIAL.

C

MATERIEL CLASSIFIED AS "CONFIDENTIAL," BUT WHICH DOES NOT MEET CODE 6 OR 8 CRITERIA.

NAME: DOCUMENT IDENTIFICATION CODE

ALIAS: LOGISTICS DOCUMENT IDENTIFIER CODE

DEFINITION: A MEANS OF IDENTIFYING TRANSACTIONS IN THE DEFENSE LOGISTICS STANDARD SYSTEMS (DLSS) THAT REFLECT AN INTERCHANGE OF DATA. THE EFFECT THAT THE INTERCHANGE HAS UPON OTHER RECORDS, FILES, DATA BASES, ETC., AND/OR THE SPECIFIC RELATIONSHIP OF VARIOUS TRANSACTIONS TO EACH OTHER.

SOURCE: DEFENSE LOGISTICS MANAGEMENT SYSTEM (DLMS)

AVAILABLE FROM:
ATTN: DLMSSO
DEFENSE LOGISTICS MANAGEMENT STANDARDS OFFICE
DEFENSE LOGISTICS AGENCY
8725 JOHN J KINGMAN ROAD SUITE 2533
FT BELVOIR VA 22060-6221

ABSTRACT: THIS PUBLICATION PROVIDES A COMPREHENSIVE SET OF POLICY AND PROCEDURES AS WELL AS A COMPREHENSIVE LIST OF DOCUMENT IDENTIFIER CODES AFFECTING ALL ASPECTS OF LOGISTICS TRANSACTION INTERFACE REQUIREMENTS.

DATA CODE CHARACTERISTICS--- TYPE: D MIN: 003 MAX: 003
